OF the thick, smooth, heavy-boned kind. Fall and spring boars and gilts sired by Dale Expansion 190135. Also choice sows bred to him for fall litters. Address
F. E. JACKSON, HURLEY, SOUTH DAKOTA.

12 HIGH-CLASS POLAND CHINA FALL BOARS

I AM offering 12 strictly choice fall boars sired by the great 950-lb. boar, **Pawnee Nelson,** that is regarded as one of the greatest living Poland China boars. These are out of 600 and 700-lb. sows. Price $40 to $50 for quick sale. Address, mentioning The Homestead, **A. H. Windom, Nodaway, Iowa.**

Purchase Percherons

There is a fundamental reason why the breeding of draft horses will continue profitable.

From 1900 to 1910 the population of the United States increased 21%. Horses increased only 8%. Cattle decreased 8%, hogs 7%, sheep 14%.

This means increased tilled acreage and increased demand for horse power.

For full information address Wayne Dinsmore, Sec'y, Percheron Society of America, Union Stock Yards, Chicago, Illinois.

CHESTER WHITE herd boars and bred sows for sale. One boar is out of grand champion sow Iowa State Fair, 1912, and sows are bred to him. Address G. H. Tutt, Marathon, Iowa.

Red Poll Bulls Including present herd bull. Call or address
F. W. Haning. **Truman, Minnesota.**

Sale of Sunny Slope SHORT-HORNS

Aledo, Illinois

WEDNESDAY, JUNE 4

40 HEAD---10 BULLS

ARE cataloged for this, the first annual sale from Sunny Slope herd. Over one-half of the offering is of the best Scotch breeding and the balance represents popular American families topped out by strong Scotch sires. Ten outstanding young bulls by my herd bull, Challenger, are listed, among them both show and breeding prospects, I will offer several heifers by Challenger, good enough to win in any company. Among the breeding cows cataloged are representatives of the Rosemary, Queen of Beauty, Lustre, Acanthus, Miss Ramsden and Victoria tribes, and everything of breeding age will either have calf at foot by Challenger or Roan Goods, a grandson of Choice Goods, or be safe in calf to one of these bulls. The cattle in this sale will please you, as they are the reliable kind. Write for catalog, mentioning The Homestead.

JOHN M. BAY, ALEDO, ILL.

Cols. Carey M. Jones, Boultinghouse and Decker, Auctioneers. Sale in town. This sale follows that of Thos. Stanton, Wheaton, Ill., June 3. Aledo can be reached by the Burlington railroad and also by Rock Island Southern electric line from Galesburg, Monmouth and Rock Island.

NEW BELGIANS and PERCHERONS

I HAVE just returned from Belgium and France, where I was able to make early selections of some of the best obtainable stallions and mares of both breeds.

MY SPRING IMPORTATION, now to be seen in my barns, includes a lot of handsome gray two-year-old Percheron stallions and mares with size and quality and some of the toppiest two-year-old Belgian stallions and best Belgian mares that could be purchased, among them a pair of prize winners at the big Belgian shows. Come and see my horses. Forty head to select from. For quick sales I will make below competition. Will meet train or car if notified.

CHARLES IRVINE, IRVINEDALE FARM, ANKENY, IOWA.

POLAND CHINA SWINE.

J. O. JAMES' SENSATIONAL PIG BARGAINS

I WILL book orders up to 100 head of spring pigs sired by my half-ton, **Big Orange, Ott's Big Orange,** who weighed 700 pounds on the scales just turned 19 months. **Big Sensation, Big Orange's King, A Wonder Giant** and **Gritters' Best.** All strictly big-type boars and out of extra big, long, heavy-boned matchless sows, many of them weighing from 700 to 800 pounds. These sows averaged 9½ pigs to the sow, many of them 10 to 13 pigs. I want you to write, describing just what you want. It makes it easier to pick the pig that will suit. I am pricing these pigs low for quick sale for June delivery, or at weaning time, for orders booked during May, or while they last, **$25** to **$35.** Must be bought during this month to get this price on them. Many of these pigs will be worth $100 to $150 by October. You can save from $75 to $100 by buying now. The early buyer catches the bargains. The dams of these pigs are sired by Big Orange, Big Sensation, Pawnee Nelson, Long King's Equal, Big Ex and Longfellow Jr. You can't beat sires, dams, pigs or prices. We guarantee our pigs to be as represented. Let me hear from you at once as orders are coming fast. Mention Homestead when writing. **J. O. James, Braddyville, Iowa.**

W. H. COOPER, LIVE STOCK AUCTIONEER

BIG BONE 2d 161497.

WE maintain one of America's greatest herds of strictly big-type Polands with big-type blood lines. We have in connection with it, one of the most complete plants for the business known. Twenty sows in our herd average over 650 pounds each including several yearlings.

50 HEAD OF BRED SOWS AVERAGED $65.00 in our February 4th sale, mostly gilts. We are booking orders now for June delivery, gilts and boars of this spring's farrow, at $20.00 and $25.00 each, out of these sows, which are of the biggest blood lines known, and sired by our big herd boars, including the great Big Expansion, weighing 800 pounds at two year old, and Big Bone 2d, and other boars of like breeding. Can furnish boars and gilts unrelated. Guarantee everything as represented or it may be returned and money refunded. Everything recorded free to purchaser. **W. H. COOPER, HEDRICK, IOWA.**

Home-bred draft stallions $250 to $650. Guarantee to sell you imported stallions for less money than any firm in America. Come to a live stallion market and see all draft breeds. A. LATIMER WILSON, Creston, Iowa.

Stooker's Stock Farm

OFFERING just now some very choice Percherons. A pair young stallions and a few mares. Write for full information. Address
F. A. STOOKER. - Dunbar, Nebraska.

FOR SALE Two extra heavy-boned, registered Shire stallion colts coming two and three years old. Price $300 and $400
C. M. KERR. CLERMONT, IOWA.

SHETLAND PONIES

STRICTLY choice lot of stock, best of breeding and attractive prices. C. S. Bratt, Arapahoe, Neb.

AN EXTRA LOT OF YOUNG CLYDESDALE

STALLIONS that I will sell at right prices. Address **R. O. MILLER, Route 1, Lucas, Ia.**

FOR SALE Ten head of Percheron stallions, mares and colts. Address **Ashbaugh Bros., Maynard, Iowa.**

PERCHERONS Imported and home-bred stallions and mares from $200 to $900 each. Address
H. REDENIUS, RUSHMORE, MINNESOTA.

HORSES AND JACKS.

TRUMANS' CHAMPION STUD

1878 As usual we have made in 1913 THREE IMPORTATIONS OF 1913 SHIRE and PERCHERON STALLIONS and MARES and have now on hand

78 IMPORTED DRAFT STALLIONS 78

Including 8 noted Wrydelands colts rising 3; 25 Imported GRAY and BLACK PERCHERON STALLIONS, the BEST we could buy in France; 40 IMPORTED SHIRE STALLIONS 3 to 6 years old, including the champions, first, second and third prize winners at International, Illinois, Iowa, Minnesota and Wisconsin State Fairs of 1912; the GOLD MEDAL INTERNATIONAL WINNING ROAN BELGIAN stallion 3 years old, we think the best Belgian colt in America; a few Hackney Stallions and 35 Imported Shire and Percheron Mares.

NO CULLS, ALL FRESH, HIGH-CLASS IMPORTED HORSES

TRUMANS' PIONEER STUD FARM, BUSHNELL, ILLINOIS.

FRANK IAMS

IS RETIRING FROM "HORSE BUSINESS"

CLOSING OUT All his Show and Business Stallions at..... REDUCED PRICES

Iams is making a "clean up" of his horses. All will be sold at "some price." He has his "Paris Winners and Best Stallions" in his barns. Prize Winners, $1,000.00 and $1,200, some higher. His 1913 "show" stallions must be sold in 30 days.

Iams is making **prices $200 to $500 "less than formerly"** on **each stallion** to make a **"Quick Clean Up"** (In next 30 days)

Paris Prize Winners at Cost in France

Buy a **ticket** to **"Iams town"** and **take advantage** of Iams' **"Reduced Prices."** Never were such choice **"Big Prize Winners"** offered at **such "Big Bargains"—all must be sold.** They are **"Model Drafters."** Iams' **"Old Customers"** make his **"Best advertisers."** His **"Percheron Stallions"** are the **very best he ever imported.** They are of **"Big Size," large bone, model, smooth "Drafters"** of **quality,** fine **form, finish and style, fast movers.** Among them are several

"PRIZE WINNERS AT PARIS"

NOGENT-le-ROTROU and **CHARTRESS** (three largest shows of France). They are all fully acclimated and in the **"Pink of Condition." They were bought to sell. All must be sold at some price.** I know **France** and **leading breeders there. I speak** the **languages** and **know how to "Buy Horses"** at **"Big Bargains,"** and I **divide "The Bargains"** with **my customers. Iams has a choice collection of**

IMPORTED PERCHERON STALLIONS

3 to 6 years, "Registered and Inspected" by **Governments of France, weight 1,800 to 2,500 lbs. All "Branded," Approved, "Registered** and **Inspected"** by **Governments of France and U. S. and Certificates "Stamped" O. K. All inspected** by a **Nebraska Deputy State Veterinarian,** and **Certificates of "Health and Soundness"** are **given** with **each Horse.** Iams sells

IMPORTED WINNERS at $1,000 and $1,400

(few higher.) **Terms cash,** or **one year's time** at **8 per cent bankable note, one and two years' time Land Security** at **6 per cent; $100 less price for cash than time. Iams pays freight and buyer's fares, gives 60 per cent breeding guarantee;** can place **$1,500 insurance. Iams backs up** his **ads** with a **$500 guarantee** that you **find the Horse as represented. Write for Horse Catalog. It has a $1,000 "Bargain" on each page.**

BREEDERS and IMPORTERS

PERCHERON AND SHIRE STALLIONS AND MARES

We have some of the very best stallions and mares that have crossed the water and we are making special prices for next thirty days. Come and see us at once.

MAASDAM & WHEELER

FAIRFIELD, IOWA

PERCHERONS

10 Head of Extra Large Imported 3 Year Olds.

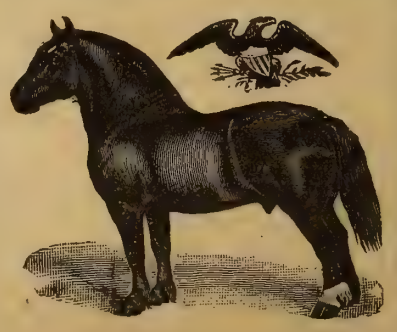
12 Head Large, Strong, Home-bred 3 Year Olds, Blacks and Dark Grays Still on Hand and for Sale This Spring at Reasonable Prices.

MARES AND YOUNG STOCK FOR SALE AT ALL TIMES

Special Sale of Percheron and Belgian Stallions

For Next Thirty Days

New importations arriving! Two large importations received since January 15th. Another importation of stallions and mares now on the water. More arrived in April. We have at any time of the year more BIG-TON, HIGH-CLASS PERCHERON and BELGIAN stallions than any other firm in the United States.



HOLBERT HORSE IMPORTING CO

A. B. HOLBERT, Prop. GREELEY, IOWA

FAIRVIEW STOCK FARM

PERCHERONS, BELGIANS, SHIRES, MAMMOTH JACKS and JENNETS

SOME extra good home-bred stallions. Percherons and Shires, pasture raised and in splendid thrift. The sort to do a lot of hard service. A few extra high-class big jacks 3 to 5 years old and 30 jennets, all ages. Democratic prices on this stock for next 30 days. Want to close them out. Address, mentioning The Homestead,

HENRY BECK, - - LITCHFIELD, NEB.

Oaklawn Stock Farm

Breeds and Imports Percheron, Belgian and Shire Stallions and Mares.

NEW **Importation Arrived April 23d,** and are now ready for inspection. If you want the kind good enough to win at the state fairs at rock bottom prices see what I have before you buy. Stallions and mares of all breeds in the last importation. When writing mention The Homestead.

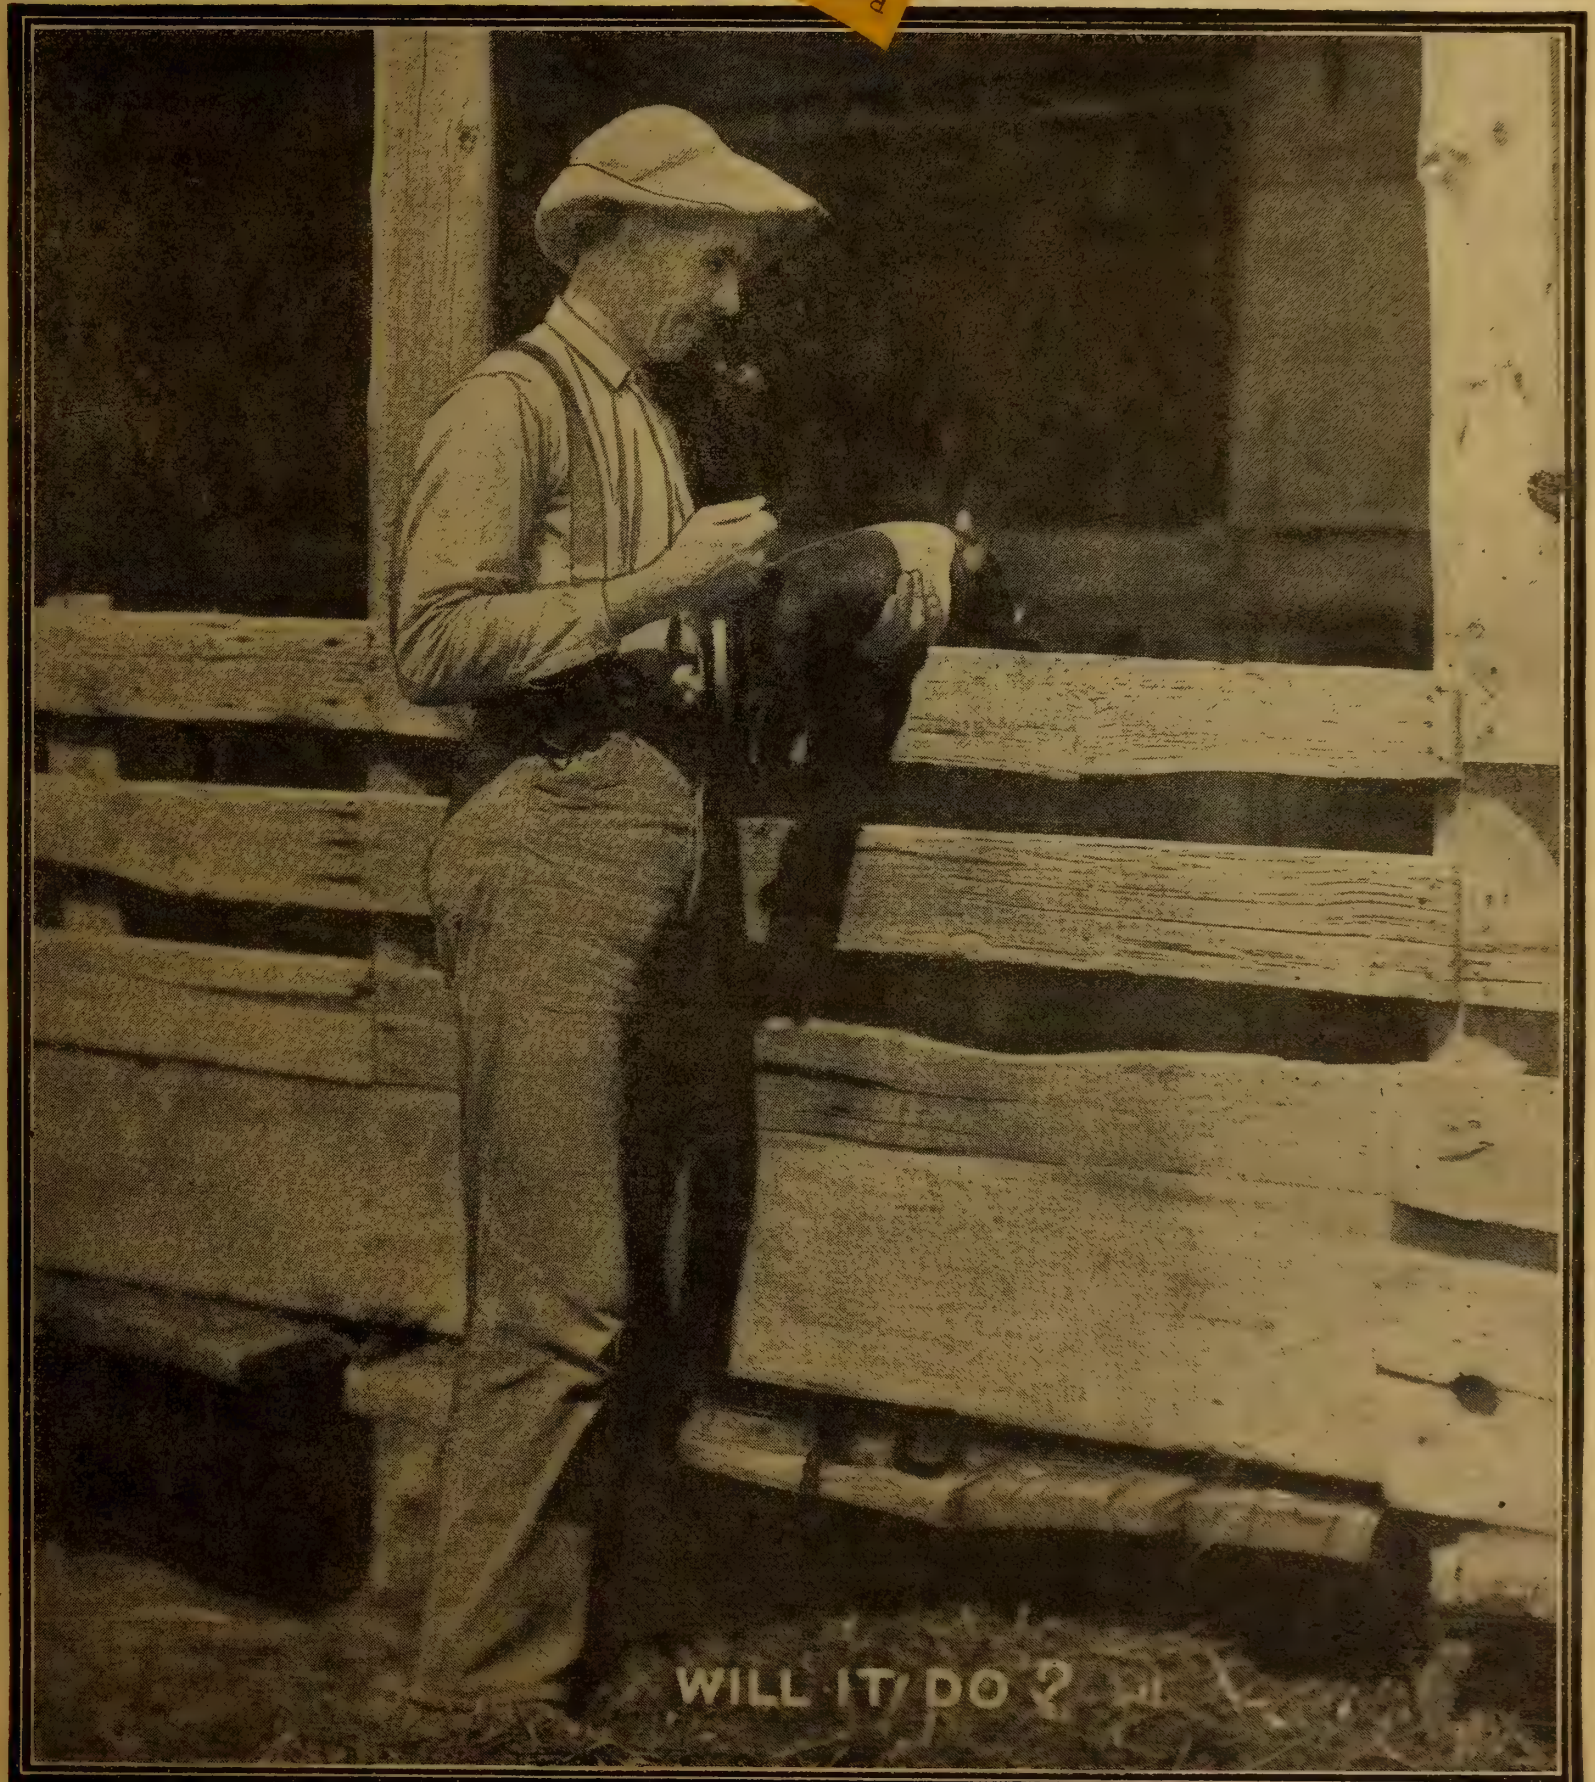
VOL. LVIII. NO. 22 DES MOINES. 29, 1913. WHOLE NO. 2903



It Saves the Farmer's Thresh Bill!

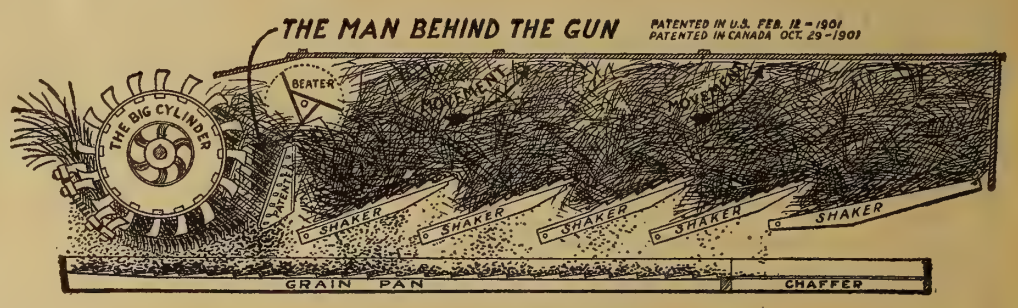
The wastage of grain by the average Threshing Machine is far more than many suppose. The Operator usually knows it, but he can't help it with that kind of Machine, so he covers it up all he can and lets it go at that. The Farmer suspects it, but thinks he has to put up with it, and much of his hard-earned money goes over into the straw stack.

This great wastage is the result of employing an incompetent type of Threshing Machine that rushes the straw to the stack, **but does not beat the grain out of it.**

THE RED RIVER SPECIAL WORKS ON AN ENTIRELY DIFFERENT PRINCIPLE OF SEPARATION from any other make of Threshing Machine. It **beats it out** while other makes hurry the straw to the stack and expect the grain to fall out, which it does not do.

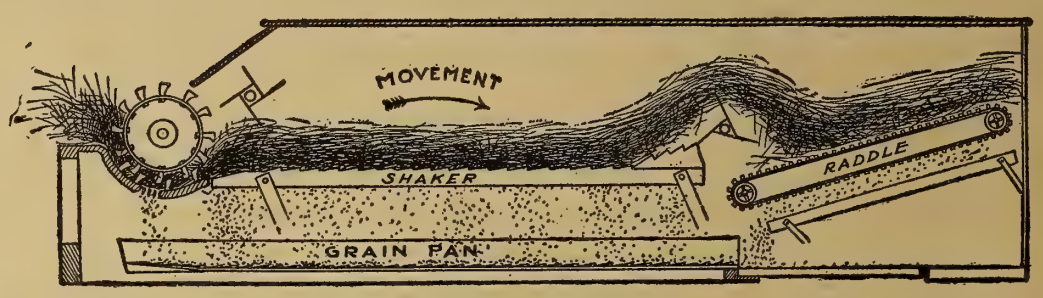
Note carefully the following illustrations:

This is the way to Separate by hand with a pitchfork



This is the way the **RED RIVER SPECIAL** *Separates*
IT BEATS IT OUT—*like you do with the pitchfork*

This is the way the Lazy Man tries to Separate with a pitchfork



This is the way **OTHER KINDS** *try to separate*
THEY DON'T BEAT OUT THE GRAIN

The Red River Special is the only Threshing Machine that uses the **true and sure method of separation by beating the grain out of the straw** just as you would do with a pitchfork.

The Big Cylinder, the Man Behind the Gun, with the **Patent Grate** and **Check Plate,** and the Uplifting Shakers that toss the straw up and **beat it as you would do with a pitchfork** save the grain that others waste, whether it be wheat, oats, rye, barley, flax, peas, rice, alfalfa, timothy or other grains or seeds.

WE HAVE THOUSANDS OF TESTIMONY LIKE THE FOLLOWING:

Joseph Rinkenberger, H. J. Meyer, Godfrey Ginzel and sixteen other farmers of Gridley, Ill., say: "We know from experience that your Red River Special Separator, when properly managed, will save enough extra grain that other machines waste to pay our thresh bills each year just as you advertise." The Girard Threshing Company, consisting of R. H. Syth, James McConnell, Louis Deceker, Ira Allen, Will Syth, Oscar Kippenham and A. Redmond, of Girard, Mont., with our 25 H. Double Cylinder Engine and 40x60 Red River Special Separator, say: "The whole rig has given entire satisfaction; steams easily, pulls well, and the Red River Special does all that is claimed for it in threshing fast and saving the grain." H. W. Herren and H. E. Smith, of Hastings, Nebr., say: "The new 36 x 56 Red River Special Separator bought of you last July does fine work in any kind of grain; is a good cleaner and a very fast thresher. We have operated two or three other makes of machines, but your Red River Special just beats them all." Mr. M. Spangenberger, of Elgin, N. Dak., says: "Anybody who has worked with your new Red River Special will think a long time before he will buy any other make of machine, for it will save all the grain from the straw pile and cannot be equalled for fast and clean flax threshing." The Weiand Thresher Company, of Glen Ullin, N. Dak., says: "Your Red River Special Separator is the best we have ever run and we have done threshing for the last ten years. It surely does save the farmer's thresh bill and does all you claim for it. We thought we had used good separators before and felt satisfied with their work, but since we have run the Red River Special we have just learned to know what a good machine is." Peter Junk, L. Bunmeister, W. H. Rankin, W. H. Robinson, G. F. Thompson, Mat Mertz and ten other farmers of Downs, Osborne Co., Kans., say: "We had our threshing done this year by your Red River Special Separator owned by C. E. Brake, and are entirely satisfied with it, and believe it saved enough grain that other machines would have wasted to pay our several thresh bills." Wm. Bronner, Peter Hanson, Ed. Brandle, M. I. Grass, Geo. Price, all farmers of Andover, S. Dak., say: "Your Red River Special run by Wm. Roth threshed our grain this year and did a very fast and clean job in threshing, taking all the grain out of the head, separating it from the straw, cleaning it perfectly and saving all the grain." Mr. Claus Anderson, of Wilmar, Minn., says: "Your Red River Special Separator that you sold Peter Erickson this year has threshed for me, and I am well pleased because it cleans well, threshes all the grain from the head, runs right along from morning until night as steady as you could wish, and more than all that, it saved all my grain."

Write us, or any of our customers, or call on our Branch House or Dealer for proof that **It Saves the Farmer's Thresh Bill.**

LIVE STOCK AND CROP ROTATION

Business Ability and a Capacity to Put Through a Correct System of Crop Rotation Bring Profitable Returns and Add to the Value of the Farm.

NINETY bushels of corn to the acre, thirty bushels or better of wheat, and 275-pound hogs at ten months old, look like good farming in the face of the average yield per acre of 27.1 bushels of corn and 15.5 bushels of wheat. The latter figures are given by government statistics and refer to the average yield of the entire country. The former records refer to the product of Elmland Farm, owned by H. B. Wilkinson & Bros., Mitchellville, Iowa, from which were obtained the accompanying illustrations. While Elmland is a good farm, it is no better than many thousands of others that lie in the broad Mississippi valley. The striking difference of yield is due to men and methods, and not to any favored natural fertility of soil. It illustrates the difference between the mere existence gained by the heedless soil robber and gainful accumulations of the thoughtful, discerning farmer. The cost of production may be considered practically the same. Elmland is a farm in which the productive capacity each year grows greater. It is not only a farm, but a factory which turns the raw products of its acres—its grains and grasses—into finished, marketable goods—cattle, horses and hogs. And the goods are of a sort which are of good repute in the marts to which go the buyers who look for the best. The animal equipment includes Shire horses, Aberdeen Angus cattle and Poland China hogs. The great, drafty Shires are largely pure-bred and recorded animals, and a number of them imported directly from England. Imported stallions are kept in service on the farm. The best of the pure breds are sold for breeding purposes. The less desirable ones and the grades are eagerly sought for by eastern buyers, and always taken at satisfactory figures. A confidence in the advantage of the pure bred over the grade as a beef maker led to persistent use of recorded Aberdeen Angus bulls on the grades with which the farm was originally stocked until the present progeny carried all the appearances of the pure-bred animals. They, however, are being gradually replaced by the produce of the herd of recorded animals now maintained. While these cattle are not given any particular attention, they are in fact well cared for. Calves are dropped in the pasture, and both cows and calves are given feed enough to keep in good condition. With the exception of oil meal, which is given as a tonic only, all feed used is produced on the farm. Pasturage is a great element in carrying the cattle up to final fitting for market. Dry-lot feeding is practiced in putting on the finishing touches. Something of the quality of steers produced may be inferred from the fact that they have won honors at the International Live Stock Exposition, at Chicago, both in individual classes and in car-load divisions.

Poland China hogs were selected with the belief that in hardiness, easy adaptation to conditions, and early maturity they best filled all requirements The brood sows are all raised on the farm. New sires are obtained each year, and always pure-bred animals. Pigs are usually farrowed in April or May, and are gotten out on pasture as early as seems practical. They receive a light slop of shorts and tankage. A field of fifteen or twenty acres of corn is reserved, and as soon as it begins to harden the pigs are turned in to shift for themselves. They usually have it all cleaned up by early December, make an extraordinary gain, waste none of the corn, and require little attention. They are then turned after the fattening steers, given a little feed and are ready for market in a few weeks. The usual marketing age has been ten months, and the average weight at that time 275 pounds. From 300 to 400 hogs are raised each year.

The rotation of crops at Elmland covers a six or seven-year period. Three crops of corn are taken, then a crop of oats, and seeded to clover, when it is permitted to remain in meadow two or three years. At times a crop of fall wheat follows the oats, and after that the clover. Pastures, except some bottom land subject to overflow, remain four or five years. Under this system a yield of ninety bushels of corn per acre has been obtained. Wheat has averaged thirty bushels and quite often in excess of that.

Thirty or forty acres of corn is cut and shocked for winter roughage. Potatoes are something of an item, and in seasons of low prices they have been utilized for cattle feeding with excellent results. Cattle and hogs are always shipped direct to the Chicago market, and all middleman profits are eliminated. The size of the farm makes it necessary to buy some feeding cattle in order to take care of its grain and grass product. If the purchased steers are yearlings they are carried over on pasture, but if older they go direct to the feed lot.

(Continued on page 7 .)

CALVES, COLTS AND PIGS—THE FOUNDATION OF AGRICULTURAL PROSPERITY.

THE HOMESTEAD

A PRACTICAL JOURNAL for the FARMER, STOCKMAN, FRUIT GROWER, POULTRYMAN, GARDENER, and HOUSEKEEPER

BY JAMES M. PIERCE

JAMES ATKINSON, Editor-in-Chief

ESTABLISHED IN 1855

PUBLISHED EVERY THURSDAY

SUBSCRIPTION RATES—Single subscriptions, $1 a year; ten copies one year, $10, and an extra copy to getter up of club. In clubs of fifty or more, 30 cents a year. Subscription price, in Canada, $1.50 a year. Subscription price to other foreign countries, $2 a year. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send your old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to THE HOMESTEAD COMPANY, Des Moines, Iowa

MEMORIAL DAY.

A particularly tender significance attaches to Memorial Day this year. It is always an inspiring sight, those thin, blue lines of heroes marching down the street or road to do homage to their comrades who fell. This year it is more than ever touching in its memories. One hundred years ago the battle which determined the second war with Great Britain was fought. Fifty years ago the pivotal battle of the civil war was fought. Commodore Perry's victory on Lake Erie established the United States among the nations of the earth. It forced the admiration of the world. It preserved to the young republic the states which are now the banner commonwealths of the middle West and the Northwest. The battle of Gettysburg was the turning point in the civil war; freedom triumphed over slavery fifty years ago this coming July. From every viewpoint of memory and patriotism there is more significance to Memorial Day this year than ever before.

The ranks of the blue-clad survivors are thinning. The veterans march to the cemetery with slow and faltering steps. Their life course is almost run. Fifty years ago they were in the flower of manhood. Today they are in their sere and autumnal leaf. The bright colors of youth are fading, they are dimmed almost beyond discernment now. There can be but few more Memorial Days in which the men who saved the Union in the years that tried men's souls can participate. It is all the more fitting, therefore, that a pause should be made in the practical work of the world and reverence be paid to their deeds and memory. A nation without memories is poor indeed. Memorial Day is the crystallization of national memories into individual tributes. There is no duty confronting us, whatever the season, or whatever our individual fortunes, which can supplant in necessity the payment of loving tribute to the men whose glorious bravery perpetuated the nation.

The United States is what it is today because of what these men were yesterday. They quit the plow, the loom, the desk; wherever they were working. There were loved ones to minister to then fully as much as today. There is not a man living today with a duty to his family who would have more to sacrifice than had those soldiers who marched to the front fifty years ago. There is no time limit to self-denial and service for the common good. Babies cried with hunger because men fought at Gettysburg and Antietam and Chancellorsville. Women went about their daily toil with awful suspense tugging at their heart strings. Uncertainty was in the air, everywhere. Word came from the front, it was pregnant with sorrow. Men fell, but others stepped into their places. Women's faces became drawn and haggard, babies' faces became pinched. But still the men fought on. Can any one of those pages be turned over thoughtlessly today and the reader deserve prosperity and peace?

It is because of all the particularly tender and touching significance which attaches to Memorial Day this year that we urge upon every one the prime importance of paying such tribute as is possible to the men whose deeds and whose deaths insured the perpetuity and the prosperity of the nation. There can be but few more Memorial Days with such opportunity, there may never be another with such significance. Make Memorial Day this year an occasion for the rekindling of the fires of patriotism and devotion.

ALFALFA ALONE NOT A PERFECT FOOD FOR HOGS.

Ten pigs weighing seventy-five pounds were turned onto a one-acre alfalfa field at the Oklahoma experiment station during the month of April last year. They were put there to see if they could make their own living without any supplementary feeding whatever. For the first thirty days these shoats made an average daily gain of one pound and their healthy condition indicated that they could be finished for market on alfalfa alone. That this could not be done, however, was wholly disproved in the next thirty days during which time these same shoats lost twenty-four pounds. In other words, at the end of sixty days they only averaged six pounds more than when they were turned into the alfalfa. During the last forty days of the experiment they gained seventeen and one-half pounds, which is a little less than an average of one-half pound daily. During the whole 100 days each hog gained twenty-five and one-half pounds or one-quarter of a pound a day. At the end of the experiment the hogs looked very thin and were in no condition whatever to be marketed.

Side by side with this lot of hogs was another that was fed a half ration of grain in addition to alfalfa pasture from which seventy pounds' gain was made per head in 100 days. These hogs were fed an average of 2.8 pounds of grain daily per head. In this case it required 406 pounds of grain in addition to the alfalfa pasture to make 100 pounds of gain.

A similar lot of hogs was pastured at the same time and fed in addition all the grain that they would consume. They ate an average of 5.6 pounds of grain daily and during the 100 days they gained 128 pounds each. It required, in this case, 440 pounds of grain to make 100 pounds of gain, this being in addition to the alfalfa pasture.

The value of the pork from each acre was computed by Prof. W. A. Linklater and it was found that where a full grain ration was fed the alfalfa was worth $19.60 per acre. Where only half a grain ration was fed the alfalfa brought $13 per acre, while in the case of hogs fed no corn whatever alfalfa to the value of $18.75 was produced.

MINERAL MATTER IN ANIMAL NUTRITION.

Men have written and talked for years of the advantages that the limestone sections hold over some of the other parts of the country. Lime is an important element in animal nutrition. In many of the European countries it is used freely on meadow and pasture land. In a recent duck feeding experiment it was found that the development of these rapid-growing birds was largely dependent on their food containing a sufficient supply of bone-building material. Cattle, especially young animals and the cows in calf, may be seen chewing bones or lumps of dirt or old plaster where lime or phosphorus is deficient in their food. Iron and sulphur may also be lacking. Horses that receive pure spring water have been known to fall off greatly in condition when they had previously been supplied with water that came through miles of iron pipes.

Mineral salts assist in the movement of the liquids through the body and tissues; for example, from the alimentary canal into the blood and also the reverse of this action, and from the blood into the tissues, and from the tissues into the blood through the kidneys. In this way the salts of foodstuffs act as laxatives and stimulate the action of the secreting glands: they are also necessary to preserve the cells in their normal condition by regulating their distension by liquids. It has been recently shown that it is the mineral constituents of wheat bran which make it a laxative feed, because if it is freed from these salts it is quite constipating. This seems to explain, at least in part, the well-known laxative effect of a bran mash and discredits the idea that this action is due only to a mechanical condition of the food. Lime in the blood is essential to its coagulation. It is a safety precaution without which small wounds would result in death by bleeding. Mineral salts keep in solution various nitrogenous elements which are not soluble in water.

Females that are carrying young, and young, growing animals, have a great craving for these mineral constituents because nature stores up these elements in the body of the unborn in anticipation of the poverty of the milk in these essential elements. During all of the sucking period the little animal is drawing upon this reserve, and lowering the per cent of mineral nutriments in its body, so, if an animal is kept too long on milk alone, it will become anemic.

The experiments made in pig feeding are perhaps of the greatest interest because pigs make a more rapid growth than other animals and because corn, their principal food on many farms, is very deficient in the mineral constituents. In trials made at experiment stations in Wisconsin, Kansas, Missouri and Alabama, an abundance of protein and mineral matter in the feed not only increased the development of all the vital organs and of the muscles, making a greater proportion of lean meat in the carcass, but it increased the strength of the bones. In feeding pigs corn alone, corn and wood ashes and corn and bone meal Professor Henry, of Wisconsin, reported that the pigs fed corn meal developed bone twice as strong as those fed corn alone, and the bones of those fed corn meal and wood ashes were 93 per cent stronger than those fed corn alone. This shows that in feeding corn to growing pigs we cannot afford to overlook the importance of having an abundance of protein and mineral matter in their rations.

Lime and phosphorus are the two minerals most used in the production of bone. Potash is of especial value in making tissues, both bone and flesh. To produce the full development of bone the work must be commenced before the animal is born, by the use of these elements liberally in the female's ration during the time she is pregnant. As the development of bone to the full extent carries with it an increase in the size and vigor of all the vital organs and a large increase in proportion of lean in the carcass it can easily be seen that we cannot afford to neglect to supply our animals with plenty of bone-making material.

This brings us down to the problem of supplying these mineral elements in the most healthy and economical form. The legume plants are particularly rich in lime. In general, roughage contains more lime than grains. Among the feeds of commerce, such as gluten meal and so forth, where the outer hulls have been removed there is a deficiency of lime. Phosphorus is abundant in tankage, wheat bran, cottonseed meal, malt sprouts, soy beans and linseed oil meal. The phosphorus in these feeds is in a readily available form. Potassium, magnesium and iron are present in sufficient quantities in any common ration for live stock. Sodium, the base of common salt, is not present in adequate amounts for the animal's needs, but this deficiency has long been recognized and the salt supplied. Sulphur is usually present in the common feeds, but sheep seem to be greatly benefited by attention to this element. It is especially valuable in the growth of hair and wool. Cabbage, rape and turnips, so highly prized by sheep feeders, are very rich in phosphorus. Next to common salt lime phosphate is the most common mineral fed to stock. This is made from green bone by treating it with hydrochloric acid to dissolve out the bone earths and precipitation of the same by lime. This is done to get rid of the mineral matter in the manufacture of gelatine. In this process lime and phosphate are supplied at once. Some claim it is superior to ordinary meal, but my experience feeding bone meal has been so satisfactory that I would not advise anyone to make a change if the bone meal gives the desired results.

The main problem to bear in mind in making up rations that will contain adequate quantities of mineral matter is to feed a wider variety of foods. By feeding a variety of foods, some containing one and some others of the necessary minerals, one is more likely to approximate the right proportions than by confining his stock to but few kinds of food. The young animals and breeding stock need more mineral matter than the older animals. Of all grain feeds, corn is especially deficient in mineral nutriment. Legume hay and pasture grasses are valuable sources of these elements. Stock farmers should raise more alfalfa and clover hay and the like and depend less upon purchased feeds of commerce if they desire to promote the health of their breeding females and young stock of all kinds on their farms.

WHO SHALL DRAG THE ROADS?

There is a serious difference of opinion among authorities as to whether or not the responsibility for dragging roads rests solely upon the farmer's shoulders. Here, for instance, is one of the three members of the recently appointed State Highway Commission of Iowa declaring: "Take the road work out of the farmer's hands. It is not fair to the farmer to make him work on the roads. Now, I am a farmer myself. I pay my road taxes in money. There is no reason why a farmer should get out and work on the roads any more than should a banker. Then, too, road making is becoming too much of a business to let anybody and everybody practice it. One man should have supervision of the road work." And here, on the other hand, is one of the leading newspapers of the same state, a long and ardent champion of good roads, declaring:

Guthrie county men dragged a highway across the country in an hour and a half the other day. The dragging bee had been arranged for and was pulled off on schedule. It reminds of a story told by Jim Fisk, one of the early magnates and millionaires. He was the son of a shrewd old New England farmer. One day the old man told little Jim that if he would clean the stables well he would pay him a gold dollar for the service. Jim, with the golden reward in sight, tugged and strained and finished the stable on time. His father gave him the dollar. Then he said: "James, if you can clean the stables one day for a dollar you can clean them every day as a duty." And thereafter James cleaned out the stables.

If Guthrie county, and other counties, can drag the principal highways of the county in an hour and a half with a hurrah and to show what can be done they can drag the principal roads after a rain as a duty. An arrangement so successful as this should suggest a permanent system. The gratification with which those road draggers turned to survey their completed work ought to teach them that a good road is a joy forever. If it is worth making as an object lesson it is worth maintaining for everyday use.

Somewhere between the two extremities of opinion (turning the work over to experts and making the farmer do it all by himself) lies the ultimate and the satisfactory solution of the vexatious problem. There is no denying that road making has become as much a science and a profession as farming itself, or teaching school, or running a bank or piloting a locomotive. Why, then, should the farmer be expected to be the sole and only road maker and repairer, any more than the school-teacher or the rural mail carrier? Yet, on the other hand, the farmer has the first-hand, direct information of what roads need most to be made or repaired. He travels them most frequently; he should assist in bringing them to that state of permanency which will minimize his own troubles en route between farm and town.

In the last analysis, successful road making depends upon harmonious cooperation between individuals and county, state and national authorities. We may not have reached the stage when state aid to the extent of many millions of dollars is advisable, but we certainly have reached the stage when the burden should be taken from the unsupported shoulders of the farmer, where it has rested all too long. The farmer is perfectly willing to do his share; he simply objects to a hoggish policy which makes his share all the work and none of the credit or reward.

The 1912 marketed crop of apples of the United States reached nearly 31,000,000 bushels. Michigan, Missouri and Arkansas produced more largely than the others, while Ohio, Indiana and Illinois showed marked decrease. The entire product was one-third greater than for the previous year.

THE GEOGRAPHICAL CENTER.

That the grain belt is the center of the financial and intellectual stability and resourcefulness of the country has long been recognized, but that it is likewise the geographical center of the nation has not been so generally known. A dispatch from Washington this week is as follows:

A point ten miles north of Smith Center, Kan., is the geographical center of the United States. This fact has been established by experts of the geological survey. The calculation was made at the request of the officials of the census bureau, who had determined the center of population to be in Monroe county, Ind. The geographical center was ascertained by determining the center of gravity of a map of the United States. This map, which was on paper of uniform thickness, was so cut as to present an exact outline of the geography of the country. Then by the application of a system of line intersection it was ascertained that the geographical center was in Smith county, Kan. That point is the center of continental United States, as the calculation did not include the territory of Alaska or any outlaying possessions.

There is no disputing the fact that the greater part of the best original thought and work of the country today is coming from the middle West, commonly known as the grain belt. The standards of morality, of intellectuality and of literacy here are higher than anywhere else. The people here are more uniformly prosperous and progressive. The bulk of the political reforms emanated here. It is only right and proper that this section should likewise be the geographical center.

THE SEASON'S HOG CROP.

Without regard to whether the price of hogs will be up or down when the season's crop of pigs is ready for market, it is important that these pigs be given every care necessary to keep them healthy and thrifty. The conditions of the season in much of the corn-raising country are such as now compel the corn raiser to give every available minute of time to the work of getting the planting done. It seems worth while to sound a note of warning, lest in the absorbing interest in the corn crop the more important pig crop be neglected.

The little pig is entitled to a good start in life. Until he is safely weaned and his digestive machinery has become accustomed to the work of taking care of all that the pig finds to eat, he needs daily looking after. There is no other young animal on the farm that has as many infantile enemies as the little pig. His entire period of pighood is made up of successive dangers, which are the result of the unnatural conditions under which he is placed.

Most of us are too apt to overlook the simple sanitary precautions that mean so much to young pigs. Comfortable sleeping places and dry bedding are absolutely essential. Damp beds in drafty quarters go as far toward causing bowel troubles in pigs as does overfeeding or underfeeding The few minutes required to inspect or change the bedding daily is time well spent. An early pasture is not easily to be gotten along without. The exercise and the green feed combine to establish a well-balanced digestion. Besides that grass is the cheapest feed that can be provided. It does not so much matter what food be given the pig, so it is wholesome, if it has free run of a good pasture and access to water at will.

Just now the most important thing is to prevent any recurrence of the disastrous disease attacks of last year. On farms which were visited by cholera last year, danger still lurks in every unturned board. The duration of life of the cholera germ remains a debatable question, and perhaps it is just as well.

Every lot should have been plowed and put into a growing crop. It is not yet too late to do it. A periodical use of some dependable disinfectant should be made. A free distribution of lime should also be made every few weeks. Where at all possible get the pigs on ground not before used for the purpose. Sowing rape in the corn furnishes excellent pig pasture up to a time when they learn to damage the corn. It is surprising how little damage they will do until quite late in the fall. Rape in the oats makes excellent after-harvest pasture.

The legislatures of practically all hog-raising states have provided means of obtaining serum for the prevention of hog cholera. This should not in the least degree cause any cessation of endeavor to prevent the outbreaks of disease. Eminent authorities are still in doubt as to serum, but they agree in the belief that an animal once infected with the disease is beyond even the hope of help. While hogs do occasionally recover, they say the recovery can in no case be due to any treatment, medicine or serum, but rather to a less severe form of disease or extraordinary vitality of the animal.

The serum treatment is in no case offered as a cure, but only as a means of securing temporary immunity from disease—probably for a period of a few weeks and not to exceed three months. The simultaneous treatment is a dangerous means of obtaining protection, although when successful it affords permanent immunity. This form of treatment should be undertaken only by a veterinarian of absolute knowledge and ability. It should be kept in mind that it produces actual cholera, with the ability to spread the contagion just as readily and just as fatally as if taken by ordinary exposure. Any herd of hogs given the simultaneous treatment should be quarantined and the premises should be cleaned up and disinfected just as carefully as in any other case of cholera.

THE PURE-SHOE LAW.

The law which the Kansas legislature passed last winter to prohibit the sale of "adulterated shoes" is very necessary judging from a report made by Department of Agriculture investigators last week. Other states could well afford to follow the Kansas example and protect the farmer from unscrupulous manufacturers and dealers.

The government investigators assert that no less than 12,000,000 pounds of epsom salts and glucose are used each year in the loading and adulteration of poor grade leather for the soles of shoes. The adulterants add nothing to the wearing value and where present in large quantities may shorten the life of the leather.

The report says:

Sixty-three per cent of the leathers examined were weighted with glucose, with epsom salts or with both. The quantity of loading varied from 1 to 7.3 per cent of epsom salts with an average of 3 per cent. The maximum quantity of glucose in the loaded leathers was 10.4 per cent and the average 5.5 per cent. The maximum amount of these loading materials found in any leather was 16 per cent, and the average where both were present was 8 per cent. The results obtained indicate that not less than 12,000,000 pounds of glucose and epsom salts are sold annually to the American people. The "loading" is done to increase the marketable weight of the leather

The Kansas lawmakers realized that the fraud had reached such an extent that sharp action must be taken to prevent it, so a law was passed prohibiting the sale, under penalty of a heavy fine or imprisonment, of shoes which contain any piece of adulterated or imitation leather, whether it be called "leatheroid," "fiberboard," or any other high-sounding name, unless the shoe bears a plain tag in a conspicuous place acknowledging the use of such imitation or adulterant. We believe that this is a step in the right direction and might well be followed with laws applying equally strongly to other articles of wearing apparel. The farmer must be protected from fraud. The state owes its citizens a duty which it shirks so long as it permits them to be imposed upon by the unscrupulous.

IMPURITY OF FARM SEED.

A circular recently issued from the office of the Department of Agriculture gives some facts and figures with reference to impurity of seeds in the market, which are of general interest to farmers. One report takes up Kentucky blue grass of which 499 samples were obtained for analysis. Sixty-two of these were found to be either adulterated or misbranded; thirty-six samples contained less than 3 per cent of blue grass; an average of 59 per cent of Canada blue grass was found in fifty-three samples. In one instance no Kentucky blue grass at all was found, the analysis showing other seeds 64.06 per cent and dirt and chaff 35.94 per cent. An average of nearly 20 per cent of dirt and chaff was found throughout the entire lot, a greater average, in fact, than the quantity of pure seed. Red top was quite prominent as was also timothy, rye grass and crested dogs-tail.

Five hundred and thirty-eight samples of red top were obtained and of these 115 were found to be adulterated with timothy. Dirt and chaff were exceedingly prominent in practically every one of the samples obtained. Timothy seed was found in all of them and other seeds ran from less than 1 per cent up to 67 per cent. The results of these investigations indicate that there is need of more stringent laws with respect to the sale of adulterated farm seeds.

PURITY OF WATER IN FARM WELLS.

There is, perhaps, no one thing that farmers take for granted as much as that of purity of water in the wells, yet thousands of examinations of samples of drinking water taken from wells on farms indicate that a very large proportion of such water is polluted and much of it absolutely unfit for use. The location of a well is a matter for serious consideration. If it is not a deep well it should involve a knowledge of the natural underground drainage, so that there may be an avoidance of putting down a well where it would act as a drainage reservoir.

No water in a well which rises suddenly after a heavy rain should be made use of, as such rise indicates the close association with a water level which is apt to be contaminated by surface drainage.

The question is a most serious one, involving as it does, not only the health of the family on the farm, but the sanitary condition of the milk and butter produced, which, if not absolutely pure, extends its influence over an unlimited field. A government bulletin on the subject has the following important matter:

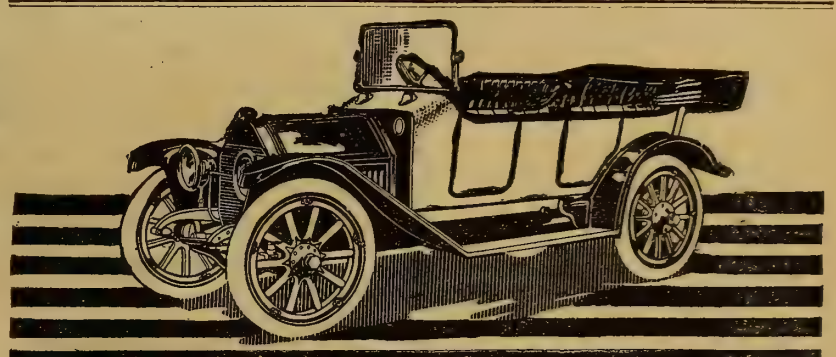
In the majority of instances the pollution, as shown by the chemical data, is derived from the drainage of the farm buildings and barnyard, and is consequent upon two causes—the location of the well and the dirty condition of its surroundings. When that most pernicious practice of sinking the well in the stable or barnyard is followed, provision is really being made to collect, as in a cesspool, liquid manure.

The amount of manure, the rainfall, and the porosity of the soil are the chief factors that will determine the rapidity and extent of the contamination of such wells; it is only in very exceptional cases that they can escape pollution. Let those about to sink wells, therefore, remember that they should not be dug in or near the barnyard nor under the farm buildings. Not a little of this rural well-water pollution is due to the filthy state of the buildings and yard.

The well being sunk at a safe distance from possible sources of pollution, the brick and stone work should be coated to the ground water line with a cement impervious to water. This will protect the well from infiltration of drainage from the upper layer of the soil. Further, a tight-fitting top should be provided, rising to the height of nine inches or one foot above the surface of the surrounding ground. This will prevent surface water, mice, rats and frogs from entering. The household slops, garbage, etc., should never be thrown on the soil in the neighborhood of the well; their proper place is the compost heap. Finally, the well should never be used as a cold-storage receptacle, nor the dairy or other vessels washed at the well unless there is an ample provision by a well-constructed drain to take away the wash water.

IOWA SWINE BREEDERS ASSOCIATION.

The annual summer meeting of the Iowa Swine Breeders' Association will take place at Ames, Iowa, June 18th. The officers of the organization have in preparation an excellent program, complete announcement of which will appear in our next issue.



If You Want Service—

every day—winter and summer—and over all roads—then you will be delighted with the excellent Cartercar. This is the simplest car made—so simple it is practically trouble-proof. Unlimited speeds—one lever control—power to climb 50% hills and many other features make the

Cartercar

With the Gearless Transmission

the best value on the market from a real service standpoint. No jerks nor jars—about half the usual tire and upkeep bills. Four splendid models—everyone completely equipped, including electric starting and lighting system.

Model 5A—Five passenger Touring Car. With electric starting and lighting system and complete equipment, **$1700**

Model 5B—A classy Roadster. With electric starting and lighting system and complete equipment, **$1600**

Cartercar Company, Pontiac, Mich.

Ideal Hoist A Helper In the Hay Harvest.

Operated with your own engine. Used any place where there is a rope or cable to pull or hoisting to do. Makes it easy for you to pull hay into barn, or on the stack. Elevates grain, building material. Loads manure, operates derricks, etc. Easy to operate. Friction clutch drive, brake for holding load. Pull-Back Drum for returning empty hay carriers, sprocket chain or belt drive to engine, with or without trucks. Easily operated from any distance.

Saves Help and Horses.

In haying time the Ideal Hoist takes the place of an extra horse or team and driver. Saves proportionately on other work. Doesn't cost much and pays for itself in a few days. Strongly built, will last for years.

Sold on Thirty Days' Trial

Let us prove at our risk that the Ideal is the best Hoist made. Try it with money-back privilege if not as represented. Free catalog with complete information sent you on request. Address

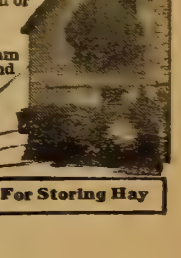
113 State Street, Cedar Falls, Iowa



For Storing Hay

FARM FURROWS

TURNED BY A PRACTICAL FARMER

Encourage the boys in entering the corn-growing contests; let the girls join the cooking club or the tomato-canning club. Train, teach, encourage toward the soil.

Don't get the habit of using the sprinkling-pot on the garden, if you possibly can avoid it, as you will have to continue to employ it till a good shower falls. Rather form the dust-mulch for the conservation of what moisture is in the soil.

Pass a dampened cloth over the shedding horses just before starting out on a drive with them. The loose hairs will cling to it and the annoyance of having them fly in the face will be avoided.

I find it doesn't pay to let a seeding stand too long. What is usually called a volunteer stand of clover seldom pays, because there is usually too much of a stand of it and it becomes sod-bound. Seed some other field and raise big corn on the sod.

All this noise about good roads might as well quiet down because when enough farmers have bought automobiles to make it worth while, they will go to work and build the roads and not say a word about it. That is their way of doing things.

An extra four-horse evener stick comes in handy. Much of the wood used in eveners nowadays is so poor it is liable to break at any time, and more particularly at a time when you are very, very busy and want to lose no time.

Mail order house catalogs are good books to have in the house, even if you are prejudiced against mail order goods, for they name the price of many things that many folks know not the value of.

Nine times out of ten the man who kicks on someone else doing road dragging for pay would not do it himself if he was to be paid the same price for it. I believe in road dragging, and in the road authorities paying for it, and if the dragging is well done at the right time, I do not care who has received the pay for it, just so it is the man who did the work.

If more of our farmers knew that the average yield of potatoes is less than one-half as high in the United States as it is in some of the European countries, it might enthuse them into "whipping up" a little in their efforts to make our soil produce something near what it ought to—not only in potatoes, but in various other crops.

Working in the field until rain actually falls is a sure way of getting soaked. I usually give the storm cloud the benefit of the doubt and try to get to the barn before proof is furnished that it is going to rain. Waiting to be convinced often ends in an unpleasant siege of the grip.

The newspapers are already giving us figures on the crops of 1913. I notice the winter wheat crop is already known, if newspaper reports are to be believed, but I imagine all of us will know much more about it after the threshing machine cylinder has hummed a few tunes.

One likes to be neighborly, but rather than overstock his pasture lands, simply to accomodate a neighbor, by taking in some of his stock, a farmer had better lock his pasture gates and wait till midsummer to turn his own stock in.

To plant small potatoes does not always mean to raise small potatoes One of the best crops of potatoes I ever raised came from small seed, but it was small because the year before had been a poor potato year, not because the seed was culled and the culls were planted.

Instead of buying more land to skin over in a hurry, would it not be a better plan, in some cases at least, to spend more time and some of the money in improving the land already owned. The production of many a farm could be added to 25 per cent by tile draining, at barely 10 per cent of the value of the land.

I always have been a great believer in the use of the harrow as soon as possible after the shower. I wait, if possible, for a shower when I have a piece of land to fit for any kind of crop or seeding. One harrowing after a shower does more good than three or four when the soil is dry.

Some of those who thought they had an oversupply of roughage are now drawing on what was to be their reserve and before another crop is ready for harvesting there will be room enough to take care of it. "Get plenty while you are getting" is a good enough motto when preparing for winter.

It sometimes pays to take some risks with Jack Frost at the beginning of the corn-raising season. Where one crop of corn is damaged by freezing weather in the spring there are ten damaged by being nipped at the ripening period.

Our friends who live in the drier parts of our country tell us that laying by something for a rainy day is not for them. It is laying by something for the dry days that worries. The point is well taken because it is the dry spells that hit their pocketbooks.

The King drag cannot be regarded as a road-making machine, but after a grade has been established, its use will keep the road in almost perfect condition. The main trouble is to find someone who has time to attend to the dragging when it should be done.

Preparing fall plowing for corn is more than loosening up the soil so that the planter will cover the seed. The weed-killing campaign begins when the disk is started and going after them hard at this time is another way of making a stitch in time save nine.

A few years ago the farmer did not look with favor on the city man's automobile, but things changed when the farmers found that they wanted automobiles of their own, and it seems that they do because they are the main buyers now.

Some of us will no more than finish planting this year until we will have to commence cultivating the first planted. I like to have corn large enough so there is no "strip" left in the row after the first cultivation—that is, have the corn large enough so any small weeds in the row may be covered.

Going over the outbuildings and making the necessary repairs, keeps them looking like new, especially if the paint brush follows the hammer and nails, and while the repair fever is on it might be well to look over the dwelling. It is hardly fair that the family should live in the only tumble-down building on the farm.

No-Rim-Cut Tires 10% Oversize

Not a Petty Saving

Don't think that Goodyears won their place through any petty savings.

They were once in bottom place. Today they outsell, by long odds, all other tires in the world.

They have leaped to leadership. The Goodyear demand has come like an avalanche.

Last year's sales by far exceeded our previous 12 years put together.

It took a vast, compelling reason to bring this change about.

Two Big Savings

The No-Rim-Cut tire—which we control—revolutionized conditions.

About one in four of all old-type tires were wrecked by rim-cut ruin. The No-Rim-Cut tire wiped out that loss completely.

Then the oversize we gave this tire added 10 per cent to the air capacity. And that, with the average car, adds 25 per cent to the tire mileage.

These two features alone vastly altered the cost of tire upkeep.

Other Savings

Then, year after year, we have spent fortunes on research and experiment.

That department now costs us $100,000 yearly. And there scores of our experts work all the time, seeking ways to better tires.

They test the tires by metered mileage—test every new idea. Night and day, four tires at a time are being worn out in our factory.

It was thus we learned, in the course of years, how to give you Goodyear mileage.

The Meters Tell

Bear in mind that meters are now used on countless cars. Men know which tire is best.

The time is past when users depend on makers' claims.

They measure mileage, watch their tire upkeep. And they tell their results to others.

Over two million Goodyear tires have gone out to meet these tests. And Goodyear sales have doubled over and over as men proved out the tires.

Judge by This

Judge Goodyear tires by the final verdict of the legions of men who have used them.

You can see the No-Rim-Cut feature—the oversize feature. But the main fact lies in their records.

Motor car makers have contracted for 890,680 Goodyears to be used on new cars this year. And our demand from users is twice as large as last year.

CURRENT EVENTS

A DECISION to equalize the agricultural schedules of the Underwood tariff bill was reached by the sub-committee of the senate finance committee to which the schedules were referred. For instance, if cattle, sheep, hogs, wheat and oats are to remain dutiable, as provided by the bill, then a duty shall be placed upon beef, mutton, pork, wheat flour and oat meal; if the raw materials are placed upon the free list, then the manufactured products made from these raw materials will likewise become free. The Underwood bill, in its present form, puts a duty of 10 per cent ad valorem on all live stock and free lists all meats, a duty of 10 per cent per bushel on wheat and oats and free lists wheat flour and oat meal. The senatorial sub-committee is determined that the schedules of raw materials and manufactured products shall be equalized, so that all shall either bear a proportionate duty or come in free impartially. It is considered likely that the full finance committee will bear out the sub-committee's finding in this respect and it is said to have President Wilson's sanction. An effort was made to amend the bill in this manner in the house, but it failed. Should the bill pass the senate in such amended form it will then go to conference between the two houses.

DEMOCRATIC victory in the senate on the tariff bill is forecasted by the result of the test vote on public hearings before the finance committee. The republicans, headed by Senator Penrose and Senator La Follette, waged a fight to compel public hearings, which the democrats opposed. Several days were spent in argument, but the democrats were victorious by a vote of 36 to 41, notwithstanding the fact that the two democratic senators from Louisiana joined with the republicans. The Louisiana senators are opposing the party measure because of the fact that it makes a sweeping reduction in the duty on sugar at once and provides for absolute free sugar in three years. Even with this loss, however, the Wilson program bids fair to be put through by a majority of four or five. Even should there be a tie vote the ballot of Vice-President Marshall would throw victory to the democrats. President Wilson's determined stand for free wool and ultimate free sugar has convinced the senate that opposition is useless and it is confidently expected that the Underwood bill will go through the senate, as it did the house. The finance committee will report the bill back about the first week in June, after which the long discussion on the floor of the senate will begin. The bill can hardly go to the president for his signature before the first of August. In the meantime the lower house is marking time, with a probability of starting currency reform legislation, with but little prospects of finishing it up at the present session, however.

CO-OPERATION between the federal department of agriculture and the various state agricultural colleges, to the profit and betterment of the farmer, is the plan of Secretary Houston. A conference was held in Washington recently between the new head of the department of agriculture and representatives from the agricultural colleges of Wisconsin, Ohio, New York, North Carolina, Pennsylvania and other states. A permanent committee will be named and frequent meetings held between the national and state agricultural workers. The most important co-operative effort will be to devise means for securing the greatest possible good both to farmers and consumers from the newly organized division of markets and rural organization service. The department, it was said after the conference, desires to co-operate along many lines, recognizing that the state colleges and the experiment stations should be the official agencies through which most of the agricultural work of the country should be undertaken. The new plan promises to further the already valuable work of national department and state college and to bring permanent results of improvement to the producer.

HENRY M. FLAGLER, one of the millionaire associates of John D. Rockefeller in the Standard Oil Company, and virtually the builder of Florida, died during the past week, in his eighty-third year. Mr. Flagler started out in life a poor boy. One of his most valued possessions, even when he became a multi-millionaire, was a five-franc piece (of the value of $1) which was all that he possessed after tramping many miles across the country looking for work. He was able to get along without spending his solitary coin and preserved it, to the day of his death, as his chief treasure. Mr. Flagler secured his start in the grain-buying business and becoming associated with Mr. Rockefeller went into the oil business, amassing a fortune. He became interested in Florida some years ago and erected a string of magnificent, palatial hotels in the famous Florida resorts. He also extended the Florida railroad systems and added to his already large fortune by catering to the needs of the rich tourists who spend the winters in Florida. Mr. Flagler had been sick for some time. He devoted his life to making money and was eminently successful at the task.

BECAUSE of the fear that the recently signed anti-alien land act will work harm to its affairs, the Panama-Pacific Exposition, which will be held at San Francisco beginning Februray 20, 1915, is using its influence to secure a postponement of the enforcement of the law. Although Governor Johnson has already signed the bill it does not go into effect for ninety days. In the meantime strong opposition is coming from three sources: the democrats in the state; the Asiatic Exclusion League, which believes that the law is not strict enough; and the exposition officials, who see a danger of Japan withdrawing from the exposition and possibly taking other friendly nations with it. Petitions for a referendum vote on the new measure will be circulated shortly. There is much difference of opinion in California as to the necessity and advisability of this new law, which prevents aliens ineligible to citizenship from owning lands for agricultural purposes or leasing them for more than three years at a stretch.

LIVE STOCK AND CROP ROTATION.

(Continued from page 3.)

This manner of feeding has demonstrated that the pure-bred steers raised on the farm bring a much greater percentage of profit than those which are bought. Their early maturing propensities and easy feeding qualities get them into market quicker and in better form. The manure spreader and the system of rotation contribute to the upward producing capacity of the land, so that today its possibilities are greater even than when first broken.

An important consideration that is too often overlooked is the economical utilization of manure produced by swine. Dry lot feeding in summer is often associated with a heavy waste of manure on account of the large part of the manure that is leached or blown away when deposited in bare lots. Feeding on pastures or in cultivated fields will do much to obviate this loss since a large proportion of the droppings and urine will then be deposited in the field where the fertilizing constituents may be utilized.

Flying Dutchman Hay Tools

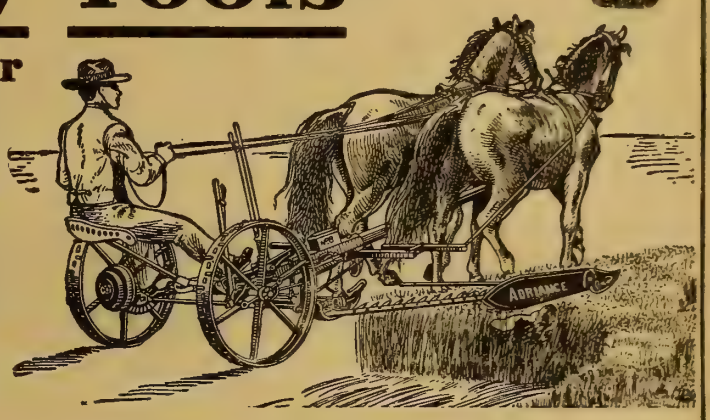
The Adriance Mower

has many exclusive improvements—its durability and convenience have made it a great favorite wherever used.

Adriance Mowers have the best cutting apparatus the world has ever produced.

The coupling frame hinges are in exact line—no chance to bind. The Cutter Bar swings like a door. It will always follow the ground, and can be swung over the tongue when not in use.

The Automatic Spring Draft prevents damage to the driver or machine when striking an obstruction.



The Crank Shaft has bronze bearings, the only successful bearings for a high speed Mower.

The Foot Lift raises the Bar with a natural forward movement, and helps to brace the driver in the seat—convenient and safe.

No Sprockets
No Gears
No Ropes
No Webs

The Flying Dutchman Hay Loader

is the simplest, lightest draft and easiest handled Hay Loader built. One man can easily operate it and drive the team. Hasn't a gear, chain or sprocket to break and cause delays. It has the long, natural, easy stroke of the hand rake and cleans the stubble thoroughly and carefully places the hay on the wagon, without tearing off the clover leaves and without jarring the loader to pieces.

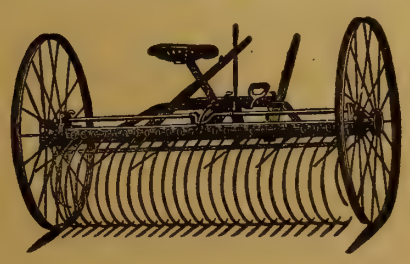
It can be depended upon to give perfect service every hour during the haying season. No delays—no trouble of any kind.

The yielding deck permits handling lightest swath or heaviest windrow with equal ease and satisfaction—requires no adjustment.

The Flying Dutchman Side Delivery Rake and Tedder

combines two machines in one. A perfect side delivery Rake—a perfect hay Tedder. Can be changed from a Rake to a Tedder in five minutes. It is built entirely of steel (except the tongue) and will give splendid service. Being convertible from Rake to Tedder, its use may save your hay crop.

The entire machine is raised and lowered by one lever without the driver leaving his seat.



The Adriance All-Steel Rake

has large wheels with replaceable spokes, plenty of clearance. The frame and axle are very strongly constructed of angle steel bars. Has great strength combined with the best of working qualities.

POULTRY DEPARTMENT

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

THE WORTH OF WELL-BRED HENS.

To the Editor of The Homestead:

The question is often asked, "Can we afford to pay out money for expensive poultry?" We have asked that ourselves and never until quite recently been able to give a satisfactory answer. True, it has seemed to us worth while to get now and then a a sitting of eggs from stock that was better, or supposed to be better, than our own, in the hope that we might get a few more eggs by means of the better blood we thus introduced into the flock. And yet, the advantage was so slight that we could scarcely notice it.

A year ago this spring, however, we made a pretty complete change in the stock on the farm. The old birds were weeded out and their places taken by the best strain of White Leghorns we could find. We selected those particularly because we had noticed that whenever we had any birds of this breed we always knew that we would have a pretty good supply of eggs from them. Then, too, the young man who came to have charge of the poultry business for us had a warm side for White Leghorns.

After a year's experience with these better birds we feel that there is a great advantage in having such stock, to the exclusion of all or any others. The hens were young last season and they no doubt have done their best for us in the last twelve months. Certainly, we have had a steady flow of eggs, winter as well as summer, and they have been mostly eggs that would sell for the highest market price, there being few undersized eggs. These eggs have mostly been shipped to the eastern market and have brought the top price. Compared with the birds we used to have and with those people now have about us, we see great reason for congratulating ourselves; for while others have been complaining of getting few or no eggs, we have had a good yield right along.

There is another thing about keeping well-bred stock, and that is that after we have built up a reputation for good layers, there is almost always a demand for chicks and surplus stock. This may be made a source of considerable revenue, for there is a tendency on the part of nearly all farmers now to get better poultry.

I am satisfied that the choice stock calls for better care and better buildings. There is something about human nature that favors this. If we have a good thing, we feel that we must keep it good and if possible make it better. We are more proud of fine poultry than we are of commonplace stock. Extra work brings its return, always and everywhere. There is every reason to believe that the man who has just average stock may greatly increase his profits by giving the business more care and closer attention. Even ordinary hens will respond to this favoritism, if such we may call it.

But that is not all there is to better stock. It stands to reason that poultry bred for a special purpose should do better than that which never has had the benefit of such care and breeding. We have still much to learn in this direction, but on our own farm we already know that better stock pays and pays well.

E. L. Vincent.

THERE ARE ENOUGH BREEDS.

To the Editor of The Homestead:

Every little while some one bobs up with a brand new breed that is a world beater. Now, as a matter of fact, there is a breed for every purpose—and a variety of each breed to please every fancy. Better far to get busy and keep the good, dependable breeds that are already with us from deteriorating. No matter how much superior stock we buy, in the end it will be exactly on par with the environment we give them.

It may be that this simple illustration will give more clearly the idea I have in mind: From a hundred birds there are always from six to one dozen of superior quality, or at least, better than the other eighty or ninety. A woman came to our yards on Thanksgiving day and got the pick of our season's lot of youngsters, and he was a dandy, too. Later in the winter another customer came and she found only a few cockerels left, all of which were late hatched. We selected the best from the lot and the matter was forgotten for nearly a year.

I chanced to visit the homes of these two customers only a few days

LEGHORNS.

ROSE COMB BROWN LEGHORNS

apart and the object lesson received was an eye opener. The choice cockerel had struck hard lines. The family lived on just a few acres and did not consider the poultry entitled to any feed only what they "picked up." Pretty scattering "picking" that! No grain was raised, the garden was fenced, but the "poultry has plenty of grass!" I could not believe that that faded, stunted mongrel was the snappy, proud business fellow that I considered my best less than one year since. "Pure-bred chickens don't pay," was the not very encouraging information I received. "Guess we'll sell 'em; someone must always stay at the stable and keep them away while the horse eats his corn."

The other cockerel, the late-hatched one that I was rather averse to letting go as a breeder because he was not yet developed, had grown big and broad and his plumage shone with the luster of health and prosperity. His mistress had been so well pleased with this improvement that she yarded him with a dozen of her best hens and this was the foundation for one of the best farm flocks of the kind in this part of the country. "What did she feed him?" Just what 99 per cent of the farmers feed their fowls—no more, no less. Minnie G. Stearns.

Roosters not needed; loafing hens; boarding cows; small-litter sows; run-down soil; these are what hold a farmer down.

POINTERS.

—Mrs. Chas. Whitlatch, Eddyville, Iowa, is quoting prices on Mammoth Bronze turkey eggs in her advertisement that appears elsewhere in this department.

—Carl R. Weber, Truman, Minn., is offering Blue Andalusian eggs from prize-winning stock for sale in his advertisement that appears elsewhere in this department.

—M. Hummel, Monroe, Iowa, has reduced prices on Barred Plymouth Rock eggs for the balance of the season to $1.25 for 15, $2.00 for 30. Prompt shipment and eggs guaranteed fertile.

—Mrs. John Holmgren, Rolfe, Iowa, advertises Rose Comb Rhode Island Red eggs for sale at special prices for the remainder of the season. See her advertisement in the proper department.

—Chas. L. Berry, Iowa City, Iowa, is offering White Plymouth Rock eggs for hatching at the unusually low prices quoted in his advertisement which appears in the proper department of this paper.

—For the remainder of the season W. I. Price, Ira, Iowa, announces that Single Comb Rhode Island Red eggs will be sold at reduced prices. See advertisement in the proper division of this paper.

—Miss Maggie Henning, Ira, Iowa, is offering Rose Comb Rhode Island Red eggs at reduced prices. Her advertisement appears elsewhere in this department. She writes: "My chickens are healthy, of a good-laying strain and eggs are hatching good."

—The Twentieth Century Hatchery, Chatfield, Ohio, are offering four varieties of chicks for sale at very moderate prices as per advertisement that appears elsewhere in this department. They will send catalog free. The prices quoted, however, are for delivery after June 17th.

—In furnishing copy for advertisement found elsewhere in this department, Mrs. C. E. Coleman, Clarinda, Iowa, writes: "I have been breeding Buff Orpington chickens for several years, and I believe I have, without a doubt, as good a flock as there is in the state, as my birds have won at the leading sows. At the last Clarinda show I won first, second and fifth on pullet; third on cock; first, second and fourth on cockerel, and third on pen."

—Ammy Bartow, Lynnville, Iowa, writes: "I am now offering eggs at one-half price, $2.25 per 100. They are hatching good and chicks are strong and healthy. Have received several orders from old customers and they speak very highly of stock and eggs. I have been a Barred Plymouth Rock breeder for over twenty years and my cockerel line is among the very best. I pack eggs very carefully and guarantee safe delivery and a good hatch. Chicks hatched in June make good winter show birds." See advertisement elsewhere in this department.

—In the advertisement on this page M. E. Edwards, Walnut, Iowa, makes some decided reductions in prices of Single Comb Rhode Island Reds. In a letter ordering this change the advertiser says: "I have advertised in The Homestead for over twenty years and have also advertised in other papers, but found The Homestead far the best of all. Its readers seem to have the progressive spirit and are always ready to buy anything that is good when it is offered for sale in The Homestead. I would not know how to get along without its weekly visits in my home."

PLYMOUTH ROCKS.

EGGS FOR HATCHING

BARRED P. Rocks exclusively for 30 years. Yards headed by cocks and cockerels scoring 92 to 92½ points. Descendants from first-prize winners. "Can't-Sag" Gates Cost Less Last 5 Times as Long

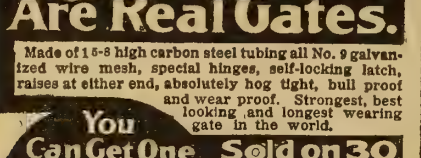
I'll save you big money on your farm gates. My new catalog quotes such astonishingly low prices on CAN'T-SAG GATES AND GATE STEELS that you simply can't afford to build another clumsy, all wood gate. My FREIGHT PAID PRICES are half what others charge for short-lived steel, wire and gas pipe gates.

30 Days' Free Trial—5 Year Guarantee

I give 30 days free trial and a signed 5-year guarantee. Send for my big free Gate Catalog at once—see why Can't-Sag Gates outsell and outlast all others. Read what other farmers and stockmen say about them. When you get this book you can either select complete CAN'T-SAG GATES, Ready to hang, any height, any length—painted or unpainted or if you prefer you can order just the GATE STEELS [which includes everything but the boards]. With these you can build your own Gates in 30 minutes and SAVE BIG MONEY.

A. V. Rowe, Pres.

(6) Send for FREE Gate Catalog Today



Note These Special Features

Each board double bolted between 4 pairs of ANGLE STEEL uprights and 6 TRIANGULAR TRUSS BRACES. Patent reenforced SELF-LOCKING HINGE. Gate swings easily both ways—always hangs square and plumb. Elevating Attachment [furnished at slight additional cost] permits gates to be raised over deep snow or allows small stock to pass under. Write for Free Catalog and FREIGHT PREPAID OFFER TODAY. HINTS·SUGGESTIONS·DEVICES

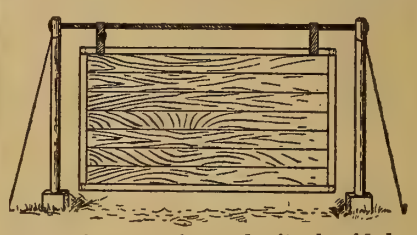
WE extend a special invitation to our subscribers to assist us during the coming months in making this department better than ever. Please send along a description, accompanied by a drawing, of any handy device you may have around the farm, or something that is connected with the home.

SAWHORSE.

This device is of great convenience to anyone using a wood saw, saving the back and also the knee with which ordinarily the wood must be held in place. The frame, a, is made of two by fours the desired length with a cross rod at b to hold the frame steady. C is an iron hook which is easily bent by any blacksmith, to hold the log in place and is a treadle of wood, shaped downward at end to make standing easy. E represents a cross rod to support treadle. The operator may stand squarely on both feet with one foot on the ground and one on the treadle, or a piece of timber may be placed on one end of treadle and then the operator can stand any place he chooses.

Making a Flood Gate.

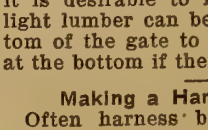
Now that the season of heavy rains is at hand the farmers whose fields are traversed by creeks and ravines will be subjected to the annoyance of having their fences washed out. Flood gates save many fences from being put out of commission, but unless they are properly made and hung they are apt to come to disaster during some violent flood when the streams are running swift and carrying wreckage, tree limbs, etc. The flood gate should be built for strength and should be made long enough to reach out a good distance on each side of the creek or ravine. The timber used in its construction should be heavy—unfinished boards are the best. The frame should be made of two by eights. The other lumber—the boards which go across the frame—should be one inch thick and twelve wide. Use spikes and ten-penny nails. The best way is to bolt the frame pieces together.



After the gate is made it should be hung securely. If there are no trees in line with the fence, or near enough to make their use permissible, poles must be set. A good, heavy pole should be selected. Set it as deep as possible. To be of any service it should be set in concrete. Two poles so set are sufficient to swing a gate. If dirt is stamped around the poles the lapping water will soften it and the pole will soon fall over or be washed out. Brace the poles well with wires which should be attached to the top, then tied to several surrounding trees. If there are no trees the wires can be pegged down. The gate is suspended by iron hasps to a wire cable stretched between the two posts. A dozen strands of heavy telephone wire twisted together makes a good one. When it is desirable to fence against hogs light lumber can be nailed to the bottom of the gate to fill up the opening at the bottom if there should be one.

Making a Harness Hanger.

Often harness becomes broken in places and out of shape because it is not properly hung up in the barn. A harness should be suspended so the strain of the weight is divided evenly. The illustration shows how a practical harness hanger may be constructed. Take a log of the desired length and bore auger holes in it. Then fit stakes into the holes. Put these stakes fairly near together. The hanger can be suspended from the ceiling by nailing boards of the proper length to the ends of the pole, then to the ceiling rafters. It is understood that the pole should be suspended with the harness stakes slanting upwards so the harness will not slip off.



Making a Trellis.

Honeysuckles and other climbing plants require a trellis to climb up and spread over. A serviceable one can be made from a soft pine (or other soft lumber) board. The board can be of any length and width desired. A board six feet long and a foot wide will make a good one for ordinary purposes. First mark the board off as shown in Fig. 1. The marks should be about an inch apart. Now take a rip saw and saw down the marks,

FIG. 1

which should extend about two-thirds of the length of the board. The slats formed by the sawing are spread out and a flexible piece of board is nailed over the end of each to hold them in

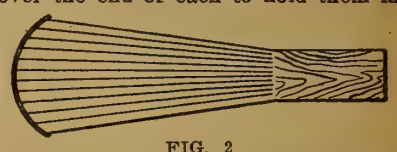


FIG. 2

position. To set the trellis drive a piece of post in the ground, then nail the trellis to it. Fig. 2 shows the completed trellis.

LEGAL DEPARTMENT

SUBSCRIBERS who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention, inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail, should remit $1.00, addressed as above. All inquiries must be signed if they are to receive attention.

LAW QUESTIONS CONSIDERED.

SELLING UNWHOLESOME FOOD.

A Subscriber, Farnhamville, Iowa.—A bought two hogs from B for the purpose of butchering them. One of the hogs was an original and B knew it, but A did not know it until the hog was killed, and its meat is not good. Can A recover damages from B?

Answer.—In selling personal property the general rule is that where no misrepresentations are made by the seller in respect to the quality or condition of the property, the purchaser buys at his own risk, and cannot recover damages on account of defects or unsoundness. but where animals or articles are sold for food, the law implies a warranty on the part of the buyer that such provisions are wholesome and fit to eat, and the rule of buyers' risk does not apply; hence in the case stated, the butcher can recover damages from B on account of one hog being an original, and the meat unfit for food.

KILLING AN OLD HORSE.

A Subscriber, Stanton, Iowa.—Is it lawful in Iowa for the owner of a horse to kill it where there is nothing the matter with the horse except old age?

Answer.—It is not unlawful provided the killing is not done cruelly. It would probably be best to have an officer of the Humane society do the killing, if it must be done.

TRIMMING HEDGE ALONG ROAD.

A Subscriber, Bedford, Iowa.—(1) What is the law in Iowa about cutting back hedge fences along the public highway? (2) Where a hedge fence along the highway is not used as a windbreak can the township trustees compel the owner of the hedge to cut it back?

Answer.—(1) The law provides that owners of osage orange, willow or other hedge fence along the public road, unless the same shall be used as a windbreak for orchards or feed lots, shall keep the same trimmed by cutting back within five feet of the ground, at least once in every year, when so ordered by the trustees of the township, and burn or remove the trimmings so cut, from the road. (2) If such owner fails to comply with the order of the trustees, he is notified by the road supervisor (superintendent) to do so, and if he fails for sixty days, the cutting back will be done at owner's expense and added to his taxes.

SALE OF LAND—TAXES.

A Subscriber, Otley, Iowa.—In January, 1912, A was assessed for money and in March following he used the money to buy a farm from B which was assessed to B. A was given possession of the farm at date of sale. Nothing was said about the payment of taxes assessed on the farm in January. (1) Who is liable for said taxes on the farm? (2) In case A is liable for the tax, must he also pay tax assessed against the money paid for the land?

Answer.—(1) Section 1400 of the code of Iowa provides that taxes on real estate shall attach as a lien thereon as against a purchase on and after the thirty-first day of December in each year. This means that if land is sold before that date, the purchaser must pay the tax for the year ending that day, but if sold after that day, the seller must pay them, hence in your case A must pay the tax. (2) A will have to pay the taxes assessed on money he had in January, 1912.

LAND ADJOINING TOWN LOTS—FENCES.

A Dallas County Farmer, Iowa.—A owns land adjoining an incorporated town and uses said land for stock purposes. Where the town lots join A's land who is required by law to build the partition fence between the lots and the land and what kind of a fence must it be?

Answer.—The law provides that the respective owners of adjoining tracts of land, except timber land not used otherwise than for the timber thereon, from which each shall derive any revenue or benefit, shall be compelled to erect and maintain partition fences, or contribute thereto, and keep the same in good repair throughout the year. We think this law applies to a case where farming land adjoins town lots, if the lots are otherwise enclosed by the owners, and used for any purpose from which such owners derive revenue or benefit. There is a decision in Pennsylvania, viz., Loeb vs. Nissley, 2 Legal Chronicle 149, sustaining this doctrine, but the point has not been decided by the supreme court of Iowa. Such fence would be any kind of a fence prescribed by the Iowa law, as a lawful fence.

Improve the sanitary conditions in and about your home. Safeguard the health of your family and lessen the labor of household duties by installing a

Fairbanks-Morse Pneumatic Tank System

Pure water under pressure always on tap in kitchen, bathroom, laundry, etc. Installation cost reasonable; operating cost but a trifle. Outfit shown is easily set up in basement of ordinary residence and can be operated by hand, engine or motor. From our complete line you can select an outfit especially adapted to your needs.

There's Only One Safe Way to Buy a Buggy

Here are a few of the things to look out for

First—See your buggy before you buy. There's a mighty big difference in buggies.

Second—be sure it is made by a manufacturer who has a *reputation for making first-class buggies.*

Third—Buy of a dealer you know.

Fourth—Don't buy an Eastern-made buggy. They are not built to stand the strains of our western roads.

Fifth—Don't buy a cheap-priced buggy. It will look shabby in a short time, cause heavy repair expense and go to pieces quickly. A really *first-class* buggy—the *Kratzer*—costs only a little bit more, looks better, is much easier riding, and stands the wear and tear because it is built *in* the West to suit Western conditions. Best—and cheapest in the end.

Kratzer Quality Carriages
Are sold by reliable dealers

You get the most in buggy beauty and endurance in a Kratzer. All wool broadcloth or genuine leather backs and cushions, springs of the finest tempered Cambria steel, tires put on "hot-set" by hand, only the best selected seasoned hickory, drop forged iron reinforcement at every point of strain, the famous Wilcox all-steel fifth wheel, every bolt, nut, stick and rod made to last for years. This is the kind of buggy you want.

Send this coupon for inside facts

We have some very interesting facts on buggies and carriages which you should get at once. Just mail the coupon and you will receive this information by return mail. Don't put it off. Send the coupon *now.*

DAIRY

FAVORS CONDENSERIES.

To the Editor of The Homestead:

A clipping from your dairy department entitled, "Condenseries or Creameries; Which?" has been handed to the writer for reply. The condenseries pay a higher price for milk than any other buyers of milk can afford to pay, and are a very valuable asset to any rural community. A condensery requires a flow of milk equal to ten or fifteen creameries and necessitates employing considerable local help, both men and women, through the entire year. The ordinary condensery will disburse from $10,000 to $40,000 a month for milk and labor which is handled by the local bank and is spent at home. A condensery not only is good for the local merchant, but benefits the entire surrounding community because it demands good roads and it stimulates the dairyman to dispose of his low-grade robber cows and replace them with real profit-making herds. It is a great factor in raising the plane of living in any community. So much for the general benefits of a condensery—what about the prices they pay. Some condenseries pay a flat rate per hundred. The condensing company with which the writer is affiliated pays on a butter-fat basis which is far more just and fair to both the dairymen and condensery. This condensery being an independent one with no connection with any of the so-called "trusts" will pay to their dairy patrons for April, $1.55, May, $1.45, June, $1.35, July, $1.35, August, $1.45, September, $1.55, an average of $1.45 per hundred pounds, or an average of 41 3-7 cents a pound for butter fat during the grass months which you all know is the lowest price of the year.

This same milk containing 3.5 per cent butter fat with a 20 per cent overrun will make 4.2 pounds of butter. Below I am giving you the prices of butter for the six grass months taken from the year book of the department of agriculture of 1911, showing what the farmer received for his butter in Wisconsin and Iowa:

	Wisconsin	Iowa
April	24 cents	21 cents
May	22 "	20 "
June	21 "	19 "
July	22 "	19 "
August	23 "	22 "
September	25 "	23 "
Average	23	20 2-3

This would make the Iowa milk, if taken to the creamery, worth 86 cents a hundred pounds (4.2×.20 2-3=.86) and the same identical milk, if taken to our condensing company, would bring (3.5×.41 3-7=1.45) $1.45 a hundred pounds, a difference of 59 cents a hundred pounds in favor of our condensery. But you say that I have made no allowance for the skim milk. The value of skim milk, we are told in the dairy text-books, depends upon the value of shelled corn, and is estimated to be one-half the price of shelled corn per bushel per hundred pounds. The price of shelled corn at this writing is 54 to 54 3-4 cents which, in the class room, would give skim milk a value of 27 cents (54÷2=27), but this, in the writer's opinion, is merely, a paper valuation featured by dairy authorities for the class room. My personal experience in creamery and condensery work in five different states leads me to believe that this is an inflated value. As a matter of fact, many dairymen bringing milk to a whole-milk creamery, do not take the skim milk back to the farm for fear of transmitting tuberculosis to their dairy herds and hogs. But for the sake of argument I will concede that skim milk has a value of 27 cents per hundred pounds. This, when added to the creamery price, of 86 cents per hundred would make 3.5 per cent milk worth $1,13 per hundred pounds (.86+.27=1.13) and if this milk were purchased by our condensing company it would be worth $1.45 a hundred pounds, a difference of 32 cents in favor of the condensery on each hundred pounds of milk. If the condensery were receiving 75,000 pounds of milk it would mean $240.00 (750×.32=240) more each day to the farmer than would the same kind and quantity of milk taken to a creamery.

I believe that the figures given will convince the most skeptical dairyman why the condenseries grow in spite of all the knocking a creamery can do to prevent their introduction in their community.

Wisconsin S. R. Barnett.

THE VALUE OF THE BABCOCK TEST.

To the Editor of The Homestead:

To be considered of so little value as to be publicly sold as a four year old for $14, to later barely escape being sent to the butcher's block and then to be given an opportunity to prove her worth as an economical producer of milk and butter fat, has been the

"Ohio" 1913 Model
The Improved Logical
Silo Filler

"Ohio" improvements for 1913 are radical—eclipse all previous efforts.
Don't close a deal for *any* Cutter and take chances with unknown makes until you see what the "Ohio" offers.
59 years' experience—*absolutely dependable quality.*

Famous Patented Direct Drive
is secret of "Ohio" superiority—the *only* machine that is driven, cuts and elevates *direct* from main shaft. Simple, compact—low-speed fan—*non-explosive*—*non-clogging* on any cut. Cuts *clean* on all crops—knives can't spring.

One Lever Controls All
Entire feed reverses by *wood friction* at finger pressure—no strain—not a gear tooth changes mesh. All gears perfectly housed. Famous "Bull-Dog" grip self-feed. Enormous *half-inch cut* tonnage, 50 to 250 tons a day—6 to 15 h. p. 20-year durability. Used by Experiment Stations everywhere. Guaranteed. Many big new features this year.

Warsaw-Wilkinson Co., 85 Highland Avenue, Warsaw, N. Y.

life history of Bess, a "native" or "common" Waukesha county cow. She spent her calf and heiferhood days in the herd of a farmer who relied solely upon physical appearances to determine the value of his dairy animals.

Fortunately, Bess fell into the hands of Frank G. Swoboda, superintendent of the Wisconsin Home Farm School at Dousman, who believes in giving everything and everybody a chance. Before discarding cows he believes in first finding out their milk and butter fat producing capabilities.

Accordingly, Bess was given a place in the barn and fed liberally of well-chosen feeds. Her milk was weighed twice daily and a monthly test was made to determine its butter fat content. To the complete surprise of even the superintendent, in a single year Bess produced 7,520 pounds of milk, which, because of its high butter fat content, yielded 414.9 pounds of butter. Needless to say, she was saved for present and future usefulness.

Mr. Swoboda follows the rule of refusing to discard a "native" or pure bred, which in a year will produce in excess of 300 pounds of butter. By a careful weeding-out process, and by continuing the use of high-class registered sires, his ambition to breed up a herd of great milk and butter producers has been partially realized. Two of the cows in the school herd have produced considerably over 10,000 pounds of butter in a year and several others promise to do equally well when they settle down to their regular pace. While developing a herd of most excellent producers, Superintendent Swoboda and his corps of excellent workers have also been transforming street boys into capable and independent farmers.

THE HIGHER UP WE GO.

To the Editor of The Homestead:

Once a man gets a taste of better things in dairying, he is not apt to come to a place where he will ever want to stop. There is always an inspiration to keep climbing.

Our first cows were very common stock. When we bought them, we had little ambition to do much more than to make a living on the farm. That was quite as much as the neighbors seemed to care about doing. We were just from town, tired of the office and longing for the freedom of the country. If we could only have all the good milk, butter, eggs, fruit and vegetables we wanted, and a chance to rest and breathe, that would be all we would ask.

But somehow a bee got into my bonnet and it did a lot of buzzing. What was the use of simply making a living? That was not much of an ambition. There must be something better in life than that. And we set out about finding it. The old, average cows of assorted sizes and colors no longer satisfied us. If there were anything better, we would like to know it.

So we began; and the line of demarcation grew more and more clearly defined from that day on. The better the cow we had, the better one we wanted. The higher up the dairy ladder we went, the more clearly we could see all around us, and the farther up we wanted to go. And we are trying to get up still higher, although a quarter of a century has gone by since we started.

Think what the better cow does for a man. She gives him more milk, for one thing. How we did enjoy taking in the milk of the better cow and showing it to the good wife! "This is what the new cow gave this morning. Isn't it fine?" And the steelyards were brought out to weigh the mess. That is one thing ambition does. It gets out the steelyards and measures things by their right, as well as by their prospective, value. No longer satisfied to guess at these things, we are on our metal to know just what every cow is doing. If we are putting time and money into any cow that does not think enough of us to give back as good as she is given, then it is time to make a change.

More yet. The milk from the better cow is better milk than the old cows gave. How do we know that? Why, we have had the new cow's milk tested. It looked to us as if there were a thicker cream on the pan than we had seen there before: the cream made rather more butter too: but how much better was the milk? That was what we must know. So we took a sample of old Brindle's milk and one from the new cow and had them tested. My! what a difference! Old Brindle's milk was pretty good, too. Why is it that a brindle cow does give rather better milk than the average cow? Or is that simply my notion? I have thought it to be true at any rate in our own herd.

But the test shows just how much butter fat there is in two samples, and throws old Brindle into the shade altogether; no longer common cows. Now we are ready to do anything reasonable to get the best possible cows.

Subscriber.

TRADE in your old separator on account of a new DE LAVAL

An up-to-date De Laval Separator will, on an average, save its cost every year over any other separator.

In addition to the actual saving in more and better cream there is also the saving in time of separation and cleaning, in easier running, greater durability and fewer repairs.

Because of these savings more than 40,000 users of inferior and worn-out separators of various makes last year took advantage of the De Laval exchange allowance and traded in their machines on account of De Lavals.

USERS OF OLD DE LAVALS, on account of the many improvements in the modern De Laval over machines sold 10 to 25 years ago, including closer skimming, easier running, better oiling, etc., will also find it to their advantage to exchange their old De Laval for an up-to-date De Laval.

SEE THE NEAREST DE LAVAL AGENT. He will tell you how much he can allow on your old machine, whether a De Laval or some other make, toward the purchase of a new De Laval. If you don't know a De Laval agent, write to the nearest De Laval office giving make, number and size of your present machine, and full information will be sent you.

THE DE LAVAL SEPARATOR CO.
NEW YORK CHICAGO SAN FRANCISCO SEATTLE

THE FREEMAN ENSILAGE CUTTER

Noted for its exceptionally clean cutting, smooth, fast running and its saving of power. The 16 inch Freeman gives excellent results with as little as 4 H. P.

HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

SHRUBS FOR ALL THE YEAR.

If they are properly chosen a small number of hardy shrubs will present a glorious floral procession lasting all summer. The secret is in getting the kinds which flower in succession rather than at the same time. No growing thing except grass helps to dress up a place so effectually as well planted shrubbery. It might be wise to emphasize the words "well planted," which means massed in the corners or scattered through the border, but not distributed like shoe buttons all over the lawn.

The floral parade opens in April with a fine burst of color when Forsythia comes into bloom. Most people know this splendid yellow flower, which appears long before the trees are in leaf. The weeping form, Forsythia suspensa, is not common, but is delightful with its long, pendulous branches.

Next comes the lilac, flower of sentiment and romance. Of late years many new and handsome lilacs have been introduced, by means of which it is possible to make the season of bloom much longer than it used to be. These new sorts are commonly grafted, however, and all the shoots which spring up from the roots must be cut off. Other good shrubs also bloom in May—some of the best spireas, the common snowball, and the bush honeysuckle, which is prized for its pink and fragrant flowers and for the bright, orange colored fruit it bears in the fall.

In June the beautiful weigelia blooms. There are two forms, one with green and the other with variegated leaves. The smoke bush, with its curious, misty, smoke colored flowers, is another and interesting June shrub; likewise mock orange and the rhododendron.

The sweet pepper bush, with its spikes of creamy white, fragrant flowers comes in July and lasts through into August. The white-leaved spirea is another midsummer shrub.

In August we have, among many, the shrub which bears the name of hydrangea paniculata grandiflora. Perhaps this is the most popular of all lawn shrubs. Certainly it is one of the most obliging, for it does not object to being cut and slashed in any way to suit the taste of the owner. If grown as a single specimen it is allowed to assume its natural wide-spreading, bushy form, but when grown in beds, should be cut back almost to a stub each season. Rose of Sharon in several varieties is a splendid August and September shrub.

Probably the most common cause of failure to secure a satisfactory number of blossoms from the flowering shrubs is pruning and trimming at the wrong time. Many a garden maker goes over all his shrubs with a knife conscientiously each spring and then wonders why they fail to blossom. The reason in many instances is that he has cut off the buds. All the shrubs which flower in spring and early summer prepare for blossoming the season before. It follows, then, that the time to trim them is immediately after they have blossomed.

The late, flowering shrubs, on the other hand, form their buds the season that they bloom. They are to be pruned in winter or early spring. In the latter list are Rose of Sharon, hydrangea paniculata, the bush roses and the later spireas. The majority of the common shrubs should have the shears applied immediately after flowering, if at all. And, after all, trimming should not ordinarily be severe. The average man fairly runs amuck when turned loose with a knife in a garden. The real purpose should be to cut out the old and dead wood, getting the blade as close to the bottom of the bush as possible, and to keep the new growth comfortably within bounds. More than that means cutting merely for the sake of cutting.—[Kansas City Star.

The English house of commons voices public sentiment with reference to one class of horses when it urges that means be taken to encourage the production of light draft horses suitable for army service.

Ireland has now sixty-five cow-testing associations, with a membership of 677.

VETERINARY MATTERS

PROFESSIONAL Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. Thoroughly good and reliable veterinary remedies are advertised from time to time on these pages. If they were not good and reliable they could not appear in our paper. Our readers are requested to look them over. You may find here some remedy which will exactly fit your case. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

PARALYSIS.

Have several sows with pigs that seem weak in their hips. They get down and cannot get up behind, and lose in flesh very fast. I have fed corn, oats and slop composed of ground corn, oats and wheat bran. They are out on grass now. I have a new hog house with cement floor well bedded with straw. Am just commencing to wean the pigs now. I noticed a description in a medical almanac which fitted this case pretty well, called it hip-shot.

There is no such disease as "hip-shot," and almanacs such as you mention should not be trusted, when standard books may be bought and studied. The paralysis described comes from pampering sows from birth on, by feeding too much corn and other rich feed and restricting exercise. Growing pigs should have mixed rations and run out all of the time, to encourage full development of bone and muscle. Corn should form but a small part of the ration for growing pigs and pregnant or nursing sows. Keep it for the fattening hogs. Feed sows plenty of alfalfa hay and roots during winter and make them take plenty of exercise every day; then they will have little, if any, trouble at farrowing time.

INDIGESTION.

(1) About March 20th I lost a calf about seven months old. The calves had been running on stock pasture and grass with plenty of water and salt, and some grain. It showed no signs of sickness, but a few minutes before it died it was lying down with other calves and suddenly it jumped up, ran around in a circle, lay down and died in a few minutes. I opened it found a dry, hard wad about the size of a gallon bucket in the small stomach. In about a week I noticed another calf sick, frothing at the mouth and gritting its teeth. I called a local veterinarian and he said it had every symptom of blackleg. We gave it a large dose of salts and vaccinated all the calves. He said he did not think it would live. In about a week it seemed better and passed black offensive manure. It would not eat or drink, so I drenched it with milk and when it seemed a little better turned it out with the other cattle, but it wandered off and acted crazy, so I shut it up and drenched with milk four or five days. It seems to eat some grass, but has drunk nothing for four or five days. It is a living skeleton and grits its teeth most of the time. I gave it a half pint of linseed oil a few days ago.

If backleg was present the calf would be lame and show a swelling on the or shoulder or some other part of the body. The symptoms described by you more indicate indigestion and impaction from eating coarse, dry grass or fodder. Copious doses of castor oil in milk give the best results in such cases and should be followed by stimulants in warm flaxseed tea. When the calf dies you probably will find impaction present.

FOUNDER.

A gray mare in foal seems to be stiff in the front shoulders and is weak in the fetlock of her hind legs. When being backed out of the stable she drags her front feet and when traveling on the road she trots like she had a wooden stick under her.

The symptoms indicate founder and she should be retired from work and given her freedom on grass, until after foaling. She may be fed oats and bran on grass. After foaling, if the trouble persists, clip the hair from the hoof-heads of both fore feet and blister them, one at a time, with cerate of cantharides at intervals of two or three weeks until she can go fairly well.

The accompanying illustration is that of the great Poland China boar, Jumbo the Great, at the head of the good herd owned by Orville O. Jones, York, Neb. Mr. Jones has good reason to feel proud of this boar, as he is one of the very exceptional boars of the state. He is big and smooth and plenty of quality and is an excellent breeder of very choice stuff. He was sired by Wade's Jumbo by the 1,000-pound Jumbo. Mr. Jones will offer boars by this sire at any time from now on. Mention The Homestead when you write.

The Most Coveted Trophy Ever Won By Any Motorcycle

THIS diamond medal was awarded a Harley-Davidson when it won the National Endurance Contest held by the Federation of American Motorcyclists. So exceptional was the showing the Harley-Davidson made that the judges not only awarded it a diamond medal and a perfect score of 1000 points, but in addition, because of the super-excellent performance, gave it a plus five, or 1000+5 score in all. This is the first and only time any motorcycle has been so honored. It was a fitting tribute to the quality of the

HARLEY-DAVIDSON

and proved its absolute reliability and durability, as no amount of minor records could.

There are two ways of getting a poor stand of corn—to get it too thin and to get it too thick.

NEWS OF THE SALE RING

Waukesha, Wis., Guernsey Sale.

The Guernsey breeders of Waukesha county, (Wisconsin), by offering a large number of choicely bred and well-fitted representatives of their herd and by agreeing to sell them under guarantees which would safeguard and satisfy even the most discriminating purchasers, attracted buyers from Ohio, Indiana, Iowa, Michigan, Minnesota, Illinois, North Dakota, Idaho and very many sections of Wisconsin to their fourth annual sale, which was held in Waukesha on May 22d. By pledging every animal to absolute sale, prohibiting all by bidding, guaranteeing all stock free from tuberculosis and holding every consignor responsible for his representatives, the confidence of the numerous buyers was stimulated sufficiently to induce the purchase of the seventy-seven consignments at an average of $287.50, which considering the number of young things sold, was regarded as a high figure. The top price of the sale was paid by Fred B. Smith, Terre Haute, Ind., for Glenwood Eventide, a well-bred four year old bred by Charles L. Hill, Rosendale, Wis., president of the American Guernsey Cattle Club. As a two year old, this heifer produced 7,048.9 pounds of milk and 302.48 pounds of b tter fat. The entire offerings was presented in good sale shape and the guarantees of the consignors established the confidence and gained the admiration of all in attendance at the sale. A list of the buyers follows:

The E. S. Mayes Jr. Duroc Sale a Decided Success.

On Monday, May 21st, Mr. E. S. Mayes Jr., Springfield, Ky., held a most successful Duroc sale. He sold a host of males, some not by prominent sires, while a few were by Defender and Superba. The males and gilts by or bred to these two noted sires sold good and there wasn't enough of them to supply the demand. Buyers and bids were in from ten states. Cols. H. L. Iglehart and C. C. Wheeler done the selling in a most satisfactory manner. A general good time was had, Mr. Mayes being some host. Below is a list of buyers and prices:

2.	McKee Bros., Versalles, Ky.	$175
3	A. F. Ogden, Anchorage, Ky.	100
4	McKee Bros.	42
5	H. L. Muir, Bondstown, Ky.	31

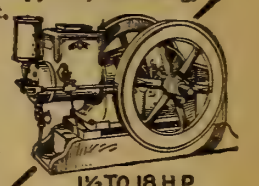
APPLETON

Appleton-Goodhue Windmills will pump your water economically, work whenever the wind blows and keep at it for years. For a nominal sum we will *Insure for 5 years* against cyclones, tornadoes, anything but neglect. Why experiment; buy a simple, sturdy, safe, self-oiling, self-governing Appleton Goodhue outfit.

FARM POWERS

When the wind don't blow you will need an Appleton Gasoline Engine and pump jack. You can belt on to the pump, when needed, or run your churn, hand sheller, etc. For heavy work, running the huskerorsilo filler you have your pick up to 18 H. P. Hopper cooled, speed changing device, single side rod; a perfect engine. Write us today.

APPLETON MFG. CO., 339 Fargo St., Batavia, Ill.



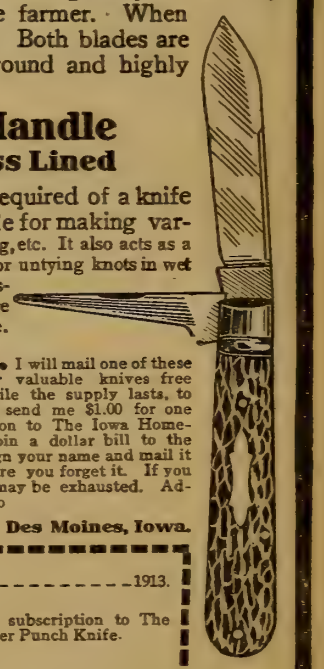
1½ TO 18 H.P. SKIDDED - PORTABLE

THIS KNIFE COSTS MY READERS NOTHING

You have read about the famous Leather Punch Pocket Knife—the knife that is called the "Marvel of Mechanical Ingenuity"—the only knife that was ever made especially for the farmer. When opened it is six and one-half inches long. Both blades are of finest tempered tool steel, perfectly ground and highly polished. The knife is complete with

Best Quality Stag Handle
Securely Riveted and Brass Lined

The large blade fills every common use required of a knife while the leather punch blade is indispensable for making various sized holes in leather for buckles, rivets, belt lacing, etc. It also acts as a swedging awl or marlin spike when turned to the left. For untying knots in wet rope and hard leather this blade has no equal. While possessing all these valuable features, the knife is no more clumsy or awkward to carry than an ordinary pocket knife.



My Guarantee I am so sure that this knife is all I claim for it that I am going to place a gilt edge guarantee on it. Send me $1.00 for one year's subscription to The Iowa Homestead. I will mail you a knife free. Try it for ten days. If it is not just what I claim it to be, you can return it to me and I will refund your money. You take no chances.

My Offer I will mail one of these valuable knives free and prepaid, while the supply lasts, to anyone who will send me $1.00 for one year's subscription to The Iowa Homestead. Simply pin a dollar bill to the coupon below, sign your name and mail it to me today before you forget it. If you wait my supply may be exhausted. Address all orders to

JAMES M. PIERCE, Publisher Homestead - Des Moines, Iowa.

Galloway's Famous Pumping Engines

Get My Special Engine and Pump-Jack Combination Offer—NOW! Yes, sir. Do it today. Don't wait a minute. Just sit right down and drop me a postal and say, "Galloway, send me your special pumping engine offer." I am out after the pumping engine business and I am going to get it because I am making the best pumping engine outfit ever made and selling it at a price never before equalled. You can't imagine the number of uses you can put one of these little engines to until you see my **Special Pumping Engine** catalog. It's something new and different and I have a copy waiting for you, free. Just write me for it without fail today. Don't wait until your windmill blows down or the calm hot days get here when the windmill won't run and you have to toil and sweat pumping water by hand for a lot of live stock. No, sir; don't do it. Be prepared. Get my catalog and special offer. That's the first step. Then—

Wm. Galloway, Pres.

$24.75 And Up

I'll Save You $25 to $300

on the first cost alone. I'll save you $25 to $50 on the best pumping outfit made. On my larger engines I can save you as high as $300 and more. Remember, we make engines in sizes from 1 3-4 h. p. up to 15 h. p. My 1 3-4 h.p. air cooled, little "Boss of the Farm" engine sells for only $24.75—an unheard of price. The same style of engine at your dealers costs from $45 to $65. Now, that's just a sample of what buying direct from Galloway means in money saved. Get my special pumping engine offer right away. Write today.

FREE Service Department. When it comes to help or information for proper installing to get the most profit out of your engine, just call on my Service Department composed of engine experts. Think of it. I not only save you money right at the start but put at your disposal a corps of experts who will tell you how to install your engine, size pulleys to use with different machines, anything, in fact, you may want to know, and this service don't cost you one cent. It's just another advantage you get when you buy of Galloway.

Write Today for My Catalog and Special 1913 Business Proposition

Here's a final clincher. My 1913 Special Business Proposition. I've got a new plan which will help you get your engine partly or entirely without cost to you in the end. No canvassing, no soliciting, no agent's proposition, for we don't sell through agents—but just a straight business offer. Will give full details when you write me. Send for special pumping catalog—offer—and my new bed rock engine prices. Don't lay this paper down and forget it. Write me now. Address me as below:

Wm. Galloway, Pres., WILLIAM GALLOWAY CO.

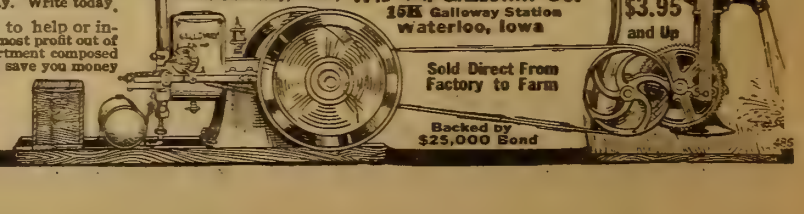
Waterloo, Iowa



THE HOME

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 639, Aurora, Missouri.

WITH THE EDITOR.

What happens when some one member of a family makes a practice of giving up his or her (it is usually her) wishes and plans, hopes and ambitions for the benefit of others? What happens too often is that the others instead of being benefited are, in the end, really injured by the self-sacrifice of the one who thought to serve them. Nothing is more foolish, more detrimental to both parties than mistaken self-sacrifice. Suppose a husband foolishly allows himself to be imposed upon by an exacting, lazy or ambitious wife—he cripples his own life and instead of serving the best interests of her he loves makes it possible for her to become less worthy of his love and of her own self-esteem.

Suppose a wife foolishly effaces herself in order to please a husband whose happiness requires the daily offering of incense, instead of serving him wisely she is catering to qualities which seriously interfere with both usefulness and happiness. Suppose a mother makes a sort of door mat of herself in her loving desire to be everything and do everything for her family. She is teaching them to be lazy and selfish, inconsiderate of her and careful only for their own comfort; she is actually digging pitfalls for the feet of those whom she holds dearer than life itself.

If we could but see the ultimate end of much self-sacrifice we would discover it to be a vice instead of a virtue, a curse instead of a blessing, and we would learn to study well before doing for others what they should do for themselves, before giving to others what they should win for themselves or do without—before robbing our own lives of opportunities and advantages and pleasures without which life is oftentimes stunted and joyless.

HOME AND HOMEMAKING.

LITTLE HELPS BY THE WAY.

Half the joy of life is in little things taken on the run.—David Starr Jordan.

In this world it is not what we take up, but what we give up that makes us rich.—Henry Ward Beecher.

You may own this plot of ground, and I that, but the horizon belongs to him who can interpret it!—Ralph Waldo Emerson.

THE BIVOUAC OF THE DEAD.

The muffled drum's sad roll has beat
The soldier's last tattoo;
No more on life's parade shall meet
That brave and fallen few.
On fame's eternal camping ground
Their silent tents are spread,
And glory guards, with solemn round,
The bivouac of the dead.

No rumor of the foe's advance
Now swells upon the wind;
No troubled thought at midnight haunts
Of loved ones left behind;
No vision of the morrow's strife
The warrior's dream alarms;
No braying horn nor screaming fife
At dawn shall call to arms.

Rest on, embalmed and sainted dead,
Dear as the blood ye gave.
No impious footsteps here shall tread
The herbage of your grave;
Nor shall your glory be forgot
While fame her records keeps,
Or honor points the hallowed spot
Where valor proudly sleeps.

RHUBARB WAYS.

Baked Rhubarb.—Wash and wipe dry the rhubarb. Cut into inch lengths without peeling. Put a layer into the bottom of an earthern baking dish, cover with sugar; repeat this process until sufficient quantity is used. Cover tightly; do not add water. Bake one hour and serve hot.

Rhubarb Marmalade.—Two quarts of rhubarb, two pints of sugar, two oranges, juice of one and grated rind of one; one cup of chopped raisins. Cut the rhubarb in pieces, cover it with sugar, and let it stand over night, then add other fruit and cook until thick. All my friends and neighbors who have tasted this marmalade have liked it and many of them have made it for themselves. If you wish you can make it without the raisins.

Orange Rhubarb Sauce.—Boil strips of orange till tender, then add sufficient sugar to form a thick sirup; lay into it very carefully a layer of rhubarb about two and a half inches long; when done remove to a glass dish, and so cook another layer till all the sirup has been consumed.

AMONG OURSELVES.

After a number of disappointments, due to first one cause and then another, we at last have the pleasure of giving the circle the picture of our good friend, Mrs. L. H. Palmer, of River Dale Farm, Baraboo, Wis.

MRS. L. H. PALMER.

Sometimes from neighbors or others I am able to gather enough facts to make a little sketch of the life of the friend whose picture we present, but this time there was no one to whom I could go for information but Mrs. Palmer herself, and all she tells is that she is "just an average farm woman who, having now raised my family, am trying to help in my feeble way other and younger women to see and understand and appreciate their duties and privileges as homemakers." It is a noble aim Mrs. Palmer has set herself and it was doubtless with it in view that she penned the message we are to have from her at this time:

"If the men are doing so poorly, what shall we say of the women who have trained them? We have made the men what they are." The above is taken from the pages of a woman's magazine and it should receive serious consideration. Woman and home have always been the loadstone that drew the family together and if the liberty to share men's work and take part in all business activities is causing us to neglect the God-given privilege of wifehood and motherhood we are losing the best and sweetest part of our lives. There is nothing that can satisfy true womanhood so much as to feel that she is the one that husband and children look to for care and loving sympathy. The influence of woman does much to make home life what it should be, and if all women fully understood how powerful and far-reaching might be their influence they would not be so careless of the precious boon. When a son or brother holds his head just a little higher as he speaks of his mother or sister he will respect all womankind, if not disillusioned by the easy license of those outside of home. "Woman's hand rocks the world," from babyhood to old age. Man, from prehistoric times, has reverenced sweet womanliness and when to that charm be added intelligence and fine executive ability we need have no fear that we will not be given any privilege we may desire.

Thinking over what Mrs. Palmer has said a question occurs to me. It is said that "no spring can rise higher than its source." Is it not equally true the quality of a woman's motherhood depends upon the quality of her womanhood? In other words, can a woman who is not developed as an individual, one who has not learned how big a thing life is and how wise and strong and brave and kind and resourceful one must be to be equal to its demands, can such an one be a really good mother? Olive Schreiner says somewhere that women perform badly the one task which is theirs by virtue of sex. If this is true—and it

K-R-I-T

The K-r-i-t - Farmer goes everywhere and always gets back

That is the reason that he is a K-r-i-t-Farmer. That is the reason that 4000 farmers are driving K-r-i-t cars.

The K-r-i-t is designed and built to meet the conditions, solve the problems and stand the severe test of the car that means real economy, real convenience, real service to the farmer.

The K-r-i-t-Farmer goes everywhere—and he always *goes*. You name us your county and we'll name you not only your nearest K-r-i-t dealer, but a dozen K-r-i-t-Farmers who will tell you why they bought K-r-i-t-s.

The K-r-i-t-Farmer always gets back because he drives a car designed and built for his roads, his sand, his hills and his income.

Power, strength, reliability, safety and durability are built into the K-r-i-t. They are K-r-i-t character.

You will find them embodied in the K-r-i-t motor; the K-r-i-t transmission; and the K-r-i-t axle.

The verdict of 4000 farmers is that the K-r-i-t is the Low-Priced car of High-Priced Efficiency.

K-r-i-t-Farmers go everywhere and always come back because they drive K-r-i-t-s.

4000 K-r-i-t-Farmers will give you in their own language the story of their K-r-i-t-s.

Then we will send the K-r-i-t out to your farm. Write today.

is, to a large degree—is it not because women have not, until quite lately, had the chance to develop the qualities they need to be mothers of the kind they fain would be? I wish the friends would discuss this.

Our next number is from "An Old-fashioned Mother," who brings us something a little out of the way:

My best labor-saving implement is very simple. Nearly every family has one or more if they realize the many uses it may be put to. Of course, I have a washing machine and sewing machine, without either of which I could not keep house. The first mentioned is the greatest saver for its capacity I ever had in my house. For want of a better name I call it my "right hand." Its uses are so many and varied. It is a bread mixer, a cake maker, a dish washer, or will prepare vegetables and many other tasks usually left to the hands of a busy mother. With the help of my "right hand" I can quickly clean up a room, sweep, dust and set it in order. It dresses the younger children and rocks the baby to sleep. There! I guess I've given a clue to my riddle. Here is the true explanation: It is about five feet, high, stands on two rather small feet, encased in shoes and stockings and, usually, when in use is covered with a long gingham apron. The top is covered with long brown hair; it has two strong, willing hands, two bright, blue eyes that look about to see the many ways she may help mother—my little twelve-year-old daughter. Am I wrong to call her my "right hand?" I have three other little girls who are following in big sister's steps. I would like to hear from other mothers—their ideas of teaching the little girls to work and the best ways to interest them.

This "Old-fashioned Mother" is to be congratulated upon the wise way in which she is rearing her girls to be her helpers. Like mercy this sort of thing blesses twice—both mother and children. By all means let us hear from others along the line suggested by this Minnesota sister.

A new member of our circle, Mary Eleanor Kramer, brings us a number of "seasonable recipes for June:"

Green vegetables are now plentiful, including asparagus, peas, lettuce, radishes, onions, spinach and early carrots. Thus many appetizing dishes may be added to the daily fare.

Asparagus with Eggs.—Two bunches of asparagus. Six eggs. Three tablespoonfuls of butter. Two teaspoonfuls of salt. Wash the asparagus; peel the tough ends, tie a bundle and put into a saucepan with enough boiling water to cover it. At the end of fifteen minutes add two teaspoonfuls of salt; boil half an hour. Remove from the fire, drain. Untie the bundle, arrange the asparagus in a baking dish. Spread half the butter over the asparagus and set where it will keep hot. Beat the eggs light, add the remainder of the butter, broken into bits. Pour this mixture over the asparagus and set the dish in a moderately hot oven for five minutes. Serve very hot.

Creamed Asparagus.—Wash carefully and break in inch lengths as far as each stalk can be broken. Cook in boiling salted water fifteen minutes. Drain and make a white sauce of one cup of water in which the asparagus was cooked and one cup of milk, thickened with two heaping tablespoonfuls of flour and two tablespoonfuls of butter, cooked together. Season with salt and pepper. Pour same over the asparagus and serve hot. The above may be served on hot buttered toast, by arranging the asparagus on the toast, then pouring the white sauce over all. Add a sifting of paprika.

Minced Spinach.—Wash the spinach thoroughly and boil in salted water (a very little) until tender. Drain in a colander, then turn into a tray and chop fine. Sprinkle with salt and pepper. For each quart of chopped spinach put two tablespoonfuls of butter and one of flour in a frying pan. When cooked smooth and before it browns, add the spinach; stir for five minutes, then add half a cupful of sweet milk, and cook three minutes longer. Arrange in a mound on a hot platter. Garnish with slices of hard-boiled eggs and serve at once.

Spring Onions on Toast.—Mince a bunch of onions rather fine, cover with cold water and set over the fire. When at the boiling point, drain and cover again with cold water. Boil ten minutes, drain, season with a little salt, a dash of pepper, a small piece of butter rolled in flour, and a few spoonfuls of milk. Have the toast ready, cut in rounds or squares and place a tablespoonful of the onion mixture in the center of each. This dish will be found odorless and delicious.

The remainder of our friend's offering—one sure to commend her to our cooks—will be given at our next meeting.

THE YOUNG FOLKS

For the best letter received each week we offer twenty-five cents; second best, a silver badge; third best, a pansy badge. Send letters to Aunt Mary, Hawley, Minn.

PRETTY POLLY.

(First Prize.)

"Pretty Polly" was a parrot, who lived with some children in the country. She was not kept in a cage. She flew about the house, and went outdoors. She could talk a great deal. She would sit on the fence or in a tree and cry, "Whoa!" to any horse that was going by, and he would stop quickly. Then Polly would laugh and say, "Naughty Polly!"

When the family was eating she would fly upon the table, perch very near the butter and put her bill in the very middle of it. Polly knew it was not right to do so, but butter was her favorite food.

There was an open fireplace in the kitchen. Once Polly crept in one night, and said, "Polly so cold! Oh, so cold! Poor Polly!" Ray called to her, "Come, Polly, get in bed with me, then you will be warm." Then saying, "Polly so cold," she trotted into his room, climbed upon the bed, crawled under the cover, and soon was fast asleep.

When Polly wanted to come in the house she would call, "Ray, let Polly in!" If he did not open the door quickly, she called, "Ra-a-y, Tom is here!" So when he came to see if Tom was really at the door, she would fly shouting, "Ha! Ha! Polly in!" Polly loved her home; but, sad to say, she flew away, and never came back again. But she was never forgotten by the children.

—Lucille Fierce, age 12.

Lost In The Woods.

(Second Prize.)

Our school went to the woods for a picnic last week. We went in a hayrack. After we had gone for about three miles we became so thirsty that we stopped at a house to get a drink. There was a very ugly dog by the well. He jumped so that he broke the chain and began to chase us. We all jumped into the rack and went without getting a drink. We did not stop at any house after that.

About half an hour after that we reached the woods. We unharnessed the horses so that they might eat grass. We looked around to find a good place to eat dinner. At last we found a pretty place near a brook. Here we spread our dinner. We ate part of the food we had brought, and saved the rest for supper.

After dinner the girls roamed off to pick flowers, and the boys went fishing. One of the girls got lost and we could not find her. We called and called, but we could not hear any answer. We became frightened and did not know what to do. Then we divided into three parties, each party going in different directions. Where we started from we left a paper which we had written on, telling her if she came there she should stay, for we were all coming back. We looked, but saw nothing of her. After our party had roamed for about two hours we returned to where we had started

69¢ A GALLON FOR GALLOWAY READY MIXED BARN PAINT

Genuine Galloway Ready-Mixed Barn Paint for only 69c a gallon. House Paint only $1.10 a gallon, in all colors. Write me for complete information about this wonderful paint. Big Doll For You

D-L-I-
D-M-L-

Can you fill in the blank spaces above and complete the doll's name? You can do this if you try. Just write and tell me what the name is and I will tell you how you can get this beautiful doll, nearly two feet tall and jointed at shoulders and hips. Her eyes open and shut, she has long flaxen hair and is beautifully dressed. You will be the proudest girl in your neighborhood when you get this doll, and she is yours for just a little easy work. Be sure to write and tell me her name today so I can send you my great free offer.

PEOPLES CO.
902 Popular Bldg. Des Moines, Iowa

from. When we reached there all of the girls were there waiting for us. Mary had roamed off, and when she could not find us she sat down to rest. While she was sitting there she fell asleep, and one of the parties found her asleep.

Then we went to our rack and prepared supper, for it was getting late. The boys had caught quite a few fishes, and we fried them for supper.

I enjoyed myself very much at this picnic, even if we did have an exciting time. —Elvera Johnson, age 10.

Some Good Advice.

(Third Prize.)

As I haven't any particular subject to write about, I will tell the young folks a few little helps to get through life easier. Be kind to all. Treat the poor as well as the rich. Do not be deceitful. Always tell the truth. Always be fair in all that you do, so people can trust you. Do not have a high temper; learn to control it. These are all I think of right now, and I hope they may help someone sometime.

—Hopeful, age, 12.

PLEASANT FIELDS OF HOLY WRIT

Save for my daily range among the pleasant fields of Holy Writ I might despair.—Tennyson.

THE INTERNATIONAL S. S. LESSON

2d Quar. Lesson 9 'Gen. 44: 4-17. June 1, 1913.

JOSEPH TESTS HIS BRETHREN.

The story of Joseph is a moving picture. It is instinctive with life, color, and activity. It moves not only itself, but it moves those who look at it. It has passed before each successive generation and aroused the strongest compunctions. It is the story of sin, its turpitude and penalties; exhibits the progress of awakening, conviction and conversion; reveals the possibility of forgiveness and reconciliation. Joseph was the most discreet pardoner the world has ever seen. If he had just condoned his brothers' sin against himself, he would have been casting pearls before swine. Forgiveness is too precious a thing for that. So he prepared a series of surprises calculated to remind them in a most vivid way of their sin twenty years before, and led them to regret it fervently. By these tests also their gains in character were revealed to him and were augmented in them. If Joseph had found his brethren just where they were two decades before in morals it was evidently his purpose to have disowned them, but to have rescued his own full brother from their vicious company. Great must have been his joy to find them so much improved. Twenty years before they would have left Benjamin in the hands of this apparently cruel viceroy to suffer whatever fate might be in store for him, just as they had put Joseph himself in the hands of the slave traders. They would have even put him to death, if necessary, to exonerate and free themselves. The distinct honor and preference which the viceroy had shown for Benjamin was enough to have inflamed their old envy if a spark of it remained. Again, Jacob had shown such partiality towards Benjamin that he was almost ready to let them and their children die of hunger rather than run the risk of losing him as he had lost Joseph in Egypt. But under the severest test the brothers proved themselves a firebrand new set of men. They thought nothing of themselves. They considered the effect upon their aged father if they should return without Benjamin. It would be his deathblow and "bring down his gray hairs with sorrow to the grave." They thought of Benjamin. Could they leave him to the fate of a slave? Splendid was their moral earnestness! It voiced itself in the deprecation and entreaty of Judah, which has been pronounced one of the finest specimens of dignified and persuasive eloquence. For pathos and sustaining dramatic power it is unsurpassed in literature. But back of the fervid rhetoric is the steel frame of a noble purpose. The climax of Judah's orderly and progressive plea is that he himself be allowed to take Benjamin's place and suffer in his stead any penalty that might be inflicted. Greater contrast to the cupidity, selfishness, and jealousy of twenty years before could not be imagined.

BUTLER STEEL **Grain Bin**

Corrugated. Can't Cave In.

Rat-Proof. Fire-Proof.

Can be used for store house. Capacity increased by additional sections. Keeps grain perfectly. Large door and removable shoveling board. Ask for booklet showing letters from satisfied users.

BUTLER MANUFACTURING CO.

OUR FASHION DEPARTMENT.

ALL PATTERNS, 10 Cents Each.

THIS department is prepared especially for The Iowa Homestead. We can supply our readers with high-grade, perfect-fitting, seam-allowing patterns at 10 cents each, postage prepaid. Full directions for making, as well as the amount of material required, accompany each pattern. When ordering, all you have to do is to write your name and address plainly, tell us the correct number and size of each pattern you want and enclose 10 cents for each number. We agree to fill all orders promptly and guarantee safe delivery. Address all orders to The Iowa Homestead, Des Moines, Iowa

5246 Ladies' Wrapper.—Here we have the ever-popular princess wrapper. Many prefer this tight-fitting style to any other. It is easy to make and suitable for development in a number of materials, some of which are cotton, challis, percale, albatross and cashmere.

The pattern 5246 is cut in sizes 32 to 44 inches bust measure. Medium size requires 7⅛ yards of 36-inch material. Price of pattern ten cents.

5778 Ladies' Maternity Dress.—This pretty dress closes at the front. It is made with a body lining. The skirt is cut in four gores and has an extra length at the top for readjusting. Any of the pretty silk materials can be used to make this dress with the collar, cuffs and fold at bottom of contrasting material or satin.

The pattern 5778 is cut in sizes 32 to 42 inches bust measure. Medium size requires 5 yards of 44-inch material, 1 yard of 18-inch all over and 2½ yards of satin. Price of pattern ten cents.

5937 Ladies' and Misses' Night Gown.—This night gown can be made with either the high or low neck and with long or short sleeves. Longcloth, nainsook, muslin or silk can be used to make this night gown with the neck edge of buttonhole stitch or embroidery.

The pattern 5937 is cut in sizes 30 to 44 inches bust measure. Medium size requires 4¼ yards of 36-inch material, 1⅛ yards of beading and 2 yards of ribbon. Price of pattern ten cents.

4949 Girls' Dress.—In the above design we have a practical little dress which might be made for school or other general wear. The full length closing at front is a new idea and aids greatly in the laundering.

The patern 4949 is cut in sizes 4 to 12 years. Medium size requires 3½ yards of 36-inch material with ¾ yard of 27-inch contrasting goods. Price of pattern ten cents.

5489 Ladies' Six-Gored Skirt.—In this handsome model we have one of the new effects using a plaited section as an insert at the lower part of the side seams. The panels are retained in front and back and there is no apparent widening of the skirt, although the plaits give greater ease of movement.

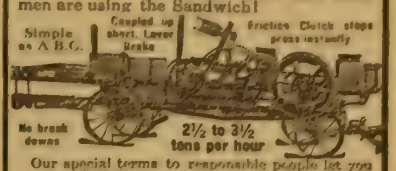
The pattern 5489 is cut in sizes 22 to 30 inches waist measure. Medium size requires 3⅛ yards of 44-inch material. Price of pattern ten cents.

5127 A Fitted Corset Cover.—The closely fitted outer garments which are now worn demand underwear that is equally fitted. The corset cover illustrated will fill every demand of fashion and should appeal to any woman who is at all inclined to stoutness. Cambric, muslin and batiste are suitable materials for making this corset cover.

The pattern 5127 is cut in sizes 32 to 44 inches bust measure. Medium size requires 1¼ yards of 27-inch material. Price of pattern ten cents.

SANDWICH
(solid steel—money maker)
Motor Press

Puts you—or your boys—in the big paying, fast growing business of baling hay! "Net profit $18 to $22 per day," write Swartz & Mensch, Dixon, Ill. Other hustlers making $200 to $300 net profits monthly. And these men are using the Sandwich!



Our special terms to responsible people let you start with little money. And you pay from your profits. Unless we know the Sandwich will make you stacks of ready cash, we could not sell on this way.

Gas Engine on Same Truck

Here's the most complete hay baling outfit in existence. Full power is driven from engine to press by heavy steel roller chain. It does away with slipping belts. The Gas Engine is the best quality—hopper cooled type—gear driven magneto—4, 6, 8, and 10-horse power.

The Sandwich has a simple time-tried self feeder and a big feed opening. A great windrow baler. Beats every ordinary press from 2 to 3 tons daily. 25 tons are an everyday job for the Sandwich; often 30 to 40.

FIELD NOTES.

Some good young Aberdeen Angus bulls are advertised for sale by John Lakings, Hurley, S. D., on page 27.

For bargains in high-producing Holstein cattle write Woodlawn Farm, Sterling, Ill., as per advertisement on page 12.

Some nice Chester White fall boars and sows are advertised for sale at $25 each by A. C. Orme, Nodaway, Iowa, on page 26.

High-grade Holstein cows and heifers due to freshen soon are for sale by W. C. Kenyon & Sons, Elgin, Ill., whose advertisement is on page 12.

For good values in Galloway cattle write James Milliken, Media, Ill. He has some extra strong young bulls for sale and also offers some attractive bargains in females. See page 26.

A. H. Windom, Nodaway, Iowa, is advertising some strictly high-class Poland China fall boars for sale on page 26. These are sired by the 950-pound boar, Pawnee Nelson, and there are a lot of good herd-boar prospects among them. The price for these is $40 and $50 if ordered right away. Mention The Homestead when writing him.

V. W. Harms, Fairbury, Ill., is offering some exceptional values in Percheron and Belgian stallions, as he still has a few high-class ones on hand that he wishes to sell in order to make room for his early summer importation. Owing to the latness of the season he will sell these horses at very attractive prices.

Every family in which there are boys will be interested in the advertisement on page 18 in which reference is made to a new 200-page sporting goods catalog. This illustrates and lists baseball goods, fishing tackle, tents, seines, bicycles, tennis, croquet, golf, hammocks, camp outfits and other goods of like character. Write for the catalog asking for No. 951 H. Address Schmelzer Arms Co., Kansas City, Mo.

John H. Fitch, Lake City, Iowa, the well-known Poland China breeder reports a nice crop of spring pigs on hand, together with a lot of fall boars and sows. He has thirty-five head of these fall boars on hand and they are sired by Jumbo Chief, that splendid son of the champion Sioux Chief and the remainder are sired by Grant King, a son of old Long King. Mr. Fitch would sell some of these fall boars at any time. If you want one write him and you can buy your pick of them now and at a price that you could not think of later in the season. When writing him kindly mention The Homestead.

Myles Harkins, Pleasantville, Iowa, will make a public sale of Duroc Jersey hogs on June 14th. He offers some good individuals and the opportunity will be an excellent one for bargains.

Short-horn bulls are advertised for sale by J. G. Westrope, Harlan, Iowa, on page 27. He has some good young Scotch and Scotch-topped bulls for sale and he is making special prices on these for the next thirty days. Write Mr. Westrope about these bulls at once or go and see them.

A few good young Short-horn bulls are advertised for sale by W. H. McLaughlin, Shelby, Iowa, on page 27. He will also offer a splendid herd bull for sale, a son of the celebrated Imp. Choice Goods. It will pay anybody wanting a bull to call and see the bulls he is offering for sale.

E. E. Handley, Carroll, Iowa, the well-known breeder of big-type Durocs has eighty-five head of spring pigs on hand and some good fall sows. His spring pigs are sired by his old grand champion boar, Frankfort K., and Crimson Chief Again, and he also has one good litter by Col. Gano. He will make a fall sale on October 3d when he will have another good lot of boars to offer the boys.

One of the best of Iowa farms is offered for sale in an advertisement on page 14 of this paper. It is quite conveniently located with access to three railroad stations. There is 260 acres of land all under cultivation and with an excellent set of improvements. A very low price will be quoted for an immediate buyer. Address inquiries to B. B. Burnquist, attorney at law, Fort Dodge, Iowa.

In the issue of May 15th in this paper we described some Shetland ponies owned by C. S. Bratt, Arapahoe, Neb. In this article we were made to say that Mr. Bratt owned a fine imported stallion that was thirty-four inches high and weighed 2,250 pounds, when it should have read 250 pounds. Mr. Bratt's stud is one of the finest in the West and readers of this paper looking for extra good Shetlands will do well to write Mr. Bratt at once, and when doing so, kindly mention this paper.

The remarkable popularity of the silage system of preserving corn makes every fact connected with the silo one of particular interest. Not the least of points to be considered is the ensilage cutter. The Silberzahn cutter is a claimant for the attention of those who are in the market for a cutter which is light running, economical, a uniform cutter and which is generally efficient. Particulars concerning the free trial offer of this cutter may be obtained by writing to Gehl Bros. Mfg. Co., 110 So. Water St., West Bend, Wis.

The Louden Sanitary steel cow stanchion advertised by them is the outgrowth of long experiment in search of a cow fastener which should be at once absolutely safe and afford the maximum of convenience and comfort for the cow. We might go on and say a great many other things about this stanchion, as well as the full line of Louden machinery. It is best, however, to obtain the catalog, which, in addition to a book of free barn plans, may be obtained by writing to Louden Machinery Co., 909 West Broadway, Fairfield, Iowa.

Perhaps one of the greatest evidences of the practicability of the automobile is the fact that a great many enterprising concerns are providing their traveling salesmen with cars with which to cover their territory. A single manufacturer recently placed an order for ten Reo model cars for such purposes. The Reo is, and has always been, one of the greatest successes as a bad roads car. It is a handsome one with every advantage that any other make can claim. Complete descriptions and special prices can be learned from R. M. Owen & Co., Lansing, Mich.

From time to time the announcements of the Studebaker Corporation have appeared in this paper. These have to do not only with automobiles, but a line of agricultural goods that have grown to be American necessities. The Studebaker Corporation is an immense one and one which, while it aims to provide farmers with goods worth the money at which they are sold, has also kept in view the interests of its employes in a rather remarkable manner. At a recent meeting of the board of directors it was voted that a special dividend be distributed at given periods to practically all employes of the corporation. The effect of the plan is really equal to a dividend of 20 or more to those who participate. This broad-minded scheme is one which other employing companies will watch with interest and which must certainly have its value among employes.

Scotch Heifers for Sale.

On page 27 you will find the advertisement of Perry O. Brown, Lamoni, Iowa, who is offering twenty head of choice young Scotch heifers for sale and these are good ones. Most of these are bred to his splendid young Scotch bull and they are bargains at the prices he is quoting. When writing him kindly mention The Homestead.

Angus at Chicago, June 18th.

Fifty head of high-class Aberdeen Angus cattle will be sold at Chicago, Wednesday, June 18th. These cattle are contributed by some of the leading breeders and the sale will be under the management of M. A. Judy, who offers this lot of cattle confident they will please the buying public. They have been carefully selected, both as regards breeding and individual merit, are all good, young ages and the kind that will give a good account of themselves. Full particulars regarding this sale will be given next week. File your application for a catalog along with M. A. Judy, West Lebanon, Ind., mentioning The Homestead when you write.

Minnesota Farm Land Bargains.

A good quarter section of land in Fillmore county, Minnesota, is described in an advertisement on page 14 of this paper. The description is that of an unusually good farm and one which cannot fail to be a profitable investment for any farmer who will buy it and operate it. Its improvements are very complete. Its location is desirable and the price is within the reach of nearly any farmer, while the terms are quite reasonable. Address inquiries to Everett Jones, Spring Valley, Minn.

Early Maturing Seed Corn.

Conditions of the present season are forcing farmers into a realization that where corn planting has not yet been done varieties of seed should be used which mature early. For this purpose we call the attention of our readers to the list enumerated in the advertisement of the Iowa Seed Company on page 14. This list includes some of the most dependable kinds of corn that have been originated. The prices are reasonable. Read the advertisement and send orders to Iowa Seed Company, Department D-1, Des Moines, Iowa.

Order Your Pigs Now.

In a recent letter from J. O. James, Braddyville, Iowa, he says he still has some sensational pigs that he is booking orders for for June delivery at $25 to $35. These are sired by his sensational boar now used at the head of his herd and are out of sows weighing 700 to 800 pounds. No better bred big-type herd can be found today in the West. You can save money by ordering these pigs now. He is selling both boar and sow pigs. Send him your order for these pigs right away, and leave the selection to him. When writing him kindly mention The Homestead.

Choice Angus Heifers for Sale.

Those of our readers who are wanting to buy some good young Aberdeen Angus heifers at private sale should write to or call on Chas. Escher, Botna, Iowa, as he has a very choice lot to sell. The most of these are sired by his imported bulls or are out of imported cows. In point of breeding and individual merit you cannot buy better anywhere and he is pricing these where they will sell. Some enterprising farmer who is thinking of going into the breeding of Angus cattle can pick up a foundation here and get them right. Write Mr. Escher about these at once and kindly mention The Homestead.

Lefebure's Belgians.

Henry Lefebure, Fairfax, Iowa, one of the leading importers of Belgian horses in the United States, has enjoyed an excellent trade during the past season. Each year his business grows and this is largely due to the fact that he handles high-class horses and treats his customers in a straightforward businesslike manner. During the past season he has sold more horses than in any previous year, but at the present time has a number of big, heavy-boned, drafty Belgian stallions on which he would be glad to quote prices. If you want high-class Belgians Mr. Lefebure can please you. See page 27 and when writing kindly mention this paper.

Meinhold'c Poland Chinas.

H. C. Meinhold, Stromsburg, Neb., is offering for immediate sale his herd boar, Big Jumbo, a son of J.'s Jumbo. J.'s Jumbo is and has been one of the best breeders in his section of the country, and Big Jumbo is also a good breeder as shown by the crop of spring pigs on the farm. Gilbert Johnson, Osceola, Neb., bred this boar, and his herd sows and by the way, they are one of the real good ones of the country are nearly all by J.'s Jumbo. J.'s Jumbo is sired by Wade's Jumbo, another boar that is doing a good work for the big hogs of Nebraska. Those of our readers looking for a good boar at a small price will find him in this boar offered by Mr. Meinhold. Address him, mentioning The Homestead.

Fisher's Poland Chinas.

We are glad to direct the attention of our readers to the Poland China advertisement of L. S. Fisher & Son, Edgewood, Iowa, on page 26. These gentlemen are now offering for sale September boars and gilts by Giant Wonder that are worth a good deal more money than is asked for them. They also are prepared to part with some extra good gilts bred for September farrow by H.'s Longfellow. The Messrs. Fisher have adopted the plan of pleasing their customers and running all risks. They prepay express charges and ship stock on approval, which is as good a guarantee as anybody could make. For special prices address L. S. Fisher & Son, R. 1, Edgewood, Iowa.

H. O. Harney's Durocs.

One of the nicest lots of Duroc pigs that the writer has seen to date we saw on the farm of H. O. Harney, Aurora, Neb., a short time ago. Mr. Harney is one of the good Duroc breeders of the state and we are right glad that he has so fine a lot of stuff. Disease took a big share of the crop on the farm a year ago, and it was pretty expensive staying in the fight, but he now has a big lot of immune stuff that should be doubly valuable this season. All of the sows purchased last winter by Mr. Harney were treated as soon as received and they all did very fine indeed. The spring pigs are being immuned as fast as they get big enough and his herd will be in excellent shape from now on. One of the good two-year-old boars that we have seen to date this season is here. He is Gold Model by Golden Model and he looks like he might make a very fine showing at the fair this fall. A very fine litter of pigs by Theobold's herd boar, Valley Chief Col., are on the farm. They are about as good as we have seen thus far. They are out of a daughter of King Col., and she is out of Ohio Lady the noted daughter of Ohio Chief. It would be hard to imagine them better bred, and they look mighty good to the writer. Mr. Harney will have a selected lot of spring boars for sale this fall, and those looking for good ones will be able to find them here. Mr. Harney is a good stockman, and his herd is as good as the best for the numbers.

Hereford Bulls for Sale.

On page 27 you will find the advertisement of A. Spooner & Son, Mondamin, Iowa, who are advertising fifty head of good young Hereford bulls for sale and they are pricing tnese where they will sell. These are well bred, good boned and big, lusty fellows. It is a good time and place to buy one or as many as you want. Write Spooner & Son at once or go and see these bulls. Kindly mention The Homestead when coresponding with them.

Clydesdale Stallion Bargains.

The man that is wanting to buy a good young Clydedale stallion should go and see R. O. Miller, Lucas, Iowa, and do it at once. He is desirous of closing out his Clydesdales and he has a number of very choice young stallions on hand. Among these are some that have been winners in the strongest shows in Canada and they are good ones. Mr. Miller is offering these stallions at prices that will sell and the man that wants a bargain can get it from Robert Miller if he will only go and see him.

Grinnell College.

Grinnell College, Grinnell, Iowa, is advertised on page 18 of this paper. This is an institution of the highest standing. Its record is an invaluable one and the advantages which it presents are superior. These include a group of studies of national standards of demand, superior equipment along scientific lines, a library of 48,000 volumes, eleven buildings on the campus, a gymnasium for men and a gymnasium for women. The instruction in all regular branches is superior. The school of music has an excellent equipment. The sixty-third year of this school begins September 17th. Catalogs may be obtained by writing to Grinnell College, Grinnell, Iowa.

Metal Stack Covers.

Those who have used metal stack covers do not hesitate to praise them. They are a rather new thing, quite in keeping, however, with modern progress. J. J. Clarke, Medicine Lodge, Kan., writes that when he baled his alfalfa last winter "it came out of the stacks as bright green as when it went in. Alfalfa will not sweat or bleach or fade when covered, making it a grade better on the market and sell for at least $1 a ton more." The Martin metal stack covers are rust proof and are used on all kinds of hay with equal success. If you want to protect your hay in stacks from rain write for illustrated circular to Martin Metal Mfg. Co., Wichita, Kan. It will tell all about the covers.

Nels H. Holm's Red Polls.

One of the newer good herds of Red Polled cattle of Nebraska is the one owned by Nels H. Holm, Osceola. Mr. Holm is an enterprising citizen and maintains one of the good stock farms of the country where may be found extra high-class Duroc Jersey swine, Shire horses and Red Polled cattle. Only a few fall boars are for sale from the Duroc herd, but an excellent bunch of spring pigs are on hand. Parties living long distances will do well to order spring boars and gilts now. The very pick of the spring boars are priced at $20 and others at $15. Two very good Red Polled bulls are for sale and also a limited number of females. Parties interested should write and when doing so kindly mention The Homestead. See page 24.

P. M. Lott's Tamworths.

The leading herd of Tamworths of the South Platte county of Nebraska is owned by P. M. Lott, Fairmont. Mr. Lott recently wrote saying that he had some very fine early pigs as well as a nice lot of fall stuff. This herd is one that was founded with the very best to be had in the way of breeding stock, and good seed well cultivated is bound to produce well. The old boar, and one that is responsible for much of the success of this herd is Knoll Slope King, and he was recently sold to M. D. Shaw, Cumberland, Iowa. Some early March and late February pigs are weighing better than seventy-five pounds each, and orders will be filled from this time on for boars. Further notices of this herd will appear from time to time in The Homestead. Kindly watch for them, and in the meantime address Mr. Lott for prices on this stock, mentioning this paper.

C. B. Kneer's Poland Chinas.

One of the really good herds of Poland Chinas of the country is the herd owned by C. B. Kneer, Stromsburg, Neb. Mr. Kneer has been in the Poland China business for many years and has sent out a great deal of desirable stuff. Just now he has a very select lot of fall boars that he wishes to sell. The season for fall boars is just a little late and Mr. Kneer prices these boars below their real value for that reason. The best lot of fall gilts that we have seen to date are on this farm and a few are bred for early fall litters. Most of this fall stuff is sired by Expansion Bob, by old Expansion. He is one of the very few sons of old Expansion that are now alive. The spring pigs are all by Herod 2d, by Herod, by Jumbo Jr. Herod is a brother to Shattuck's famous boar, Sampson. Mr. Kneer recently bought a very valuable boar of Beall & Jackson, Roca, Neb. He is the making of an extra big fellow. He is by Nebraska Wonder, by A

Wonder. Homestead readers looking for good boars will do well to write Mr. Kneer.

Cartwright's Durocs.

J. W. Cartwright, Burlington, Iowa, is an enthusiastic breeder of Duroc Jerseys and will hold his first sale of pure-bred Durocs on September 26th. At that time he will sell a number of fall boars sired by Col. Defender 2d, a grandson of Defender, and a bunch of spring boars and gilts sired by Improver Col, and Col. Improver, both of which are sired by Proud Col. and Defender Boy, a son of Defender. These pigs are out of sows sired by Proud Col., Proud Advance, Proud Ohio Chief, W. R.'s Chief and others. Mr. Cartwrights has 125 spring pigs that are promising and barring accident will make an attractice offering.

McCormick's Polands.

C. A. McCormick, Mechanicsville, Iowa, has a good herd of big-type Poland Chinas and has over 100 good spring pigs at the present time. The pigs are sired by Orange Surprise, an extra big, growthy, heavy-boned yearling boar by Crow's Kind, Matchless Expansion, a good breeding son of Dorr's Expansion, and Big Bone Wonder, a son of the noted Big Bone. This is a good trio of boars and they are siring a nice lot of pigs for Mr. McCormick. Mr. McCormick held a brood sow sale last year and received many compliments on the high standards of his offering. He has some extra good, big, smooth sows in the herd sired by Miller's Longfellow, Chief Jumbo and otehrs of note.

Flying Dutchman Hay Tools.

The Moline Plow Company one of the pioneer institutions of the West, which has from the start devoted its attention to the manufacture of agricultural machinery, has assumed the manufacture and distribution of the Flying Dutchman line of hay tools. These are the Adriance mower, the Flying Dutchman hay loader, the Flying Dutchman side delivery rake and tedder and the Adriance all-steel rake. An advertisement of these goods occupies a prominent position on page 7 of this paper. It gives a great many details concerning each of the machines. Not all, however, as they have so many points of excellence that it is necessary to set them forth in a handsomely illustrated circular, for which write to the Moline Plow Co., Department 11, Moline, Ill.

Col. Z. S. Branson.

A gentleman who understands thoroughly the principle of expert salesmanship, who adds prestige to an auction by his dignified bearing and who in his arguments advances sound logic that cannot fail of convincing is Col. Z. S. Branson, Lincoln, Neb. Twenty-eight years has Colonel Branson been selling for the very best stockmen and real estate men of the country. Evidence of his ability lies in the fact that he still continues to sell for these men. All of the leading pure-bred horse sales held in the West the past season have been conducted by Colonel Branson. The writer has assisted in a great number of sales where Colonel Branson has officiated and we know that much of the success of these sales was due to the efforts of the master salesman. His methods are clean and honorable, his ideals high and his efforts untiring. We recommend colonel Branson.

A. L. Diehl's Hampshires.

The writer recently called on A. L. Diehl, Benedict, Neb., and wish to say that this progressive stockman has a nice lot of Hampshire swine. Mr. Diehl has been buying the best stuff offered for sale, and the most of the sows and the herd boar are among the best that we have seen to date. We are especially pleased with this boar. He is our ideal of a Hampshire. He is extra big and yet smooth, heavy boned and good footed. He is perfectly marked and we think will add some value to this herd as a sire. Some exceptionally good spring pigs are on the farm and will be sold privately. Mr. Diehl is pricing these pigs at such figures as make them bargains. The herd boar, we mention is Prince, by the Good-enough-bred boar, Pride of The West, by Majestic Boy. His dam is Lady Fullerton by Teddy R. B. He is a boar to keep in mind. When writing Mr. Diehl kindly mention The Homestead.

Browning and His Champion Herd.

The name of Browning has become so thoroughly fixed in its connection with Duroc Jersey hogs that the mention of one is really a suggestion of the other. H. E. Browning, who for several years has been on the field force of this paper as a solicitor of advertising, has found the interests of his herd to be increasing so rapidly as to demand his entire time and attention. He has therefore severed his connection with this publication and from now on will be found at Hersman, Ill., directing the affairs of the grand champion herd of Duroc Jerseys. This paper has regretted very much the turn of affairs which make this course seem necessary. During the entire time of Mr. Browning's connection with us his work has alike been satisfactory to this publication and to its patrons. His thorough knowledge of Duroc Jersey breeding, of the affairs of breeding and handling hogs and his familiarity with men of force in Duroc Jersey circles made him well fitted for the important position he occupied. We are just in receipt of a letter from Mr. Browning in which he says that he is getting together the strings which he has so long trusted to other hands and will now give his herd such attention as to push it still further to the front. He finds many things to do and takes a great deal of enjoyment in doing them. We shall look for the Browning herd at the fairs this fall and expect it to show even greater merit and bloom than in former years. Any reader of this paper who is interested in Duroc Jerseys will do well to get in correspondence with H. E. Browning, Hersman, Ill.

Bay's Offering of Good Short-horns.

Some decidedly good propositions will be offered in the Short-horn sale of John M. Bay, Aledo, Ill., Wednesday, June 4th, the day following the Stanton sale at Wheaton. Mr. Bay has cataloged forty head, thirty females and ten bulls over one-half of which is of the best Scotch breeding. There are eight young bulls in the sale, all the get of Challenger, the strong Scotch son at the head of Mr. Bay's herd and the breeder and the farmer will find among them plenty of good material. The female portion of the offering contains much that is very attractive and the party wanting good Short-horns should not overlook the sale. Mr. Bay is selling a well-bred, dependable lot of cattle, does not expect anything but reasonable prices and it would seem as though the discriminating buyer could secure cattle well worth the money. Aledo is easy of access, being on a branch of the Burlington and can be reached over the Rock Island Southern Interurban from Galesburg, Monmouth or Rock Island. The sale will be held in town.

C. B. Powers' Poland Chinas.

One of the real good Poland China breeders of Nebraska is C. B. Powers, Aurora. Mr. Powers has raised a lot of the real good stuff of central Nebraska the past several years, and this year has a wondeful bunch of stuff and from only a few sows. Mr. Powers has raised some of the best boars grown in the West the past few years. Among them was Expansion Again, a boar that reached as great a weight as any boar for his age that we know of. He died before two years of age, and had only sired a limited number of pigs, for the reason that he was a late May pig and the first season was not used, and the later season died when he should have been coming right into his best. However, there are a number of sows on the farm by him, and they are unusually good. A younger boar and one that appeals to the writer very much is a son of Expansion Again and out of the great breeding sow, King's Giantess by Long King. King's Giantess is one of the very best Long King sows that we know of and is a great breeder. She is also the dam of the noted Powers boar, Big Bone. Big Bone is one of the great big kind, and breeds extra well. He is the sire of a greater part of the spring crop on the farm just now. Big Bone gilts bred to Again Expansion, the younger boar that we just mentioned, should be good property, and they are the sort that may be offered in the winter. However, Mr. Powers is planning on making a fall sale, and at that time will dispose of the greater part of the spring crop. Again Expansion is a boar that we look to win at the state fair this fall, and we believe that he has a mighty good prospect for champion honors. He was second prize in his class last fall, and had many friends for the first place. Keep this good herd in mind and watch for further announcement of the fall sale.

Thos. F. Miller's Polands.

Readers of The Homestead will be glad to know that the veteran breeder of big Polands, Thos. F. Miller, York, Neb., has a fine lineup of spring pigs on his finely appointed stock farm. Without question Mr. Miller is one of the best stockmen in Nebraska today. His herd of Poland Chinas has contributed much to the popularity of the Nebraska hogs, and the crop on the farm this year give much promise of eclipsing any previous crop from the famous Cedarbank Farm. This statement means much to those that have kept in touch with the former offerings of Poland Chinas raised on this farm, but the writer is familiar with the stock produced and we make the assertion without hesitation. The crop this season is simply one of the very best lots of 125 spring pigs that we have ever seen on one farm, and they are from such large, uniform litters. Many of the sows are raising upwards of nine pigs each, which is, of course, most unusual for any kind or breed. The pig crop is sired for the most part by a son of Long Chief 2d, called Ringmaster. This boar has certainly bred well. Another son of Long Chief 2d and out of a daughter of Big Bone is the sire of quite a number and we wish to say that he is an extra good individual and his pigs promise extra well. Another boar is a son of Big Price and out of a daughter of Long King. This boar is breeding well, especially his gilts look well, but we are not so well pleased with him as the boar just mentioned before him. The boar that the writer likes above all the rest of the boars in the herd is one from the Mouw herd, and is just now a year old. He is sired by Black Big Bone and out of the best producing sow on the Mouw farm in recent years. The writer believes that this will make one of the best boars within the state. and only one or two other yearlings we have seen please us so well. One or two litters are by him, and they are among the very best on the farm. Mr. Miller will probably sell the boars from the herd at private treaty and those of our readers interested in the real, big Poland Chinas should write soon for a description of anything they wish. When writing kindly mention The Homestead.

Schmieder's Poland Chinas.

One of the best herds of Poland Chinas that will be found in northwest Iowa is that of John Schmieder, Remsen, and he has a splendid crop of 160 head of spring pigs this season. The boar that Mr. Schmieder is using at the head of his herd is Blue Valley Chief, a son of Combination and he in turn was a son of Blue Valley Quality. His dam is Nebraska Girl by Nebraska Hadley, and you can take it from us that here is one of the best boars today in western and northwestern Iowa. He is a hog that has plenty of size, a wonderfully thick and well-balanced boar from end to end, and for a hog of his size has a splendid head and ears. He is a masculine boar in character, a good-boned fellow and walks off like a cart horse. This hog was a first-prize boar at the Nebraska State Fair in the under-six-months class and he was a fist-prize winner at the Interstate Fair last fall. In fact you will not find many boars at the heads of herds that will compare with this boar. About half of his present spring crop is sired by him and he also has eight good fall boars that are also sired by him. These fall boars are out of daughters of Dorr's Expansion, Big Smoke and Big Tom. A man who is wanting a good fall boar can buy one of these and get him right and there is not a one in the bunch that will not make a good boar to head a herd. The remainder of his spring crop are sired by Schmieder's Big Ex and Paney's Defender, the latter hog being a boar that he and Henry Dorr purchased at the Nebraska State Fair last fall. He has a nice litter of seven by the old boar and out of Dude's Queen, the second-prize sow at the Sioux City Fair last fall and another good litter that is out of a daughter of Blue Valley Chief that was third-prize sow at the Interstate Fair last year. This litter is sired by the first-prize fall yearling boar he bought of Lingford last year. He has a nice late litter of six pigs by Dorr's Expansion and out of Evergreen Lady, the dam of Caverly's sensational boar back East. Just now Mr. Schmieder will sell those good fall boars and anyone wanting one should order right away, because now is the time to buy them. When writing him kindly mention The Homestead.

Henry Dorr's Poland Chinas.

One day recently we visited the herd of that well-known breeder, Henry Dorr, Remsen, Iowa, and found he had 170 head of spring pigs on hand and he always has some good ones. When it comes to breeding Poland China hogs they will have to take off their hats to Henry Dorr, because he not only breeds the kind they are all wanting, but he also breeds the kind that brings the money over the scale. His present spring crop is sired by his famous old boar, Dorr's Expansion, a boar that Mr. Dorr says will stay on his farm as long as he lives, and the old boar is still looking well and doing good service. Here is a boar that has helped to make the Dorr herd famous throughout the East and the West and he is one of the great breeding boars today that will be found throughout the West. The remainder of his pigs are sired by D.'s Monarch, a son of Golddust Hadley, Expander, a son of Long Hadley and Big Tecumseh, a son of Blue Valley Chief. He also has one litter by Columbus and a few by other boars that are out of sows he bought last winter. He has a splendid litter of eight by Dorr's Expansion and out of a daughter of Fesenmeyer's old A Wonder. Mr. Dorr has a number of good fall boars that he is now offering for sale and he wants to dispose of these as soon as possible in order to make room for his spring crop that is now coming on. He has two good herd boars that he will also offer for sale, just because he has too many boars in the herd. One of these is Expander and the other is Pawnee Defender. Either one of these will make a good herd boar for some man who is looking for a herd header. The latter boar is a yearling and will make a wonderfully big hog and the man who is looking for a boar of this kind should get in touch with Henry Dorr right away. He also wants The Homestead readers who want a good fall boar to write him at once. Kindly mention this paper when corresponding with him.

Shetland Ponies.

In an advertisement on page 24 Mrs. H. E. Simon announces that she has for sale Shetland ponies of all ages and that reasonable prices will be quoted on them. Address inquiries to Mrs. H. E. Simon, Route 3, Burlington, Iowa.

Angus Bulls for Sale.

On page 27 H. R. Davis, Corning, Iowa, is advertising some splendid young Aberdeen Angus bulls for sale and some of these are good enough to head herds. He is offering a good two-year-old bull sired by Blackbird Dan, a son of the great Black Woodlawn. This bull is out of a daughter of Gay Blackcap and is a well-bred fellow and will make a good breeding bull. He also offers three nice yearling bulls, all sired by Sir Blacknight, a double-bred Blackbird bull. He is pricing these bulls where they will sell and if any of our Homestead readers want one they can buy them right. Write Mr. Davis about these bulls at once or go and see them.

Gaffey's Chester Whites.

That well-known breeder of Chester Whites, W. E. Gaffey, Storm Lake, Iowa, has 120 head of good spring pigs far this year and about four head of fall boars on hand. The boar at the head of the Gaffey herd is Sam B., champion boar at the Sioux City Fair in 1910 and 1912, and he is the sire of many of the pigs. The others are sired by Young Sam, and he is a son of the old boar and out of the prize-winning sow at the Interstate Fair in 1910. He also has quite a few pigs by Peach-blood Chief, who in turn was out of a Chickasaw Chief sow. Altogether he has twelve litters by old Sam B., and among these are some very promising pigs. The fall boars that he has on hand are sired by Crystal Chief and he is also a Chickasaw Chief-bred boar. He will sell these fall boars at any time and later in the season he will have some good spring males to offer the trade. Remember Mr. Gaffey when you want a Chester White boar this fall.

Stanton's Great Short-horn Sale.

Tuesday, June 3d, will occur at Sittyton Grove Stock Farm, Wheaton, Ill., one of the big Short-horn events of recent years. Our readers have already been informed Thos Stanton recently purchased the entire herd of George J. Sayer, McHenry, Ill., and will offer the tops at public sale next Tuesday. To the cattle he is selling from the Sayer herd Mr. Stanton has added some very strong things from his own herd, so that the entire offering falls little short of sensational in every particular. Two International champion bulls, Roan Sultan and White Star are listed and Mr. Stanton has cataloged his Browndale Sultan, the outstanding son of the champion Avondale. Show females will be offered in profusion headed by Imp. Fair Start 2d, with a bull calf at foot by Roan Sultan. The showman and the breeder will find the sale of the year while the beginner looking for foundation stock of the richest breeding and strongest individual merit can secure it at the sale. Remember the date, next Tuesday, June 3d, at Sittyton Grove Farm, Wheaton, Ill.

Poland Chinas Guaranteed Cholera Immune.

The first man to sell pure-bred swine and give an iron-clad guarantee to refund the purchase price if the animals die of cholera, is W H. Cooper, Hedrick, Iowa. Mr. Cooper is a well-known live stock auctioneer and one of the leading breeders of this class of Poland Chinas in the corn belt. He has the finest equipped swine raising plant in the state of Iowa. He has built up a business by square dealing and making good his guarantees and his yearly sales have been running from $7,000 to $10,000. We have never heard of any dissatisfied customers who have bought stock from Mr. Cooper. He is offering 100 head of spring pigs either sex, singly or in pairs or trios at $35 each or three for $100 and guarantees to refund the purchase price if they die from cholera. Their sires and dams have been immuned and these pigs have all received the double treatment. Mr. Cooper has given the double treatment enough trials during the past year to satisfy him that it is a success and is willing to back his judgment with money. The pigs are from sows weighing up to 800 pounds each and descending from the most noted blood lines of the breed. The pigs are sired by Big Expansion, an 800-pound two-year-old son of Dorr's Expansion, Big Bone 2d, a 900-pound son of Big Bone, and Chief Leader, a great young boar just past a year old and weighing 500 pounds. These pigs are ready to ship any time and are guar-

An ONLY for Service

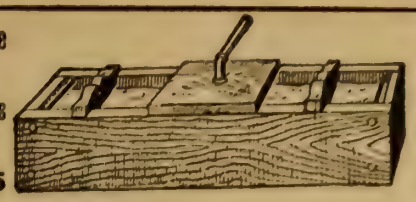
An ONLY for YOU!
ONLY $3.75



This is our 6th year in the business and ever increasing sales is the proof of its ability to do the business in the hog yard.

The time is at hand when the farmer requires just as clean water for his hogs as for the horses or cattle, and that will be conservative of the water supply, and automatic with the needs of the stock. We have all these requirements in the "ONLY" Hog Waterer. Ask for our new book, "HOG SENSE." It's FREE. Address

ONLY MFG. CO., Dept. H, HAWARDEN, IOWA.

NEXT WEEK'S SALE PROGRAM

Tuesday, June 3 — Short-horns, Thos. Stanton, Wheaton, Illinois.

Wednesday, June 4 — Short-horns, John M. Bay, Aledo, Illinois.

anteed to give satisfaction. They are all recorded and to show the reputation of Mr. Cooper's herd over a wide territory we might say, Mr. Cooper has twenty-two spring pigs already sold to go to nine different states. We have known Mr. Cooper for several years and being acquainted with his method of doing business, can say that he makes every statement good. Our readers need not hesitate in sending him their order. See his advertisement on page 26 and when writing him kindly mention The Homestead.

Col. H. S. Allen, Auctioneer.

It is with pleasure we call Homestead readers' attention to the auctioneer card of Col. H. S. Allen, Russell, Iowa, on page 24. Colonel Allen has been one of the foremost breeders of Duroc Jerseys in the West for the past twelve or fifteen years and he is now giving attention to public sales, and has cried sales in four states to the satisfaction of all his patrons. Few men have bred as many high-class Duroc Jerseys as has Col. Henry Allen, and the breed has made material advancement through the hogs that he has sent out from his herd. While he is especially well posted in Duroc Jerseys he is nevertheless posted on the other breeds and he will cry sales for anybody and everybody that wants him. He has about twenty-five sales booked for the fall and about the same number for the winter and he still has a few open dates that he will book for anybody who wants to engage his services. If you are thinking of making a sale and want a well-posted auctioneer write Col. Henry Allen and have him book a sale for you.

Motorcycle Days.

These days the motorcycle is seen frequently along the highway. The swift little machines are going back and forth on errands of immediate necessity, mercy, pleasure and business. They give most of the pleasures of automobiling at a small percentage of the cost of buying and operating a car and are becoming more popular every day on the farm as they can be used for a variety of useful purposes in addition to pleasure. Many a boy who longed to leave the farm is now perfectly contented because his motorcycle will take him to town in a few minutes and back again. One of the best motorcycles is the Harley-Davidson whose advertising is familiar to our readers. An advertisement for this company appears on page 15 of this week's issue. This advertisement shows the many prizes won by this handsome and efficient machine. The Harley-Davidson Motor Company who manufacture the machine have a very handsome catalog which they will be very glad to send our readers free, if they will write mentioning this paper.

Chicago House Wrecking Company.

The Chicago House Wrecking Company, a name which has become a household one among our readers, has ceased to exist as a name. For business reasons only the four Harris Bros., who have conducted the Chicago House Wrecking Company for twenty-five years and who still own and control it, have changed the name from Chicago House Wrecking Company to Harris Bros. Company. This business concern began operation in 1893 by making the purchase of the complete buildings of the Columbian exposition, which was at that time considered the greatest undertaking by any firm. Later they took over the buildings of the Trans-Mississippi fair at Omaha, the Pan-American exposition at Buffalo and the Louisiana Purchase exposition at St. Louis. From time to time the firm branched out in other lines until today it handles practically every known manufactured article, such as plumbing, heating, hardware, machinery, paint, harness, sporting goods, groceries, furniture, roofing, fencing, etc. The name of the business has been the direct result of giving the patron a little better bargain than could be obtained elsewhere and quality of goods beyond criticism. The new name will lack the suggestiveness of the old one, but it is the same sound, substantial concern as before.

Carey M. Jones, the Auctioneer.

In any field where there are numerous people engaged there are always certain ones that stand out prominently, no matter what the business or profession may be. This is particularly true in the auctioneering world. The profession of an auctioneer is one that calls for brains, judgment, diplomacy and aggressiveness if any degree of success is to be achieved. One gentleman who combines all these accomplishments to a marked degree is Carey M. Jones, Chicago, Ill., and as a consequence he is today at the top. His success has not been any sudden advancement, but has been justly earned by years of hard work and close application. Breeders all over the United States and Canada have come to recognize Colonel Jones as the peer of any auctioneer who has been associated with our live stock industry, and today undoubtedly has a greater number of patrons than any other auctioneer before the public. Colonel Jones is a striking example of the successful young man who applies himself assiduously to his profession. Possessing a pleasing personality, a gentleman at all times and under all conditions, having a thorough knowledge of values, a student of pedigrees, with the ability to handle his audience in a masterly and tactful manner, he combines those characteristics so needed for an auctioneer to win. The success or failure of a sale lies in the hands of the auctioneer. Probably in no other business are so many thousands of dollars' worth of property trusted to the hands of a man to be converted into cash in so short a period as are placed under the control of an auctioneer. That Colonel Jones has always demonstrated fully his ability to get for his patrons the full value of their goods is clearly proven by the fact that today scarcely any prominent sale of cattle is held without Colonel Jones being one of the auctioneers.

Red River Special Thresher.

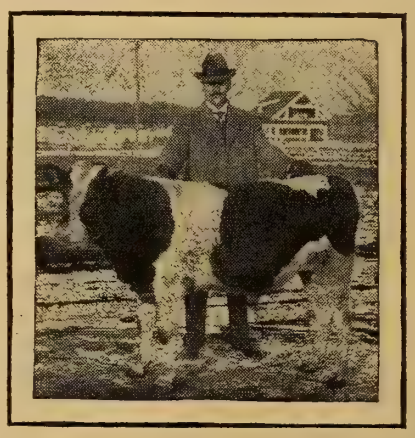
A big advertisement on page 2 of this paper illustrates the difference between the Red River Special thresher and other kinds. The pictures are apt in presenting their arguments. For sixty-five years the Nichols & Shepherd Company have been engaged in the business of producing threshing machines. They have always stood high and their machines have been of the quality that did good work economically and saved the greatest possible portion of the grain. The upper engraving in the advertisement shows very plainly why every particle of grain is saved in the Red River Special. The straw is agitated and beaten and shaken until when it leaves the thresher an absolutely perfect separation has taken place. The Red River Special is made in various sizes to suit the demands of farmers or those who wish to make threshing a special business. It is sold at reasonable prices and under a most liberal guarantee. Complete particulars may be obtained by writing to Nichols & Shepherd Co., Battle Creek, Mich.

Wixcel Automatic Hay Loader.

The modest advertisement on page 16 is a very small reference to the Wixcel Automatic hay loader and scarcely contains a hint of the excellence which that machine possesses. This season, with its present promise of hurried work throughout the remainder of the spring months, makes it necessary that every possible advantage of labor-saving machinery be taken. The Wixcel is as near an automatic loader as a machine of this character can be made. It takes hay from the swath and windrow, lifts it to the wagon and distributes it over the load. One man who has given it a complete trial says that he put up fourteen tons of alfalfa with this loader in half a day. Another states that he himself put up twenty acres of alfalfa last year and was able to use the Wixcel on days too windy to permit the use of old-style loaders. One good team operates the Wixcel anywhere except where land is very hilly or particularly muddy. Still another user of the Wixcel says that his machine saves him from $4 to $5 per day during the haying season. The Wixcel is not an expensive machine. It is a durable one and one which never fails to give satisfaction. Full particulars concerning it may be obtained by writing to Wixcel Mfg. Co., Department A, Marcus, Iowa.

The Galloway Holstein and Ayrshire Sale.

On June 19th, Wm. Galloway, Waterloo, Iowa, will hold his annual public sale of Holstein-Friesian and Aryshire cattle. The sale will take place at the farm one and one-half miles from Waterloo. The Galloway farms have made a reputation in the corn belt as a field for the production of highest quality certified milk and cream and superior butter. The animals to be offered in the sale are each and every one either producers at the milk pail or sons and daughters of heavy producers which have proven their value in a practical way. The Galloway farms are well worthy of a visit by any dairyman or farmer. Their equipment of modern farm dairy machinery and what is said to be the best cow barn in the state of Iowa would prove instructive in the highest degree. The results which Mr. Galloway is obtaining in doing a dairy business on land worth $500 per acre and upward are proof positive that there is money to be made in dairying on any land in the corn belt. There is never an excess in the supply of top quality dairy farm products. Among the Holstein-Friesians to be offered at this sale will be sons and daughters of cows having records from eighteen to twenty-six pounds of butter in seven days, as well as cows which themselves have made records. The blood of Korndyes, Pontiacs and Colanthas is prominently represented. There will also be Rag Apple, Ormsby and Segis strains in variety. Many of the females in this offering will have been bred to King Segis Pontiac Combination, the present head of the Galloway herd and said to be one of the best herd bulls west of the river. Catalogs of this sale give pedigrees and complete information. They are now ready and may be had on application to Wm. Galloway, Waterloo, Iowa. See advertisement on page 12.



T. W. Cavett's Poland Chinas.

One of the best known herds of Poland Chinas in Nebraska is the herd owned by T. W. Cavett, Phillips. Mr. Cavett is also one of the oldest breeders in the state, having bred good hogs for nearly a quarter of a century. This spring the pig crop is one of the biggest of this section, numbering a little over 125 pigs. They are from uniformly large litters and from two sires for the most part. Probably the major part of the crop is sired by Big Cloverdale, one of the really big boars, as well as one with a world of quality. He is sired by the 1,000-pound Centennial and out of the great breeding sow, Countess, by Blue Valley Exception by old Exception. Blue Valley Exception was at his time, probably the best breeding boar in the state. Big Cloverdale is certainly doing good work, and is a very fine boar. A younger boar and the sire of a part of the pigs is Long Wonder by Black Knight by Big Wonder. The dam of Long Wonder is by Shattuck's great breeding boar, Sampson, by Jumbo Jr. This young boar has done extra well as a sire, and Mr. Cavett should certainly be able to put up a good lot of stuff for his fall and winter sales. There are a couple of fall boars on the farm by Big Cloverdale and one is out of Black Cloverdale by Cloverdale Hadley one of the truly great boars produced a few years ago. The other pig is out of Graceful by Cavett's Big Hadley. The former one is the sort that pleases us the better, but they are both valuable boars and one is for sale. Should you write kindly mention The Homestead.

J. A. Jacobson's Durocs.

The writer was pleased to call on J. A. Jacobson, Marquette, Neb., a short time ago, and we wish to say that we found at this farm a very progressive stockman, and also a very fine lot of Durocs. Mr. Jacobson has had an advantage that most stockmen of the present day have not had, and that is the benefit of an agricultural college training. His neighbors that are securing stock from him are pleased that they have Mr. Jacobson in the neighborhood, and the standard of the live stock of the community has been raised very much indeed. The foundation of the herd was secured from the good breeder of Durocs, H. O. Harney, formerly of Marquette, but now of Aurora, Neb. Later additions have been made from the herds of Mr. Bayne and also from the herd of O. G. Smith & Son, Kearney, Neb., at whose last winter sale Mr. Jacobson paid the top price. The good show and breeding boar, Tony B., by Red Echo by the champion Red Knight, is in service and he is doing a lot of good work. The herd of sows are largely sired by Ambition's Col., by Prince of Cols., Mammoth Tom, one of the largest Durocs ever shown at Nebraska, Wonder Improved by Lincoln Wonder, H. A.'s Choice Goods, and Model Goods by Golden Model 2d. Mr. Jacobson has a few very fine fall boars that are being priced worth the money and readers of The Homestead that are in need of anything of this sort will do well to write Mr. Jacobson for prices. Mention The Homestead when you write.

Van Patten's Durocs.

The Homestead readers generally will be interested in learning that Van Patten & Son, Sutton, Neb., have had good success in saving a nice crop of spring pigs again this season. These pigs are from some of the best boars within the state, and should by fall develop a lot of stuff that will look mighty good to the good stockman. Model Wonder is the new boar and he gives every promise of being one of the great boars of the country. He is by Golden Model 4th and out of a dam by Wallace's Wonder by Crimson Wonder Again. The other boar is Uneeda Crimson Wonder, generally recognized as one of the very best of the breed and without question one of the very best ever produced by that world-famous mating of Crimson Wonder Again and H. H's Queen. These pigs are in the hands of as good stockmen as are in the country, and breeders and others looking for good breeding stock will never go wrong by investing in stock from this farm this season. The success of the breed in the West is due to no one's efforts more than it is to this firm. The best interest of the breed has always been fostered, and state fair champions and farmous breeding stock has been liberally contributed from the efforts of Van Patten & Son. We will have more to say of this herd shortly, and should you write for prices or description of anything, kindly mention The Homestead when doing so.

HEAVY-MILKING HOLSTEIN-FRIESIAN COWS.

Two of them go in the Galloway sale at Waterloo. See field note.

Owens Bros.' Great Short-horn Sale.

One of the oldest herds of Scotch Short-horns in the state of Iowa, is that of Owens Bros., Homestead, Iowa. For thirty-five years this herd has been recognized as one of the very best in the state. Only the very best Scotch bulls that could be obtained have been used. Their herd bulls have never been bought on the spur of the moment, but on the other hand, these gentlemen have always, when in need of a bull, spent considerable time in inspecting every bull they deemed eligible to head the herd and then the one that they considered the best type to cross on their females was purchased. Price has never been a barrier, the only requirement being a good bull. This has been the secret of their success in building up a great herd of Scotch Short-horns. Their cattle have never been pampered or kept in show condition. By this we do not mean that their cattle are kept thin in flesh, but on the contrary they have fed their cattle with an eye to their future usefulness. The eighty Scotch Short-horns that will sell in their sale on June 12th are in the best possible condition to do good for the purchaser. They are thrifty and carrying plenty of flesh for breeding cattle. Twenty bulls and sixty females have been listed for this event. Among the bulls are some extra good ones, in fact, there will be bulls good enough for the best breeders as well as bulls suitable to use in breeding market-topping steers. Courtier's Crown is a three-year-old red bull that has been used some in the herd. His calves are showing up good and while he has not been used as much as Messrs. Owens would like to have used him, as many of the females in the herd are closely related to him, we want to say he will prove an excellent proposition as a bull to head some good herd. He is sired by Courtier 5th, an extra low-down, thick Scotch bull used in the Owens herd very successfully. His dam is a Queen of Beauty cow sired by Baron Kear 2d, while the next six sires were bred by Amos Cruickshank. This bull will weigh 2,200 pounds in nice breeding condition and is a smooth, mellow, good ribbed bull with plenty of Short-horn character. Courtier's Hero is another son of Courtier 5th and out of a Queen of Beauty cow sired by Nonpareil Prince, a son of the $4,000 bull, Nonpareil King. This is a very thick, smooth, wide-backed bull that many will like sale day. Scottish Secret is an August calf by Scottish Victor, a grandson of the $4,000 Nonpareil King, while his dam is Baby Pride 7th, a Queen of Beauty cow by Baron Secret with such sires as Imp. Harvester, Imp. Goldstick, Imp. Baron Surmise, Imp. Stanley, all of which were bred by A. Cruickshank, found in the list of sires. Scottish Chief is a July calf sired by Scottish Victor and out of Baby Pride 5th by Cumberland Chief. He also descends from the Queen of Beauty family with practically the same list of renowned sires as Scottish Secret. Scottish Secret and Scottish Chief are an extra good pair of low-down, thick calves with good lines, good spring of rib and plenty of depth. They look like developing into high-class bulls. Victor Robin is a Marr Flora bull sired by Scottish Victor that will make a very large bull. He is a big, strong, heavy-boned fellow and has lots of scale. Sultan's Magnate is a good calf consigned by J. A. Daniels. He is sired by Monarque Sultan, a grandson of the celebrated Whitehall Sultan, his dam is by Golden Crest and grandam Imp. Blossom by Matadore. W. R. Hakes is consigning Sultan D., a March yearling by Scottish Sultan, a grandson of Whitehall Sultan, while the grandam is the imported cow, Scottish Countess. There are a number of other bulls worthy of mention and we urge anyone interested in a good Short-horn bull to attent this sale. The females consist of twenty cows with calves at foot, a number of two-year-old and yearling heifers, all of which are a high-class lot and in excellent breeding condition. The cows not having calves at foot and heifers of breeding age are safe in calf to the herds bulls, Cumberland Dictator by Burwood Royal, and out of Gladiolus 2d by Cumberland's Last, Sultan Goods by Missies' Sultan out of Sweet Lavender 2d by Good Choice and a couple of good bulls of their own breeding. Cumberland Dictator has developed into a wonderful massive thick bull and looks like he would make a great sire. In our next issue we will give more particulars regarding the female end of the offering. These gentlemen have issued a handsomely illustrated catalog that will be sent only on application. If interested address Owens Bros., Box H, Homestead, Iowa, and they will be pleased to mail you one. The sale will be held at the farm four miles south of Homestead and they have made arrangements for the two fast trains, No. 8 and No. 17 on the Rock Island to stop at Homestead on the morning of the sale. This will make it especially convenient for those attending the Howell Rees & Son's sale at South Omaha, on June 11th, to attend the Owens sale. See advertisement on page 28.

BEATRICE AND C. C.

BELLOWS BROS.

10th Annual Sale of

Scotch Bred Shorthorns

MARYVILLE, MO.,

TUESDAY,

JUNE 10, 1913

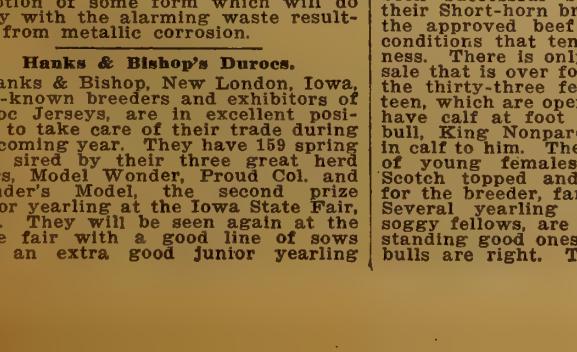
COLUMBIA 12 AND C. C.

49 HEAD--12 BULLS, 37 FEMALES--49 HEAD

The concentration of Choice Goods blood through his sons, Good Choice (sire of Diamond Goods) and Best of Goods with much of the blood of Whitehall Sultan and Hampton's Best enables us to offer twelve bulls the superior of which have not been seen in a sale ring.

37 COWS AND HEIFERS--17 CALVES AT FOOT

A draft of superior Scotch females representing blood that has done so much toward the advancement in improved Short-horns. Sinnissippi Victoria by Imp. Red Knight; Parkdale Victoria by Best of Goods with C. C. by Diamond Goods; Sweetheart 2nd by Good Choice with C. C. by Hampton's successor; Choice Victoria by Good Choice with C. C. by Sultan Choice; Beatrice by Banker's Victor with C. C. by Superb Goods, others as choicely bred and with as superb character are by such sires as Hampton's Best, Imp. Fancy's Pride, Imp. Blythe Baron, Clipper's Czar, Ringmaster and other noted sires. See the great string of calves by Diamond Goods, as there are herd headers among them; also females bred to him. Others bred to Sultan Supreme, a great son of Double Dale, Secret Sultan, Diamond Abbot and Cornerstone.



PARKDALE VICTORIA AND C. C.

We will gladly send catalog on request, mentioning The Homestead.

Improvement in Quality of Iron.

In the late nineties, the attention of the United States Department of Agriculture was drawn to numerous complaints on the part of farmers that modern iron and steel were of very poor quality—that nails, barbed wire, galvanized roofing, etc., rusted out far more rapidly than the old iron of half a century ago. Some landowners could point at barbed wire fences which had been erected soon after the invention of this useful form, and which were still in good condition, while on the same farm later purchases of wire has been replaced two or three times because of the rapid corrosion of the material. Almost everyone is familiar with the great difference between the old wrought nails of the early nineteenth century and the handsome product of present-day machines. Buildings seventy-five years old have the greater portion of their nails in good condition, while those erected within fifteen or twenty years have very few not severely rusted. The result of numerous experiments and analysis goes to show that the old iron was generally of a high degree of purity, while modern steel contained a relatively larger admixture of substances like manganese, carbon, copper, etc., having a widely different electrical quality from that of iron, and which as a result tended to set up those electro-chemical actions which are involved in the formation of rust. The final decision was embodied in a report, the net result of which was the statement that iron for all exposed situations ought to be the purest obtainable. The proof of this theory has been demonstrated in practice. For quite a number of years it has been possible to obtain, at slightly higher price than that of the ordinary product, iron of a degree of purity never attained before; and this material, in the form of road culverts, irrigation pipe and flumes, roofing, etc., is showing itself to be of the very greatest practical value, as it is but little harmed by rust. Taking into consideration the expense and annoyance of replacing metal work, after only a few years of service, it is probably true that this new iron product more than justifies its cost; and it seems that the conditions of the future will compel the adoption of some form which will do away with the alarming waste resulting from metallic corrosion.

Hanks & Bishop's Durocs.

Hanks & Bishop, New London, Iowa, well-known breeders and exhibitors of Duroc Jerseys, are in excellent position to take care of their trade during the coming year. They have 159 spring pigs sired by their three great herd boars, Model Wonder, Proud Col. and Wonder's Model, the second prize junior yearling at the Iowa State Fair, 1912. They will be seen again at the state fair with a good line of sows and an extra good junior yearling boar sired by Proud Col. This firm has never made any pretentious claims before the shows, but after the ribbons are tied they usually have their share and they are won on stock of their own breeding. For the past five years they have been consistent winners at the Iowa State fair, having won championships and grand championships. They have nothing to sell at present, but a little later on will start an advertisement in The Homestead, at which time we will give more particulars regarding this herd.

Whitsitt's Twenty-Fifth Annual Sale.

At Prairie Heart Farm, Preemption, Ill., Friday, June 13th, Whitsitt Bros., will make the twenty-fifth annual offering of Short-horn cattle that has been presented to the public at that pioneer breeding establishment. There are few herds in the country today that can announce any such number of public sales. For nearly half a century Short-horns have been bred upon Prairie Heart Farm, and during a greater portion of that operation were under the critical and progressive direction of Benjamin Whitsitt, long one of the best known Short-horn breeders and all around cattlemen in the middle West. The first Short-horn cow that ever came into Mercer county, Ill., was brought there by the father of Ben Whitsitt, and from that time down to the present day the reds, whites and roans have been bred upon the Whitsitt farm, the business having been conducted for a long time under the firm name of B. Whitsitt & Sons. A few years ago the senior member of the firm decided to relinquish the burdens of business and the herd passed under the management of the sons. The thorough training received at the hands of their father, together with an inherent love for good cattle, made them particularly fitted for the work, and the cattle to be sold June 13th will demonstrate that they are successfully carrying on the breeding operations at Prairie Heart Farm. Fifty-one head have been cataloged, thirty-three females and eighteen bulls, and the buying public will find it a class of cattle that will prove satisfactory. The Whitsitts have always been successful beef producers, and their Short-horn breeding cattle are of the approved beef type, raised under conditions that tend to future usefulness. There is only one animal in the sale that is over four years old, and of the thirty-three females all but fourteen, which are open heifers, will either have calf at foot by the good Scotch bull, King Nonpareil, or else be safe in calf to him. They are a working lot of young females, both Scotch and Scotch topped and will make money for the breeder, farmer and ranchman. Several yearling Scotch bulls, deep, soggy fellows, are listed, that are outstanding good ones, while the younger bulls are right. This is a lot of cattle that deserves consideration. Messrs. Whitsitt are not looking for high prices, but feel certain that those who attend the sale will be pleased with the cattle. The advertisement appears on page 24. Look it up and send a copy of the catalog to Whitsitt Bros., Preemption, Ill., mentioning The Homestead when you write.

Truman's Recent Sales.

Manager John G. Truman of the Pioneer Stud Farm, Bushnell, Ill., writes: "Our W. E. and H. W. Truman sailed on the Mauretania May 21st for their regular annual visit to the old homestead. They will visit the leading shows of England, France and Belgium for the sole purpose of obtaining the very best specimens of stallions and mares for our business this fall. The trade for strictly high-class stallions still continues good. Among our numerous sales made the past month not previously reported are the following: Imported Shire stallion to Dale Bros., Bureau county, Ill., (the second stallion we have sold them); imported Percheron stallion to Melvon Maroney, Harrison county, Mo.; imported Shire stallion to Dunham Bros., Louisa county, Iowa, (the third stallion we have sold them); Percheron stallion to C. F. & C. D. Davis, Hamilton, county, Ind.; imported Shire stallion to those enterprising breeders, I. J. Swain & Sons, Mills county, Iowa; imported Percheron stallion to L. E. Sims, Decatur county, Iowa; imported Percheron stallion to J. M. Myers, Edgar county, Ill.; imported Shire stallion to the Woodland Pioneer Shire Horse Company, Decatur county, Iowa, their third stallion; imported Shire stallion to R. I. Fuller, Linn county, Mo.; imported Shire stallion to Calvin Boord, Decatur county, Iowa; imported Shire stallion to John Freeman, Meagher county, Mont.; imported Shire stallion to R. W. Taylor, Humboldt, county, Iowa; imported Shire stallion to Cline & Fisher, Hamilton county, Ind.; imported Percheron stallion to Minooka Percheron Horse Company, Grundy county, Ill.; two shire stallions to E. T. McCarty, Laramie county, Wyo., (third stallion); imported Percheron stallion to Avon Twentieth Century Percheron Horse Company, Fulton county, Ill.; imported Shire stallion to Russell Childress, Coles county, Ill., (second stallion); imported Shire stallion to Amos Ackroys, Weld county, Colo.; imported shire stallion to J. C. Hall, La Salle county, Ill.; Percheron stallion to Edgar Boice, Laramie county, Wyo.; imported Shire stallion to A. T. Wheeler, Mahaska county, Iowa; Percheron stallion to A. E. Fuller, Howard county, Iowa; imported Shire stallion to William McGraw & Company, Laramie county, Wyo.; imported Percheron stallion to Hermon Koth, Clayton county, Iowa; imported Percheron stallion to E. & L. J. Koch, Lee county, Iowa. We still have an extraordinary fine collection of imported Shire, Percheron and Belgian stallions which we are offering at attractive prices in order to make room for our regular summer importations."

Aberdeen Angus Bull Bargains.

Our readers who contemplate the purchase of Aberdeen Angus bulls will be interested in the advertisement of W. B. Seeley, which apnears on page 27. At the present time that gentleman has for sale less than a dozen bulls ranging from nine to twelve months of age. As he is planning to be away from home part of the summer he will be glad to dispose of the entire surplus stock of young bulls before leaving, and for that reason will make some especially attractive prices. It will be recalled that the Seeley herd is an old, well-established one which, for several years, made highly successful rounds of the state fairs and which has been producing cattle of the highest quality. A good share of the young bulls offered are the get of Clansman Chief 2d and belong to some of the more popular families. Clansman Chief blood has stood the test of time. Old Clansman Chief was one of the greatest bulls ever used in Iowa and left to his credit sons and daughters that have gone into the very best herds. Our readers should not delay writing for prices and descriptions of the bulls in question. Address W. B. Seeley, Mt. Pleasant, Iowa.

Are You Saving Cream Profits?

It is a deplorable fact that, although butter making may under favorable conditions be one of the most profitable departments in the operation of a farm, the other extreme is that it may very easily be a profit-losing division. Whether it operates at a profit or at a loss depends largely upon whether the cream is closely gathered. A good cream separator, one which runs lightly, is easily cleaned and skims closely, will save its price every year on any farm on which a dozen cows are kept. The attention of our readers is called to the advertisement of the new Butterfly cream separator, which will be found on page 12. This separator has not only all the good points mentioned above, but it may be obtained so easily that its cost may be provided out of the savings which it makes. The manufacturers know what they are talking about and they offer to back up their knowledge by selling the separator to any reader of this paper for a cash payment of only $2 down, the remainder to be paid within one year. This is an extraordinary offer. It is a liberal one. In fact, it lets the farmer use the machine while it provides the money to pay for itself. Read the advertisement and send for free catalog folder, which gives full information concerning this great offer. Address Albaugh-Dover Co., 2262 Marshall Blvd., Chicago, Ill.

Bellows Bros.' Short-horn Sale.

The offering of forty-nine head of Scotch-bred Short-horn cattle which will be made by Bellows Bros., Maryville, Mo., on Tuesday, June 10th, is such that every lover of good cattle should be deeply interested. By the concentration of certain lines of blood with upwards of thirty years' experience in breeding for a superior type of beef animal enables them to so mate their cattle that the best results are obtained. Of the twelve bulls they sell, six are sons of Diamond Goods, others carry a goodly amount of Choice Goods and Whitehall Sultan blood and none better is known. It is an opportunity seldom equalled to select herd-header material fit to head the very best herds. The thirty-seven females, seventeen of which have calves at foot, are such that the most discriminating judges of good beef cattle will be pleased. There is herd-header material among the calves and there are as choice young females sell-at foot as one finds. It is an offer of superbly bred Scotch females with such choice individual merit and character that they cannot fail to be attractive in any herd to which they go. The fact that all but three not of breeding age, are bred to the Bellows' herd bulls adds greatly to their value. Diamond Goods probably the peer of any living descendant of Choice Goods is the sire of many of the calves at foot and a dozen or more females are in calf to his service. Others are bred to Sultan Supreme, a great son of Double Dale, Secret Sultan, Diamond Abbot and Cornerstone. The Bellows Bros. herds have been drawn on for some of their best as is seen in the two Victorias, Sinnissippi Victoria, by Imp. Red Knight and her daughter, Parkdale Victoria by Best of Goods. No better little family is found. Sinnissippi Victoria has a red bull calf at foot by Diamond Goods, her daughter has a red heifer calf at foot by Diamond Goods and a more valuable pair would be difficult to find. They have about all that is desirable in good Short-horns. Sweetheart 2d by Good Choice is one of the plums, being by the same sire and out of Modesty, the grandam of the great Diamond Goods. This is the family the late Colonel Bellows prized most highly and rightly too, as is seen by the stock produced. Sweetheart 2d sells with roan cow calf at foot by Hampton's Successor. They are a pair that will please those looking for as good as is found. Choice Victoria by Good Choice, is one of the valuable things of the sale. Her grandam, Imp. Victoria Mary, was bred by Dean Willis and the next six dams were bred by A. Cruickshank. She has red roan cow calf at foot by Sultan Choice. Emma Belle, a two year old by Standard Goods, is a strictly choice Marr Emma, her grandam and four succeeding dams being bred by Mr. Marr. She is in calf to Diamond Goods since October 22d, and should be appreciated, for her character, general conformation and breeding is all that could be desired. Columbia 11th, 12th and 13th are three choicely bred things tracing close up to Imp. Columbia 2d, bred by Mr. Campbell who also bred seven other dams in their pedigrees. Columbia 11th and 12th have heifer calves at foot by Diamond Goods and are rebred since last fall to the same bull which adds greatly to their value. Queen of Beauty 20th by Best of Goods, is from a family that has produced many of the best cattle found in Bellows Bros.' herd and is the first daughter of Barmpton's Queen of Beauty that has been allowed to leave the herd. She is the dam of Cornerstone, one of the top bulls of the sale. Lovely of Parkdale 3d is one of the best daughters of Good Choice that has left the herd and as she is out of a good daughter of Hampton's Best the sire of Bellows Bros.' show cattle at the World's Fair she represents as good as they have produced. She is soon due to calve to service of Diamond Goods. Her dam, Lovely of Parkdale, is listed and she also is due to calve soon after the sale to the service of Diamond Goods. Beatrice, a massive roan cow by Banker's Victoria, with white heifer calf at foot is a short-legged cow, deep and thick and the heifer calf by Superb Goods is a show prosposition that shows the value of its dam as a producer and incidently that the man who buys Cornerstone will get a breeding bull that he may rely on. Rain Drop, a two-year-old daughter of Ringmaster, in calf since October 1st to Diamond Goods should be appreciated. Mint Drop 15th a white four year old sired by the Clarke bull, Carlogie Knight with roan bull calf at foot by Diamond Goods is a large cow that produces extra good calves. The youngest thing in the sale is Diamond Lady 2d, one year old sale day got by Diamond Goods. She is a beautiful roan and were she of right age some showman should buy her as she is right. There will not be another such an opportunity offered soon to buy such high-class females whose usefulness is apparent by the great array of high-class calves and everyone interested in good Short-horns should arrange to attend the sale. The Bellows Bros. invite you whether you buy or not as they desire that you become familiar with the work they are doing in breeding up-to-date Short-horns. They want to send you a catalog and will on receipt of your request mentioning this paper. See page 23.

Wendt's Duroc Jerseys.

On this page W. J. Wendt, Remsen, Iowa, is advertising twenty head of choice Duroc Jersey fall boars for sale and he is offering these from $25 to $50 and he has some very good ones. Among these are quite a few that are good enough to head good herds. The Wendt herd is one of the oldest and one of the best in the state. These fall boars are sired by C. Indicator 118489, a grandson of old High Chief, and this hog has proven himself to be a good breeding boar in the Wendt herd. These boars in question are out of daughters of Crimson King, Grand Champion, Belle's Wonder, Wonder C., Chief Bunker, High Model II, and other good sows that he has in the herd. Mr. Wendt is desirious of closing these boars out as soon as possible and he will therefore close them out as soon as he can, and the man that orders first will get the worth of his money. He has 130 spring pigs on hand this season and he is also booking orders for these to be shipped later in the season. He will make special prices to anybody taking two or more of these fall boars if they order right away. When writing Mr. Wendt kindly mention The Homestead.

Frazer Bros.' Big Polands.

The writer recently visited Frazer Bros., Waco, Neb., and we were much pleased with the nice outlook they have for the season's hog business. They have a nice lot of spring pigs, as well as a few extra good fall gilts. These gentlemen have been breeding big Poland Chinas for the past several years, and they have been among the most careful buyers that we have known. They have selected only such hogs as conformed to their type, and that come of that sort of stuff. They now have a herd that is right up to the best of them. As good a sow as we have seen this spring is in this herd and is sired by the 1,050-pound Long Chief. She is also a breeding sow, and her spring litter by Big Jumbo are hard to equal. Big Jumbo is one of the main herd boars in this herd, and sure one of the big and the good boars of the country. He is a son of Wade's Jumbo and for heavy bone and good legs is hard to fault. The other boar is Orient, by Blue Valley and out of a daughter of First Look. This boar was bred by Thos. F. Walker & Son, and was one of the best boars that they sold last season. He is also siring a good lot of stuff. They have fourteen pigs sired by the champion Columbus and they are as good Columbus pigs as we have seen for their ages. These gentlemen will offer their spring boars at private sale a little later on. In fact, they will b ok orders for them now, and those of our readers looking for this sort of stuff will do well to write these gentlemen. Orient would be sold, as they do not wish to keep over the two old boars, and while he is not one of the cheap sort, yet he will be sold at a price that is a bargain.

Rees & Son's Short-horn Sale.

In last week's issue we reviewed the young bulls that will be offered by Howell Rees & Son in their forthcoming sale at South Omaha, Neb., on June 11th, and this week we will tell our readers of some of the good females that will be included in their sale. There will be about thirty-five or thirty-seven of them in all and the greater number of these will be Scotch cattle. Nearly everything they will offer will be sired by a noted bull and in many cases will be out of well-known cows. Individually and collectively it is a splendid offering from one end to the other. Ten or twelve head will have calves at side of dams, the greater number of which will be sired by their noted show and breeding bull, Ruberta's Goods. One or two cows will have calves by their new bull, Whitehall Rosedale, and one will have a calf by Victor Sultan. All of the females in the sale sired by Ruberta's Goods that are old enough will be bred to Whitehall Rosedale, and here is a line of breeding that is destined to make a mark with Short-horn breeders throughout the central West. This bull is a son of that sensational show and breeding bull Avondale, and he in turn is a son of that phenomenal sire and grand champion winner Imp. Whitehall Sultan. No bull used in this country during the past quarter of a century has done ore to place the Short-horn breed in the forefront than has Whitehall Sultan. His sons and his grandsons all over this country, heading the very best herds in the land, have done, and are doing wonders today in the production of the highest type of cattle, and Short-horn history would be sadly incomplete were it not for this great sire and his get. Whitehall Rosedale is a grandson of the old bull and is one of the most promising herd bulls we have seen of late years here in the West. In combining the blood of the Choice Goods who was last used in the Rees herd and through his grandson, Ruberta's Goods, who is still doing service in this herd, you are getting a commingling of the blood of the two greatest sires and the two greatest show winners that have been used in this country in the past quarter of a century. The great Choice Goods was unquestionably the greatest show winner since the days of Young Abbotsburn, and his sons and his grandsons are today heading many of the greatest herds in this country. In no other sale to be held this summer will you find more of the blood of these two noted sires as you will find in the Rees sale. Included will be some of the choicest show heifers they have in the herd. Among these is Ruby's Goods, that splendid red yearling heifer by Ruberta's Goods, that was a first-prize winner at Denver, Topeka, Oklahoma and Hutchinson. She is a full sister to the Frank Harding heifer that brought $500 last year. Sylvia Goods is a roan and is also a daughter of Ruberta's Goods, and she will show as a two year old this fall. She sells with a nice roan bull calf at foot and she is rebred again to Whitehall Rosedale. She was a first-prize heifer everywhere last year except the Royal and Denver, where she was third and second respectively, and she is right to go on again the coming fall. June Goods is another choice heifer sired by Ruberta's Goods that was a first or second-prize heifer everywhere last year except the Royal, where she stood third, and she is one of the choice young things they will sell. Among the many great cows they are listing for this sale is Lady Violet, a three-year-old daughter of Ruberta's Goods, and out of Lady Violet 3d by Imp. Choice Goods. She is a full sister to the heifer that topped their sale last year at $600 and she is one of the very choicest cows in their sale. She will calve about sale time. One of the good Cruickshank Secret cows they are selling is a daughter of Banker's Victor, a bull used successfully at the head of the C. C. Norton herd, and she has a nice heifer calf at foot by Ruberta's Goods. Silver Charity 2d is a good four-year-old cow also bred by Mr. Norton, and she is sired by a son of Banker's Victor, and she belongs to that celebrated Sweet Charity family, that proved such a wonderful breeding type in the Norton herd. She has a good young bull calf at foot by Ruberta's Goods. Princess Goods is a choice two-year-old heifer sired by Ruberta's oGods. She is a richly bred Orange Blossom and she is safe tin calf to Whitehall Rosedale. Victoria Maid is a nice red heifer by Ruberta's Goods, and out of Sunny Maid 2d by Imp. McNaughton. She is a Cruickshank Secret and she is also safe to Whitehall Rosedale. Ramsden Orange Blossom is a six-year-old cow by Pride Ramsden, and is due to calve about sale time to Ruberta's Goods. She is a richly bred Orange Blossom and is the dam of one of the best young bulls in the sale. Orange Lynette is another good six-year-old cow sired by New Year's Day and out of a daughter of Duke of Oakland 2d. She is a Duchess of Gloster and she sells with a red bull calf at foot by Ruberta's Goods and is rebred to the same bull. Countess Sultan is a three-year-old daughter of White Sultan, a son of Imp. Whitehall Sultan that sold to J. A. Tittemore, Wisconsin, for $2,750 and is now in use in the C. A. Saunders herd at Manilla, Iowa. She sells with a roan January heifer calf at foot by Ruberta's Goods. Lady Marengo 2d by Old King Champion is another of the good cows that will be offered and she is due to calve in December to Ruberta's Goods. These are just a few of the best they will offer. A strong line-up of young Scotch bulls, good enough to head herds makes up the catalog list. Send for it at once and kindly mention The Homestead.

Twenty-fifth Annual SHORT-HORN SALE

At Prairie Heart Farm

Preemption, Illinois, June 13

51 HEAD ---18 BULLS--- 51 HEAD

An offering that will please the buyer

HOWELL REES & SON'S
ALL-SCOTCH SHORT-HORN SALE
SOUTH OMAHA, NEBRASKA,
WEDNESDAY, JUNE 11, 1913

45 HEAD---37 COWS AND HEIFERS, 10 CALVES AT FOOT, 8 YOUNG BULLS---45 HEAD

WE INVITE you to our second annual sale and we will show you one of the best offerings of Scotch cattle you have ever seen. Included will be **eight choicely bred Scotch bulls,** any one of which is good enough to head any herd. Among these is **Good Secret,** a son of our great bull, Ruberta's Goods, and he is out of a daughter of Imp. McNaughten. He is a Cruickshank Secret and an outstanding good one. **Lavender Goods 2d** is also a son of Ruberta's Goods and out of Lavender Lady 2d by Imp. Choice Goods and a herd header. **Orange Goods, Crescent Goods** and **Ruberta's Nonpareil** are all sired by Ruberta's Goods and belong to the Cruickshank Orange Blossom, Nonpareil and Crocus tribes. Callant Tyne is a son of The Callant, and Fair Sultan is a son of Victor Sultan. These are a royally bred lot of bulls and we invite your most critical inspection. We are selling a grand lot of Scotch cows and heifers, including some of our very best show heifers. There will be ten good calves at side of dams, sired by **Ruberta's Goods, Whitehall Rosedale** and **Victor Sultan.** The most fashionable and popular Scotch families will be represented in our sale, and it is an offerng that we feel proud of. If you want a good young Scotch bull to head your herd or if you want some high-class cows, make it a point to attend our sale. Catalog now ready and can be had for the asking. Address

Gould's Chester Whites.

One of the good spring pig crops this year in the Chester White line will be seen at the home of Frank A. Gould, Rockwell City, Iowa, whose advertisement regularly appears in The Homestead. He has 100 head and two sows to farrow yet. His early pigs are looking fine and are doing fine, and if nothing happens them between now and fall he will have some good boars and gilts to offer the trade. Those of our readers who are going to want a Chester White boar pig should write Mr. Gould and have him make your selection now while he has the whole bunch to select from.

POLAND CHINA SWINE.

COOPER'S BIG-TYPE POLAND CHINAS. Guaranteed Cholera Immune

100 HEAD of pigs of spring farrow for sale, either sex, can furnish boars and gilts unrelated. These pigs are from sows weighing from 500 lbs. yearlings up to sows of over 800 lbs. in weight, representing the biggest blood lines and the most noted families of the breed. They are sired by Big Expansion, the 800-lb. 2-year-old son of the noted Dorr's Expansion; Big Bone 2d, weighing 900 actual pounds, and a son of the great Big Bone, Chief Leader, an outstanding 14-months-old boar weighing 500 lbs. today, and other boars of same likeness. These pigs will be ready to deliver beginning in June. They are from immune sires and dams and have received the double treatment. We will guarantee them cholera immune at

$35.00 EACH OR THREE FOR $100.00.

We will refund your money if they die from cholera. We guarantee them to be breeders; we guarantee safe delivery and record everything; have orders booked now from 9 states. If you want the biggest of the breed send us your order. We guarantee satisfaction.

W. H. COOPER - - - - - - - - - HEDRICK, IOWA.

BIG BONE 2d 161497.

J. O. JAMES' SENSATIONAL PIG BARGAINS

I WILL book orders up to 100 head of spring pigs sired by my half-ton, **Big Orange, Ott's Big Orange,** who weighed 700 pounds on the scales just turned 19 months. **Big Sensation, Big Orange's King, A Wonder Giant** and **Gritters' Best.** All strictly big-type boars and out of extra big, long, heavy-boned matchless sows, many of them weighing from 700 to 800 pounds. These sows averaged 9½ pigs to the sow, many of them 10 to 13 pigs. I want you to write, describing just what you want. It makes it easier to pick the pig that will suit. I am pricing these pigs low for quick sale for June delivery, or at weaning time, for orders booked during May, or while they last, **$25** to **$35.** Must be bought during this month to get this price on them. Many of these pigs will be worth $100 to $150 by October. You can save from $75 to $100 by buying now. The early buyer catches the bargains. The dams of these pigs are sired by Big Orange, Big Sensation, Pawnee Nelson, Long King's Equal, Big Ex and Longfellow Jr. You can't beat sires, dams, pigs or prices. We guarantee our pigs to be as represented. Let me hear from you at once as orders are coming fast. Mention Homestead when writing. **J. O. James, Braddyville, Iowa.**

AUGUST GORDER'S POLAND CHINAS

A FEW choice fall boars sired by Teddy by the champion, Big Mischief. A nice crop of pigs sired by Futurity Jack and Matchless Expansion. The sow herd is by such sires as the 1,000-lb. Centennial, Colossus, Big Victor and other noted big boars. Address today and mention The Homestead.

AUGUST GORDER, PLATTSMOUTH, NEB.

WE ARE NOW BOOKING ORDERS FOR BRED SOWS

WE have a number of extra choice fall gilts, great big ones, that we will breed for fall litters for those that order now. These gilts are by Nebraska Wonder, by A Wonder, and Chief Price Again. Will breed them to Sampson Junior, a selected son of Nebraska Wonder, or to Nebraska Wonder. We price these gilts low for the class of stock, and if you wish some of this sort order at once. Be sure to mention The Homestead when you write. Address **BEALL & JACKSON, ROCA, NEBRASKA.**

BAIRD'S MAMMOTH POLAND CHINAS

THE great sire Columbus, without doubt the greatest big boar in existence, is in service. Sows of mammoth build and of the richest breeding make up the herd. We would like to hear from you if interested n extra good ones. Mention The Homestead and address **R. B. BAIRD, Central City, Neb.**

FAULKNER'S SPOTTED POLANDS

THE old original big-boned spotted kind. Now booking orders for spring pigs to be shipped when weaned. Pairs or trios, no kin. Everything Registered. For the kind of our forefathers address

Homer L. Faulkner, Box 117, Jamesport, Mo.

BIG-TYPE POLANDS

OF the thick, smooth, heavy-boned kind. Fall and spring boars and gilts sired by Dale Expansion 190135. Also choice sows bred to him for fall litters. Address

F. E. JACKSON, HURLEY, SO. DAKOTA.

GOOD LUCK HERD POLAND CHINAS

WE are offering big-type September boars and gilts for sale sired by Giant Wonder 184793, and a few extra good gilts bred for September farrow to H.'s Longfellow. Will ship on approval and prepay express charges. Satisfaction guaranteed. Write for descriptions and prices.

L. S. Fisher & Son, R. 1, Edgewood Iowa.

HEAVY-BONED Poland Chinas, both sexes, any age. Priced right. Also B. P. and W. Rocks. James H. Duncan, Lone Oak Farm, Lineville, Ia.

12 HIGH-CLASS POLAND CHINA FALL BOARS

I AM offering 12 strictly choice fall boars sired by the great 950-lb. boar, **Pawnee Nelson,** that is regarded as one of the greatest living Poland China boars. These are out of 600 and 700-lb. sows. Price $40 to $50 for quick sale. Address, mentioning The Homestead, **A. H. Windom, Nodaway, Iowa.**

Yearlings and good ones. They will suit you.
M. D. CLORE - - **LUCAS, IOWA.**

HEREFORD BULLS

A FEW good individuals for sale at right prices. Address, mentioning Homestead, John Thompson, care of Farmer and Breeder, Sioux City, Iowa.

HORSES AND JACKS.

Special Sale of Percheron and Belgian Stallions For Next Thirty Days

New importations arriving! Two large importations received since January 15th. Another importation of stallions and mares now on the water. More arrived in April. We have at any time of the year more BIG-TON, HIGH-CLASS PERCHERON and BELGIAN stallions than any other firm in the United States.

HOLBERT HORSE IMPORTING CO
A. B. HOLBERT, Prop. GREELEY, IOWA

MAASDAM & WHEELER
FAIRFIELD, IOWA
PERCHERONS

10 Head of Extra Large Imported 3 Year Olds.
12 Head Large, Strong, Home-bred 3 Year Olds, Blacks and Dark Grays Still on Hand and for Sale This Spring at Reasonable Prices.
MARES AND YOUNG STOCK FOR SALE AT ALL TIMES

OAKLAWN STOCK FARM

Breeds and Imports Percheron, Belgian and Shire Stallions and Mares.

NEW **Importation Arrived April 23rd,** and is now ready for inspection. If you want the kind good enough to win at the state fairs at rock bottom prices see what I have before you buy. Stallions and mares of all breeds in the last importation. When writing mention The Homestead.
GEORGE EGGERT NEWTON, IOWA.

FAIRVIEW STOCK FARM
PERCHERONS, BELGIANS, SHIRES, MAMMOTH JACKS and JENNETS

SOME extra good home-bred stallions. Percherons and Shires, pasture raised and in splendid thrift. The sort to do a lot of hard service. A few extra high-class big jacks 3 to 5 years old and 30 jennets, all ages. Democratic prices on this stock for next 30 days. Want to close them out. Address, mentioning The Homestead,
HENRY BECK, - - **LITCHFIELD, NEB.**

BELGIAN EMPORIUM OF AMERICA.

A CHOICE collection of Belgian stallions and mares constantly on hand. Several importations annually. Catalog on application. Address
Henry Lefebure - - - - - **Fairfax, Iowa.**
Eight miles west of Cedar Rapids.

FAIRVIEW JACK AND JENNET FARM

60 **HEAD MISSOURI AND KENTUCKY BRED.** A strictly high-class lot of Mammoth Jacks and Jennets, 14½ to 16½ hands high, with plenty of bone and quality. Everything guaranteed as represented, and priced right. Address
J. C. HUCKSTEP, **EOLIA, PIKE COUNTY, MISSOURI**

STALLIONS

Home-bred draft stallions $250 to $650. Guarantee to sell you imported stallions for less money than any firm in America. Come to a live stallion market and see all draft breeds. A. LATIMER WILSON, Creston, Iowa.

PERCHERONS

Eleven home-grown 3-year-old stallions, exact wt. 1,840 to 2,090 lbs. Bone to spare. May 29th these and youngsters for sale. The **biggest** Percherons pay you best. Drop a card for details.
FRED CHANDLER
Route 7,
Chariton, - **Iowa**

Purchase Percherons

There is a fundamental reason why the breeding of draft horses will continue profitable.

From 1900 to 1910 the population of the United States increased 21%. Horses increased only 8%. Cattle decreased 8%, hogs 7%, sheep 14%.

This means increased tilled acreage and increased demand for horse power.

For full information address Wayne Dinsmore, Sec'y, Percheron Society of America, Union Stock Yards, Chicago, Illinois.

GERMAN COACHERS

TWO choice stallions, one imported, showing size and style and one home bred, with quality. Priced reasonably. Short-horn bull, fifteen months old, well bred. Address
HELD BROS. **Box 7** **HINTON, IOWA.**

Palestro I. 52027 (67506) will make the season of 1913 at my farm 2 mi. east of Garner, Ia. Palestro I. is a black sired by Mon Jarret (47526) by Theudis, by Besigue, by Brilliant III. and dam traces to Brilliant III. Write for terms. Henry Moll, Garner, Iowa.

W. J. BUTLER

OTTAWA, ILL., Breeder of
Percherons and Belgians

12 YOUNG stallions and some young mares. I raise them and want to sell them. Write me.

AN EXTRA LOT OF YOUNG CLYDESDALE

STALLIONS that I will sell at right prices. Address **R. O. MILLER, Route 1, Lucas, Ia.**

FOR SALE Ten head of Percheron stallions, mares and colts. Address **Ashbaugh Bros., Maynard, Iowa.**

PERCHERONS Imported and home-bred stallions and mares from $200 to $900 each. Address
H. REDENIUS, RUSHMORE, MINNESOTA.

Stooker's Stock Farm

GENTLE PONIES Several small ponies for sale. Write me what you want. Perhaps I can please you. J. H. Kelley, Altoona, Ia.

OFFERING just now some very choice Percherons, A pair young stallions and a few mares. Write for full information. Address
F. A. STOOKER, - **Dunbar, Nebraska.**

FOR SALE Two Shetland pony stallions, one and two years old, full brothers, matched, weight of eldest 560. S. A. Wolcott, Gilmore City, Ia.

SHETLAND PONIES

STRICTLY choice lot of stock, best of breeding and attractive prices. C. S. Bratt, Arapahoe, Neb.

OWENS BROS.' GREAT SALE OF
SCOTCH SHORT-HORN CATTLE

AT THE FARM, FOUR MILES SOUTH OF
HOMESTEAD, IOWA, THURSDAY, JUNE 12, 1913

80 HEAD---60 FEMALES, 20 BULLS

SIX BEEFY SCOTCH BULLS THAT SELL IN THE SALE.

THE BULLS are a good lot and several of them are good enough to head any herd. Courtier's Crown, Scottish Chief, Scottish Courier, Courtier's Hero, Scottish Secret and Sultan's Magnate are all good ones, the deep, thick, low set kind. If you want a herd bull, don't miss this sale.

THE FEMALES include some of the best cows and heifers we own. 20 of the cows have calves at foot and the others of breeding age are in calf to our herd bulls, Sultan Goods, Cumberland Dictator and Scottish Lad. The Queen of Beauty, Flora, Butterfly, Secret, Avalanche, Violet, Emma, Duchess of Gloster, Victoria, Missie and other Scotch families are represented. The cattle are in the finest of breeding condition, just right to do well in the buyers' hands. All have been tuberculin tested.

The illustrated catalog will be sent only on application to

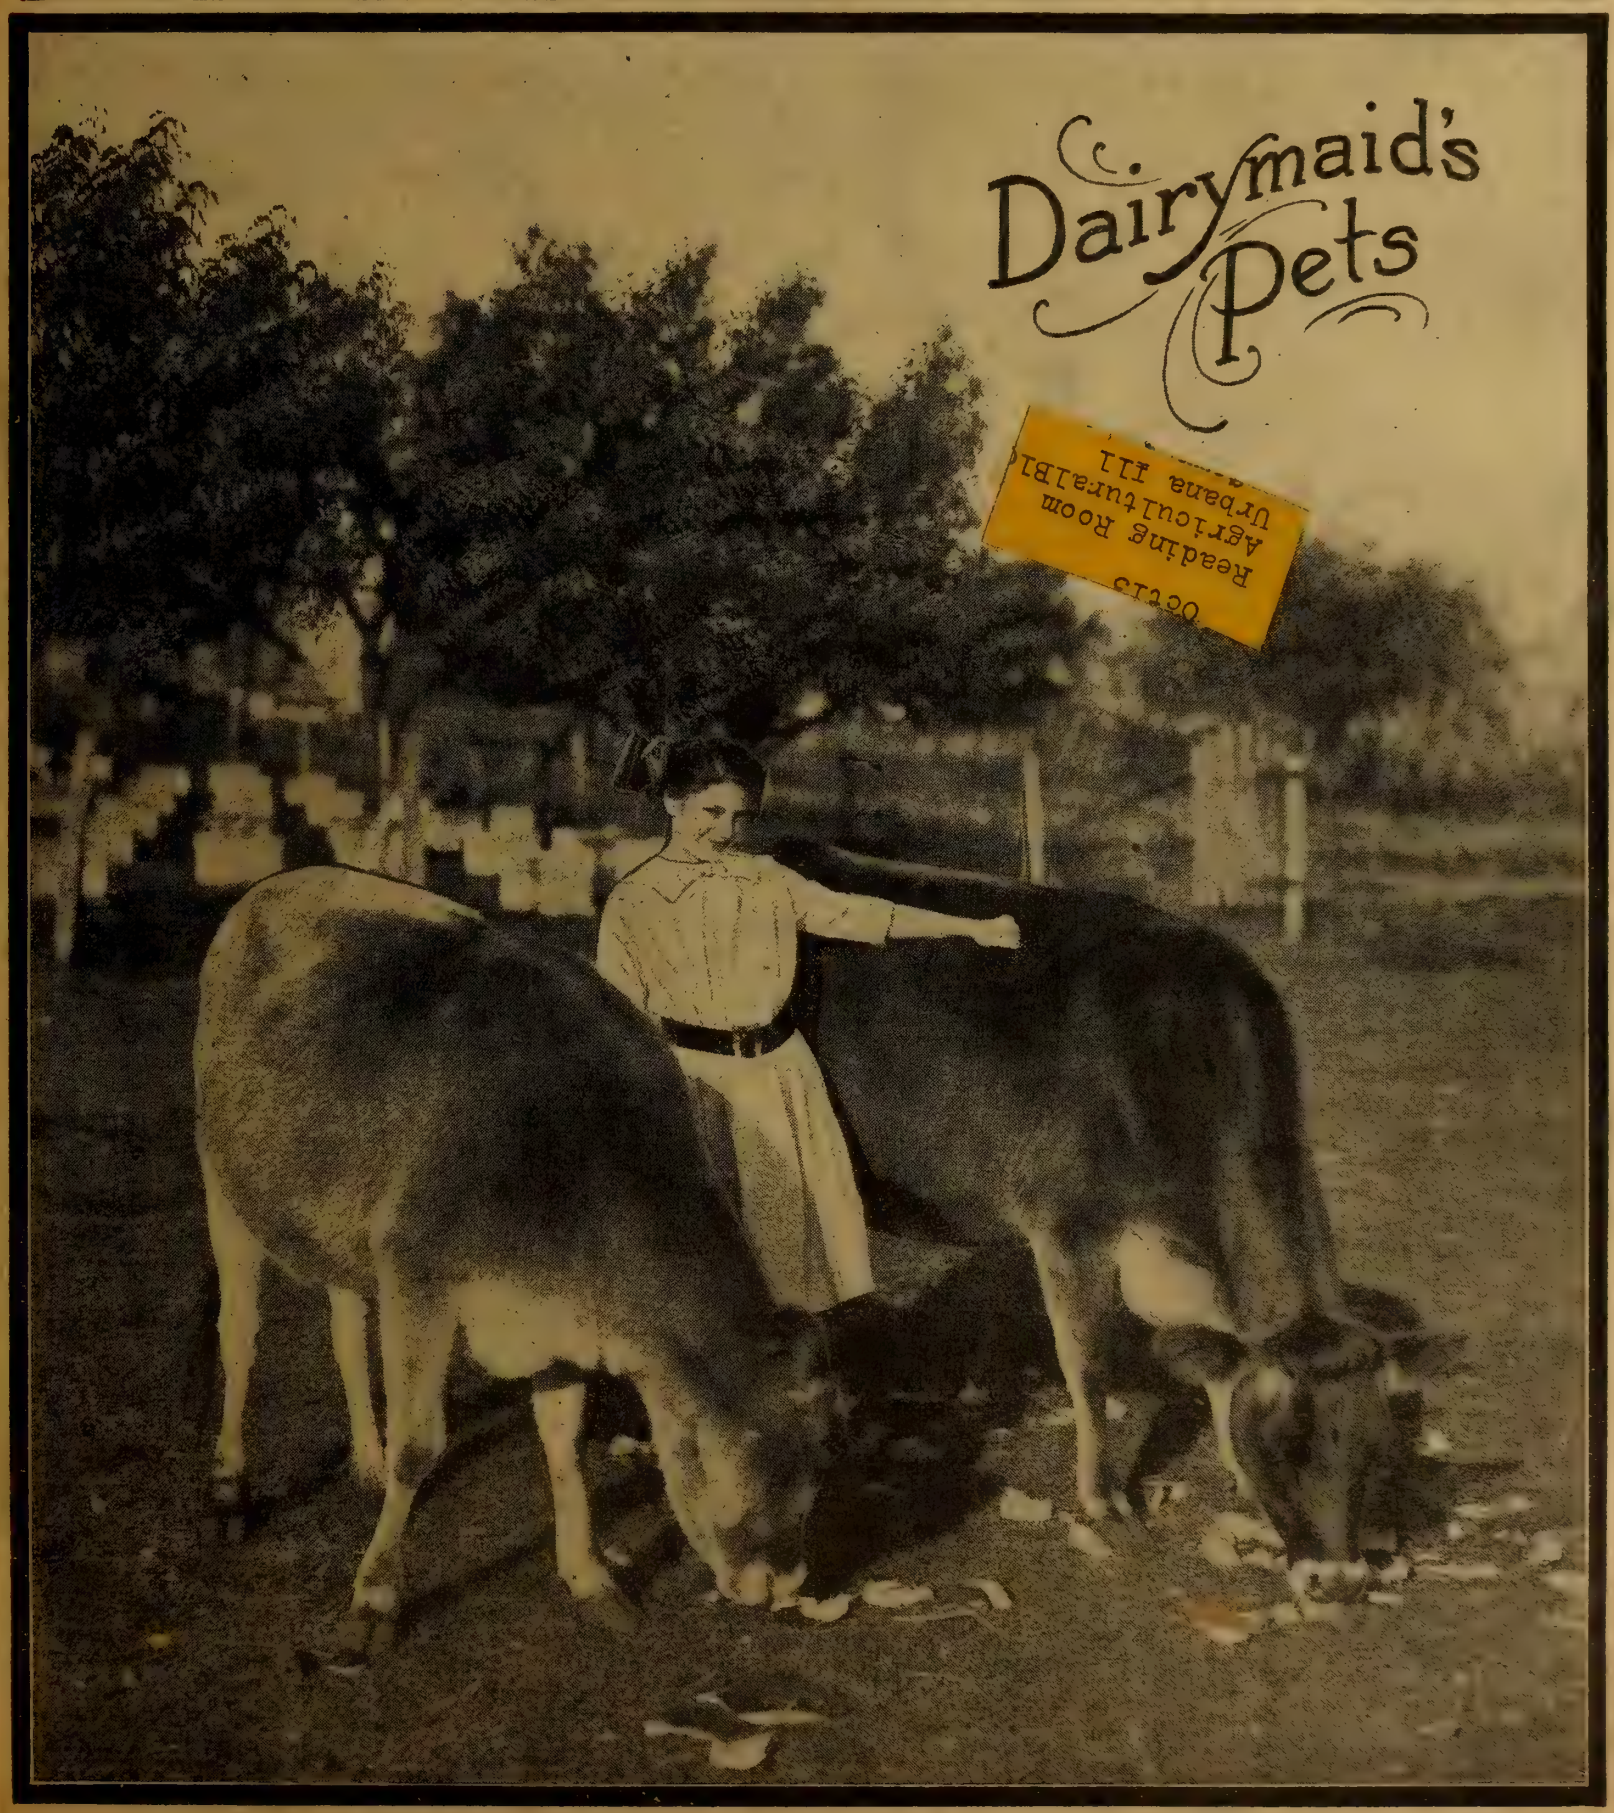
VOL. LVIII. NO. 23 DES MOINES, IOWA, JUNE 5, 1913. WHOLE NO. 2904



A Montgomery Ward & Co. Honeymoon

Drawn Expressly for Montgomery Ward & Co. by Henry Hutt

Henry Hutt, whose beautiful cover designs you have seen on leading publications such as The Ladies' Home Journal, Life, The Saturday Evening Post and other national magazines, was asked to give his idea of the message of Montgomery Ward & Company's new Catalogue. He said "I believe more young couples have been able to start on their honeymoons, relieved of care through the savings made by buying through Montgomery Ward & Co.'s Catalogue than you can ever realize."

So we commissioned Mr. Hutt to convey this message to you because we knew he was right.

Naturally the birds who are building their nests have no time to talk about how they are doing it.

In after years many a contented young couple write us saying how impossible it would have been to spread out their little available cash if they had not been able to buy the furnishings of their new homes so economically through the Ward Catalogue.

That is part of the joy of this great business—but it is not confined to the young people.

Both old and young are realizing more day by day how much better it is to conserve their dollars by buying in the modern way through Bargaintown's great text book—our new Catalogue of 1000 pages.

Have you seen a copy of this great book? Have you studied the hundred thousand articles graphically pictured and truthfully described.

If not, there is a copy waiting for *you*. And it will be sent without a cent of expense—except the cost of the stamp spent in writing to us.

Simply sign the coupon on this page and send it to us *now*.

This will be no obligation on your part—except to look through its pages.

Cut out this coupon, sign and send it today to

Montgomery Ward & Company

Dept. X17 **Chicago** **Kansas City** **Ft. Worth, Texas**

(We have established in each of above centers. Send to point nearest you.)

I would like to receive and look over your New Catalogue. Send me a copy without any cost or obligation on my part.

THE ONE-ROOM SCHOOL MENACE

Sorry Condition of Educational Affairs Found Throughout the Grain Belt by Government Investigators—The Cure is Not Difficult, However, and Already Better Conditions are in Sight.

ONE-ROOM MODEL SCHOOLHOUSE EXHIBITED AT WISCONSIN STATE FAIR.

THE one-room, one-teacher school is the menace of rural education. Even in these progressive days of school consolidation, when centralized schools are to be found in every state, the fact remains that the rural school is in a deplorably lamentable state of inefficiency. Government investigators have been looking into the subject thoroughly. They have gone throughout Iowa, Illinois, Missouri, North Dakota, Wisconsin, Minnesota, Nebraska, Kansas, every one of the twelve grain-belt states and twenty other states as well and have discovered facts to which the prosperous grain-belt farmer would be only too glad to shut his eyes and ears, but which remain nevertheless a shame and a disgrace to those sections in which commodious, up-to-date farm houses and substantial outbuildings testify to a prosperity no evidences of which are to be found in the country schoolhouses.

"Their terms are short, their support inadequate, their teachers poorly prepared, their attendance irregular, their management unscientific and wasteful of money, time and energy, their courses of study ill adapted to their needs and the houses in which the children are taught cheap and poorly equipped and furnished." Such is the government investigators' report on the rural school. It is a terrific arraignment, but the facts disclosed justify the severe terms.

The sorry condition of country schools is not generally recognized. A report issued by the United States Bureau of Education, under the title of "The Status of Rural Education," discloses that not foreign immigration, but the lack of educational opportunities in rural districts, is chiefly responsible for the relatively high rate of illiteracy in the United States. The illiteracy among native-born children of native parentage is more than three times as great as among native children of foreign parentage. Few people know that approximately 62 per cent of the total school enrollment is in rural schools, but that the rural aggregate attendance is only 51 per cent of the total aggregate attendance; while about 60 per cent of those in rural schools are in one-teacher country schoolhouses and that, to quote the government's report, "the instructional work in the average one-teacher country school is of very low grade."

The total number of one-room, one-teacher country schoolhouses in the thirty-two states covered by the government's report (including the twelve grain-belt states) is 147,227, which is 80 per cent of the total number of public schools in these states. At this ratio the total number of one-room country schools in the United States is 212,380, with an average attendance of thirty-one each, which means no less than 6,700,000 children in schools so unsanitary, unattractive and insufficient as to be deplorably inadequate in every way.

The grain belt cannot escape responsibility for this condition of affairs. The government's bulletin gives detailed conditions in seven of the twelve grain-belt states, as follows:

Illinois.—The state has 10,615 ungraded schools, with an average enrollment of twenty-seven pupils in each school, and an average annual session of 7.5 months. Ten of these ungraded schools were in 1910 in log buildings. There were ninety-nine schools with an enrollment of five or less; 568 with ten or less and 1,512 with fifteen or less. There were employed 3,063 teachers who were teaching in 1910 their first year. In these ungraded schools in that year there were 3,448 teachers who had less education than the equivalent of a complete high-school course.

Iowa.—The state department classifies the rural school buildings as, approximately, 60 per cent "good," 30 per cent "fair," and 10 per cent "poor," 5 per cent are without suitable and separate outhouses. There were 12,640 one-room country schools in 1910. The state superintendent reports that in January of that year 257 of these had an enrollment of five or fewer pupils; 1,814 from six to eleven; 2,986 from eleven to sixteen; and 2,453 from sixteen to twenty-one. He secured reports from 10,350 of these schools, giving the actual attendance for the best day in the third week of January, 1910. Ten schools reported one pupil each; thirty-five reported two pupils each; seventy-three reported three each; 160 reported four each, and 244 reported five each. There were altogether 522 schools with an actual attendance of five or less; 2,498 with attendance of from six to eleven; 3,127 with from eleven to sixteen; and 2,168 with from sixteen to twenty-one. In these country schools were 4,676 teachers teaching their first year, and 2,500 who began the year with less than one year's experience; 1,659 of them were receiving less than $35 per month; 7,301 from $35 to $50 per month. The average number of months the schools were taught during the year was eight. Owing to the great number of changes in teachers during the year, the average number of months each teacher was employed was, approximately, five.

FIVE THOUSAND LOG SCHOOLHOUSES ARE STILL IN USE IN THE UNITED STATES.

Kansas.—About 300,000 or 60 per cent of the entire school population (5 to 21) lived in rural districts in 1910. Of this number 242,187 lived in districts served by one-teacher schools. The average enrollment in such schools was twenty-two, the average daily attendance fifteen, and the length of term 26.3 weeks; the cost of maintaining the schools was $3.98 per pupil per month.

Minnesota.—In 1910 there were 8,719 teachers in rural districts. Men received an average salary of $51.47; women, $42.67. The enrollment in 346 schools was less than ten pupils, and in 1,911 schools it was from ten to twenty. The average session for these small schools with less than twenty pupils was seven months. Each pupil attended on an average but ninety-two days. The teachers in them were paid an average of $39.37 per month, which is $3.69 less than the average paid for all rural teachers of the state, and $12.86 less than the average paid for all teachers, both urban and rural, for the state.

Missouri.—There were 10,882 school districts in 1910, including 697 with fewer than twenty pupils of school age and

THE HOMESTEAD

A PRACTICAL JOURNAL for the FARMER, STOCKMAN, FRUIT GROWER, POULTRYMAN, GARDENER, and HOUSEKEEPER

BY JAMES M. PIERCE

JAMES ATKINSON, Editor-in-Chief

ESTABLISHED IN 1855

Entered at Des Moines Postoffice as second-class matter

PUBLISHED EVERY THURSDAY

SUBSCRIPTION RATES—Single subscriptions, $1 a year; ten copies one year, $10, and an extra copy to getter up of club. In clubs of fifty or more, 30 cents a year. Subscription price, in Canada, $1.50 a year. Subscription price to other foreign countries, $2 a year. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send your old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to THE HOMESTEAD COMPANY, Des Moines, Iowa.

A GIGANTIC ROAD PLAN.

Ex-Senator Jonathan Bourne, Jr., of Oregon, father of the parcel post legislation in congress and to whose untiring efforts the law creating that service is largely due, has a plan for road building that goes far beyond any former plan, in magnitude and far-reaching result. Senator Bourne proposes to expend three billion dollars for a national system of highways, the federal government to advance the money to the various states on their fifty-year 4 per cent bonds: His plan contemplates that this immense fund shall be apportioned among the states on the basis of area, population, assessed valuation and road mileage. The proposed apportionment to middle western states would be as follows:

	Road mileage	Apportionment.
Illinois	94,141	$39,400,000
Iowa	102,427	25,000,000
Indiana	67,996	25,100,000
Michigan	68,906	28,800,000
Wisconsin	61,000	25,600,000

The Bourne plan also suggests the establishment of a national school of highway and bridge engineering in Washington, so as to create a supply of trained specialists from which the various states could draw for state and district engineers, thus systematizing the work of construction and maintenance the country over.

Senator Bourne realizes that the magnitude of his plan is one of the chief arguments against it, the rank and file of the road enthusiasts preferring to make haste slowly and go about the herculean task in a more modest manner to begin with at least. He has presented his plan, however, to the joint congressional committee of federal aid for post roads and has started on a campaign of promotion and publicity by which he hopes to win converts. Elaborating his plan to an eastern newspaper man he said:

Expenditure of $3,000,000,000 by the government and the several states for highway improvements is, at first thought, a startling proposition, even though the expenditure be distributed over a period of fifty years; but when we consider the magnitude of the interests affected, it will be seen to be a wise investment.

There are in the United States some 890,000,000 acres of farms, worth about $39,000,000,000. There are some 22,000,000 working horses and mules on these farms, costing annually for feed and keep about $1,760,000,000. With good roads will come substitution of traction for horse power, with a probable saving of $1,000,000,000 a year.

My plan contemplates the expenditure of $1,000,000,000 for road construction and $40,000,000 a year, for fifty years, for maintenance by the government and the states, making a total of $3,000,000,000 in fifty years. If the expenditure for construction increased the value of the farms only 3 per cent the owners would get back immediately in property values more than the amount of the investment. If the amount expended annually for road maintenance reduced the cost of hauling 30 per cent, the saving would cover the cost of maintenance. In my opinion the adoption of my plan would double the total value of farms and reduce the cost of road hauling 75 per cent.

As a plain business proposition, expenditures on road construction and maintenance offer larger returns on the investment than anything else of which I am aware. In my opinion, roads are of far greater economic and social importance than pending tariff and currency legislation combined.

I is a forgone conclusion that the American people will not adopt any such gigantic plan without due consideration and discussion, so that there is little prospect of the scheme being tried out in the near future. At the same time Senator Bourne has a reputation for putting through some big reforms. Two years ago the parcel post seemed to be slated for oblivion for many years to come, yet today it is so firmly established as to lead to the wonder that it was so long delayed. It is not chimerical to suggest that even as immense a plan as the Bourne road plan is possible some day.

A WORD ABOUT THE COLT.

A Missouri subscriber calls attention to the fact that the average farm colt, even before weaning, requires something to supplement the mother's milk. In outlining his own methods of handling colts he says:

Too few of the colts on most farms receive any other means of sustenance except their mothers' milk till they are ready to wean. Of course, the colt will graze some, but it will not develop and thrive as well on grass and milk as it would if properly fed on a little grain and mill-feed stuff. We begin to tempt the colt to eat of a little grain, mill feeds and clean, bright roughage just as soon as possible. With a small trough containing some grain, and placed where the colt frequents, it quickly forms the habit of eating.

Oats are a fine grain for the colt. Too much corn is to be avoided, as it is too strong for the little fellows' digestive apparatus. It does not contain the substance of which colt tissue ought to be formed, anyway. Frame (bone) and albuminous structure should be embodied in the colt's rations.

We have found a most satisfactory feed for the colt to be one part corn chop, one part bran, and two parts oats. These form a ration that will furnish bone and muscular tissue for the young and rapidly growing body, and at the same time supply sufficient material for putting on a little fat and keeping up the heat sometimes necessary.

Such a ration is especially adapted to keeping the bowels of the colt free and easy of movement, which is very essential at this particular period. Any congestion or difficult movement of the bowels must be given the most prompt attention. For this reason it will be well to add to the above ration two or three handfuls of oil meal twice a day, the amount being increased or lessened according to what the requirements seem to be.

By a judicious, systematic plan of feeding the colt we thus insure its rapid and proper development into a strong, full-sized animal. This should be done before the weaning period, as it will so accustom the colt to eating that the change from sucking the mare to that of subsisting entirely by eating will not prove so much of a detriment to it. The plan of early feeding also aids in keeping the mare in good flesh, as the colt will not draw so heavily from her milk supply as it would if no feeding were done in conjunction with the nursing.

We venture to say that where the little colt is fed liberally on either ration mentioned by this subscriber it will result in making not only maximum growth, but the little fellow will line up in the fall carrying a reasonabe amount of flesh even though the mare has been worked somewhat freely through the spring and summer months. We would like to place special emphasis on the free use of oats, though a little corn may be used to advantage if the ration is balanced by adding some bran and oats. In the case of the draft colt where the mother is at work liberal feeding at all times can only mean one thing, namely, that maximum growth of body and limb will result. Those who will take the time to consult the draft horse market will find that pounds are very high in price after a certain limit is reached and these pounds can be more economically made the first year than at any other time.

PROFITS IN ROTATION OF CROPS.

An average profit of $8.02 per acre for six years is the result of the work on the North Dakota demonstration farm at Bathgate. To secure this result the crops were rotated as follows: corn, wheat, barley, clover, wheat, oats, and the land manured for the corn crop. The highest average net profit per acre was $15.57 in 1911, the lowest was $2.93 in 1909. The yields were about as good in 1912, but the price was enough lower to reduce the returns by $9.30 per acre reducing the profit from $15.57 in 1911 to $6.26 in 1912. Clover has had a good deal to do with securing these profits. It has returned on an average, $33.24 per acre per year and that with an outlay of but $9.50 per acre. The average return for wheat has been $18.90, but the cost of production was $10.25. Without the manure and the clover the wheat would not have yielded enough to make a profit of $8.65 per acre.

The demonstration farm at New Salem has been run seven years. The rotation here consists of corn, fife wheat, oats, oats and peas, and macaroni wheat. The land is manured for the corn crop. The average net profit per acre for the seven years was $4.77; 1910 and 1911 showed a loss of $4.01 and $1.85 respectively. The profits in the other five years were sufficient to wipe out this loss and bring the average net profit to nearly $5. These results could not have been secured without the manure, the corn and thorough work.

WHITE CLOVER AND FLIES.

There are few farmers but realize that the house fly is a deadly pest. The great question is how to get rid of it. It will not do to consider the work ended once the windows and doors are screened, for flies will gain entrance notwithstanding such precautions. What the farmer and the farm wife need is good, sensible advice on how to rid themselves of a pest at once uncomfortable and dangerous. We are indebted to Dr. Crumbine, of the Kansas State Board of Health, for the following practical suggestions on how to rid the house of flies once they gain an entrance:

Any method that gets rid of one fly is good; a method that gets rid of two flies is better, and so on. Fly paper is good, but you have to wait until the fly allows itself to be stuck, and some flies are very perverse about this. Poisoned water helps, but often the flies seem to be immune.

Pyrethrum powder burnt in a house stupefies flies until they may be swept up and destroyed. A little of this burnt in the morning in the rooms which are then aired, will make the house exempt from flies all day. Twenty drops of carbolic acid put on a hot shovel or any piece of iron creates a vapor that kills flies, making a simple and effective remedy. The common mignonette plant grown in jars and placed in a room makes home life unpleasant to the house fly, while nature has given us another simple remedy in the common white clover found in almost every yard. Gather a handful in the morning and place it in a vase, and watch the flies hunt the open; its odor is very offensive to them. The clover should be renewed every day or so, for when dry it irritates the nostrils.

A cheap and effective poison, not dangerous to human life, is bichromate of potash in solution. One dram dissolved in two ounces of sweetened water and placed in shallow dishes will dispose of many flies. Another remedy which for all purposes probably has no equal is a solution of formalin or formaldehyde in water. A spoonful of this liquid in a quarter of a pint of water left exposed in a room will kill all the flies in it. Flies are also exceedingly sensitive to light. By closing all the blinds of a room except one, the flies will seek the open one, when they can be easily driven out.

The white clover treatment is available to practically every farmer and should be tried immediately. Most of the other suggestions depend upon drugs which must be purchased. It might be well to make a list of these for purchase the next time a trip to town is taken. The ordinary house fly is little, but its possibilities of trouble are great. The danger in the drug treatment lies in the possibility of the children being hurt by the preparations, for children have a way of getting into mischief with the most harmless things. We would suggest careful screening of all openings and a thorough trial of the simple treatment suggested by Dr. Crumbine, using the bunch of white clover, with the use of drug preparations withheld until the simpler methods have been tried.

ROAD DRAG DAY.

The success of Road Drag Day is assured. Hardly a state of the grain belt but is trying this latest plan of co-operation between town merchants and farmers. The success of the plan in Stuart, Iowa, a town of 2,000, was recently detailed. The success of the road enthusiasts of Centerville, Iowa, a town of 6,000, is so notable that we publish the following report, kindly furnished by a subscriber:

Centerville believes it broke all drag day records when 150 drags were driven to town and prizes were distributed by merchants amounting to $2,000. The sixty-ninth one to register was Miss Edna Gray, twenty years old, who drove thirty-one miles. She got up at two o'clock, left home at three, drove eight miles to the southwest corner of the county, then twenty-three miles to Centerville on a drag without a seat on it. She admits she sat down on it occasionally. Her brother accompanied her on the trip with another team. Her prizes aggregate $111 in cash and $9 in merchandise and good roads boosters propose to raise her a purse.

Mrs. Blanche Talbot drove in thirteen miles with a seven-months-old baby on the drag and took the prize for the married woman coming the farthest. W. S. Creech was the man coming the farthest, driving seventeen miles. Isaac Streepy was the oldest man to finish the drag marathon. His age is seventy-five years. W. H. Owings was a close second. He is seventeen days younger. Arthur Cozard, six years old, was the youngest boy and Marjorie Talbot, nine years old, was the youngest girl.

Every dragger was given merchandise prizes by thirty merchants besides the special prizes. Coming to town and returning the draggers traveled a total of 1,774 miles.

When all ages from nine to seventy-five thus co-operate there is hope that the enthusiasm necessary for the solution of the road problem will shortly be forthcoming. Road Drag Day is passing the experimental stage and proving its practical usefulness.

STUDYING THE SELLING END OF FARMING.

A newspaper interviewer recently asked the new secretary of agriculture, David F. Houston, "What is the most important agricultural question of the day?" The secretary was ready with his answer. He had a wide field to range over: good roads, greater yields per acre, improved schools and churches, home uplift. But Secretary Houston believes there is an even greater and more imminent question than these. Here is how he answered, in his own words:

What is the most important agricultural question of the day? Let me answer you in my own fashion. So far, the states and the national government have been giving attention to problems of production. We have wanted to know how staple crops might be increased. More and better corn, cotton, wheat and hay on the same acreage has been the aim of scientific agriculturists. The results which have been accomplished in that direction are wonderful. We have learned how to produce. Now we must learn how to market our crops. Therefore, organization is necessary. Co-operation is a word I dislike. Many co-operative enterprises are fakes. They are no more than private combinations run for personal profit. Uplift is another misused and overworked word. Besides, it is offensive. Any man resents being told that he needs uplifting. Co-operation, therefore, as it is often practiced and is coming to be understood, is not to be applied descriptively to the movement we are about to undertake. Organization is the term to be employed in connection with our efforts—not organization which looks toward holding crops back from market and influencing prices, but which promotes potentiality and improves conditions of rural living.

Our first attention is to be given to the marketing of farm products. I was glad on coming here to find that congress had taken a squint at that great question by making an appropriation of $50,000 with which the secretary of agriculture is to carry on an investigation and to acquire and diffuse among the people of the United States useful information on subjects connected with the marketing and distributing of farm products. But the sale of produce is only one aspect of the movement toward rural organization.

Many things have been done in spots throughout the country to better conditions among agriculturists. These are to be studied and knowledge of them carried to the farmers of all sections. The vision that comes into the minds of those working to develop the rural organization service includes good schools, competent doctors, places of amusement, facilities for borrowing money at a reasonable rate of interest, systems of sanitation, and, indeed, all the advantages and conveniences found in our cities and large villages. We see, also, a centralized church for each farming center, and not three or four weak congregations, battling for existence and starving their ministers.

The interview is important, in that it shows the attitude of mind of the man who for the next four years is to direct the far-reaching work of this highly important branch of the government. Secretary Houston brings new blood into the department for the first time in sixteen years. During that time he has been studying problems, first hand in Texas and Missouri. He is convinced that what the farmer needs is not so much bigger crops, but bigger earning capacity for the crops which he already produces. To this end, the department of agriculture will devote itself and its many-sided and far-reaching energies for the next four years.

It is of more than passing interest to note that grain-belt men have been called upon to carry on this new work. To begin with, Secretary Houston, coming from Missouri, is a grain-belt man. In the second place he has chosen as his first assistant another Missouri man, Dr. Beverley T. Galloway, assistant in horticulture at the

University of Missouri for a number of years. In the third place he has put this work of farm organization and crop marketing in the hands of still another grain belt product, Dr. Thomas Nixon Carver, born and educated in Iowa and an expert on economic questions of the day. Dr. Carver knows the farmer's problems first hand. Needing money to pay his way through college he started a milk route and for four years worked, as hard as any man ever worked, in a dairy, making the fruits of his toil pay his college expenses, year by year, until he graduated. It is into such experienced hands that Secretary Houston proposes to entrust this highly important question of seeing that each stroke, each seed and each moment count double what they did in the old days of unorganized, haphazard farming and selling of farm products.

CORN ROOTS NEAR THE SURFACE.

There has been uneasiness throughout the greater portion of the corn belt this year over the lateness of the season. Heavy rainfalls combined with a low average temperature have resulted in making soils unusually cold for the time of year and as a result it may be said that the crop is starting off behind time. This coldness of the soil will materially affect the character of the root development and the growth in the surface soil will be much greater than is usually the case. It may be depended upon always that roots will develop in that part of the soil where conditions are most favorable as to the warmth of the surrounding medium and the moisture supply.

As a general principle, it may be always safely borne in mind that deep cultivation is much better suited to dry years than to wet and the conditions thus far this year indicate that those who hope to reap maximum crops will not indulge in the luxury of pruning the corn roots with their cultivators.

Of course, it goes without saying that when plants are small, little damage can be done, but in going over the corn the second and third time the thought that should be uppermost in the mind of every man who actually does the work is that the roots are nearer the surface this year than usual and that therefore the soil should not be stirred deeply.

An additional fact should not be lost sight of, namely, that deep cultivation always delays the crop in maturing, and as the season this year between the time of planting and the average date of the first frost is now known to be too short, every effort should be made to hasten maturity rather than delay it. We have known instances where a single deep cultivation late in the season has delayed ripening for a period of ten days, this being not apparent when the deep cultivated crop was compared with an adjoining field where shallow culture was practiced.

We well realize the aversion which many men have for the shallow shovels because we have known instances where hired men absolutely refused to use them. It may therefore require some patience to get the work done this year in accordance with sound practice, but be assured that any patience that is excercised in order that this desirable end may be reached will be paid for at a very good price per hour for labor involved.

DISINFECTANTS FOR STABLES.

In a recent bulletin from the department of agriculture some attention is given to the question of disinfecting stables and the instructions in this bulletin include among other things a list of the most commonly used disinfectants. For example, bichloride of mercury, also known as corrosive sublimate and mercuric chloride, is used in solution in water, commonly in a strength of one to 1,000, though solutions of double such strength may be employed. Although possessing great germicidal power, it has the disadvantages of being a violent poison, of corroding metals and of uniting with albuminous substances, such as excreta, blood, etc., and thus forming inert compounds. Unlike the coal-tar products, it leaves no odor in the stable, which is an advantage in connection with the production of milk. On the other hand, care must be used in the handling of a solution of this drug, and feed boxes to which it has been applied should be washed with clear water before animals are again permitted access to them.

Chloride of lime (sometimes termed chlorinated lime) is a well-known disinfectant, although its value is doubtless greatly overrated. This may be due in part to the fact that it is a powerful deodorant—such drugs on account of their pungent odor being popularly believed to have great disinfecting power. Being of uncertain strength and somewhat destructive to metals and having a permeating odor especially objectionable in a stable where milk is produced, chloride of lime cannot be classed as the most desirable of disinfectants. For general disinfecting purposes it may be mixed with water in the proportion of six ounces to the gallon.

An aqueous solution containing approximately 40 per cent formaldehyde and known as formalin has of recent years become a more or less popular disinfectant. Formalin is mixed with water in the proportion of six ounces to the gallon and the resulting solution is applied directly to surfaces of substances which are to be disinfected.

Carbolic acid in its pure form is, at ordinary temperatures, in the shape of long, white crystals. For convenience it is frequently dispensed in liquid form by the addition of 10 per cent of water. A 5 per cent solution of carbolic acid is sometimes used as a disinfectant, but carbolic acid has the disadvantage of being expensive and somewhat difficult to dissolve.

Crude carbolic acid should not be confused with pure carbolic acid. It is a product of coal-tar distillation and consists for the most part of practically inert oils and cresylic acid. Its disinfecting power depends upon the amount of cresylic acid which it contains, as well as the relative percentage of hydrocarbon oils. Owing to its uncertain composition crude carbolic acid cannot be classed as one of the most desirable disinfectants.

Cresol, commonly termed "straw-colored carbolic acid," "liquid carbolic acid," etc., in a 2 per cent solution is an efficient disinfectant. It has the disadvantage, however, of being somewhat difficult to dissolve, so in preparing a disinfecting solution warm water should be used and care exercised that the drug is entirely dissolved. As the disinfecting power of cresol is dependent upon the amount of cresylic acid contained therein, it is essential when using the drug to know the degree of purity. Grades can be purchased under a guaranty to contain from 90 to 98 per cent of cresylic acid. Any containing less than 90 per cent should be rejected.

IOWA SWINE BREEDERS.

A letter just received from Sec. M. P. Hancher, of the Iowa Swine Breeders' Association, states that the date for the summer meeting has been set for June 18th, and that the usual meeting of the expert judge association will take place on the day following. Only a portion of the program has been arranged at this time. Dr. C. H. Stange is on the list for a paper on the subject of "Methods for Controlling and Eradicating Hog Cholera in Iowa." Prof. John Evvard will talk on "Forage Crops for Swine." Col. H. S Duncan will deliberate on the subject of "Public Sales." W. M. McFadden, secretary of the American Poland China Record Association, will aso be on the program, but the subject has not yet been decided upon. Mr. Hancher informs us that in next week's issue we may expect to give the entire program for the day's exercises.

According to a bulletin issued recently by the Michigan State Dairy and Food Department the "Egg Substitute" that has been offered for sale proves to be a composition of baking powder, starch and analine dye. Every cook knows full well that in a scarcity of eggs if starch is added it helps lighten the pie or cake. One of these substitutes was named "Egg Save" which on being analyzed was found to be 80 per cent starch, 2 per cent casein and 18 per cent water colored with a yellow coal tar dye. If we are short on eggs we will use our own starch, thank you.

Get My Low Direct Prices on Galloway Galvanized Gates

They're bull strong and hog tight. The strongest and best built farm gate selling at the lowest prices ever made on a strictly standard high-grade farm gate. Made in four different styles—one, two, or three bar type—heavy or medium size tubing in any length from 8 to 16 feet. Supplied either painted red or galvanized. Galvanized gates are best and our price lower than dealers or agents ask for inferior, painted gates. Self locking, built with adjustable sliding hangers. Sold on a positive three year guarantee. Equip your farm this season with Galloway Galvanized Gates.

Wm. Galloway, Pres.

Write for My New Gate Offer

To introduce Galloway Galvanized Gates, I'm making remarkably low, direct prices. You can buy ten superior Galloway Galvanized Gates for what six of the ordinary type would cost of your dealer or some agent.

Galloway Gates are sold direct on our famous plan of satisfaction guaranteed or your money and freight costs refunded. Don't buy gates of any other style or make until you see our big circular and prices. Write me today—NOW—before you lay this paper down. Use a postal or letter. Just address

BUILDING A CRIB?

If you expect to build a crib let us tell you how to install the "Camp" Vertical Cup Elevator—We'll gladly offer suggestions and show you why the "Camp" is the most suitable equipment for your needs.

Our elevator requires no pit—it can be installed with hopper above the floor. Made of first quality cypress, all material is the best to be had. The Camp is constructed on most simple lines, can't get out of order and gives satisfaction year in and year out. Our machine does the work properly and does it quickly. Can be installed with either overhead or low down Hydraulic Jack. Camp takes up less space. Tell us the kind of crib you intend to put up; we'll do the rest

Without fail, get our full information today.

Camp Bros. & Co., Washington, Ill. DEPT. O.

CURE THAT SPAVINED HORSE

In three weeks' time you can have a good, sound driver or work horse in place of a lame, spavined animal, by using Bo-Spav-O—the remedy that is guaranteed to positively remove and cure a bone spavin without blistering or leaving scar or blemish of any kind. A simple, humane, easy-to-apply remedy that quickly makes bone spavins disappear. Used for three years and not a single failure. Write today for interesting circular and further information.

Small Output But Great Value

We Build Only a Few Thousand "Jack Rabbit" Cars per Year but every car will last a lifetime and cost less for upkeep than any other car you can buy

When output goes above a very moderate number of cars a day, quality suffers. It is impossible for each car to receive the thorough attention of the masters of automobile building.

Every "Jack Rabbit" car is an individually built and perfect car—true to Apperson quality in every way. Every

Apperson "Jack Rabbit"

The Car With the Powerful Engine

has the personal supervision of Elmer and Edgar Apperson. They built the first automobile 20 years ago, and have been years ahead of other builders ever since.

You buy a lifetime's service in a "Jack Rabbit" car. The average age of the 17,000 now in use is 8 years. Some are 17, 18 and even 19 years old. Don't let the craze for low-priced cars lead you to make a costly mistake. The really cheap car is the one that is cheap to maintain.

The up-keep expense of "Jack Rabbits is lowest of all. It is the car the man of moderate income can best afford.

"Jack Rabbits" are beautiful, powerful, complete and up-to-date in every way. Make a careful study of all their good points. **Write us your name and address for catalog, today.**

"INGECO" Engines

Get The Most For Your Money

The cost of a farm engine in the end depends upon the length of time it will last and its economy of operation. A good farm engine lasts a lifetime, always does good work, and costs but little to operate. By getting a good engine you save both money and trouble.

"INGECO" Farm Engines are not high priced, but in design and construction they are the highest grade engines made. Remarkable for their economy in fuel—on steady work they soon pay for themselves. Reliable, quick to start, simple to operate. They run as long as fuel is supplied.

FROM 1½ H. P. UP TO 60 H. P. PORTABLE, SEMI-PORTABLE, STATIONARY.

Write at once for the name of the nearest dealer and catalog describing "INGECO" Engines, and the reasons why you should consider this engine. By all means do not buy until you have found out all about "INGECO" Engines. The "INGECO" is the best all round farm engine made. It is the kind of farm engine you need on your farm.

ST. JOSEPH VETERINARY COLLEGE

RECOGNIZED by the U. S. Dept. of Agriculture. Positions open to graduates, state and county veterinarians, U. S. Vet. inspectors, U. S. army veterinarians, teachers in veterinary and agricultural colleges. Private practice unlimited. Veterinary inspector's salary, $1,400 per year, over 3,000 clinical cases during the past term. Address F. W. Caldwell, Pres., 8th St., St. Joseph, Missouri.

CURRENT EVENTS

A MICHIGAN editor, George A. Newett, of Marquette, is being sued for libel by Theodore Roosevelt because of the publication of an article in his paper, Iron Ore, in which he said: "Roosevelt gets drunk and that not infrequently, and all his intimates know it." This story of alcoholic excess has frequently been raised against Roosevelt, who now proposes to put an end to it for all time. He ordered his lawyers to bring suit against the Michigan editor for $10,000, not in hopes of obtaining a verdict for that amount, but to stop what he claims are libelous lies about his personal habits. Colonel Roosevelt occupied the witness stand the greater part of one afternoon, testifying under oath that while he is not a total abstainer, he never was drunk in all his life, has never entered a saloon, has never drunk whiskey except when prescribed by a physician, has never tasted beer but once, partakes of light wines temperately in his own home or as social conventions demand when he is a guest. Colonel Roosevelt made a good witness and was corroborated in his testimony by his personal physician who testified that no man who was given to alcoholism could have withstood the shock of the assassin's bullet as Roosevelt did last fall in Milwaukee. Among others who will testify are Admiral Dewey, Lyman Abbott (editor of The Outlook, of which Colonel Roosevelt is associate editor), Robert Bacon (former United States ambassador to France), James R. Garfield (former secretary of the interior), Gifford Pinchot (former government forester) and William Loeb, Jr., (President Roosevelt's private secretary). Colonel Roosevelt declares that he is exceedingly temperate in his personal habits, while the Michigan editor alleges that Roosevelt was drunk on the occasion of a public address in Duluth, Minnesota. The trial promises to be a notable one because of the prominence and the long and notable list of witnesses. It is a good thing to get this subject of Colonel Roosevelt's personal habits settled once and for all, so that, if the story of excesses be found to be a libelous canard, it cannot be used against him and his principles in any future campaign.

A SPECIAL session of the republican national committee, to be called sixty days after the adjournment of the present congress, was decided upon at a meeting of the executive committee in Washington last week. The special session is for the consideration of three important matters: amending the representation of states at future republican national conventions so that it will be proportionate to the actual vote rather than to the number of representatives in congress, thus cutting down the unfair representation of the democratic South; recognizing statewide primaries and providing for the selection of delegates in this manner, rather than by old-style caucuses and slates; a national convention to be called within the next year to put these reforms into existence and otherwise take steps to reorganize the party. The feeling is quite general that if the republican party is to remain one of the leaders it must reorganize promptly and be prepared for the next campaign. At a recent meeting of the progressive branch of the party in Chicago a conciliation committee of five was selected, consisting of Senator Cummins, Senator Jones, Senator Crawford, Representative Cranford, Representative Rogers and ex-Governor Hadley. This committee has issued a statement in the course of which it says: "The existing rule promulgated by a convention held more than thirty years ago relating to the manner of selecting delegates needs revision. Some of the states have passed primary laws and others will pass them that are not in harmony with the rule, and some provision must be made that will remove the conflict. We content ourselves by stating what seems to be an obvious conclusion. "That we must either accept these primary laws or we shall have no republican following in the states which have enacted them." The proposed meeting of the republican national committee is for the purpose of deciding definitely whether these reforms shall be made and the progressive branch dominate the party.

A FALLING pier caused the death of thirty-three persons and the serious injury of double that number at Long Beach, California, last week. A large crowd had assembled on the beach to celebrate British Empire Day, in honor of the birthday of the late Queen Victoria. The doors admitting to the pier were thrown open and the crowd surged out upon the poorly constructed framework, which collapsed throwing hundreds upon the beach twenty-five feet below. All but one of the victims were women, many of them aged, who were unable to save themselves. An official investigation has been ordered and damage suits totaling a million dollars will be instituted. The accident threw a damper upon the observation of the day, which has come to be widely recognized throughout the English-speaking world, because of the great strides made by Great Britain under the rule of Victoria, one of the greatest rulers and best women who has ever occupied the throne.

LOUDEN'S LABOR SAVING LITTER CARRIER

Tickles the Boy *because it makes a man of him*—**enables him** *to do a man's work with ease.*

You clean your barn with half the effort in half the time. The

LOUDEN CARRIER

makes this heavy job fun for the boy. Curves and switches take the carrier to any part of the barn. The cost is small. It's a money making investment in any size stable. **Send for Catalogs. Ask your dealer about the LOUDEN CARRIER.**

BARN PLANS FREE

If you expect to rebuild or **remodel a barn our Architectura Department will work your ideas into a real plan without cost or obligation to you.** Tell us the number and kind of stock you wish to stable and give other information. We may be able to save you a good many dollars.

We manufacture every equipment for Dairy, Horse and Hog barns, and hay unloading tools.

FARM FURROWS

TURNED BY A PRACTICAL FARMER

The coming of spring and early summer seems to bring out new cases of lump jaw among cattle. I have had best luck treating lump jaw with the patented dopes. If used according to directions, the cure is practically sure. The sooner treatment is given after the lump is noticed, the easier the cure.

It is all right to dehorn calves as soon as the button starts, either with caustic potash or any of the prepared dehorning compounds, but I imagine they are more apt to develop into "bunters" than when the horns are allowed to grow and are cut off, say when the animal is a yearling. Perhaps this is all imagination on my part.

I haven't a sweat pad on the farm and not a horse with a sore shoulder or even a hint of collar trouble. Since I quit sweat pads and put the money formerly paid for them in extra collars, my horses have had no shoulder trouble.

I pity the man who has outgrown his love for a good clean game of baseball. Such a man is growing old too fast.

Too much green grass and too little grain puts a work horse on the bum in short order. I do not like the idea of turning the work teams out on pasture during wet weather, when there is no field work to do and feeding no grain during that time. They come back to work in a soft, weakened condition.

All agree that the country is never prosperous unless the farming class is prospering, yet they are now asking us to produce things for less money, that the world may live cheaper. Have we got to the point where all things are too high priced?

Harrowing corn when small seems to be going out of fashion more and more each year. Most corn growers now figure that time necessary to harrow a field is better spent in cultivating—and, besides, most cultivators are now provided with seats.

The small farmer has to limit his machinery purchases, for he has not the use for many machines that make their purchase profitable. How fine it would be if every neighbor would get along fine with every other neighbor, then the co-operative purchase of machinery by small farmers would be practical.

It is money wasted to spend it for dragging a road that is not piked enough so there is a ditch on either side of the roadway. Better grade first, then keep the grade up by dragging afterwards.

Whether four large shovels or six smaller ones are better depends upon field conditions. A change of gangs and shovels would be an ideal arrangement, but we do not all feel that we can afford that. I know that four large shovels are better weed "ousters" than six smaller ones, but many times we cultivate to put the soil in condition rather than to kill weeds, and the smaller shovels are better for that.

If the sow is in the habit of losing her litter, it is the height of folly to continue breeding her, as she has some inherited ailment. Market her at once!

If there is any time that is more pleasant than all others on the farm it must be in spring when the fruit trees are in full bloom and the grass is at its "greenest." There are no flies nor mosquitoes to pester and no matter which way we look there is some beautiful work of nature to admire. Let us enjoy the beauties of spring while we may.

The right time to plant corn is just after a good seed bed has been prepared. After the seed is in the ground it may do to go and see your neighbor who farms by the moon and give him some sunshine in exchange for "moonshine."

The "latest thing" in gas tractors is one that can be steered with lines like a team. The next will be one that will mind "get up" and "whoa" and perhaps one that will come at our call and eat salt out of our hand. Who knows?

One thing every farmer needs, whether he has a work shop or not, is a blacksmith's box vise, and it should be a good one, because some day it will see hard usage.

The experiment station is a good place to go for advice as to the kind of materal to use in building a silo, also the size to fit your herd. The dealer may be thinking of his own pocketbook when giving advice on these questions.

The practice of allowing the cattle to graze over the grain fields a few days after the grain is up may be all right in some cases, but it does not take a very bright farmer to see that it is all wrong when the fields are soaked like they have been this spring. Young plants crushed into the mud never rise again.

It is usually a mistake to hire an inexperienced hand to put up any kind of building, but with a silo it is foolish to do so. This building must be absolutely perfect or it is worse than worthless. When the inside walls are smooth and water tight they are as they shoud be.

The lock-stitch sewing awl is a handy thing to have around for keeping the harness in repair, because sewing is often neater and better than riveting, but it must not be forgotten that it takes practice to do perfect work with anything. Don't make your start on a heavy tug.

Just now the cultivator is an all-important tool. The important part of this very important tool, too, is the shovels. Working with poor shovels is costly economy.

I do not like to be late with clover haying. There is a time when clover makes the best hay, and unless the weather prevents haying at that time, I plan on letting the other work wait until this job is out of the way. When a third of the heads have commenced to turn color, is my rule.

A small pasture close by the building is handy. There is usually a few "calm milkers" that should be kept close by, and the mare with her young colt just fit in the barnyard pasture.

There is no tree for artificial groves like the catalpa. The half acre I planted something like twelve years ago make fine posts now, and wherever a tree is cut sprouts come up that grow faster than the first cutting did. One should be careful about getting the sprouts out so that but one is left to a stump. The second growth will be straighter than the first.

At this season of the year the mind of youth turns fondly to the promised day for fishing A day's trip to some river often does more to make the boys feel satisfied with the cornfield than anything else. I can remember when a day spent along "the Elkhorn" was a great event.

The mare that will not raise a first-class draft colt returns more profit to her owner when she raises a mule. Of course, the large mule outsells the small one, but a small mule will outsell a small horse any day of the year.

POULTRY

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be inclosed with inquiries. Address all letters relating to poultry topics to this office.

FAILURE WITH THE INCUBATOR.

Mrs. J. H. Menamin, one of our Minnesota subscribers, makes the following inquiry:

I purchased a 200-egg incubator and it is our first experience with a machine of any kind. Have just taken off our second hatch. Our first experience was eighty fertile eggs from 198 and fourteen chicks, ten of which were cripples and all died in less than a week. The second hatch was 194 eggs, 142 of which tested fertile; result, thirty live chicks.

The machine was run according to directions and the eggs were turned and cooled faithfully, at no time during the hatches did the heat get below 102 degrees and never higher than 105 degrees and that only once in the last week. No moisture at all was used, but frequently during the last two weeks and the last week especially, the inside of the doors and the bottom of the nursery was covered with moisture.

The eggs were purchased from a raiser of full blood Rhode Island Reds and the flock seemed to be in good condition. Out of the 112 eggs that didn't hatch there were ten full-grown chicks dead in the shell, and the rest seemed to be filled with what looked to be the intestines and some fluid. The first hatch was about the same way. Another thing I noticed was the marked difference in temperature of the under side of the egg and the side turned toward the pipes. Is a person supposed to air the eggs before turning? The trays are made of screen, would a piece of muslin on the bottom of the tray help?

Now where is the trouble, in the management of the incubator, the incubator, or the eggs?

The contents of the eggs examined indicate lack of heat and consequently undeveloped chicks. Also does the fact that the "under side of the egg was cold" gives rise to the opinion that the egg chamber was not warm enough.

We are unable to account for the excessive moisture in the machine unless the ventilation is insufficient When the chicks begin to come from the shells, the escaping moisture is apparent on the glass door, and if the incubator be left closed and the temperature not allowed to run down, all is well. If, however, the door is opened at this critical stage, the sudden drop in temperature often chills the chicks so badly that they "die in the shells." We would not advise muslin to be placed over the tray; if it were required the manufacturer would supply it.

It is barely possible that the parent stock is weak and the germs die in the process of incubation, though not at all probable. What about the conditions of the room? Are there any decaying vegetables or oil tanks to give off foul vapors? Does the room contain adequate fresh air by being well ventilated? The lungs are not developed at this stage and the chick gets its oxygen through the pores of the shell and failure to supply the necessary oxygen will cause disaster.

We had a very expensive lesson along this very line a couple of years ago. A neighbor was employed to run her own and our incubator, both to be filled with high-priced eggs. The first time was a total failure, the second time about a twenty per cent hatch. Everything had been cared for in a perfectly orthodox manner, such as our correspondent describes. In despiration we tried again and got the best hatch our machine had ever given. The incubators were set in a small room adjoining the dining room, an ideal placed it seemed

The first hatch was run through cold weather and no outside ventilation whatever was supplied. The next time there were some few warm days when the windows were open, with the result of a few chicks. The last hatch was run with the windows wide open and was very successful. No draft should strike the machine, however.

Are you quite sure that the thermostat is rightly placed? A woman called upon us to pass judgment on her machine—the eggs were not kept warm and a lot of other troubles, including the blaze being turned so high that the solder was melted, and this very essential part of the wooden hen was found to be upside down. Sometimes an untested thermometer plays havoc with a person's calculations.

It is due both the manufacturer and the operator of the machine that they be informed that something is wrong, and if, after all conditions are made right, it yet refuses to play fair it should be returned.

The above illustration is a likeness of Courtier's Crown, an extra good three-year-old herd bull that sells in Owens Bros.' Short-horn sale at Homestead, Iowa, on June 12th. See page 20.

CHICKEN POX.

To the Editor of The Homestead:

I have received so much valuable information from the poultry department in your paper that I feel it would be only just to other poultry raisers to add my experience with chicken pox. I haven't the least idea where the germ came from, but when I found I had a fully developed case on hand I knew at once what it meant, for I had it in my flock two years ago. My first step was to separate every ailing bird, going over the flock every day. I bought five cents' worth of permanganate of potash and put in a jar, adding two quarts of water. The first three or four days I dipped the head of every diseased fowl in this solution, full strength, and after that I diluted it one-half part water. The affected birds were put by themselves, fed a soft ration of equal parts ground corn and oats moistened with milk, and potash mixed with their drinking water. Every morning their quarters were thoroughly sprayed with creoline, taking care to give their heads a good dose of it. I have only lost two birds, and they were so bad before I knew it that I killed them. This treatment looks like lots of work, but for one who has over two hundred hens and hundreds of little chicks to save, it is the best treatment I know of.

Our egg money alone amounts to $400 per year besides what we use and what young chicks and old hens we sell every year. I think they pay better than hogs, for the money invested, but would not advise anyone, especially a woman, to go into it for pastime, for to win out one must go into it with sleeves rolled high, a brave front to rats, cats and weather and determination to win out.

A Subscriber's Wife.

IOWA WEATHER AND CROP BULLETIN.

The following climate and crop bulletin is issued by the Iowa Weather and Crop service from the central station at Des Moines, for the week ending June 1, 1913:

The last week of May brought a marked improvement, and the weather conditions during the six working days were ideal for field work and the germination and growth of vegetation. Excessively high temperatures and almost continuous sunshine prevailed, with no rain after Monday noon, except a few light, local showers on Friday morning, until Saturday night. Rapid progress was made in planting corn, and 80 to 85 per cent of the crop is now in. The early planting is up and shows a good stand. Cultivation is in progress in many fields, but there is considerable plowing yet to be done on low, wet ground. With a continuance of the warm, dry weather practically all of the corn will be planted by the close of the coming week, but if wet weather prevails the acreage will be considerably less than it was last year. Winter wheat and rye are heading in southern, and rye in blossom in central counties. All small grain, grass and clover are making rank growth. Potatoes and garden truck are doing nicely, and fruits are promising.

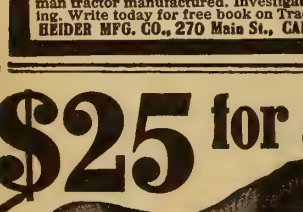
The Heider Tractor Again Leads Them All.

Runs Successfully on Either Gasoline, Motor Spirits or Kerosene

We have solved the fuel problem successfully. A simple device permits the use of either Gasoline, Motor Spirits or Kerosene at all speeds and puts our tractor in a class all by itself. A gallon of kerosene runs the Heider Tractor longer than a gallon of gasoline, and develops the same power, thereby doing the same work at less cost than any other tractor on the market.

The Heider Tractor Pays for Itself.



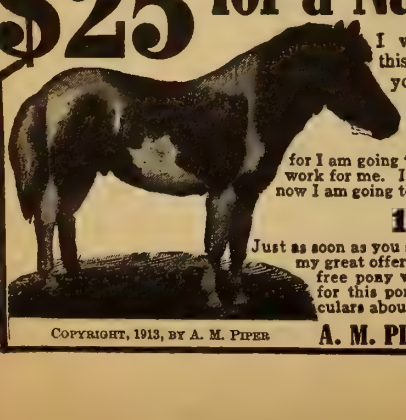
Its 4-cylinder motor, light weight, great power, simple operation, economical fuel consumption, make it the best, most practical, all-purpose one-man tractor manufactured. Investigate before buying. Write today for free book on Tractor Farming.

HEIDER MFG. CO., 270 Main St., CARROLL, IOWA.

Murderous Lice and Mites

MITES and Lice are the most murderous of all poultry pests. They bore through the skin and sap all the vitality and strength out of your fowls. J. C. Reefer, the poultry expert of 1750 Main St., Kansas City, Mo., is giving away free samples of a scientific lice and mite ointment, which poultrymen declare will exterminate these dreadful pests over night. You certainly should write Mr. Reefer for free sample and send him a stamp to pay postage.

$25 for a Name for this Pony



I will give $25.00 FREE for the best name for this beautiful prize Shetland pony. Send the best name you can think of right away, for not only do you have a good chance to win the $25 prize but

You Can Win the Pony, Too

for I am going to give him to some boy or girl who will do a little easy work for me. I have just given "Dandy," another beautiful pony, and now I am going to give away this pony. But first I want a name for him.

1500 VOTES FREE

Just as soon as you send me a name for the pony I will tell you all about my great offer and I will also send you a special coupon good for 1500 free pony votes. Remember, I will give $25 for the best name for this pony, and I send you 1500 free pony votes and full particulars about the pony as soon as I hear from you. Write me today.

POINTERS.

—Thomas L. Morlan, Indianola, Iowa, makes a new announcement on this page. Partridge Wyandotte eggs are offered for sale at the unusually low price of $3 per 100. Orders will be promptly filled.

—For the next thirty days H. E. Gerry, Tracer, Iowa, will sell Single Comb Buff Orpington eggs at half price and also make special low prices on all breeding stock. His advertisement appears elsewhere in this department.

—Mrs. Laura Mather, Clarksville, Iowa, writes: "My Leghorn eggs are hatching fine, strong chicks and giving good satisfaction. I will sell eggs cheap this month as per price quoted in the advertisement found elsewhere in this department."

—In sending change for advertisement found elsewhere in this department, Mrs. Wilson McIntyre, Red Oak, Iowa, writes: "I have had a splendid egg and chick trade this year. Will sell eggs at reduced prices the rest of the season. My eggs are hatching fine and I never had stronger chicks than this year. If in need of eggs please write me."

—Earl Bloom, Bridgewater, Iowa, well-known breeder of Barred Plymouth Rock, Brown Leghorns and White Pekin ducks advises us that his hens are laying well and that he is prepared to furnish plenty of eggs of both breeds of chickens. He has over 300 chicks just off from two incubators and is getting 90 per cent of fertile eggs. Mr. Bloom has obtained eggs from some of the best breeders of the East, as well as the West, so that another season he will be prepared to furnish still more new blood to his patrons.

Special Prices on Eggs.

Note the change of prices on eggs made by Mrs. L. C. Reese, Prescott, Iowa, on this page. She owns one of the best flocks of Barred Plymouth Rocks in the West, of the Bradley-bred most noted strains, and she is selling eggs of both pullet and cockerel matings. She is also offering baby chicks at twenty-five cents each. No better Plymouth Rocks can be secured in the West. Send her an order at once.

WYANDOTTES.

White Wyandottes. A few eggs yet at $3.75 per 100. No more chicks as our entire output is booked. OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit $1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

BENEFICIARY ORDER—RIGHTS OF MEMBERS.

Mr. George S. Currie, Baldwin, Iowa.—A certain lodge of a beneficiary order has a social fund made up from quarterly dues, and money taken in from entertainments, dances, etc. The members of the lodge wish to invest this money in a lot and build a hall on it for the use of the lodge. Can they do so and prevent the lot and hall from falling into the hands of the grand lodge in case the local lodge should break up or lose its charter?

Answer.—This question can only be answered, after a thorough examination of the constitutions and by-laws of the grand lodge and the local subordinate lodge. The rights of members, and the relations of the subordinate lodge to the grand lodge, are fixed and determined by such constitutions and by-laws.

COLLECTING STALLION FEES.

A Subscriber, Rock Rapids, Iowa.—A man who is a tenant, bred a bunch of mares to my stallion. The man's landlord has a mortgage on the mares and their increase. Can I collect the charges for stallion service the same as though the mares were not mortgaged? The landlord told me to breed the mares.

Answer.—You can collect the charges for stallion service just the same as though the mares were not mortgaged.

FENCING PRIVATE LANE.

A Subscriber, Barnes City, Iowa.—My farm adjoins the public road; back of my farm away from the road is a farm recently owned by C. For several years he has used a lane on my land next to the division line to go to and from the public road. The lane is twenty-two feet wide. I did not sell it to him, but he agreed to fence it for the use of it. Recently C sold his farm to D and D refuses to fence the lane. Last fall I fenced across the lane at point farthest from public road and put in a good gate for D's use, so he would not be shut in, but he smashed it to pieces and said he would not have it and I could not help it. He still uses twenty-two feet of my land for a lane. I pasture the adjoining field, and there is a poor two-wire fence between lane and field. I want this fence hog tight, as the rest of my land is so fenced. I do not ask D to buy the land, but would sell it. How can I compel D to make a hog-tight fence along the lane?

Answer.—As you did not sell the strip of land, nor the right of way over it to either C or D, and have no contract about fences with either, you cannot compel D to fence the lane. D has no right to use it at all. You can lawfully close the lane at both ends, and turn the ground back into your field, and if D breaks fence you can recover damages and restrain him by injunction. The only lawful way by which D can get access to the road would be to condemn a right-of-way for a lane over your ground, and to do this he must pay you part compensation, and then the law requires him to fence the lane on both sides.

STANDING GRADE STALLION.

A Subscriber, Van Horn, Iowa.—What is the law in Iowa in regard to two-year-old grade stallions kept for public service?

Answer.—The owner or keeper of every stallion or jack over two years old, kept for public service, or for sale, exchange or transfer, shall make oath that the stallion or jack is, to the best of his knowledge, free from hereditary, contagious or transmissible disease, or in lieu thereof, a certificate signed by a duly qualified veterinarian who shall be a regular graduate of a recognized veterinarian college, certifying that such animal is free from hereditary, contagious or transimissible disease, and shall file the same with the secretary of the state board of agriculture. Also, the owner or keeper must advertise the horse by printed posters not less than five by seven inches in size, and have the word "Grade Stallion" printed thereon above the name of the stallion, in type not smaller than one inch in height, said posters to be posted in a conspicuous manner where the stallion is kept for service, and the certificate of soundness must be posted in like manner.

I'll Stop Your LOSSES FROM WORMS

"There is no doubt that Sal-Vet saved my entire herd of hogs. On all sides of my farm other farmers lost nearly every hog they had. I shall always aim to keep "Sal-Vet" or no hogs."
PETER V. CAREY,
Route No. 5
Fairfield,
Ill.

I'll Feed Your Stock 60 Days Before You Pay

I'll SAVE Your Sheep and Hogs

Don't let worms breed contagious diseases among your hogs this year. Don't let them kill off the young pigs and lambs and rob you of your season's profits. You can prevent it if you will just take "a stitch in time." Now is the time when worms get in their deadly work. Now they are breeding—multiplying by the millions in the stomach and intestines and if you don't get the best of them they will surely get the best of you. I'll rid all your stock of these destructive pests. I'll prove it before you pay.

The Great Worm Destroyer **SAL-VET** **The Great Live Stock Conditioner**

is a wonder working medicated salt to which your hogs, sheep and other farm animals can run freely and doctor themselves. It requires no dosing, starving or drenching. Costs only 1-12 of a cent a day for a sheep or hog and a trifle more for larger animals.

Send No Money—Just The Coupon

Just fill out the coupon at right—tell me how many head of stock you have and I'll ship you enough "Sal-Vet" to last all of them 60 days. No simply pay the freight charges when it arrives and when the 60 days are up report results. If it fails to do what I claim, I'll cancel the charge—you won't owe me a penny. Send the coupon now. Address

SIDNEY R. FEIL, Pres. (121)
The S. R. Feil Co., Dept. H, Cleveland, O.

More Proof

"My sheep were sick and dying, but "Sal-Vet" stopped my losses. I was out of the preparation for about a month, and the animals again commenced to die. As soon as I began to feed the second lot of "Sal-Vet" the losses again stopped and I have not lost one since."
Silas C. Millsaps,
Springfield, W. Va.

PRICES: 40 lbs., $2.25; 100 lbs. $5; 200 lbs. $9; 300 lbs. $13; 500 lbs. $21.12. No orders filled for less than 40 lbs. on this 60 day trial offer. Never sold in bulk, only in Trade-Marked Sal-Vet packages. Shipments for 60 days' trial are based on 1 lb. of Sal-Vet for each sheep or hog, and 4 lbs. for each horse or head of cattle, as near as we can come without breaking regular size packages.

THE ONE-ROOM SCHOOL MENACE.

(Continued from page 3.)

1,567 with more than twenty but less than thirty. There were 461 schools with fewer than fifteen pupils and 1,795 with from fifteen to twenty-five pupils. There were 1,234 schools with an average attendance of fewer than twelve, and 3,061 with an average attendance of from twelve to twenty; forty-one schools were in session less than four months, and 748 between four and six months. There were 1,106 schools which had a "divided term" with at least four weeks between the two sessions.

Nebraska.—Of the 6,604 one-teacher schools in the state, 445 had in 1910 an average attendance of less than six pupils; 1,488 from six to eleven; 1,761 from eleven to sixteen; 1,174 from sixteen to twenty-one; and 833 from twenty-one to thirty-one, making a total of 3,694 with an average attendance of fifteen or less, and 5,701 with an average attendance of thirty or less. There were 410 districts which maintained school less than three months or none at all; 5,651 maintained schools from three to six months; 4,132 from six to nine months; and 1,964 nine months or more. The average number of days in the session in all districts was 139.

Wisconsin.—In the 6,494 one-teacher schools in the state, 4,403 have thirty or fewer pupils. Of this number, ninety have fewer than six; 381 from six to eleven; 668 from eleven to sixteen; 933 from sixteen to twenty-one; 1,163 from twenty-one to twenty-six; and 1,168 from twenty-six to thirty-one.

In view of such a sorry condition in states otherwise prosperous and progressive, what is to be done? The government's experts name three things:

First, improved buildings, with strong commendation for consolidated schools.

Second, improved teaching, with teachers specially fitted to instruct pupils in everyday affairs, such as elementary agriculture and domestic science.

Third, proper supervision of school affairs, by competent boards, with the county unit (rather than the township or district unit) given strongest commendation.

In the final analysis, the government experts have this to say of conditions and possible cure:

The great number of one-room schools, including a large number with very small enrollment, the large proportion of them which are housed in insanitary, uncomfortable, ugly buildings with little equipment and with rough furniture, the great number of poorly educated and untrained teachers, the low salaries paid them, and the short length of service given them in the same position are all indications of inefficiency. It is true that a good school may exist in the poorest building and with the poorest equipment, but, as a rule, the condition of the building and equipment is a good indication of the instructional work of the school. In other words, instructional work of a high grade in a school reacts upon the material equipment, for whether the good instruction is due directly to the teacher or indirectly to a good supervisor through her, its influence is sooner or later felt by the school directors and by the school patrons, and results in a general improvement of the material facilities. Investigation, as far as it has been carried out, seems to show that, as a rule, wherever the greatest advance has been made in rural schools, improved buildings and equipment have followed improved teaching. It seems, therefore, that the question of the teacher is of the greatest importance and with it the question of supervision and the organization and administration of the school system, because no widespread improvement in teaching is possible unless proper supervision is provided and the school affairs are properly managed.

In view of the fact, therefore, that the situation, while sorry is not without hope of cure, it behooves all who have at heart the welfare of rural sections to take a hand in pulling the country school out of the valley of desolate despair in which it has been allowed to remain all too long. Consolidation is going on in every state, financial aid to schools which teach elementary agriculture and domestic science is being given by various states, schoolhouses are being opened at night as community centers, schoolgrounds are being improved and beautified, school-teachers are being prepared as scientifically as engineers or doctors. In view of such progress the prospect is not altogether dark.

Ask your neighbor to subscribe for The Homestead.

You Need Empire Fertilizers

to enable your crops to take advantage of good weather conditions. No matter how fine the weather or how good your own cultivation of the soil, there is never enough plant food in the soil of the **available** sort to produce the largest possible crop. Why not take the advantage good weather and cultivation can give you with the aid of our ready-to-act plant food? A small amount to the acre supplies just the **available** elements needed to produce large crops of vegetables, grain or forage.

EMPIRE FERTILIZERS

These fertilizers supply to growing crops in available form the plant food elements required which in connection with good seed, cultivation and weather and the plant food supplied by the soil and air, are producing good crops of profitable size and quality. Farmers depend upon them as upon other old friends, and have done so for years.

Dairy Cleaning Easily Done

Old Dutch Cleanser halves the work in the dairy. The milk pans, pails, churns and cream separator are thoroughly cleaned in half the time with half the effort, if Old Dutch Cleanser is sprinkled on cloth or on the article cleaned. It leaves the milk utensils shinning, clean and sweet.

It quickly removes cream clots and milk stains from shelves, benches and floors.

Old Dutch Cleanser does equally as well anywhere on the farm where cleaning is done.

CONDENSERIES OR CREAMERIES.

To the Editor of The Homestead:

Recently the writer has made a study of the dairy industry in the state of Utah. The northern part of the state is famous as a dairy section. The region has alfalfa, plenty of pure mountain water and an invigorating atmosphere. Pasture is lacking, or at least, never has been developed, yet dairying is thriving, the dairy farmers are making money and the business is looking up decidedly. In another valley the natural facilities in the points mentioned are equal with the added value of natural pastures of excellent quality.

A short time before the writer saw the request in a recent issue of this paper for articles on creameries and condenseries, he made a verbal report concerning the second region mentioned above. His exact words were: "What that country needs is a condensery that will put the market on a sound, reliable and substantial basis. If a condensery is put in there we can expect it to be as good a dairy section as the one found in the northern part of the state."

It is difficult to find a more prosperous dairy community than in northern Utah where four condenseries are operating in one valley. A price per pound for butter fat is stated each month which is strictly adhered to for thirty days. For the month of May, 1913, the price per pound for butter fat was thirty-seven cents. The people are satisfied. The centralizer creamery and the sweet cream market are bidding constantly for the product. Yet from three stations in the localities of which there are probably 3,000 cows, it is to be doubted if the cream from more than 100 cows is shipped. The two cow-testing associations in the state are in that valley.

In the other dairy section conditions are not so prosperous. There are several creameries. They are in a more or less unsettled condition. One of them suffered for a year or two under a dishonest manager. At the present time the entire cream product is shipped to a centralizer. The people have lost heart to some extent and are looking to sources other than dairying for their income. In other towns prices and conditions are frequently demoralized and men are deciding to quit the business. There is not the sound progressive tone to dairy affairs that is found in the locality where the condenseries are in operation. There are fewer high-class cattle and prices are lower from five to ten cents per pound for butter fat. Truly in the opinion of the writer a condensery would be a stimulant to dairying and a blessing to that community.

There are disadvantages in selling milk to condenseries. They take the whole milk and do not leave any by-product. That creates a tendency to neglect the calves. Frequently in public addresses and in private advisory work the writer has urged dairymen who sell to condenseries to skim a sufficient amount of milk to feed their calves. If necessary they can take five cents per pound less for butter fat in order to get skim milk for the calves. That would give them skim milk at about twenty cents per hundred. There are no hogs, or, at best, few in the condensery district. Neither are there in the creamery section.

Condenseries have done a great deal to advance the dairy interests in the West and will do so in any community.

H. E. McCartney.

ACCOMPLISHMENTS OF IOWA STATE DAIRY ASSOCIATION.

The Iowa State Dairy Association, one of the pioneer organizations of its kind, has accomplished very creditable results. It is composed of nearly a thousand creamerymen, dairymen and farmers who represent every locality in the state. Its purpose is to bring the producer and manufacturers of dairy products in closer touch and therefore work out the problems which are of vital interest to each.

Realizing the important part which dairying plays in permanent agriculture, and the necessity for its improve-

Square Deal On Cream Separators

Let me tell you one sure thing: The Beatrice is the only standard separator on the market that you can buy at a fair-play price. A square deal—that's what you get when you buy a

BEATRICE Cream Separator

Most dealers ask $100 up for a high-grade separator. I paid $75 for my Beatrice. I don't think I ever had so much cream separator satisfaction.

Why, I can clean the bowl and disc *in less than 2 minutes*, with the patented device furnished free with the separator. They come out as clean and as spotless as a new penny and as sweet as a nut.

I figure I save the price of my Beatrice every year by its close, clean skimming. It's the easiest-running machine I ever had. My repair bills have amounted to practically nothing. It's a sure-enough built-to-last cream separator.

Take Farmer Onswon's advice. Get a Beatrice. Get on the list of satisfied separator users. See your dealer or write to

ment on the average farm, the members appealed to the legislature for financial aid. It was not difficult to convince the legislators that such a worthy cause should be supported by state funds, and during the past five years $25,000 has been appropriated for dairy educational work.

Since the establishment of the educational department a vigorous campaign has been conducted. An effort has been made to reach the producer in such a manner as to interest him in improving his herd, his feeds, his accounts, etc., in a practical way, which would bring about a gradual change with a minimum cost.

Creameries in every section of the state that found difficulty in securing a sufficient amount of butter fat, or that had trouble in the quality of the raw product received, were at once anxious to co-operate in the holding of meetings. Farmers' institutes have devoted a goodly portion of their programs to dairy subjects and have called upon lecturers employed by the association. Contests have been inaugurated at the county fairs, breeders' associations formed, dairy short courses held and literature pertaining to timely subjects on dairying scattered broadcast.

One of the most important features of the work has been the establishment of a great dairy show in conjunction with the annual convention. Last year this show was unsurpassed by any similar event in the world. It brings dairy cattle breeders with their choice animals from every part of the United States and offers the farmers of not only Iowa but the Mississippi valley an opportunity to become acquainted with the various breeds. Premiums are offered for butter, cheese and milk which, in addition to the display of dairy appliances and farm implements, brings thousands of prosperous farmers. The convention proper is held in a building on the grounds, and the subjects chosen for discussion are handled by authorities in each particular line.

As a means of meeting large numbers in a limited time the special dairy train has been used with excellent results. Thus far eight of these trains have been run. Each has been on the road two weeks or longer, and, as the lecturers lived on the train, every hour was utilized. These specials have enabled the speakers to reach over 180,000 farmers and their families. Meetings have been held in 595 towns and ninety-four of the ninety-nine counties in the state have been visited by the specials. The trains carried lecture coaches for men, ladies and children. Besides the apparatus carried in the coaches, a baggage car equipped as a model dairy barn and containing representatives of the dairy breeds was used for demonstration purposes.

The results of the work are gratifying. Iowa is rapidly taking her rightful place among the dairy states. System is being introduced and the unprofitable animals are being replaced by the dairy breeds. The silo is considered a necessity and the legumes are found where formerly less valuable crops grew. The introduction of the pure-bred sire, economical feeding and intelligent care are revolutionizing the industry. Following these improvements, as a natural sequence, come the substantial farm buildings and attractive homes which make a permanent agriculture.

Irish potatoes grown under a mulch produced about 45 per cent more than the same acreage given ordinary culture at the Nebraska station. The mulch was four to five inches of straw of any kind or hay or leaves. Of course, no cultivation whatever was given. The mulching of these potatoes cost less than would the cultivation, yet the mulching heavily increased the yield.

THE HOME

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 639, Aurora, Missouri.

WITH THE EDITOR.

In "The Iron Woman," Margaret Deland relates the story of a boy who from early childhood had a sort of repugnance to his mother because of her homeliness and untidiness. As a little fellow, Blair Maitland envied his playmate, David Ritchie, whose mother was pretty and always prettily dressed. As he grew older the carelessness of his mother about her appearance and the unloveliness of his home so oppressed the boy that he felt ashamed and longed to get away from them.

More often than we give them credit for, children are conscious of their environment; always they are affected by it. Where a house is untidy, the table is ill set and the food invitingly served, children eat like little animals and their characters lack the influence of the self-restraint necessary to refined ways of living. The child who eats greedily at home will be grasping abroad; the child who is never taught the courtesies of a refined table will be uncouth and ungracious at other tables. He is thus robbed of a very necessary part of the equipment of life—he is sent unarmed to a combat which calls for full armor to insure victory.

In homes where the house mother is burdened with work there is constant temptation to carelessness in dress, to rude table service and to neglect of training in manners. If such a mother fail sometimes there is every excuse for her, but it should be her aim to consider the training of her children in refined ways as of hardly less importance than their training in morals, and it should be her daily endeavor to create such an atmosphere of refinement in the home that, unconsciously, her family will imbibe ideals and acquire habits that will enable them to hold their own in any society and to look back upon their home with affection when they reach maturity.

HOME AND HOMEMAKING.

THE FOUR-LEAF CLOVER.

One leaf is for hope and one is for faith,
And one is for love, you know;
And God put another one in for luck—
If you search you will find where they grow.

But you must have hope and you must have faith,
You must love and be strong, and so—
If you work, if you wait, you will find the
Place where the four-leaf clovers grow.

NATURE STUDY FOR THE LITTLE ONES.

Children are naturally interested in outdoor things, and all that a mother needs to do to make a small naturalist of her child is to direct and call his attention to the beautiful things of nature that seem to us too obvious for comment. Ask the little one to tell you the colors in the sky every day at sunrise and at sunset. One mother called the beautiful sunrise or sunset, as viewed from the window, "God's pictures," and the children often ran to her in delight, saying, "Mother, come and look quick, God has made another picture." Ask the child to look for birds every day, noting their plumage, the way they fly and their calls. Children love to collect things, and this instinct may be turned to educational uses if they are encouraged to make collections of different varieties of leaves, wild flowers, beautiful pebbles and shells, noting the colors and shapes of each.

AN EFFECTIVE REMEDY.

A very simple and effective cure for poisoning from sumac, poison ivy or poison oak is obtained from boracic acid. Bring a solution of the acid to the boiling point. Wring woolen cloths out of it and lay upon the affected part as hot as can be borne, covering with another woolen cloth to keep in the heat. When cool repeat. Keep this up for twenty minutes; then wait two hours and repeat again. It does not burn as might be expected, but stops both the burning and itching, and is very soothing.

HOUSEHOLD HINTS.

When powdered sugar gets hard run it through the food chopper. This is an easier way of breaking up the lumps than using a rolling pin.

Always remove the cake of fat that settles on the top of cold soups. If allowed to remain the soup will turn sour more quickly than it otherwise would.

Before blacking the stove, draw the ends of fingers across a bar of hard soap, scratching off enough to fill under the nails and so keep the blacking from lodging there; which is so difficult to remove.

A splendid way to improve the appearance of a cook stove is to take the soap suds after washing clothes and wash the stove all over with the suds, then use the stove polish as usual. This certainly improves the appearance of a stove greatly by making it shine brighter. Also use the suds on your sad irons before ironing. This helps greatly toward making them smooth.

A rubber doormat or one of the cheaper coco fiber or heavy rope mats is elastic to the step. For that reason it is helpful to have one in the kitchen to stand upon when washing, ironing or washing dishes. You will be surprised, as I was, to find how much less tired you get after standing for several hours at work.

AMONG OURSELVES.

A message and a bit of verse from Electa McCullough emphasizes something I am always glad to have given prominence in our Home Department:

The home embraces not merely the family, but also the friends of the farm and house—the animals that serve us so faithfully. The horse and cow are useful servants, and are often friends, but for pure love, commend me to the good dog. As this paper likes dogs and dog poetry, this doggerel is offered, and perhaps it wil please the children:

TO A TINY TERRIER.

My pretty Flirt! you are the dog
Of all the dogs the best;
Say, who would think so true a heart
Is beating in your breast?
Affection always there abides!
Whatever be my mood
The message in those shining eyes
Is love and gratitude.
Although I sometimes do neglect
And scold my little pet
How ready is she to forgive,
How ready to forget.
How prompt to know my slightest wish,
Or go at my command,
Without a thought of a reward;
Is not such service grand?
My little dog! I well may learn
A lesson from your ways—
To do my duty as I ought
For neither pay nor praise.

Dumb creatures have such a large part in the life of the farm that it specially behooves dwellers on the farm to recognize their worth and reward their services. As summer comes on let us be careful to see to it that our animals have shade and water and that the horses that work so hard in the fields are given the best of care. Our thanks to Electa McCullough for the verse which leads our thoughts to those who are so dependent upon us.

After quite an absence Mrs. Mabel Porter, better known Among Ourselves as "Arkansas Pioneer"—though she is not in Arkansas at present—she is with us today:

Recently I heard a man say, "The world is keeping a record of some of the crops of Kansas—the wheat, the corn and the fat cattle. These are duly recorded and heralded from one publication to another and yet the 'man' crop is never mentioned either as to quality or quantity." He then proceeded to show how the farmer thought more of his steers than he did of his sons. What he said was very plausible, but down in my soul I felt it was not the truth. To obtain money the farmer promotes every honorable device. He publishes and heralds and works and strives, but his money, his striving is all for the boy—the family. He feels that the boy is his own personal interest and not a thing to advertise. However, a lurking fact we cannot dodge is that we are dangerously near the brink of destruction if our money-making schemes come between or separate us from the boy. Too often being burdened with the necessities of life we neglect our duties. Each father owes the boy a certain amount of character molding of the proper kind. It is each one's duty to learn about these matters. There is much scientific research, much truth and many statistics behind much instruction given us on the lines of child training. I would suggest to the mothers who read that they neglect not the literature that pertains to the building up of reliable characters. Do not depend on some college you are going to send them to—that will be too late. Those who succeed in college or elsewhere are

The Biggest Thing in the Clock Business

Big Ben is the biggest thing today in the alarm clock business.

He is only two years and a half old, but he's already getting more work from the States than any clock alive.

In two years and a half time, 18,000 jewelers—70% of the total number of United States watchmakers — have already adopted him. Two million and a half families leave it to him to call them up in the morning. Two million and a half families use him all day long to tell the right time by.

He is really two good clocks in one—a crackerjack of a timekeeper and a crackerjack of an alarm.

Big Ben stands seven inches tall. He is triple nickel-plated and wears an inner vest of steel that insures him for life. His big, bold figures and hands are easy to read in the dim morning light. His large, comfortable keys almost wind themselves. He rings *five minutes steadily or ten intermittently*. If he is oiled every other year, there is no telling how long he will last.

He's sold by 18,000 watchmakers. His price is $2.50 anywhere in the States, $3.00 anywhere in Canada. If you can't find him at your jeweler's, a money order mailed to *Westclox, La Salle, Illinois*, will send him anywhere you say, express charges prepaid.

HARTSHORN SHADE ROLLERS

Original and unequaled. Wood or tin rollers. "Improved" requires no tacks. Inventor's signature on genuine:

Stewart Hartshorn

Ask your neighbor to subscribe for The Homestead.

those who have the character for the foundation.

All of which is very true and should be heeded by fathers of boys. By the way, summer is the time when the ambitious father is apt to put dollars ahead of the welfare of his son by giving the lad tasks too heavy and too many. This is a dangerous proceeding. Not only is there danger of the boy taxing his immature body, but—what is equally important—there is danger that he will learn to think of the farm as a place of all work and no play and plan to get away from it as soon as he can.

Our good friend, Mrs. Mary Eleanor Kramer, will today finish the talk which so interested our housewives last week:

Boiled Onions With Vinegar Sauce.—Select onions as large as walnuts. Peel and boil in salted water until tender. Drain, put into a covered vegetable dish and keep warm. Make a sauce by boiling together one cup of weak vinegar, a tablespoonful of butter, salt and pepper to taste, let boil two minutes, pour over the onions and serve hot. For creamed onions boil onions as above and substitute a cream sauce for the vinegar sauce.

Green Peas.—Shell the peas, then wash the pods well. Put the pods into a kettle, add water to cover and boil twenty minutes. Remove from the fire, drain through a colander and use the water for cooking the peas. Boil the peas from twenty minutes to an hour and a half (according to age of the peas). When tender drain. (Save the water for soup.) Add to the hot peas a heaping tablespoonful of butter, a half teaspoonful of sugar and a little pepper. Shake the kettle well for three minutes and serve. Creamed peas may be served by pouring over the drained, cooked peas a hot cream or white sauce.

Carrots and Green Peas.—Scrape and cut into dice one pint of young carrots. Boil in salted water until tender, drain. In a second vessel cook one pint of green peas in salted water until tender, then drain. Now mix the peas and carrots, add pepper to taste, and season with a tablespoonful of butter and three tablespoonfuls of rich, thick cream.

Green Pea Salad.—Boil peas until tender, drain and cool. Line a deep salad bowl with lettuce leaves; on each leaf place a spoonful of the cold peas, dust with salt and pepper, and over all pour a boiled salad dressing made by mixing together one dessertspoonful of dry mustard, one-half teaspoonful of salt, one-quarter teaspoonful of celery salt, one tablespoonful of butter. Stir thoroughly, add the yolks of two eggs. Beat well; add one cupful of milk, cook until it begins to thicken. Remove from the fire. When cold add two tablespoonfuls of vinegar, beat thoroughly and pour over the salad.

Spinach Salad.—Wash half a peck of fresh spinach, put in a steamer and steam for fifteen minutes; turn into a colander and drain. Chop fine, season with salt, pepper and two tablespoonfuls of melted butter. Mix well and press into small molds or cups. When cold, turn out each mold on a separate lettuce leaf, put on top a spoonful of mayonnaise or boiled dressing, garnish with a sprig of parsley and a slice of hard-boiled egg and serve.

Housewives are sometimes at a loss to secure variety without an expenditure of labor which circumstances do not justify, hence one who contributes recipes which provide simply prepared dishes "a little different" is always welcome.

"A Reader" asks if it is injurious to spray currant bushes with Paris green after the currants are half grown. An early reply will be appreciated.

THE YOUNG FOLKS

For the best letter received each week we offer twenty-five cents; second best, a silver badge; third best, a pansy badge. Send letters to Aunt Mary, Hawley, Minn.

BIRDS.

(First prize.)

I like birds very much. The hawk, blue jay, kingbird and sparrow are the only birds which papa will let be killed on the farm. It seems cruel to kill them, but the hawk steals chickens; the blue jay steals both hens' eggs and birds' eggs and drives other birds away. Kingbirds eat bees, and we can't afford that, and the sparrows are always driving away the pretty song birds. The blackbirds in particular are valuable. They more than pay for the harm they do by the cutworms they eat as they follow the plow. And the swallow is an interesting bird. He catches all the insects he eats on the wing. The robin is the first bird to come, and the lark and blackbird soon follow. One year an old lark had her nest in our yard, and every morning she and her babies would come into our front yard to dig, and whenever she found a worm she would grind it up and give it to a baby bird. There are a pair of woodpeckers around here this spring, and they have pecked a large hole in a tree and are lining it. We believe they are going to build there.

I wonder how many of the cousins have seen a humming bird's nest? A pair had a nest in our honeysuckle last year. It was so well hidden that it took us four days to find it after we saw them fly into a certain place every day.

Mama and I often get up at three in the morning to watch the birds wake up. The four o'clock risers are the blackbirds, yellow-hammers, and killdeers. By half past four nearly all the birds are up.

I wonder if people rose as early as birds if they would be as happy and useful. Do you think so?

We have a swing under a cherry tree, and as the birds sit in the branches and sing and eat cherries, I sing (as near as I can) like them. Did any of you ever try it? I think it's fun. Mama says when I am old enough to help more in the house, I may have a pair of canary birds, and maybe a pair of strawberry birds. So I do all I can to help her, and find it pleasant to clean up, cook (I can bake cookies, cakes, pies, doughnuts and candy) and sew. Don't you enjoy helping your mamas?

—Grandma, age 11.

The Beauties of Nature.

(Second prize.)

I do love poetry, although I am not a poet. I love to paint the beautiful scenes I see when I ride out through the long, shady, cool lanes, and the large green meadows. Every evening I ride through long shady lanes to the meadows after our herd of cattle. Some evenings I see the sun sink below the horizon, as it casts its beautiful light on the earth. Sometimes when I am late I see the large round moon and stars shining brightly in the sky. When I was almost ten years old I lived in the city, but I have lived in the country almost four years. I would so much rather live in the country than in the city, for you can see so many beautiful scenes of Mother Earth's, and when spring comes, how happy we all do feel! The first flowers seem so grand to us! I often think of the poor little city children that never can take long walks and rides through the green meadows and pastures; I would like so much to have them with me, and let them walk and ride and gather the beautiful flowers and hear the merry birds sing.

I walk one mile to my school each morning, and I enjoy the beautiful warm sunshine, and I hear the birds twittering in the treetops along the roadside, and I cannot help but think what a happy life this is and what a beautiful world.

—Cowboy, Ia., age 13.

A Young Poultryman.

(Third prize.)

Mama has the Rhode Island Red chickens. I have the Plymouth Rock. I have a chicken house of my own. It is a small one. I have only eleven hens and one rooster. I have them in a pen which has no grass in it. So I have to feed them every day. I get five eggs a day from eight hens. They are tame and run to meet me when I go to feed them. I have set three of them on fifteen eggs each. Last year I sold over $15 worth of chickens. I am taking music lessons on the piano now, and want to make enough from my chickens to pay for my lessons. I had not been absent a day from school until I took the measles the first day of May, neither had I been tardy. I am in the third room and hope to be in the fourth next year.

—Forest E. Davies, age 8.

How many of this spring's choice heifer calves can you afford to sell for veal? Very few of the good ones should ever find their way into the butcher shop with first-class dairy and beef cows so scarce. Build up the herd with these good young things, even though your city friends must eat less veal and pay higher price for it. The butcher can never pay the breeder what a good heifer calf is worth when she is sold as veal. Consider her as a breeder and the veal price is insignificant, even though it may on the surface appear high.—[Farmer's Advocate.

THE INTERNATIONAL S. S. LESSON

2d Quar. Lesson 10, Gen. 45; 1-15. June 8, 1913.

JOSEPH FORGIVES HIS BRETHREN

Twenty-two years, and the brothers' paths, which diverged at the pit in Dothan, converge again in the palace of On; years for Joseph so crowded with startling transitions as to make the artless narrative fascinating beyond comparison; years for his brothers, let us hope, of moral improvement, though their great crime remained unconfessed and unatoned for. The guilty brothers may have furtively scanned the faces of such domestic slaves as they might chance to meet with small expectation of recognizing in some menial their rejected brother. But they looked squarely at this mighty prince, with his Egyptian name and retinue, without the slightest suspicion that he was their kinsman. He was completely metamorphosed. But they were the same rude Bedouins, still in shepherd garb, speaking their mother tongue, and only slightly grizzled by lapse of years. Joseph knew his brothers at sight, but not in vain had he passed through his long series of trying situations. His composure was admirable. He was every inch a diplomatist. He would know their disposition toward himself. He would put them in such situations as to stir up their compunctions. He would have them at his feet before he disclosed himself. So he continued to use an interpreter, and made no sign of understanding the conversation they had among themselves. Joseph's bearing toward his brothers, and the various expedients he used, were well calculated to reveal their hearts and excite their contrition. He made himself strange toward them, and spoke roughly. He taxed them with being spies. At once they knew themselves to be as utterly in the power of this ruthless prince as their pleading brother had been in theirs a score of years before. What right had they to expect this stranger to be more propitious than they had been? Down in an arched Egyptian dungeon, three days they tasted the bitter sorrow of their brother in the pit when they were so deaf to his wailing. One of their number held as hostage, bound them to return to the prince from whose presence they would gladly have fled forever. Finding the money in the sack was a forceful reminder of the shekels each had gotten so illy by the sale of a brother. At length the confession is extorted: "We are verily guilty concerning our brother." There are sweet touches of nature through this story, illustrating well that all nations are really of one blood,—Joseph's secret tears at the remorse of his brothers; Jacob's agonized exclamation, "If I am bereaved of my children, I am bereaved;" Joseph's lordly banquet to his brothers; his inquiry for his father; his hasty retirement to weep at the sight of his own brother; Judah's masterful plea for Benjamin; and, finally, Joseph's disclosure of himself after all foreign witnesses had first been expelled; his tact in saving his brothers from being swallowed up of overmuch sorrow by directing their attention to the providential use of their evil deed. In the range of literature, the narrative is not surpassed in naivete.

FATTENING GEESE.

To the Editor of The Homestead:

W. H. Firke, of Piatt county, Illinois, has added a unique feature to his immense stock feeding business.

For several years he has gone down into the rough country of Tennessee and bought up geese; a few in a place at forty to fifty cents each, and driven them to some convenient railroad center. The geese would be shipped to his farm and fattened for the market. Two years ago he realized a profit of nearly $600 on one car load besides a surplus of fifty geese left at home.

This season Mr. Firke purchased 4,000 head and drove them sixty miles to the railroad. This year the geese were fed nothing but corn, each goose consuming about a pint of corn per day. They drank a great deal of water. In former years the flock was fed about thirty days; one bunch that was fed twenty-six days gained four pounds each. Mr. Firke has made a success of this side line to his business of fitting stock for market.

The geese were fed in the same feed lots as the stock, but at the season when there are no cattle or sheep on hand, he has a feeding shed 64x90 feet with a hay mow above it. Two-thirds of the shed floor is concrete. At the sides is a combination feed manger suited for geese, sheep and cattle. On the south side of the shed are two feed lots 55x65 feet each, one of which has a concrete floor. Each day this lot was given a coat of straw so that it would be dry and more manure would result. The manure is counted as one of the profits of the venture.

Some kind of stock is being fed at all times of the year and the feeding of the geese enables Mr. Firke to give steady employment to his help. There are 20,000 square feet of concrete floors in the buildings and lots, all of which was done by the men on the farm. Electric lights are installed in all buildings, and one lamp at the top of the barn will light up the whole barn lot when turned on.

Minnie G. Stearns.

At the recent Dublin (Ireland) society's spring show there were 500 Short-horn cattle on exhibition. Aberdeen Angus were out to the number of 180 head, all owned by Irish breeders.

OUR FASHION DEPARTMENT.

ALL PATTERNS, 10 Cents Each.

THIS department is prepared especially for The Iowa Homestead. We can supply our readers with high-grade, perfect-fitting, seam-allowing patterns at 10 cents each, postage prepaid. Full directions for making, as well as the amount of material required, accompany each pattern. When ordering, all you have to do is to write your name and address plainly, tell us the correct number and size of each pattern you want and enclose 10 cents for each number. We agree to fill all orders promptly and guarantee safe delivery. Address all orders to The Iowa Homestead, Des Moines, Iowa.

6104 Ladies' Dress.—This stylish frock closes at the front and may have long or short sleeves. The three-gored skirt may be made with empire ore regulation waistline. The dress is splendid for general wear and may be developed in serge or linen.

The pattern 6104 is cut in sizes 34 to 42 inches bust measure. Medium size requires 5 yards of 36-inch material. Price of pattern ten cents.

6990 Ladies' Dress.—This costume closes at the front and may be made with long or short sleeves. The turn down collar is a pretty feature. The skirt is cut in four gores and may be made in the empire or regulation waistline. It is a charming example of latest fashion in one-piece dresses.

The pattern 6090 is cut in sizes 34 to 42 inches bust measure. Medium size requires 5 yards of 36-inch material and ⅝ yard of 45-inch batiste or net. Price of pattern ten cents.

6111 Ladies' Dress.—Something decidedly new and quite charming is here presented. This dress, while replete with fashion's latest features is simple to make. It closes at the front and the three-gored skirt may have either the empire ore regulation waistline. Linen, serge or ratine can be used to make this dress.

The pattern 6111 is cut in sizes 34 to 42 inches bust measure. Medium size requires 6 yards of 36-inch material and ¾ yard of 22-inch net. Price of pattern ten cents.

VETERINARY MATTERS

PROFESSIONAL Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. Thoroughly good and reliable veterinary remedies are advertised from time to time on these pages. If they were not good and reliable they could not appear in our paper. Our readers are requested to look them over. You may find here some remedy which will exactly fit your case. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

COLIC.

One of my horses is bothered with weak kidneys and has symptoms of colic after working all day. He drinks and eats and then about one hour after feeding in the evening he gets sick. He passes water often. Can you give me any advice?

Have his teeth attended to by a veterinarian. Feed him from an extra large feed box so that the grain will spread out thin on the bottom and make bolting impossible. Feed whole oats and wheat bran dampened with water. Give the drinking water before feeding. Do not feed the horse when he is warm and tired. Feed a pound or so of hay at such times, before allowing the grain mixture. At time of attack give two ounces of turpentine and an ounce of laudanum shaken up in a pint of raw linseed oil as one dose. Give it carefully to prevent any of it from running into the windpipe and lungs.

TYPICAL HERD OF AYRSHIRE CATTLE.
See Field Note of Galloway Sale.

The Holbrook Angus Sale.

P. J. Donohoe, Holbrook, Iowa, and William Cash, Williamsburg, Iowa, held a very successful sale of Aberdeen Angus cattle at the Holbrook sale pavilion on May 27th. The average was highly satisfactory to the sellers and buyers received good values. Imp. Eryse, an excellent individual topped the females at $465 selling to Escher & Ryan. This firm were liberal bidders and buyers. Ballinera was not only the top bull, but the top of the sale, selling for $555 to Geo. Evans & Son. He was sired by the champion Erwin C., and out of the famous World's Fair winning cow, Blackbird 26th. The evenness of prices indicate a very healthy tone in the Aberdeen Angus business. More cattle could have been sold at the same prices as the demand was not appeased when the sale ended. There is undoubtedly a very bright future for breeders of Aberdeen Angus cattle, at least for the next few years to come. Carey M. Jones and N. G. Kraschel did the selling in a highly satisfactory manner. A list of sales is appended:

FEMALES.

LANDS AND HOMES

Get Your Canadian Home From the Canadian Pacific

WE will make you a long-time loan—you will have 20 years to pay for the land and repay the loan—you can move on the land at once—and your Canadian farm will *make you independent.*

20 Years to Pay

Rich Canadian land for from $11 to $30 per acre. You pay only one-twentieth down—balance in 19 equal annual payments. Long before your final payment comes due your farm will have paid for itself over and over. This advertisement is directed only to farmers or to men who will occupy or improve the land.

We Lend You $2000 For Improvements

The $2,000 loan will help you in erecting your buildings, and you are given twenty years in which to fully repay this loan. You pay only the banking interest of 6 per cent.

Advance of Live Stock on Loan Basis

The Company, in case of approved land purchaser who is in a position and has the knowledge to take care of his stock, will advance cattle, sheep and hogs up to the value of $1,000 on a loan basis, so as to enable the settler to get started from the first on the right basis of mixed farming. If you do not want to wait until you can complete your own buildings and cultivate your farm, select one of our Ready-Made farms—developed by C. P. R. Agricultural Experts—with buildings complete, land cultivated and in crop, and pay for it in 20 years. We give the valuable assistance of great demonstration farms—free.

This Great Offer Based on Good Land

Finest land on earth for grain growing, cattle, hog, sheep and horse raising, dairying, poultry, vegetables and general mixed farming, irrigated lands for intensive farming—non-irrigated lands with ample rainfall for mixed and grain farming. These lands are on or near established lines of railway, near established towns.

Ask for our handsome illustrated books on Manitoba, Saskatchewan and Alberta—mention the one you wish. Also maps with full information *free.* Write today.

FIELD NOTES.

Faulkner's herd of big, spotted Poland China hogs will be found headquarters of the spotted kind. Address H. L. Faulkner, Box 117, Jamesport, Mo., for complete information regarding boars for herd headers.

Will Thompson, Jesup, Iowa, is offering thirty-three high-grade Shropshire ewes, one buck and twenty-three lambs. Mr. Thompson is overstocked and has not enough pasture to carry his stock through the summer. See page 19.

Writing with reference to his Chester White hogs, Earl Bloom, Bridgewater, Iowa, informs us that he has shipped stock to Idaho, Minnesota, Kansas and Ohio within the last month. He expects to offer our readers some excellent fall pigs quite soon.

Some splendid young Scotch Shorthorn bulls are advertised for sale by W. H. McLaughlin, Shelby, Iowa, on page 22. He also offers one of his present herd bulls for sale and he will make a price on them where any breeder wanting a bull can afford to buy.

Conrad's Poultry and Stock Farm, Cedar Rapids, Iowa, has an announcement on page 11 that is of interest to all farmers. It concerns a preparation used for the destruction of lice, fleas and mites on farm stock. It is good for horses, cattle or poultry. It is sold at $1.50 per gallon. Send orders to the address named.

B. F. Mason, Seward, Neb., has a Poland China boar that is a real herd-heading sort of a proposition. He will sell this boar worth the money as he has no further use for him. He is cholera immune, and an extra good individual and extra well bred. Mr. Mason also has a few Short-horn bulls for sale. Mention The Homestead when writing him.

Fly time is the most trying season of the year for the dairyman and anything which will reduce the pest of flies is welcomed. On page 12 our readers will find an announcement presenting Cow Ease, which is a preparation clean, harmless and easily applied, that keeps flies off of the cows and saves five times its cost in extra milk. Trial lots are sold at the prices named in the advertisement. Send orders to Carpenter-Morton Co., Boston, Mass.

The engraving in the advertisement of Sal-Vet on page 10 shows the wonderfully attractive form of pigs without worms. Appearances, however, are not all. A pig without worms grows quicker, makes a greater percentage of gain on the food used and gets into market in a more salable form than those which are affected. Sal-Vet is offered to farmers on a trial offer at sixty days and under an absolute guarantee that it will dispose of worms. All that is necessary to be done is to fill out the coupon printed in the corner of the advertisement and forward it to Sidney R. Feil, president S. R. Feil Co., Cleveland, Ohio.

Nash & Son Lose Gold Medal.

A short time ago the writer made mention of the new Poland China boar that Nash & Son, Minden, Neb., had secured to head their herd of the real big Nebraska Polands, and we mentioned that with this boar, which is Big Hercules, and their old boar Gold Medal, that they were extra well fixed for herd boars. Now we must tell our readers that they have lost Gold Medal. He accidently injured himself, dying a couple of days afterward. These gentlemen have a big lot of Gold Medal pigs on the farm. A very select line of fall gilts and a big crop of spring pigs. They have lost a very valuable boar, a great sire of choice sows, but they still have the best boar that has been in this herd in years in Big Hercules. If interested in the extra big ones, if wishing to buy an extra choice sow bred for fall litter, address as above and mention The Homestead.

Beaver Offers Short-horn Bull.

S. C. Beaver, Ulysses, Neb., is offering his herd bull and one of the choicest large Short-horn bulls in the country. He is an immense fellow, weighing about 2,200 and is a beautiful roan, splendid disposition and right in every way. If looking for an extra good one, write Mr. Beaver as above. The writer has seen this bull and we recommend him.

Westrope Offers Bulls.

Any of our readers who are in need of a good young Short-horn bull should write or go and see J. G. Westrope, Harlan, Iowa, as he has a few good young Scotch and Scotch-topped bulls for sale and he is making prices on these where any farmer or breeder can afford to buy. He would like to clean his present crop up and therefore he will price them where they will sell.

Chester White Herd Boars.

The breeder who is wanting a good boar to head his Chester White herd will get a bargain in the two that G. H. Tutt, Marathon, Iowa, is offering for sale. One of these is Counsellor, a Nagle-bred hog, and he is a son of Lewis E., and out of Highland Nellie. This is one of his old standbys, but he has so much of his get in his herd that he must sell him. His other boar is Village Boy, who is out of a champion Iowa State Fair sow. He will sell either one of these boars at $50 if taken soon. He is also offering ten head of good sows bred for fall litter and he is offering at $40 and upwards. He has some splendid spring boar pigs and he is booking orders for these at $25 to $35. He has some early pigs that are strictly all right and now is a good time to have him book your order for one of these. Write Mr. Tutt about these at once and mention The Homestead.

Good Angus Bulls for Sale.

If any of our readers want to buy a good, young Angus bull they should write or go and see H. R. Davis, Corning, Iowa. He has several for sale all sired by well-known Blackbird bulls and he is pricing them where they must move. If you want one of these you had better go and see these bulls right away.

Smooth Jumbo for Sale.

Some Poland China breeder who wants a good two-year-old boar should buy Smooth Jumbo, that George Glynn, Sioux Rapids, Iowa, is offering for sale. He is a son of Crow's Kind, he a son of Big Orange. His dam is Goodie by Wintermute's old Jumbo. He is an unusually smooth boar, will weigh right around 800 pounds and is a bargain to some breeder who is wanting to buy a good herd boar. Write Mr. Glynn about him at once and kindly mention The Homestead.

Linnwood Cumberland for Sale.

The Short-horn breeder who is looking for a good white bull to head his herd will be interested in the white bull that H. H. Powell & Son, Linn Grove, Iowa, are offering for sale on page 19. He is twenty months old and is a son of that noted show and breeding bull King Cumberland 2d, the junior champion Iowa State Fair bull. The sire of this young bull is a full brother to the grand champion King Cumberland that heads the Elmendorf herd, so you may know he is a well-bred fellow and a good individual. He is out of a Miss Ramsdem cow sired by the champion bull, Ceremonious Archer, and is therefore a royally bred fellow. He will make a 2,200-pound bull when matured, is a good headed and well-balanced bull, and the breeder who is looking for a splendid young white Scotch bull to place at the head of his herd will be interested in this youngster. Write Powell & Son regarding this bull and kindly mention The Homestead.

Poland China Sows for Sale.

On page 19 George Glynn, Sioux Rapids, Iowa, advertises twenty-five head of well-bred big-type Poland China sows for sale, all bred for early fall litters to Mouw's Big Sioux. Among these are daughters of Crow's Kind, Youngfellow (a son of Tecumseh Longfellow) and Bright Eye. These sows are strictly choice Poland China brood sows and he is selling them at from $50 to $75. We have seen these sows and will say they are bargains at the price he is asking for them. You can buy these sows, save their fall litters and put them into a winter sale and double your money. Mr. Glynn also offers to sell Smooth Jumbo, a two-year-old son of Crow's Kind out of a daughter of Wintermute's old Jumbo. He is a hog that will weigh right at 800 pounds in his present form and will easily make a 900-pound or better hog when fat. He is smooth as a ribbon, deep in body and a right, good herd boar. He can be bought worth the money if taken now. Write Mr. Glynn and send him an order for some of these good sows and if you want a herd boar don't overlook his Smooth Jumbo, as he is a good hog. When writing him kindly mention The Homestead.

Duroc Fall Boars for Sale.

If any of our readers want some good Duroc Jersey fall boars they should read the advertisement of W. J. Wendt, Remsen, Iowa, on page 22. He has twenty good boars for sale and they are sired by C. Indicator, a grandson of old High Chief. These are good lusty fall boars and he is pricing them at $25 to $50 if taken soon. Write Mr. Wendt about these fall boars at once and kindly mention The Homestead.

R. L. Bollman's Hampshires.

A representative of this paper recently visited R. L. Bollman, the noted Hampshire breeder of Coal Valley, Ill., and found him as enthusiastic for his favorite breed of swine as ever. Mr. Bollman has been a prominent exhibitor at the different state fairs and International Live Stock Exposition for several years. He has made some very successful public sales all of which indicate that he has the kind of Hampshires that the best breeders want. He has at the head of his herd a good boar named Time Keeper that if shown this fall will make some strong competition for the other fellow. He has a good young boar sired by Messenger Boy, the undefeated champion of 1912, that he is using some. Mr. Bollman's son, Earl, is taking an active interest in the Hampshire business and when he gets a little older we predict for him a successful career as a Hampshire breeder. Mr. Bollman has a few fall boars and an extra fine lot of spring pigs of both sexes for sale at reasonable price. See page 23 and write him your wants, mentioning The Homestead.

Niswander's Hampshires.

Howard Niswander, Kinross, Iowa, has more good Hampshires than he has ever owned before at any one time. Last winter he purchased three sows bred to the famous Messenger Boy and succeeded in raising twenty-five pigs from these sows. He also has five litters sired by a son of Captain Jack, one litter by Lempe's Favorite and one litter by the prize-winning boar, Dudie. Mr. Niswander has over 100 spring pigs and they are the best he has ever owned. He is giving them good care and at the present time will price some of the largest spring pigs very reasonable. It has been his ambition to own as good a herd of Hampshires as anyone and with the class of sows he has been buying during the past year he will soon realize his ambition. He would be pleased to hear from any of our readers wanting an extra good spring boar pig at a reasonable price. See page 23 and when writing kindly mention The Homestead.

O. S. Johnson, Auctioneer.

Col. Oliver S. Johnson, Tipton, Iowa, known as the Iowa auctioneer, is carrying an advertisement in The Homestead on page 21. He needs no introduction to many of our readers. He has just issued an article and instructive little booklet entitled, "My Million Dollar List" which contains the names of men for whom he has sold a million dollars' worth of property. It also contains several unsolicited complimentary letters. On receipt of your name he will be pleased to mail you one. Colonel Johnson has

given special attention to horse and cattle sales. He is familiar with the breeding of this class of live stock and those for whom he has sold do not hesitate to give him strong recommendations. His experience as an auctioneer covers a period of about fifteen years and during that time he has sold all breeds of pure-bred live stock. His terms are reasonable and he will be pleased to correspond with anyone contemplating the holding of a public sale during the next year. When writing him for any information, kindly mention The Homestead.

Dickinson's Alfalfa Offer.

The present active campaign all over the country on the subject of alfalfa raising has awakened unusual interest. A late instance is that of the Albert Dickinson Company, Chicago, which offers to present to any reader of this paper a sufficient quantity of alfalfa seed to go to test a plat of land one rod square. With the seed, and without any cost whatever, there will be sent a handsome booklet of forty-eight pages giving full information with respect to the growing and use of alfalfa. See the advertisement on page 11 and forward request for seed to the Albert Dickinson Co., Chicago, Ill.

The Heider Tractor Announcement.

One of the most up-to-date concerns engaged in the manufacture of tractor engines is the Heider Mfg Co., whose new advertisement appears on page 8. The Heider is so fully protected that it meets all demands and is adapted to the use of gasoline, motor spirits or kerosene as a fuel. This plan enables the user to make use of that fuel which might happen to be cheapest and most economical or him. Testimonials concerning the effectiveness of the Heider tractor and free book concerning it may be obtained by writing to Heider Mfg. Co., Room 270, Main St., Carroll, Iowa.

Hancher's Poland Chinas.

One hundred and fifty spring pigs is the number M. P. Hancher, Rolfe, Iowa, has on hand and he has some very good ones. These are mostly sired by his noted boar, Smooth Wonder 2d, that are regarded as one of the greatest breeding sons of old A Wonder now living. This old boar has done the Hancher herd a wonderful lot of good and has been instrumental in bringing it to the front as one of the best today in the entire West. Another splendid boar he is now using in the herd is Chief Price Jr., and still another is Long Wonder. These are all large boars of the strictly big-type kind, and the most of the pigs that he now has in the herd are sired by these three hogs. Another boar that he is now using promises very much for this herd and that is Mouw's Jr., and he is using him very largely on the get of Smooth Wonder 2d. Mr. Hancher will make a public sale on August 6th, at which time he expects to put in the best boars he has and some of his choicest sows and the latter will be bred to one of the present boars that is being used in the herd.

Poland China Fall Boars for Sale.

On page 24 F. E. Jackson, Hurley, S. D., is offering some splendid Poland China fall boars for sale and he has some of the very best that you can find anywhere. These are mostly sired by Dale Expansion, a son of Dorr's Expansion, and he was the pick of Henry Dorr's crop of fall boars in 1911. He has developed into a splendid boar, having plenty of size, with a large bone and ample quality. He is proving one of the greatest breeding boars in South Dakota, and these fall boars that Mr. Jackson is offering are out of sows that topped the best sales throughout the West. They are out of such sows as Nebraska Maiden, a daughter of that well-known boar, Golddust Hadley, Sunflower, a daughter of that noted Nebraska State Fair winner, Big Tom, and Victorine, daughter of Big Victor. There is no better breeding than is behind these fall boars and they are good enough that any breeder would be glad to have them at the head of his herd. Mr. Jackson is also offering a few good sows bred for fall litter to Dale Expansion and he is making low prices on these considering what they are. Write Mr. Jackson at once about these and kindly mention The Homestead.

Bellows Bros. Short-horn Sale.

The sale of Short-horn cattle to be held at Parkdale Farm by Bellows Bros., Maryville, Mo., on next Tuesday, June 10th, is a sale that should be attended by every breeder interested in improved Short-horns. It is strictly a breeders' sale, the work of many years is represented and that work has been performed by master builders, conceded to be among the foremost molders of the modern type of Short-horn cattle. It is to be regretted that Colonel Bellows who devoted his life to the work should have been taken off just at a time when his and his brother's efforts as cattle breeders were showing that they have not toiled in vain. In this sale they were prepared to show to the world cattle that are superior to any they had previously produced. The twelve bulls listed were bred by Bellows Bros., they are the best ever bred by this firm, eight are rich roans, four are reds and all are dependable bulls coming from superior sires and dams that may be seen at the farm on sale day. This affords the buyer an exceptional opportunity. Half the number are sired by the champion show bull, Diamond Goods, and there is not an ordinary plain bull listed. Several of these bulls are good enough to go to head the best herds and breeders who are looking for as good as is to be found should not overlook this opportunity. The breeding of all is superb and the character and quality of these bulls is unsurpassed. The thirty-seven females are a good lot, seventeen have calves at foot and all but those with very young calves at foot are rebred. The sires represented are bulls of national and international reputation. The calves

NEXT WEEK'S SALE PROGRAM

Tuesday, June 10,	Short-horns, Bellows Bros., Maryville, Missouri.
Wednesday, June 11,	Short-horns, Howell Rees & Son, South Omaha, Nebraska.
Thursday, June 12	Short-horns, Owens Bros., Homestead, Iowa.
Friday, June 13,	Short-horns, Whitsitt Bros., Preemption, Illinois.

at foot are by the Bellows Bros. herd bulls and among these are some as choice young things as are found. Diamond Goods, Sultan Supreme (an exceptional yearling by Double Dale), Diamond Abbot and Cornerstone are the bulls to which the cows and heifers are bred. There has not been held recently a sale from which it is possible to make such choice selections of herd headers and females fit to go to any herd. The Bellows Bros invite you to come to the sale, see the breeding herd and the offering. You are welcome whether you buy or not. Note this page for the last announcement.

A Prominent Dairy Cattle Sale.

Interest is growing in the announcement that on June 19th Wm. Galloway will make a public sale of Holstein-Friesian and Ayrshire cattle at his well-known Galloway farms, Waterloo, Iowa. Among the star attractions in this sale in Holstein-Friesians will be a son of the undefeated grand champion show cow, Fay Jewel Beauty. This calf was dropped November 28, 1912, and is an animal of extraordinary promise. One of the special attractions in females is the young cow, Hilaria Johanna Ormsby, whose dam is closely related to the $7,000 Holstein-Friesian cow, Johanna De Kol Van Beers, with a record of over forty pounds. All the more popular and practical producing strains of Holstein-Friesians are represented in this sale. Among the Aryshires are many cows and heifers from improted sires and dams. The Galloway farm herd is well known to be one of the best of the breed in the United States, hence this offering has unusual attractiveness. The illustration which appears on this page represents a show herd which has one premier honors at the great dairy shows of the country. Every reader of this paper should obtain a copy of the catalog which contains pedigrees in full and all other information. See advertisement on page 21. Address inquiries for pedigrees to Wm. Galloway, Waterloo, Iowa,

Chicago Angus Sale June 18th.

Fifty head of Aberdeen Angus cattle will be offered at public sale at the Union Stock Yards, Chicago, Wednesday, June 18th, by M. A. Judy. These cattle come from three of the best-known herds in the country, have been selected with special reference to blood lines and individual merits and Mr. Judy, than whom there is no better judge, considers it one of the best lots of cattle he has ever offered to the public. There are forty females and ten bulls cataloged for this sale, represensation of the Blackbird, Trojan, Erica, Pride, Queen Mother and other popular tribes, and the breeder, the farmer and the beginner will all find in the sale something to please them outside of the International and the association spring bull sales there has not been an offering of Angus cattle made in Chicago in some time, and the forthcoming sale should draw a large attendance. Good beef cattle were never in stronger demand than at the present time and buyers should not overlook this opportunity to place public sale values upon outstanding specimens of the great Angus breed. Some exceptionally good values in bulls will be found in the sale. Among the ten head listed are some herd-heading propositions and some show prospects, while the farmer wanting a bull to sire the market-topping class of steers will find what he needs at this sale. Manager Judy charactizes this offering as the most select lot of Angus cattle sold in Chicago in recent years, a statement that should have much weight with the buying public. The catalog should have wide distribution. It can be secured if you mention The Homestead and address M. A. Judy, West Lebanon, Ind., as per the advertisement on page 24.

F. E. Merrick's Durocs.

The writer called on F. E. Merrick, Osceola, Neb., a few days ago and wish to say that he has one of the extra good bunches of spring pigs that we have seen this year. Mr. Merrick is a mighty progressive fellow, and has one of the very top Duroc herds of his section of the state. The class of sows and the boars also that have been employed in building this herd are of the very best, and the seed sown is certainly bearing the proper kind of fruit. The present crop of pigs are nearly all by Golden Rod Hero by Golden Model and his dam was Miss Hope. The remainder of the pigs are by I Am Crimson, by the champion Bell's Crimson Wonder. I Am Crimson was not shown at the state fair, but without special fitting and in competition with many old breeders and experienced showmen at Osceola, easily won everything in the Polk county classes. He is a really good kind of boar, and a good breeder. Belle's Crimson Wonder is certainly one of the great boar sires of the country, having sired a great many boars that have the ability to sire state fair winners. Last season practically every pig that won in the under-six-months class in Nebraska was sired by Belle's Crimson Wonder or a son of Belle's Crimson Wonder. We saw a litter at Mr. Merrick's farm that look as though they would help keep up the reputation. They are by I Am Crimson and out of a Crimson Wonder 3d dam. They are sure right now, and from that line of mating, one has good reason to expect that they will look well this fall. At the Beem dispersion sale Mr. Merrick bought three sows, and while their pigs are a little late, they are certainly extra good. The grand producing sow, Currant Blossom, has a litter by I Am Crimson and the other two have litters by Golden Rod Hero. Golden Rod Hero was also purchased in the Beem sale, and that time the writer stated that he was a boar of exceptional merit, and a line of breeding that can not now be had, especially that close to Golden Model. The way he is breeding shows that he was not overrated. Mr. Merrick will sell his spring boars at private treaty this fall. Watch for further announcements, and remember that he will be at the state fair if all goes well, and that he would like to meet you there.

Iowana's Cholera-Proof Berkshires.

The production of high-class Berkshires is one of the leading industries at Iowana Farms, Davenport, Iowa. Manager J. L. Thatcher selected the foundation stock for this great herd with extreme judgment, choosing only stock of known producing value and the best of blood lines. Today the Iowana herd is undoubtedly the largest collection of Berkshires in the country. Not only that, but every animal measures up to a certain standard, and that a high one. The management at Iowana has never stopped at expense when the matter of securing a herd boar or breeding sows was under consideration, and as a consequence the herd today stands in the front rank as a high-class producing establishment. The noted Rival's Champion is the senior herd boar at Iowana, and he is assisted by Masterpiece Rival 2d, Artful Belle's Rival 3d and other good boars. There are 100 brood sows in the herd, every one of which produces two litters a year. The sows at Iowana must be producers or they are sent to market. The management considers a sow that will not produce two litters each year an expense item and she is gotten rid of. The sows in this herd are a combination of the strongest blood lines known to the breed and their matings with the outstanding boars at the head of the herd are productive of the most satisfactory results. At the present time Iowana is making an offering of practically 700 spring pigs carrying the blood of these great sires and dams, a lot of growthy pigs, of splendid type, and all cholera immune. Some time ago the entire herd was immunized against cholera. The simultaneous treatment is in vogue at Iowana Farms, and the severest tests have shown that the entire herd is thoroughly immunized. It means something to get Berkshires of such gilt-edged breeding and strong conformation as the ones produced at this great Iowa breeding farm, and when one adds to that the fact that they are all cholera proof, the buying public can at once see the value of the offering. Breeding affairs are carried on in a thoroughly practical manner at Iowana Farms. There are no frills of any kind attached to the work, which is in skilful hands. It is a practical, producing proposition all the way through, and a visit will be of interest to anybody. Manager Thatcher is offering the spring crop of pigs at attractive prices, value considered, and those in the market for Berkshires of the right breeding and type will consult their best interests by inspecting the offering at Iowana Farms. The advertisement will be found on page 21.

Briggs Bros. Herd of Durocs.

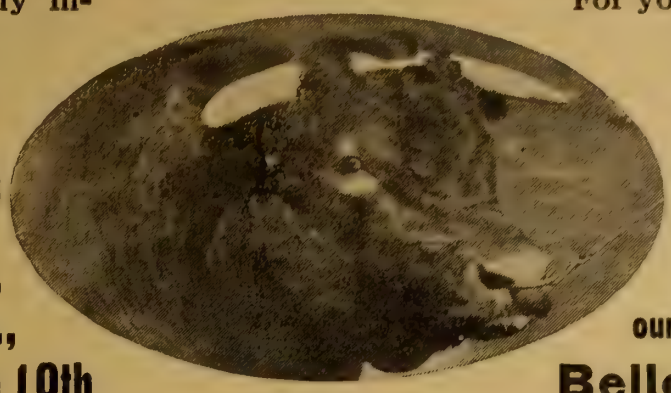
When at Seward, Neb., a few days ago, the writer called on the well-known breeders of good Durocs, Brigg Bros., of that place. These gentlemen have in the past produced some of the very best stuff within the state and have held a number of very successful sales. They have made money at the business, and any good business man is entitled to do this, and if a breeder's products cannot make money for him, it does not seem that he should expect them to be profitable in other hands. The very fact that brood sows sent out from these herds did make their owners money is the reason that the herds have been so profitable to their owners. These gentlemen have foreseen the fact that most stockmen will pay a fairly liberal price for big, roomy brood sows, and then set about to produce them. They secured the great breeding boar Watt's Model for this purpose. This boar was mated on daughters of Fashion's Improver by Improver 2d and the results were all that could have been anticipated. Their herd almost leaped into fame and their average of sales ran high. Golden Model 5th by Golden Model 2d was then introduced and again the cross was excellent and by adhering to these lines they were able to maintain a type. Crimson Critic was next introduced and as a sire he is among the real good ones of the country. These last three named boars are still in use, and they are in fine breeding form. A greater part of these herds was lost by disease a year ago, and past season little was sold from them. This year, however, a nice lot of stuff will be for sale. Probably the best yearling boar that the writer ever remembers seeing we saw on the farm of V. A. Briggs on this visit. He is a June pig, just a year old now, and for general conformation we do not think we ever saw one as good in all parts. This boar is lame right now, injured in the shoulder it seems, but if he comes right in time, and does well he certainly should get a high place at the state fairs. He is so outstanding that he is hard to describe, but we hope he will be at Lincoln that Homestead readers may get a glimpse of him. Briggs Bros. sell on February 17th.

Pederson's Poland Chinas.

One of the good western Poland China herds that is rapidly coming to the front is owned by C. M. Pederson, Dunlap, Iowa, and he has ninety head of good spring pigs on hand. His litters this season have been large in size and he has pigs sired by some of the most noted large-type boars today in the West. Among these are litters by Fesenmeyer's great boar, A Wonder, Chief Price Again, Golddust Wonder, Long Orange, Defender Again, and his later litters by his 1,000-pound boar, Henry Big Bone. This hog is an extra large boar and Mr. Pederson secured him from M. G. Arnold & Son.

The accompanying photo was taken on the famous Elmwood Pony Farm, owned by Col. W. J. Thompson, Dorchester, Neb. This is one of the most noted pony farms in the entire western country. The stud is one of the largest in the country, numbering 100 head or more and they are of the very highest excellence. The very top of the eastern sales as well as a big lot of imported stuff is included in the number on this farm. By far the greater part of the ponies are registered, probably more than will be found in any other one stud in the central West, and they are all pure bred. Very nearly every first prize at the Nebraska State Fair last season went to this stud. The blood of the great sire, McDougal, is to be found here, as well as sons and daughters of the champion sires, King Larrigo and David Harem. Better breeding is not to be found anywhere. Many choice ponies are for sale. Write for prices and mention The Homestead.

You are cordially invited to our Tenth Annual Sale of **Short-horns** to be held at **Parkdale Farm, Maryville, Mo., Tuesday, June 10th**



For your consideration we list **12 Young Scotch Herd Headers** **37 Scotch Bred Females, 17 with calves at foot** **Many rebred to our best herd bulls.**

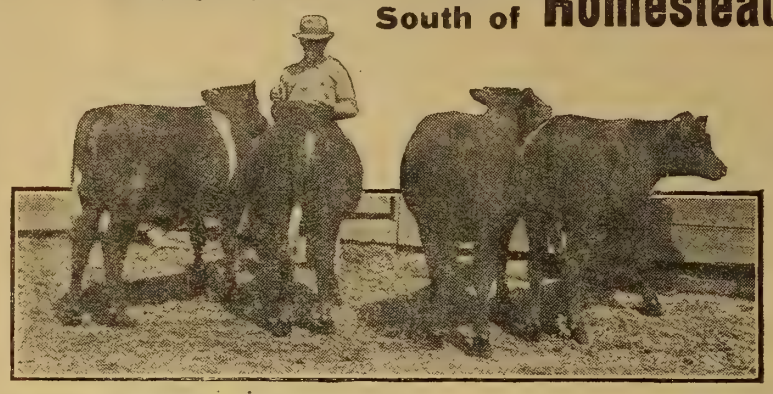
Extraordinary Sale of Scotch Short-horn Cattle

At the Farm Four Miles South of Homestead, Iowa, Thursday, June 12, 1913



WE have selected 80 head of extra good cattle from our herd of 300 and among those selected for this sale are a number of the very best females we own. Only cattle of the very best Scotch breeding will be sold as our herd contains Scotch cattle only. Several representatives of the Queen of Beauty family have been cataloged and we want to say this has been one of the very best families we have ever had on the farm. Other excellent representatives of the Butterfly, Avelanche, Emma, Duchess of Gloster, Flora, Missie and others have been cataloged. The 20 bulls that will sell are an exceptionally well-bred lot and are good individually. Many herd bull propositions will be offered. Any breeder needing a herd bull should make arrangements to attend our sale. We have always used the very best bulls we could obtain regardless of price and for that reason the cattle in this sale can reasonably be expected to transmit their desirable qualities to their offspring. The fact that we are selling eighty head of cattle in one day insures bargains for every man present, as this is a larger number than is disposed of at the average sale in one day. All cattle will be tuberculin tested before the sale. The two fast trains, No. 8 and No 17, on the Rock Island, will stop at Homestead on sale day. Catalog mailed only on application to

OWENS BROS. - BOX H - HOMESTEAD, IOWA

FRED REPPERT, CAREY M. JONES, GEO. H. BURGE, AUCTIONEERS

Strawberry Point, Iowa. Mr. Pederson has a few extra large fall boars that will weigh 225 pounds and he will sell these at any time and at prices that should move them. He does not wish to carry these over and therefore these special prices. If any of The Homestead readers should want one of these they had better write Mr. Pederson at once. He will make his sow sale on February 15th, at which time he hopes to offer the best bunch of brood sows that has ever been sold in his section of the state.

Learn Auctioneering.

No profession offers more attractive possibilities than does auctioneering, and there is no other line of work where today are so many opportunities. In former days no chance was offered for special training in this class of work, but now full instruction in all branches of auctioneering can be secured at Jones National School, 2862 Washington Blvd., Chicago, Ill., the original and largest auctioneering school, now entering upon its tenth successful year. A handomely illustrated catalog giving full particulars will be sent upon application. The advertisement appears on page 21.

Peter Mouw's Midsummer Sale.

On Wednesday, June 25th, at his home near Orange City, Iowa, Peter Mouw will make a midsummer sale of seventy-five head of his celebrated large-type Poland Chinas, and it will be an offering that will be especially attractive to breeders. Particularly so to those breeders who are looking for herd headers because there will be thirty-five boars in this sale, and eight of these will be sons of Big Jumbo, the boar that has been credited as being the greatest large-type boar that has ever lived. Never before has there been so many herd-heading boars in one sale as you will find in this offering. Mr. Mouw is contemplating making a trip across the water with his wife in early July and he is therefore making this sale this time. Many of the boars that he is listing are hogs that he has been using in his herd, and he has been growing them and with a view to making herd boars. The number of remarkable big-type boars that has come from the Mouw herd and today head the best herds east and west, is in itself sufficient to guarantee breeders that he will offer something they are looking for in this sale. There will be eighteen tried boars in the offering and fifteen to eighteen fall boars. Eight of these will be sired by Big Jumbo and will be from a year to under three years of age. Among these will be Oakland Jumbo, a two-year-old son of Big Jumbo. He was two last October and is a son of Miss January by Wonder 4th. He is a strictly big-type boar, a big-boned fellow and has been used with success in the Mouw herd. Square Jumbo was a two year old last February and he is sired by Big Jumbo and out of Miss January 8th by Long Wonder. Here is the making of a great herd boar, being a big-boned and good-footed fellow, in fact, he is right up on his toes, and he has a good-arched back and a deep body, together with excellent hams. He is a strictly head-boar proposition and will make a splendid boar to head any good herd. Tecumseh Jumbo is another good two year old by Big Jumbo and his dam is Tecumseh Lady by Ideal Tecumseh, he by old Tecumseh Ideal, the boar that formerly headed the O. N. Remington herd in Nebraska. Here is another splendid boar, having size and quality, good bone, arched back and deep body, and he will be liked by a great many who attend this sale. Iowa King is a May two year old and is a son of Big Wonder and out of a dam by Surprise Tecumseh by Old Miller's Tecumseh. Here is a boar that while not as finished a hog as some of the others, yet he will make one of the largest and heaviest-boned boars that he will sell. Young Jumbo is another two-year-old son of Big Jumbo, not overly fat when we saw him, but he will make a big boar. Chief Price is a fall yearling by Black Big Bone, out of a daughter of old Chief Price. There is quite a good outcome to this boar. He is also selling Long Orange, one of his older breeding boars and he is the sire of some excellent things in this herd. Long Jumbo is a two year old by Black Bone and when it comes to something particularly long and big you will get it in this boar. Fair Fellow 2d and Wonder are also the making of big boars and good herd headers. Adam's Big Hal is a three year-old and is a son of Big Halver and he is a hog with lots of size and quality and many bidders will like him. Besides these he will select the best fall boars that are sired by Big Jumbo, Black Big Bone and Long Orange and catalog them for this sale. He will also sell a splendid lot of sows at this time. A number of these will be bred for fall litter and the fall sows will be sold open. He is cataloging some excellent tried sows that are among the best he has in the herd. The younger sows will be excellent sows to go into a herd or to be put into a fall or winter sale. By all means send for the Mouw catalog and kindly mention The Homestead when asking for it. M. T. White will represent The Homestead at the sale and will care for any bids sent in his care. See page 24.

C. F. Adams' Poland Chinas.

C. F. Adams, Owasa, Iowa, has one of the good herds of big-type Poland Chinas to be found in the corn belt. This representative of The Homestead recently visited the herd and was very much pleased with the character of this herd. The noted boar, Big Halvor has been at the head of the herd for several years and is undoubtedly one of the big boars of the breed. In his six-year-old form he is carrying very little flesh, but still has the mammoth frame and heavy bone that Poland China breeders demand in this day. He was sired by Long Wonder, he by Longfellow 7th and out of Surprise A 2d, a daughter of Chief Price. Mr. Adams has twelve or fifteen yearling and two-year-old sows sired by Big Halvor that have the size and smoothness and heavy bone that all breeders desire. It is doubtful if a dozen better sows sired by one boar can be found in any herd in the state. A two-year-old boar in the herd, Maid's Halvor 1st is a son of Big Halvor and out of Long Maid, one of the very largest sows in Iowa. This boar is one of the longest, smoothest, best-backed boars we have seen in many a day. Any admirer of big-type Poland Chinas with quality could not help but like this boar. Barring an accident he will make a name for himself as a great individual and as a sire. Mr. Adams having the sire and dam in his herd would price this boar worth the money to some breeder who wants a really high-class herd-heading proposition. Grand Chief is another boar that has been used in the herd. He was bred by John Miller, being sired by Dry Creek Chief and out of Miller's Queen by Long Wonder. Mr. Adams is offering spring pigs for sale sired by the above great boars and out of a grand bunch of sows sired by Big Halvor, Coming Wonder, Big Nelson and others of note. If any of our readers are interested in buying some good big-type Poland China boars and gilts of spring farrow that are ready to ship at any time we suggest that you write Mr. Adams telling him what you want and get his price before you buy. See page 19 and when writing kindly mention The Homestead.

GALLOWAY FARMS HOLSTEIN-AYRSHIRE SALE

WILL BE HELD ON GALLOWAY FARMS,

WATERLOO, IOWA, THURSDAY, JUNE 19, 1913

Holstein-Friesian cows, heifers and bulls of popular strains. Ayrshire females of imported blood. All of extra individual merit. Big illustrated catalog ready.

WILLIAM GALLOWAY - WATERLOO, IOWA

Rees & Son's Last Call.

For the last time we want to call Homestead readers attention to the sale of Howell Rees & Son's Short-horn sale at South Omaha, Neb., on June 11th. It is a richly bred lot of Scotch cattle, sired by and bred to some of the most noted bulls in the West. They are listing some of the very best females they have had in their herd and they are also cataloging some splendid young bulls. Some of these have been leading winners at the very best shows in this country and some of these are in condition to go right on and win in their respective classes this fall. One of the most noted breeding bulls that has been owned in the West in recent years is the great Ruberta's Goods that has been at the head of this herd. As a show and a breeding bull he has measured up to the best in this country and his get in the greatest shows the past several years have always held their own and have invariably gone back home with their share of the ribbons. One of the greatest heifers seen at the fairs in recent years is Violet Goods, a daughter of this great sire and she is still in the Rees herd and doing good service. She is unquestionably one of the greatest heifers that has been out for these many years. Quite a number of her half sisters will be in this sale and they will be bred to their new bull, Whitehall Rosedale, regarded as one of the best bulls in the West today. Mr. R. E. Baldwin, Osceola, Iowa, is selling eleven head in this sale and they are all Scotch cattle. He offers three bulls among the number, one a Duchess of Lancaster, one a Campbell Mina and another a Beauty. Two of these are sired by White Knight, a son of Imp. Crescent Knight, a bull formerly owned and used by the Cargills, Canada, and later used in the good herd of Robert O. Millers, Lucas, Iowa. The Mina bull is sired by Golden Victor, a son of Nonpareil Victor, and these are all three good young bulls. He is offering some excellent cows among which is Golden Belle, with a heifer calf at foot by Royal Cumberland 2d. She is sired by an imported bull and is out of an imported dam and is one of the best cows in his herd. Another good cow that he is selling is Miss Robin, a daughter of Imp. Cock Robin and out of the great cow, Candytuft, by Banker's Victor. She will have a calf at side about sale time to the service of White Knight, and she is going to be a bargain at whatever price they pay for her. A number of other good Scotch cows are listed by Mr. Baldwin for this sale. If you have not received the catalog write Howell Rees & Son, Pilger, Neb., and kindly mention The Homestead.

Lavender Goods 2d, a splendid young Cruickshank Lavender bull, sired by Ruberta's Goods and out of a daughter of Imp. Choice Goods, to be sold in the Howell Rees sale at South Omaha, Neb., June 11th. See field note on this page.

Whitsitt Bros.' Short-horn Sale.

A study of the catalog for the Short-horn sale of Whitsitt Bros., Preemption, Ill., Friday, June 13th, reveals much of interest and among the fifty-one head cataloged will be found cattle for all classes of buyers. There are twenty young bulls listed for this sale, among them some very strong propositions. Red Masked is a two year old, got by the Thompson-bred Challenger Victor, out of a Campbell Claret dam, and is a strong bull in every way, short legged, thick fleshed, strong backed with a good head and horn. This bull is well enough bred to go anywhere and as an individual he is right. Violet's Prince is another well-bred Scotch bull, belonging to the Cruickshank Violet Bud tribe, not quite two years old, and a well-made fellow. His sire, Eastern Spur, is a well-bred Scotch bull now in use in the Whitsitt herd. This bull will stand inspection. Roan Champion is a rugged yearling by King Nonpareil, a son of Lancaster, the bull used with such marked success by Countryman & Son, and out of a dam by the Bouce-bred Fairhaven second dam by the Orange Blossom bull Amos Chruickshank Roan Champion is a bull of much promise. There are bulls in the offering for the breeder, the farmer or the ranchman and they are the dependable kind. Messrs. Whitsitt are cattlemen who handle their stock under right conditions. The final test of all beef animals is the block and if a farmer could send to market a load of steers of the same uniform excellence as the bulls consigned to the sale they would be toppers. But it is not alone in the bulls that excellence is found in the offering. A decidedly good lot of females will be offered. Sweet Violet and Sweet Violet 2d are twin red heifers of June 22,1912, got by the superior breeding bull, King Nonpareil, and are a decidedly attractive pair of heifers. Lady Clarinda, by King Nonpareil, out of a dam by Golden Prince 4th, second dam the imported cow, is a Campbell Claret and a very attractive yearling heifer. Princess Gift is a nice two-year-old Violet Bud, bred to Nonpareil King, and Rosemary, by Challenge Victor, out of a dam by the Purdy-bred Lovely's Victor, sells with a nice red heifer calf at foot. There are a lot of good well-bred, useful cows in this sale, all milkers and only one over four years of age. Those who attend will not be disappointed. The sale will be on the farm, which adjoins the station at Preemption on the Sherrard branch of the Rock Island, twenty-two miles south of Rock Island. The Rock Island Southern Interurban from Rock Island to Monmouth and Galesburg runs one and one-half miles west of the farm, and cars will be met at Dorothy. The advertisement of this sale appears on

Meyers' Short-horns.

M. W. Meyers, Beaman, Iowa, is a gentleman who has gotten together an excellent collection of Scotch Short-horns during the past few years. He has not made much noise in making this collection, but has quietly purchased some of the very best Scotch cows he could obtain and at the present time has a herd of females that is a credit to his judgment. He is offering some bulls for sale at the present time, among them a red March yearling bull sired by King Banff 3d and out of Orange Flora by Orange Duke 2d, second dam by Prince Victor. This bull is of the Mar Flora family and is a well-grown calf of good type. There is an April yearling red bull by the same sire and out of Sultana Barmpton by Village Sultan, he a son of Whitehall Sultan. The second dam is sired by Duke of Oakland 3d, one of the good sires that has done service in Iowa. This bull is of the Barmpton Leaf family. The sire of these two calves, King Banff 3d is a grandson of Lord Banff and out of imp. Fairy Violet by Master Archer. Mr. Myers has three Scotch-topped bulls for sale that are good, growthy bulls of beefy conformation. The herd of females are ofthe Dorothy, Milk Maid, Victoria, Flora and Brampton Leaf families. Any of our readers in need of a good Scotch or Scotch-topped Short-horn bull should write or visit Mr. Meyers at once. When writing kindly mention The Homestead. See page 22.

Mysenburg's Herefords and Chester Whites.

One of the good stockmen and practical farmers of central Nebraska is N. D. Mysenburg, David City,. Mr. Mysenburg has been breeding choice live stock for many years and about five years ago he began the breeding of pure-bred Herefords and some time later began to breed pure-bred Chester White swine. Last season he made some very valuable additions to the Chester White herd by buying a half dozen or more bred sows in the Chas. H. Murray sale. These are very nicely bred and are a really valuable lot of stuff. The Hereford herd has had many valuable additions, in fact this herd contains many of the top females of many noted western sales that have been held the past few years. The present herd bull is for sale and is being advertised on another page of The Homestead. He is an excellent sire and is four years old. He is Beau Donald C. 1st by Beau Donald 37th and he is out of the great breeding cow, Victorin 3d. Beau Donald 37th was formerly owned by W. W. Wheeler, Harlan, Iowa. He was one of the very best Hereford bulls of his time. The writer knew much of him and we regarded him very highly. Victorin 3d was one of the choice females of the Wheeler herd. Mr. Mysenburg offers this bull for the reason that his herd is full of his breeding and for no fault of the bull. He is individually good enough to head any herd and his breeding is of the fashionable sort. A couple of young bulls old enough for service are also offered as well as a nice lot of select females. We would suggest that Homestead readers write Mr. Mysenburg at once for prices on these cattle for they are right and priced well worth the money. Kindly mention The Homestead when writing.

Owens Bros.' Short-horn Sale—Last Call.

The Owens Bros. sale, June 12th, will afford the young breeder or beginner an opportunity seldom offered to purchase a few females bred right and individually right at conservative prices. Every female in the sale is of the best Scotch breeding having descended from families that have made good in the Owens herd. They are an excellent lot of individuals as one would expect from such superior breeding. The price should be conservative as there will be eighty head to sell in one afternoon which in itself would insure bargains. Owens Bros. have been breeding a class of Short-horns that pay a profit and that is what the average man wants. Their cattle are reared under ordinary farm conditions. The milking qualities of the herd have been carefully looked after. Each cow raises her own calf and does that mighty well as those present sale day will see for themselves. The sixty females in the sale consist of twenty cows with calves at foot a number of cows and two-year-old heifers that are safe in calf and a number of fine yearling heifers. There are twenty-five excellent representatives of the Queen of Beauty family. This family has had much to do with the popularity of the Owens Short-horns as they are excellent milkers, good feeders and of the best beef type. Beauty May 5th, Prides Lady 2d, Happy Pride 2d, and Red Crest are of this family and are among the good cows of the sale. B. O. Cowan visited this herd in 1909 and selected Lady Pride 2d as the best female in the Owens herd at that time. Red Crest has a fine heifer calf at foot and has a yearling and a two-year-old heifer in the sale. She is a heavy milker and a good breeder. Happy Pride is one of the very best females in the sale. She has a good bull calf at foot. Beauty May 5th is another big, broad-backed, smooth cow that will look good to any Short-horn breeder. Geraldine 13th is of the Gardenia family and is of the right stamp for a good breeding cow. She is a daughter of Courtier 5th second dam Baron, Cumberland, Pride of the Isles, Royal Duke of Gloster and Champion of England in the list of sires. Susan Lady 4th is a Parsons-bred cow of the Lady Susan family and sired by Scottish Champion. She is a good breeding cow and will have a calf at foot. Good specimens of the following families are cataloged: Missies, Butterflies, Floras, Dorothys, Secrets, Victorias, Emmas, Elizas, Violets, Avanlanches and others fully as popular. The calves are sired by and the cows bred to the good stock bulls in service in this herd. These bulls are Cumberland Dictator, a grandson of the celebrated Cumberland's Last, Sultan Goods, a grandson of Whitehall Sultan and Choice Goods, two sires that have done more for the Short-horn breed than any other two bulls used in America during the past quarter of a century, Scottish Lad and Scottish Victor, two bulls bred by Owens Bros., that are making good as sires. Every animal in the sale has been tuberculin tested and a certificate of health will go with each animal sold. The sale will be held at the farm four miles south of Homestead. Arrangements have been made to stop trains Number 8 and 17 at Homestead on sale day. This will be a great convenience for those coming from the Rees sale to be held at Omaha on June 11th. A handsomely illustrated catalog has been issued and will be mailed only upon request. A postal card or letter will bring it if addressed to Owens Bros., Box H., Homestead, Iowa. See their advertisement on page 20.

HORSES.

FRANK IAMS

IS RETIRING FROM "HORSE BUSINESS"

CLOSING OUT All his Show and Business Stallions at..... REDUCED PRICES

Iams is making a "clean up" of his horses. All will be sold at "some price." He has his "Paris Winners and Best Stallions" in his barns. Prize Winners, $1,000.00 and $1,200, some higher. His 1913 "show" stallions must be sold in 30 days.

Iams is making prices $200 to $500 "less than formerly" on each stallion to make a "Quick Clean Up" (In next 30 days)

Paris Prize Winners at Cost in France

Buy a ticket to "Iams town" and take advantage of Iams' "Reduced Prices." Never were such choice "Big Prize Winners" offered at such "Big Bargains"—all must be sold. They are "Model Drafters." Iams' "Old Customers" make his "Best advertisers." His "Percheron Stallions" are the very best he ever imported. They are of "Big Size," large bone, model, smooth "Drafters" of quality, fine form, finish and style, fast movers. Among them are several

"PRIZE WINNERS AT PARIS"

NOGENT-le-ROTROU and CHARTRESS (three largest shows of France). They are all fully acclimated and in the "Pink of Condition." They were bought to sell. All must be sold at some price. I know France and leading breeders there. I speak the languages and know how to "Buy Horses" at "Big Bargains," and I divide "The Bargains" with my customers. Iams has a choice collection of

IMPORTED PERCHERON STALLIONS

3 to 6 years, "Registered and Inspected" by Governments of France, weight 1,800 to 2,500 lbs. All "Branded," Approved, "Registered and Inspected" by Governments of France and U. S. and Certificates "Stamped" O. K. All inspected by a Nebraska Deputy State Veterinarian and Certificates of "Health and Soundness" are given with each Horse. Iams sells

IMPORTED WINNERS AT $1,000 AND $1,400

(few higher.) Terms cash, or one year's time at 8 per cent bankable note, one and two years' time Land Security at 6 per cent; $100 less price for cash than time. Iams pays freight and buyer's fares, gives 60 per cent breeding guarantee; can place $1,500 insurance. Iams backs up his ads with a $500 guarantee that you find the Horse as represented. Write for Horse Catalog. It has a $1,000 "Bargain" on each page.

STALLIONS

Home-bred draft stallions $250 to $650. Guarantee to sell you imported stallions for less money than any firm in America. Come to a live stallion market and see all draft breeds. A. LATIMER WILSON, Creston, Iowa.

GERMAN COACHERS

TWO choice stallions, one imported, showing size and style and one home bred, with quality. Priced reasonably. Short-horn bull, fifteen months old, well bred. Address

HELD BROS. Box 7 HINTON, IOWA.

Purchase Percherons

There is a fundamental reason why the breeding of draft horses will continue profitable.

From 1900 to 1910 the population of the United States increased 21%. Horses increased only 8%. Cattle decreased 8%, hogs 7%, sheep 14%.

This means increased tilled acreage and increased demand for horse power.

For full information address Wayne Dinsmore, Sec'y, Percheron Society of America, Union Stock Yards, Chicago, Illinois.

Stooker's Stock Farm

50 HIGH-CLASS ABERDEEN ANGUS CATTLE

AT PUBLIC AUCTION, WEDNESDAY, JUNE 18, 1913

AT THE UNION STOCK YARDS PAVILION, CHICAGO, ILLINOIS

50 HEAD---10 BULLS, 40 COWS AND HEIFERS---50 HEAD

THERE is no question but what this is the most select lot of Aberdeen Angus cattle sold in Chicago in recent years. All of the most fashionable families are represented—Blackbirds, Trojan Ericas, K. Prides of Aberdeen, Queen Mothers and other popular families. Many of the animals cataloged are sired by the most renowned champions and their individuality is such as to please every one who is in the market for good cattle. The contributors are among the oldest and most successful breeders in America. The bulls listed are fit to head any herd in the land and some of them are excellent show yard prospects. They are the kind that will please the breeder or farmer who may be in the market for a bull to sire the market-topping steer. The cows and heifers are a most useful lot and will make money rapidly for whoever invests in them. Every one is guaranteed to be as represented. Send for a catalog and arrange to attend the sale. Mention The Homestead when writing.

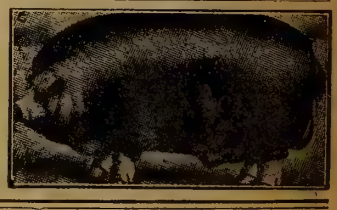
BIG BONE 2d 161497.

J. O. JAMES' SENSATIONAL PIG BARGAINS

I WILL book orders up to 100 head of spring pigs sired by my half-ton, **Big Orange, Ott's Big Orange,** who weighed 700 pounds on the scales just turned 19 months. **Big Sensation, Big Orange's King, A Wonder Giant** and **Gritters' Best.** All strictly big-type boars and out of extra big, long, heavy-boned matchless sows, many of them weighing from 700 to 800 pounds. These sows averaged 9½ pigs to the sow, many of them 10 to 13 pigs. I want you to write, describing just what you want. It makes it easier to pick the pig that will suit. I am pricing these pigs low for quick sale for June delivery, or at weaning time, for orders booked during May, or while they last, **$25** to **$35.** Must be bought during this month to get this price on them. Many of these pigs will be worth $100 to $150 by October. You can save from $75 to $100 by buying now. The early buyer catches the bargains. The dams of these pigs are sired by Big Orange, Big Sensation, Pawnee Nelson, Long King's Equal, Big Ex and Longfellow Jr. You can't beat sires, dams, pigs or prices. We guarantee our pigs to be as represented. Let me hear from you at once as orders are coming fast. Mention Homestead when writing. **J. O. James, Braddyville, Iowa.**



BIG JUMBO FOR SALE

BIG JUMBO (by J.'s Jumbo) is for sale. An excellent breeder and fit to head a herd of purebred Poland Chinas. Farmer's price will buy him.
H. C. Meinhold, Stromsburg, Nebraska.

BIG POLAND CHINAS

WE maintain a herd of big Poland Chinas of the very best blood lines. We are booking orders for spring boars; some of these are excellent. Drop us a line for prices and full descriptions. Address
Pitz & Adams, Plattsmouth, Nebraska.

November Boars

WEIGHT 175 to 250. Price $20 to $30. All sired by Orange Boy. Some herd header prospects.
M. G. Arnold & Son, Strawberry Point, Iowa

LINE BRED EXPANSION BOARS

SEVERAL suitable to head Poland China herds; others good farmers' boars. A few sows bred for fall litters. Mention The Homestead and address
C. B. Kneer, Stromsburg, Nebraska.

When writing to advertisers please mention The Homestead.

AUGUST GORDER'S POLAND CHINAS

A FEW choice fall boars sired by Teddy by the champion, Big Mischief. A nice crop of pigs sired by Futurity Jack and Matchless Expansion. The sow herd is by such sires as the 1,000-lb. Centennial, Colossus, Big Victor and other noted big boars. Address today and mention The Homestead.
AUGUST GORDER, PLATTSMOUTH, NEB.

BAIRD'S MAMMOTH POLAND CHINAS

THE great sire Columbus, without doubt the greatest big boar in existence, is in service. Sows of mammoth build and of the richest breeding make up the herd. We would like to hear from you if interested in extra good ones. Mention The Homestead and address
R. B. BAIRD, Central City, Neb.

GOOD LUCK HERD POLAND CHINAS

WE are offering big-type September boars and gilts for sale sired by Giant Wonder 184793, and a few extra good gilts bred for September farrow to H.'s Longfellow. Will ship on approval and prepay express charges. Satisfaction guaranteed. Write for descriptions and prices.
L. S. Fisher & Son, R. 1, Edgewood Iowa.

HEAVY-BONED Poland Chinas, both sexes, any age. Priced right. Also B. P. and W. Rocks. James H. Duncan, Lone Oak Farm, Lineville, Ia.

FAULKNER'S SPOTTED POLANDS

THE old original big-boned spotted kind. Now booking orders for spring pigs to be shipped when weaned. Pairs or trios, no kin. Everything Registered. For the kind of our forefathers address
Homer L. Faulkner, Box 117, Jamesport, Mo.

When writing to advertisers please mention The Homestead.

12 HIGH-CLASS POLAND CHINA FALL BOARS

I AM offering 12 strictly choice fall boars sired by the great 950-lb. boar, **Pawnee Nelson,** that is regarded as one of the greatest living Poland China boars. These are out of 600 and 700-lb. sows. Price $40 to $50 for quick sale. Address, mentioning The Homestead, **A. H. Windom, Nodaway, Iowa.**

BIG-TYPE POLANDS

OF the thick, smooth, heavy-boned kind. Fall and spring boars and gilts sired by Dale Expansion 190135. Also choice sows bred to him for fall litters.
F. E. JACKSON, HURLEY, SO. DAKOTA.

MULE-FOOTED SWINE.

Mule-Foot Hogs

Oldest breeder in the State. Pedigreed stock for sale
Samuel Johns, Sec. A., Wilmington, Ohio

350 BIG-TYPE Mule-foot hogs, all ages. America's champion herd. Ponies and White Leghorn eggs. Address J. Dunlap, Williamsport, Ohio.

LITTLE CATTLE MAN

Regal

Built for YOUR Roads

Regal Underslung cars will render service on your country roads far in excess of the price you pay. The Underslung construction—the frame below the axle—ensures safety, stability and endurance on the roughest highways. Regal cars are the safest cars because with the weight hung low the danger of skidding or "turning turtle" is eliminated. Our production has grown from hundreds to thousands because the Regal has proven to the American farmer and the world that a better car cannot be purchased for even twice the price. The Regal is the only car with the endorsed Underslung construction you can buy for less than $1,000. You can have your choice of a touring car or a roadster. Write for our instructive Regal booklet and we will mail it at once together with the name of the Regal dealer in your locality. Call on him.

Regal Motor Car Co.

307 Piquette Ave., Detroit, Mich.

$950

Regal Model "T" Underslung Touring Car

Extra equipment, top, windshield and speedometer — $75

All Motor Cars are best lubricated by

Polarine

FRICTION REDUCING MOTOR OIL

Maintains the correct lubricating body at any motor speed or heat.

The best *Summer* oil.

And the best *Winter* oil, because it flows freely at zero.

Polarine lubricates perfectly every make and type of car. It's the convenient oil—sold everywhere.

The World's Oil Specialists make it after 50 years' experience with every kind of lubricating problem.

See how it increases your motor's efficiency. It will save its cost in repairs every year.

Summer Care of the Auto.

By Henry Hatch.

A GREAT deal has been written about the care of an auto during the winter months, but very little is said about the care of the machine during the summer season, when it is used three or four times as much as it is during the cold season. Perhaps this is because cold weather has a habit of magnifying all gas engine difficulties, and such machinery is supposed to take care of itself when the weather favors its use.

It will soon be four years since I became a possessor of an auto. During this time I have learned much about the "critter" that is not commonly told in books or automobile magazines and that is seldom mentioned by the auto agents. When I hear a man brag about his car, telling how many hundred miles he has run it without grinding the valves or even cleaning the spark plugs, I cannot consider that anything to brag about, but rather the admission of neglect, for spark plugs should be cleaned every 500 miles (and oftener if oil is being used freely) and if you would get the most power from your engine for the gas used you will grind your valves every 1,000 miles. Because the modern gas engine does not stop stockstill when it needs attention, it frequently happens that it does not get the attention it needs as soon as it needs it, and folks will brag because it will run without the atention it should have.

But the editor has asked me to say something about the care of the auto during the summer season. Let us suppose the car has been put in good shape for the season early in the spring, which means grinding the valves, scraping out the collected carbon and otherwise overhauling all parts. This is a good job for the early spring, after the weather has warmed enough to permit of such work and while the fields are drying off enough so farm work may be started. You see I am assuming that you are going to do the most of the work on the auto yourself. If at all mechanically inclined, you had better do it, even though it might be cheaper to hire it done, because by doing this work yourself you learn things that you just simply will not learn unless you do. As I live a considerable distance from town and twelve miles from a first-class garage, necessity has compelled me to "learn the critter" or else give up the use of the auto.

As the weather warms up, the first thing you will find about your auto that will work differently will be the carburation. You will find that the carburetor needs adjusting. During the spring season, when one day is warm and the next day may be cold, it is a hard matter to get a satisfactory adjustment, and it is best not to do too much changing, unless you have learned your carburetor so well you know almost without testing how much of a change to make. When making a change I usually keep in mind the number of quarter or half turns given the thumb adjustment, then I know just about the kind of a change needed for warm weather and cold. After summer weather comes to stay, however, I get an adjustment as nearly right as possible, then let it alone, unless it gets out of order and requires attention. When the auto was new to me the carburetor was a great mystery, but one day the machine balked on me when seventeen miles from a garage, and the trouble was traced to the carburetor. It was up to me to take the carburetor apart to locate and remedy the trouble, or be hauled in by team. I chose "digging into the thing" and since then the carburetor has not been such a mystery. I mention this to illustrate the need of farmers to know the machinery of their autos, and that the best way to get the needed knowledge is to "tackle it" when anything goes wrong, being sure to "save the pieces" so if you cannot get them back together they will be there for someone else to assemble.

The oiling system of most cars works different in summer than in winter, many requiring a different grade of oil for hot weather than for cold. Some oils will not stand the heat that other oils will, so it often happens that the oil which seems best for winter use burns up too quickly during the summer, and is not the oil to use from an economical as well as from a mechanical standpoint. The best way to determine the oil to use is by test. If your engine heats up in hot weather and when working over heavy roads, you can then have a chance to know your oil; if it burns quickly, thereby causing you to leave a trail of smoke behind you, one of two things is wrong—you are using too much oil or the oil you are using will not stand high temperatures without burning. If you know your oiling system is working right, then it is time to change to a different oil.

The cooling system of the auto comes in for about as much attention during the summer as it does during the winter, but in an entirely different way. In the winter difficulty is sometimes experienced in keeping the engine warm enough, and if anti-freeze is not used in the radiator, there is always the possibility of a freeze-up to be watched. During the summer season the problem is to keep the engine cool, that is cool enough so everything works well, for any gas engine must be warm to develop the maximum of power. The water in a a water-cooled engine is supposed to be always at the boiling point around the cylinders to be sure of best results. Of course, it is not supposed to boil in the radiator, but no damage is done if it does, providing the radiator is kept reasonably full and sufficient lubricating oil is being used to prevent pistons from sticking. It is a good idea to use nothing but soft rainwater in the radiator, as scale will not form from soft water, and to change the water quite often and thoroughly flush out the water system when changing water. By all means see that the circulation is unobstructed.

Of course, it is assumed that you are keeping all gear cases filled as full as they should be with the right kind of transmission grease. This can be a somewhat heavier grease for summer than for winter, as it will be more inclined to work around loose or worn shaftings and boxings during warm weather if too thin. Knowing that your oiling and cooling system is working right, and that your engine is up in trim, there is always the tire proposition to look after. Tires should be kept fully inflated at all times, but the fact that heat produces a greater pressure should not be lost sight of. A tire that registers a pressure of seventy pounds when starting out will easily register a pressure of eighty after an eight-mile run over a hot road, on a hot day. When the road is hot and the weather hot, it is a good idea to cut down from five to eight pounds on air carried in tires, as the heat will soon put that much in a tube. A patched tube is almost sure to give trouble during the summer season, for the simple reason that the extra heat will burn the patches off. A thorough job of vulcanizing makes the only permanent repair on a tube for warm weather. Small vulcanizers will do this at almost no expense, and you can quickly learn their operation, but if you do not care to do this, by all means let a cement patch on a tube be only a temporary repair, having the rent vulcanized as soon as you get where it can be done, as that is the only way to be free from tires going flat in hot weather, causing delay and disgust with the whole tire proposition.

If I can be of help to readers of this paper during the coming summer season, in the care of their autos, I will be only too glad to make such suggestions as nearly four years of experience with an auto enables me to make. I do not pretend to know it all, but I am learning all the time, and it is realized that the longer a person runs a machine the faster he learns. What little I do know I am perfectly willing to pass around, so if I can answer any question you wish to ask or can help you out of a trouble, I will be only too glad to do so.

Profit in Co-operative Marketing

How the fruit growers' associations of two southern states proved of immense value not only to the producer, in the way of better prices, but also to the consumer, in the way of more uniform products.

THE value of organization and co-operation, not only to the producer in the way of better prices, but also to the consumer in the way of finer and more even grade products, was strikingly shown in the strawberry marketing of Missouri and North Carolina this spring. The story deals only with the production and marketing of a single fruit, but its lesson is so obvious as to be of value to every farmer, no matter what or how varied his crops.

Two-thirds of the immense strawberry crop of southern Missouri, totaling fully 16,000,000 quarts, was handled this spring by the Ozark Fruit Growers' Association, whose guaranteeing stamp was ample surety to the purchaser that the enclosed fruit was of high quality and uniform grade and whose careful inspection and marketing methods brought to the producer a better and more uniform price than was obtainable through individual shipping. The manner in which the Ozark Fruit Growers' Association works is shown by this account of the activities of the berry growers in and around Pierce City, Lawrence county, in the extreme southwestern part of the state.

To begin with, the Ozark berry crop this spring was not only high grade, but bumper. Good beds averaged 150 crates to the acre, prevailing prices being close to $2.50 a crate of twenty-four quarts. At ten cents per quart, f. o. b. cars at Pierce City, the 800,000-quart crop brought in about $80,000, of which about $55,000 was net profit, the balance being allowed for cost of picking, packing and drayage to town, and cost of association commissions for handling the crop. As a great many of the farmers did not have to pay out money for picking their crop, the family being able to do that work, they saved the two cents per quart which was the regular price charged as expense against the crop in the above figures

The berries are unusually large and firm this year, the cool weather permitting them to attain large growth before ripening. The average count in a standard quart was about fifty berries, while seventy-five berries in a quart will pass for "fancy grade." The berries were so uniformly large that there were very few second-grade berries packed. J. H. Mettlock selected twenty-six strawberries from one day's picking which made a heaping quart. Any other grower could have done as well by taking a little time to sort out the extra large berries.

Commission men have been paying a premium for berries from Pierce City for several years, for the Pierce City Fruit Growers' Association is the only organization in the berry district requiring all of their growers to pack in hinged-lid crates. The hinges are

UNIFORMLY HIGH-GRADE BERRIES, BEARING THE ASSOCIATION GUARANTEE.

only two short pieces of tin holding the back of the lid to the crate, but they keep the lid from getting lost or broken when it is not nailed down. The hinged lid is especially convenient to handle when the berries are being inspected or exhibited and the extra expense has been a fine profit maker for the growers.

Each grower grades the berries as they are brought to the field packing shed by the pickers. The berries are inspected again by a representative of the Ozark Fruit Growers' Association, with which the Pierce City Fruit Growers' Association is affiliated, as soon as received at the shipping station. If they are not up to the association standard for size, condition and quantity, they are accepted as second grade or rejected entirely as the conditions warrant. After the association inspector has accepted the berries, the association guarantees them to whatever market they are sold. Each grower has to stamp on every crate he sells, his name and number in the association, so that every complaint can be traced back to the grower, and if there has been any cheating in the packing, which the inspector failed to notice before shipping, the buyer is allowed a rebate and that amount is charged to the grower. However, the growers realize the value of keeping their reputation up to the top notch and do not try to hurt their own interests by cheating.

What the Ozark Fruit Growers' Association has done for the berry growers and the berry crop of Missouri, the East Carolina Truck and Fruit Growers' Association has done for the farmers farther south and east. The manner in which this association carries on the task of marketing its produce systematically is well worthy of study and emulation.

With the aid of a corps of assistants the secretary of the association, in his office at South Rocky Mount, North Carolina, has at his finger tips every condition that could affect the demand for the fruit on all the big markets. He knows how many car loads each market received the previous day and how many independent shipments that day, what price they brought, what condition the berries were in, how much stock is left unsold, weather conditions, which to a large degree regulate the demand, and all other data which in any way could affect prices. The shippers of car-load lots or more at all the various strawberry points receive this information by wire late in the afternoon and upon this information they base their shipping instructions by wire to the secretary. If a shipper learns through these advices that cold, rainy weather prevails at Pittsburgh, or that the market has been glutted with berries the previous day, or that a lot of fruit in bad condition has been shoved on the market, he accordingly instructs the association secretary to send his berries to his commission connection in New York or some other point where conditions are more favorable.

When markets are overburdened with any product the prices go to pieces, but a practical plan of controlling distribution prevents that and keeps the berry markets from becoming demoralized. Prices are not fixed and are therefore not arbitrarily controlled, but wise distribution better regulates the supply to the demand and prices assume normal proportions. While one market may have a greater supply than is necessary to meet the demand, another may be cut out of its share in the supply. The organization long ago realized that the key to wise distribution lies in the knowledge of the number of car loads that are necessary to supply the demands of the various large cities, and along this line is the daily distribution analyzed and carried out.

EXPERIENCE IN SAVING HAY.

As the weather is the most important factor that we have to deal with in saving the hay crop, an element over which we have no control, it is difficult to lay down hard and fast rules about when to cut hay or even in regard to methods of handling after it is cut. In most cases we have to do what is expedient even though this does not harmonize in the least with scientific principles. This is not equivalent to saying that familiarity with sound principles is of no avail. In the following communication received from a Missouri subscriber, some of the fundamentals are dealt with:

As climatic conditions differ so do the methods of putting up hay, yet there are certain principles to be taken into consideration that are the same for all localities. There is some difference of opinion as to the proper time to cut timothy, but anyone who has handled a great deal of hay knows that late-cut hay will not prove as palatable to stock as if cut at the proper time. It will be stiff and dry, though it will make a heavier yield than if cut early. The proper time to cut timothy is while in the "second bloom" which is really just when dropping the bloom, and before the heads have turned brown to any considerable extent. Clover must be cut when the first heads have dried, say when half the blooms have turned brown. When sown with timothy it will be necessary to let the clover get a little overripe in order that the timothy may be in condition to cut at the same time.

One of the most economical methods of handling a large crop of timothy or clover is to stack in the field, using the large sweep rake to gather the hay and take it to the stack. For the small farmer, however, a better method is to haul the half-cured hay directly to the hay barn.

We cut our clover early in the morning and in the afternoon rake into windrows and put in small cocks. If the weather will permit, it is left till the morning of the second day, when it is put in the stack or hay mow. The advantage of handling clover from the shock or windrow in the forenoon is that fewer leaves will be lost from shattering. Clover hay cannot be cured without sunshine, and neither can it be cured bright in the swath or windrow. It must be put in small cocks and partially cured at least. Nothing on the farm will pay better than canvas covers for the hay cocks. Clover will not turn water, and too often the weather will not permit of its being left out till cured. If clover hay is stacked in the field, there must be a covering of grass hay or other protection against rain. This covering should come well over the edge of the stack.

There is little advantage in cocking timothy or red top, as this hay will cure in the swath, but should not be left to bleach after it has dried sufficiently to put away. If to be stored in the mow, hay cut in the forenoon may be hauled in during the early afternoon. If stacked it should be well cured. If hay is cut late in the afternoon it will not be damaged in the swath by heavy dew or even a rain, but if half cured it should be put in the windrow or small cocks.

Alfalfa requires more care in humid climates than does most of our other hay crops. The stalks contain a great amount of moisture, and this must be cured out before stacking. The only successful method is by putting small cocks and using small stack covers. A well-rounded cock thus protected will come through a rain in good shape. Since alfalfa will lose some of the leaves if handled dry, it is better to haul in the cured hay early in the morning while the dew is on. In unfavorable weather it is at times necessary to turn the cocks and scatter the hay. When this is done it is better to turn the entire cock edgewise instead of to invert it. This will allow it to fall apart so that the sun and air can reach the center.

While it is true that the best quality of hay can only be made when the crop is cured in the field in small cocks, yet the labor item is such that this plan cannot be carried out on the average farm. With the side delivery rake at hand considerable drying must be allowed before the crop is touched after cutting so that when it is put in the windrow a day's curing will make it fit for the mow or the stack. Where it can be cocked so much the better, but in most cases the quickest way of getting it under cover is, after all, the best way.

AGRICULTURE IN PUBLIC SCHOOLS.

The recent Iowa legislature enacted a law requiring the teaching of elementary agriculture in all the public schools of the state after July, 1, 1915; also that elementary agriculture be included among the subjects required in the examination of applicants for teachers' certificates. By taking this action Iowa enrolled itself among the progressive grain-belt states which have at last awakened to the necessity of making the public school courses of study practical and of everyday significance and value.

Ten years ago it would have been considered a wild dream of the imagination to require farming to be taught in the public schools not only of the country but of the city. Five years ago those enthusiasts who predicted the day when this would occur were greeted with an incredulous smile and all too often with ridicule. And yet what is going on today? Last year in 103 out of the 114 counties of Missouri 30,938 pupils of the rural schools studied elementary agriculture. One county reported 1,200 pupils in this subject; another county reported 800, the smallest number being thirty. At this ratio for 103 counties, the entire number in the state was 35,000, more than the total number of pupils enrolled in the seventh and eighth grades, in which the subject is now being taught. Prof. R. H. Emerson, of the University of Missouri, accounts for the discrepancy by the fact that many pupils who complete the common school course in the country do not have high school advantages, on account of which they spend a year or two more in the rural schools, reviewing some of their work, agriculture usually being one of the subjects.

We are indebted to Professor Emerson for the following outline of what the rather fragmentary teaching of agriculture today will develop into in the near future:

The next step will be to improve the teaching of agriculture and to make it count for as much as possible. Some rural teachers are putting life into this work and are meeting with remarkable success. Other rural teachers have prepared notebooks containing reports of experiments, reports on original investigations, compositions on special agricultural subjects and elementary surveys of the agricultural products of the school districts. Many of these notebooks are excellent in their makeup and would compare favorably with those prepared in the high schools. These results are found in schools where teachers are putting time and thought and life into the work.

The subject as taught at present, in a large number of schools, is only textbook agriculture. Nothing is done outside the text. There are no observations, no original investigations, no experiments—only the facts of the text-books are given any consideration. The questions and answers of the book are followed with religious devotion. It is taught very much like geography has been treated for many years—memorizing the page and reciting it.

Agriculture should be made vital. There should be an application of the theories and principles studied in the school to the actual conditions as found in the farm home and on the farm. It may be selecting corn for show, determining the per cent of impurities in seeds or judging live stock.

Such work will cause patrons of the rural schools to see that these institutions have taken on new life and that they are worthy of a more loyal and more liberal support.

Whatever may be the indifference of a community concerning the country school, there will be an awakened interest when it is once seen that these schools are teaching things that are really worth while.

The lead which is thus being taken by Missouri and followed closely by Iowa should be an inspiration to every other grain-belt state. When properly taught, agriculture in the public schools includes not only a study of corn, soils and crops, but rural life and its betterment as well. The boy or the girl who has had a practical course in elementary agriculture in the rural school, under a progressive teacher who knows the subject, should be able to make a better, more sanitary, more artistic and altogether more soul-satisfying home. We do not know of anything which gives promise of better or more far-reaching results than this campaign of farm culture in the public schools.

FAVORS THE FORTY-SIX INCH WOVEN FENCE.

A Missouri subscriber, Mr. Joseph Stewart, in commenting on a recent Farm Furrow which favored the higher types of woven wire fence, has this to say:

I have acted as agent for an eastern wire fence company for several years, and have sold several cars of wire to my neighbors, and have figured closely on the cost of fencing, and I tell all my customers to buy the taller woven wire. The regular merchants sell a twenty-inch, six-bar wire at eighteen cents per rod and four-bar wires estimated at three cents per rod each makes the cost of the wire at the store thirty cents per rod.

I sell a ten-wire, forty-six inches high, at twenty-eight cents per rod at the car and make a good enough profit, and if it were not for the fact that horses reach over and ride it down, it would be a good enough fence for anybody. But most farms are well supplied with enough old barbed wire that a strand can be procured to stretch over the top of the forty-six-inch fence as a matter of protection to the woven fabric, and the farmer will have an ideal fence.

It is cruel to dumb brutes to put up wire with barbs on it like some stockmen put it up. And thousands of dollars' worth of value is lost to the farmers every year through stock getting injured on barbed wire.

The people of our part of the country had to quite raising Hambletonian horses because they were of a nervous disposition and were continually getting cut and scarred up on wire and when they got badly cut up there was no market for them, but with a Percheron, if he did get ruined on the wire, he would still sell to someobdy for a work horse, or at least that was the principal argument adduced to induce the farmers to breed Percheron horses.

Have you not noticed that the best milk cow is the one that gets her tits or udder ruined on the wire? And some one has a disagreeable job milking that cow to save her.

The forty-six-inch wire fence properly put up on good posts and with good, well-braced corner posts will make a fence that any farmer would be proud of.

I have very little calls for barbed wire, which is an indication to my mind that the farmers are getting away from it. But far too many farmers order the lower weave, eighteen, twenty and twenty-six-inch wire so they can use old barbed wire above it.

What this subscriber contends, namely, that there is an increased demand for the higher types of woven wire, we believe holds true throughout a considerable portion of the corn belt. The labor required to build fence is about the same in any case and the slight difference in the cost when the thirty-nine or forty-six-inch fence is used is not enough to justify the use of the lower fence.

We favor most strongly the use of one or two barb wires on top in all cases, otherwise the woven wire will soon become sagged out of shape. There is practically no risk to run whatever in using a tightly-stretched barb wire or two above a thirty-nine or forty-six-inch woven fence.

MILLET OR CANE FOR FODDER.

The meadow acreage is relatively light this year and many efforts will be made to supplement the hay supply by the use of such crops as millet or cane. The question comes up on the outset which of these crops will give the best results for general farm feeding, all things considered.

In pointing out just which is the better crop of the two we would first say that much depends upon the acreage that is to be devoted to these crops. If anywhere from five to ten acres are to be seeded to these crops we believe it will pay well to divide the area and sow part in millet and part in cane. Millet is usually seeded when grown for hay purposes at the rate of three pecks of seed per acre, while cane will give better results when seeded thickly say at the rate of from sixty to eighty pounds of seed per acre.

On rich ground or indeed on any kind of ground cane will outyield millet. In the case of soil that is well fertilized a yield of from fifteen to twenty tons of green fodder may sometimes be obtained and this will cure into from five to eight tons of good fodder.

Either of these crops may be seeded during the month of June with reasonable expectation of getting them harvested before frost. In the case of millet the crop should be cut very soon after it is well headed out and before the seed reaches the milk stage. If this crop gets too hard there is always a little danger in feeding it to horses, as it acts too freely on the kidneys, but if it is cut early and well cured it makes an excellent substitute for timothy, though it is not as rich as clover hay.

Cane or sorghum should be allowed to grow until the seed is quite hard because when that stage is reached the percentage of sugar in the stems is very large and hence it carries a maximum supply of food elements. Some swine breeders have had splendid results in the feeding of mature cane to brood sows during the winter months so that when a comparison is made between millet and cane this fact should be kept in mind. Either crop may be used advantageously in feeding cattle and horses.

FAITH IN THE VALUE OF ALFALFA.

It is not difficult to find instances where alfalfa fields have produced hay ranging in value from fifty to one hundred dollars per acre in a single year. Seven tons in four cuttings is by no means an uncommon yield and on this basis it is plainly apparent how the $100 mark can be reached.

Because of the high value of the crop when a perfect stand is secured one Iowa farmer has gone the limit in the matter of expense in preparing a twenty-five acre field for this crop. To begin with the soil was an overworked clay loam, corn having been grown continuously for many years. In 1912 this field was summer fallowed and treated to a coating of sixteen tons of farm yard manure to the acre. In addition to this 1,500 pounds per acre of ground rock phosphate was scattered over the surface with the manure spreader. The manure and phosphate were plowed under in the month of June and the land was double disked every ten days until the middle of August. Three and one-half tons of ground limestone per acre were spread upon this land in July and the field was seeded the middle of August at the rate of twenty-seven and one-half pounds of seed per acre.

As might be expected after so large an outlay for labor and fertility a perfect stand resulted and there is every indication that the first cutting from this field will yield approximately three tons per acre. The owner of this farm believes that under favorable weather conditions during 1913 he will be able to cut ten tons of cured hay from each acre or 250 tons from the twenty-five acres.

DESTROYING QUACK GRASS IN ONE SEASON.

A Missouri subscriber outlines a plan which he claims will destroy quack grass in a single season. His communication follows:

Here is a plan that will exterminate quack grass in one season: Stir your land that is infested with the grass in June, plowing it deep and following the stirring with the disk, cutting it and cross cutting it. This thorough working is essential, in order that the best possible seed bed be established. To smooth the bed, run the spike-tooth harrow over the field.

Sow the ground immediately to millet, putting the seed on very thick, so the growth will completely shade the quack grass when it comes on. The amount of seed to the acre, of course, will vary, according to the fertility of the soil, but as a rule, no less than a bushel (fifty pounds) should be used, and if the land is strong, considerably more can be safely put on.

The millet should be cut just before it is ripe. This gives one a roughage of excellent quality for winter feeding, and removes the quack grass. The ground should be restirred immediately, plowing an inch or so deeper than at the previous stirring, and seeded to buckwheat, which should be cut for a crop and removed from the field. Another deep stirring should be given the land, and the disk run over it a couple or three times before freezing weather.

By this plan, the millet and the quack grass secure a good start together, but the millet, growing more rapidly and vigorously than the quack grass, smothers out the latter growth. The second crop (buckwheat) acts as a check on the second start of the grass from the roots; while the third plowing throws up those deep-set roots for exposure to the freezing and thawing of winter. The subsequent disking keeps the soil in fine condition for very early spring seeding the following season, so that, in case any scattering quack grass still held root in the soil, the early cropping would hold it back and smother it out. This, with the extermination of the grass, securing of the two crops in a single season, and

the thorough working of the soil readily recommends the method to all.

We believe that if conditions are just right the happy outcome which is here predicted will result. However, as the result of considerable experience in handling this pest we have always preferred the plan of plowing in the fall, keeping the surface stirred from time to time during the spring and following this up by the sowing of millet some time during the latter part of June or the first week of July. Our theory is that the frequent surface stirrings tend to weaken the plants and the millet finishes the work of destruction by the smothering process. As it is too late this season to adopt this plan we recommend the method outlined above. If it does not wholly and completely destroy the plants it will at least materially weaken them so that the work of destruction may be finished next summer.

A WORD ABOUT CLOVER BLOAT.

A Nebraska subscriber, who has handled thousands of grazing cattle annually during the last ten or twelve years, gives the result of his experience in the prevention of clover bloat, in the following communication:

As this is the season of the year when cattle losses from clover and alfalfa bloat are the greatest, my experience along the line of prevention may be worth something to other of your readers. In the first place, I wish to say that the idea that cattle bloat from the first feed of clover or alfalfa is somewhat erroneous. Very few cattle that have had sufficient food will bloat when first turned on clover or alfalfa, but, on the other hand, the greatest loss is usually found after they have been grazing on such forage for a week or more. It is then that their digestive systems get out of tune and the condition of the paunch and nearly the entire digestive tract is such that they cannot properly digest and assimilate such watery and succulent materials. A cow that has a digestive system in perfect running order will graze on clovers the season through and never bloat at all, but the risk is that such feeds are not in themselves a proper grazing ration and will not hold up under the strain. Cattle will crave dry feed and in fact will eat old straw or hay that they would otherwise refuse, in their attempt to equalize things.

Our plan was to have some bluegrass pasture, preferably enough to graze the stock about half the time. We would then place all the cattle on the blue grass the first thing in the spring. After they had been on this pasture for a couple of weeks we would then turn them on the clover, leaving them there for not more than a week at first, and then back to the blue grass. These cattle rarely bloat at all and if they did it was during the last day of two that we had them on the clover. As the season advanced and the clover became more solid we left the cattle on for longer periods. After the red clover had ripened blossoms it rarely gave further trouble until the second growth got well started.

The worst weather for bloat is hot weather following copious rains, as it is then that the clover is growing the fastest. Our plan might be summarized as follows: Do not turn a hungy animal on clover or other green feeds when there is a probability that they will gorge themselves. Leave cattle on a clover pasture until signs of bloating appear, then remove for a week or ten days. If convenient furnish some dry hay or straw that they may run to, and if these precautions are observed very little loss will be experienced.

In case of an animal dangerously bloated the quickest way is to tap on the left side at the point of greatest distention. This should be about the center of the triangular space between the point of hip bone, the short ribs and the ribs proper. Use a trocar and cannula, or a knife, and do not be afraid of making an opening. A six-foot length of three-fourth-inch or one-half-inch rubber hose may be pushed down the throat to the paunch to let out the gas. If a hose is used it should first be oiled.

We would like to place special emphasis on one recommendation made by this subscriber, namely, that of not turning hungry animals into fresh legume pastures and allowing them to stay there for any length of time in the first instance. If they have a good morning meal of grass and they are turned in just after the dew has completely dried off there will be very little risk to run.

DESTROYING DODDER.

The Missouri Experiment Station has found as the result of analyzing a great many samples of alfalfa that as much as 28 per cent of these samples contain dodder while in the case of red clover seed 16 per cent of the samples carried a percentage of dodder.

Dodder grows in a peculiar way and instead of feeding upon the soil like other plants, it lives upon the juices of the legume. In appearance it is a "yellowish leafless vine." It entwines the legume plants and if it is not checked it will entirely destroy the crop.

The desruction of this pest means that a drastic measure must be applied, namely, the cutting of the infested portion of the field and the burning of the product when it has become dried out. It is suggested by Prof. J. C. Hackelman, of the Missouri station, that where the patches are small it will pay to scatter straw over the surface before burning in order to insure complete eradication. Special attention is called to the fact that the removal of infested hay from one part of the field to the other can only result in contaminating a larger area.

BEST BREED OF LIVE STOCK.

The time has not yet arrived when we can dispense with first-hand information acquired through practical experience in certain phases of farm affairs. The point that we have in mind is well illustrated by an inquiry from a subscriber who proposes to engage in the live-stock industry and asks for information concerning the best breed to handle. He does not even indicate whether he proposes to emphasize dairying or beef raising, but leaves the whole matter an open question to be determined by an outside party who knows nothing of the local conditions and has no knowledge whatever of the characteristics and instincts of the would-be stockman.

Under these conditions we have no information to give. The selection of a breed of live stock is a matter of individual taste which comes as the result of experience. To those who have had no experience, but are obliged to make a beginning on their own hook it may be said that starting into the business in this way simply means placing the cart before the horse.

Each breed of live stock has its own particular characteristics, these being the result of breeding operations carried on by talented men under widely varying conditions, each having his own specific object in mind. We have four great breeds of beef cattle and an even larger number of dairy breeds. In draft horses there are at least four types to choose from, in hogs at least six and in sheep an innumerable number. Even outlining the characteristics of the breeds would be almost useless labor because it would convey little that is new to the experienced man and nothing worth while to the man without experience.

The only advice that can be given when information of this kind is sought is simply this: that all the principal breeds of live stock are meritorious in their own special way and that those succeed best who first ascertain in which direction their own instincts lie and which breed best satisfies the love that is in the heart of every real stockman for the meritorious farm animal.

IOWA SWINE BREEDERS.

The annual summer meeting of the Iowa Swine Breeders' Association will take place at Ames, on Wednesday, June 18th. Secretary Hancher has prepared an excellent program which is herewith presented. The meetings will begin at 1 o'clock in the afternoon and there will also be an evening session. The program is as follows:

Forage Crops for Swine.—Prof. John M. Evard, Ames, Iowa.

How to Grow the Pig From Birth to Maturity.—J. B. Ashby, Audubon, Iowa.

Handling Private Sales.—H. S. Allen, Russell, Iowa.

Public Sales.—H. S. Duncan, Clearfield, Iowa.

Some Points to be Observed by the Breeders.—W. M. McFadden, Chicago, Ill.

What to do with the Kicker in the Show Ring and Elsewhere.—John R. Tupper, Woodbine, Iowa.

Methods for Controlling and Eradicating Hog Cholera in Iowa.—Dr. C. H. Stange, Ames, Iowa.

After each paper the opportunity will be given for general discussion of the subjects.

On Thursday, June 19th, the annual meeting of the National Association of Expert Swine Judges will take place and the usual scoring exercises and examinations for certificates will be made.

HOMESEEKERS LOW FARES TO CANADA

Come to Canada now and let us help you pick a choice farm before the best are taken. The Canadian Government is now distributing 135,000 FREE fertile farms along or near the **Canadian Northern Railway**—Wheat Farms, Poultry Farms, Dairy Farms, and farms adapted to cattle, hog, sheep and horse raising.

Even if you have already located your farm you should travel to it over the **Canadian Northern Railway** and have the added advantage of traveling from 1,550 to 2,500 miles through Canada's richest farming country.

Just glance over these low rates—tickets are first-class, round-trip, good for twenty-five days, with stop-over privilege. Excursions every first and third Tuesday, via Duluth and Ft. Frances, or via St. Paul and Winnipeg.

To / From	Chicago	Duluth	Des Moines	Kansas City	Omaha	Minneapolis or St. Paul	St. Louis	Sioux City

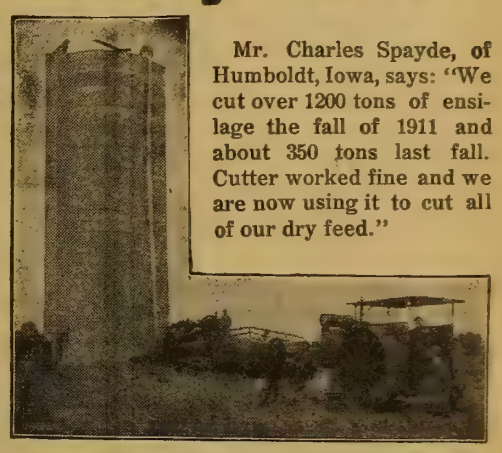
See the Smalley Cutter In Action!

If you want to see a real *show*, just watch this Powerful Smalley "cut up." See it take fodder by the ton and cut it into small, fine pieces, shoot it into a giant silo 60 feet high. Some *improvement* over the old slat-apron Cutter that requires an army of workmen to feed it, and balks when it comes to filling a *tall* silo.

Four-fifths of all Silos are now filled by Smalley machines.



Mr. Charles Spayde, of Humboldt, Iowa, says: "We cut over 1200 tons of ensilage the fall of 1911 and about 350 tons last fall. Cutter worked fine and we are now using it to cut all of our dry feed."

Filling a Mammoth, 60-foot Silo on George Crow's Farm, near Hutchinson, Kas.

The Powerful Smalley Force-Feed Silage Cutter

is a regular "hawg" for work. Makes no difference whether you have **green** or **dry** ensilage—or whether it's **corn, oats, peas or alfalfa.** Now furnished with Alfalfa Grinding Screen if wanted (for making alfalfa meal).

Only one drive pulley on Blower outfits. No Idler to bother with. Ten per cent steel guaranteed in all foundry castings. No oiling by hand—hard oil cups on all important bearings.

Get a post card quick and send for Smalley's new big illustrated Catalog. Finest Silage Cutter Book ever printed, yet absolutely free. Write now for it.

SMALLEY MFG. CO., Box 144 Manitowoc, Wis.

Manufacturers of Ensilage, Alfalfa and Hand Feed Cutters. Combination Ensilage and Snapping Machines, Drag and Circular Saw Machines, Champion Plows, Cob Grinders and Feed Mills. (71)

GET THE BEST TWO MAN POWER PRESS MADE

Here's the best Power Hay Press made. We guarantee it to do as much if not more than any other Press of equal size. Capacity limited only by the ability of the feeder. Sold with or without engine. Make no mistake—get the "Missouri." Write today for our liberal proposition and **Free CATALOG.**

FARM FURROWS

TURNED BY A PRACTICAL FARMER

When crossing corn, particularly if stalks have been plowed under, I like to wait until the fenders may be dispensed with. Like fly nets to a harness, fenders add double their weight to the handling of the gangs.

If you are riding in a swiftly moving vehicle, like an automobile, you can easily tell whether the road has been dragged or not. Dragging takes out all the "wrinkles."

It is now an admitted fact that every farmer ought to own a silo—and his wife ought to have a canning outfit to match the silo.

Trouble is one thing the farmer ought not to borrow nor lend.

Sprinkle some bran and corn chop on the calf's nose after it is through drinking its skim milk (only one-third corn chop, however). It soon gets a taste of feed in this way and thus will learn to eat.

The line fences should be closely looked into when one is purchasing a farm, or he may also be buying a lot of trouble with some adjoining farmer.

Wait till you are just ready to use your binding twine in the small-grain fields; then hustle off to town after it, when your dealer likely will be sold out. Or, if you are lucky enough to secure the twine, be sure that you will pay a good, stiff price for it, as there almost invariably is a shortage of harvesting material in country places at that particular season.

Our corn crop had its ups and downs at the same time this year, some going down by way of the planter and some coming up to take a look at the sun and breathe the fresh air. The work of getting the corn planted between the rains kept us all busy.

With so many crop killers standing around anxious to give each crop a bump, it is no wonder that we raise so many bumper crops. Perhaps it goes, bump, bumper, bumpest. Let us try to make this crop the bumpest crop we ever raised regardless of the bumps and bumpers.

Eight pigs is a good bunch for a young sow to raise. If there are any more in the litter it might be well to do a little pruning especially if there are any weak, runty ones among them. They will be pretty sure to be crowded out and die, anyway, and if taken away early it will give the others a better show.

Hog cholera is a disease that is dreaded by all hog raisers and having had a couple of sieges of this disease I don't feel like giving any advice as to a "cure." I believe that in this case an ounce of preventive is worth a ton of cure and that ounce is found in keeping their quarters as clean as possible and using a good disinfectant quite freely. A little lye with their slop occasionally will keep them free from worms, but a well hog seldom needs "doping" any more than a well man.

Put a good camera or kodak in the hands of the boys and girls. You will be surprised at the enjoyment and profit they will derive from it.

Our grandfathers used to put enough weight into buildings in large timbers to pull them down. Almost without exception the roofs on those old-time buildings would become sway-backed in a very short time. The rafter of years ago was larger than the sill of today. It is a fact, however, that some of the building done today is on a too slender order.

Any dairy cows that are not "coming out of the kinks" with the aid of this fine grazing ought to be marketed.

Sometimes the pigs will provide their own "creep" (under the fence), but what I call a "creep" is a feeding pen where the small pigs may go to and where the old hogs cannot. I provide such a place for every batch of pigs I have, beginning to feed them there when six to eight weeks of age. This special feed helps them along wonderfully.

It takes good cream to produce first-class butter.

Leave a nook somewhere about the farm for millet. It may be sown as late as June and July, and still will make a bountiful yield of first-class roughage. Some farmers do not fancy it, but we have found that, by cutting it just as it begins to fill, it makes an excellent feed for any and all live stock in winter.

Don't waste time and seed replanting corn. Replanted corn never amounts to much, even as fodder, and it never ears out well. It seems that the first planting shades it and holds its development in check. Then, the replanted corn tassels out later than the first planted, and this prevents proper pollenization of the crop, so that the late part of it is deficient in this respect. If one have less than a half or two-thirds of a stand of corn, it should either be left as it is, or the ground harrowed and all planted over.

More of us ought to use the land-roller for putting the soil in prime shape for cultivation, and to aid in the conservation of the available supply of moisture against a time when it may be sadly needed.

Try to arrange the pasture lots so one will be resting up and growing while the others are being pastured. It insures better grazing and permanency of a vigorous growth of grass.

Poultrying may be considered as a side line to farming, but it will not flourish under the usual neglect accorded it by most farmers.

There is no denying the fact that good roads can be built of stone or of concrete where the material is close at hand, but here there is nothing but earth to build with and that is good enough if we go at it in earnest. The best roads on earth can be built of earth at less expense than a road can be imported.

Twenty-six-inch woven wire is hardly high enough for hog fencing, unless it surrounds a large area. For lots and around small fields, where the natural tendency to jump becomes greater, a barb wire is needed along the top. In this case a light wire, such as comes eighty rods to the spool, does very well.

Already some of the weeds about the farm are shooting for seeding. Swat them while the iron is hot!

There is no use in trying to confine what is a large water course in flood time to a very small culvert. I have seen that tried too often, always with the result of having the grade cut through by the water that cannot get through the small opening. Many wrongly condemn the galvanized culvert because a size is used that is too small.

No-Rim-Cut Tires
10% Oversize

11% Less This Year

Rubber has dropped a little. And our factory cost, because of multiplied output, has dropped a little more. Our new factories are completed, and we've equipped them with the latest labor-saving machinery.

Now we have a capacity pretty close to 8,000 motor tires daily.

As a result, No-Rim-Cut tires are costing about 11 per cent less than last year.

What You Save

You save, by using these new-type tires, all the ruin of rim-cutting. And that is what wrecks 23 per cent of the old-type clincher tires.

You get extra capacity. No-Rim-Cut tires are 10 per cent larger than the same rated size in clinchers. And that oversize, under average conditions, adds 25 per cent to the tire mileage.

And now you save on price—11 per cent under what these tires cost last year.

No Extra Price

No standard tire of any type costs less than No-Rim-Cut tires today.

Hooked-base tires—tires which rim-cut—now cost the same as these new-type tires which don't.

Tires just rated size now cost as much as these oversize tires.

Consider how it pays to insist on these savings when they cost you nothing extra.

Their Records

No-Rim-Cut tires, when they cost more than clinchers, came to outsell all others.

The demand for these tires has doubled over and over. It has become the sensation of Tiredom.

More Goodyear tires were sold last year than in the previous 12 years put together. And car makers alone have contracted this year for 890,680 of them.

Now No-Rim-Cut tires cost no more than old-types, and our demand from users so far this year has jumped 85 per cent.

Just Be Fair

All we urge is fairness to yourself. Test the tires which, on countless cars, have shown the lowest cost per mile.

One glance will show that these tires can't rim-cut, that they are over rated size. Find out how this lowers tire bills.

Hundreds of thousands of men who have done that now use Goodyear tires.

Also be fair to us. For 14 years our experts have worked to lessen tire upkeep. And we are still spending $100,000 yearly on research and experiment.

Now comes this 11 per cent reduction. Doesn't this record, in your estimation, call for a test of these tires?

CURRENT EVENTS

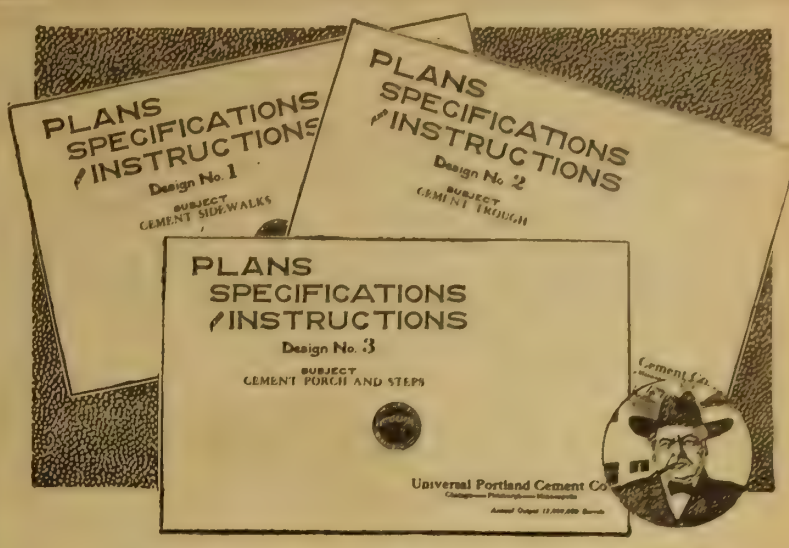
THE agricultural schedules of the Underwood tariff bill came in for considerable discussion in the senate and at the White House last week. The sub-committee of the senate finance committee to which the matter was referred (consisting of Williams, of Mississippi; Shively, of Indiana, and Gore, of Oklahoma,) decided that raw materials and their manufactured products should bear an equal duty and agreed upon the following schedule: fresh meats (beef, mutton and pork) to carry a duty of 10 per cent ad valorem; cattle, sheep and hogs to be left as they are in the original bill, dutiable at 10 per cent ad valorem; wheat flour to be restored to the dutiable list at the specific rate of forty-five cents a barrel, with other wheat products dutiable at 10 per cent ad valorem, oatmeal 5 per cent ad valorem; wheat to stand a duty of ten cents a bushel and the duty on oats to be reduced from ten cents to six cents per bushel. The effect of this change would be to take meats and flour, the manufactured products, off the free list and make them stand a duty similar to that which their raw materials stand. No sooner had this been decided upon, however, than President Wilson let it be known that he had views to the contrary. The president informed Senator Simmons, chairman of the finance committee, that he desired the duty taken off practically all agricultural products, admitting cattle and meats, grain and flour (including oatmeal) altogether free of duty. It is announced that a poll of the finance committee has been taken and that the president will be sustained on this, as he has been already on free wool and free sugar.

NINE foreign nations have responded favorably to Secretary Bryan's proposal for a world-wide peace pact which will go further than anything before attempted to make war impossible. These nations are Italy, Great Britain, France, Japan, Brazil, Sweden, Norway, Peru and Russia. They have asked for more particulars of the plan and evinced a desire to continue negotiations along the lines suggested. The plan is one which Secretary Bryan proposed to an international peace conference in London more than five years ago and now has an opportunity, because of his cabinet position, to officially promulgate, with President Wilson's sanction. In brief, the plan is that all the contracting nations agree to submit all disputes, "of every character and nature," to an international commission, the contracting nations agreeing not to declare war or begin hostilities until such an investigation is made and report submitted. The nations do not agree to accept the finding of the international commission, but they do agree to wait until a report is made, which means that a year or a year and a half must elapse before hostilities can begin, giving ample time for the anger of the moment to subside and for cooler counsel to find a way out of the threatened difficulty. It is simply an international acceptance of the adage on a big scale: "When angry count ten, when very angry count 100." While negotiations along this line are being carried on, the United States is going ahead to make new peace treaties with various powers, having negotiated new treaties, since President Wilson came into office, with France, Italy, Spain and Great Britain. The new administration is thus allying itself with the world-wide peace forces and bringing that much nearer the millennial day when war shall have completely disappeared from the face of the earth.

THEODORE ROOSEVELT was splendidly vindicated in his libel suit against the Michigan editor who charged that he frequently became drunk. Not only did Colonel Roosevelt testify upon the stand that he never drinks beer, never uses whisky except in small doses upon doctors' orders, never drinks anything except light wines in moderation and was never drunk in all his life, but a score of nationally notable men corroborated him in every detail. When the Roosevelt testimony was completed the Michigan editor took the witness stand and read a public statement in which he frankly admitted that "I have been unable to find in any section of the country any individual willing to state that he has personally seen Mr. Roosevelt drink to excess," and also stated, "I am forced to the conclusion that I was mistaken." The defendant, having thus made a complete retraction, threw himself upon the mercy of the court, which announced that it would sustain a verdict for the entire amount asked by Roosevelt, $10,000. Before this could be done, however, Colonel Roosevelt made a statement in which he declared that he had not gone into the suit from any vindictive motive, but simply to defend his good name, wishing "once and for all during my lifetime to deal with these slanders so that never again will it be possible for any man in good faith to repeat them." He stated that he would be perfectly satisfied with nominal damages, which, under the Michigan law, are six cents. The jury thereupon returned him a verdict for this amount. The two principals agreed to pay their own costs, $2,000 for the defendant editor and about $10,000 for Colonel Roosevelt. The trial occupied a week and was unique in American history. It sets at rest, for all time, the reflections made upon Roosevelt's character and personal habits and shows him to be temperate and abstemious in his tastes and life.

A RATHER desultory investigation is being made by the senate of the charges preferred by President Wilson that an "insidious lobby" is at work in Washington, standing between the people and the bills intended to give them legislative relief. A committee has been appointed to hear the testimony of their fellow senators, eleven questions being put to each member of the senate in the attempt to find out if any are financially interested in businesses which would be benefited by any changes proposed in the Underwood tariff bill. No disclosures of particular importance have thus far been made, most of the senators contenting themselves with a more or less casual listing of their property and a denial of having been approached by any one whom they would call a "lobbyist." Practically every senator admitted that he had talked to or been written by "interested parties," who tried to convince him by argument that certain things in the tariff bill would work an injustice to their business, but each senator maintained that this was not lobbying, but was entirely permissible. It is probable that President Wilson will go more into details and explain what he meant when he declared that a more pernicious and insidious lobby is at work in Washington now than for many years past. Even if he does not do this, however, his charges will have some good results, disclosing the financial investments of the senators and stopping the activities of the lobbyists for the time being, anyway.

Missouri's Chief Josephine, the cow which, two years ago, broke the world's record for milk production for one year, has been killed in the interest of veterinary science. This famous cow was valued at $5,000. Just why certain cows have come forward as great milk producers, has never been definitely learned and the sacrifice of Josephine was decreed in an effort to settle this question, if possible, by a pathological examination of her interior department. While Josephine was under test as the world's greatest milk heifer she produced 29,860 pounds of milk in one year. She gave an average of twelve gallons a day for the first six months.



These Plans Free To Any Farmer

They tell you exactly how to build your cement porch, watering trough or sidewalk. The plans and directions are complete; the instructions simple and clear. Any farmer can easily do the concrete work described with the help of these plans.

We will send any or all of them to you free. Just send your name and address to our nearest office, telling which plans you want.

POULTRY DEPARTMENT

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

BALANCED RATION NECESSARY FOR EGGS.

To the Editor of The Homestead:

There is more money to the square inch in the production of eggs for market than any other one branch of the whole poultry industry.

Everyone is interested in how to get the most eggs possible from their flock, and at the least expense. Prof. A. G. Phillips, head of the poultry section of the Indiana Experiment Station at Lafayette, in his enthusiastic talk at the short course, at Urbana, Illinois, gave the most practical ways and means, that are wholly adaptable to the farmer, that we have ever heard.

Mr. Phillips uses vitality and proper housing as a basis for success in any branch of poultry culture.

He then produced a chart headed, "A Good Hen vs. an Average Hen. What Do Your Hens Produce?" At the Purdue station, hen 13 was fed fifty-eight pounds of feed costing eighty-seven cents and produced 197 eggs during the year; these were worth $4.27, showing a profit of $3.40. The average hen in Indiana with the cost of feed unknown, produced eighty-seven eggs per year worth $1.26. According to these figures it is very evident that the farmer needs to look after the business of disposing of his eggs as well as to produce them.

This paper has always urged the use of lean meat to furnish protein for laying hens. A hen may be full of yolks and if she has nothing with which to make the white of the eggs she may abort the yolks into the intestines where they are reabsorbed.

A flock of hens at the station were fed corn, wheat, oats, bran and shorts; one section was given skim milk in addition, another section meat scraps, and a third section received no meat or milk to supply the protein. The results of this year's test in the three sections are compared in this table:

	Skim Milk	Meat Scraps	No Meat Food
Av. grain consumer..	50.7	55.1	48.6
Av. cost of feed.....	98c	87c	66c
Av. No. eggs laid....	124	125	24
Av. cost per dozen....	9c	8c	35c
Per cent fertility....	93.7	91.1	90.2

The table shows that the hens getting the protein in their feed laid 124 and 125 eggs a year, and that the hens having grain only, laid twenty-four eggs, or one-fifth as many as the ones properly fed. We have a similar illustration of this on this farm: through the months when there is a goodly supply of animal food in the form of bugs and other insects we get the "full flush of laying." Before this period, and after, the egg supply drops.

After paying for the skim milk or meat scrap the hens having this balanced food produced eggs at nine cents and eight cents per dozen, while the purely grain-fed hens charged thirty-five cents a dozen for the eggs they laid. This is surely conclusive as regards the meat and skim milk question.

Meat scrap, in this case at least, does not mean scraps from the butcher, but a product of the packing house which has been superheated with steam; it is a special poultry food including meat, bone and blood meal; this is not green bone, however, nor scraps of meat.

This test was made last year and it gave the same results in profits, but the hens rightly fed laid more eggs—145.

Numbers of questions have come to this paper in regard to tankage or green cut bone as a substitute for meat scraps and skim milk. When asked about this, Professor Phillips said that the time and strength required to turn the cutter is considerable, that hens are greedy and if they get more than one-half ounce of it they will get sick, if it is bought of the butcher and contains tainted meat, it may cause ptomaine poisoning or cause limber-neck; while green bone is good, it is not to be recommended for wholesale use.

The general laying ration consists of ten pounds corn, ten pounds wheat and five pounds oats for the grain;

LEGHORNS.

EGGS from S. C. Buff Orpingtons. 15 $1; 100, $5. Also Fawn and White I. R. duck eggs, 15, $1.25. Mrs. Emilie Plough, Charter Oak, Ia.

for the dry mash, five pounds bran, five pounds shorts, three and a half pounds meat scraps, or the meat may be substituted by sixty-two pounds skim milk. The grain is scattered in deep litter and the mash is fed dry in hoppers. This is a very simple ration, and available on nearly every farm. I have fed practically the same feed to my breeding stock and with the best of results.

As to feeding tankage, Mr. Phillips gives practically the same answer that was in these columns some time since, namely, tankage is beneficial, but is not clean and does not contain the amount of bone.

These rations should be fed so that twenty-five pounds of grain will be consumed in the same time that thirteen and a half pounds of the dry mash.

For green feed in winter, sprouted oats is named first in the list, and silage is voted all right. Steamed clover and alfalfa are foods, but should not be confused with succulent foods—they are not. Another practical point of this lecture is the fact that the corn is recommended to be cut down one-half in summer. If the hens run with the hogs at feeding time they get too much corn, but this may, in a measure, be remedied by keeping them away long enough to eat the dry mash. Minnie G. Stearns.

SUMMER NESTS.

To the Editor of The Homestead:

When some of the hens steal away from the poultry yard at this season to build a nest where it may never be discovered, it is usually the case that there is something wrong with the nests provided for their use, although it must be admitted that some hens never lose the instinct originally given them by nature to secrete their nests in a patch of weeds or grass, no matter how comfortable the nests provided for them by their owner. However, the majority of the hens of a domesticated flock will use the nests in the poultry building or yard if they are comfortable, but when nests, especially those in the building and house, are dirty and infested with numerous insect pests, some of the hens are bound to seek laying places elsewhere. So one cannot make the nests too inviting, or go after lice too vigorously, or keep the building too clean, if it is not desired that many eggs be deposited where they may never be found.

When the hens go on the nests to lay on a warm day, the temperature under them will be very high. This furnishes an ideal condition for lice to multiply. During the summer season nests should be examined once a week at least, and if dirty or lousy they ought to be cleaned at once. Burn the old contents of the boxes and put in fresh material. In order to avoid broken eggs, an abundance of nesting material must be kept in the boxes in summer as well as in winter. In order to facilitate the cleaning of building and nests, the latter should be so arranged that they can easily be removed for cleaning and disinfecting. If they are nailed fast to the walls of the building, the work of cleaning probably will be neglected.

At this season we always like to provide a great many nests for the hens, a large number being placed around the poultry yard and in the orchard. Barrels make good outside nests when laid on their sides so they cannot roll about. Small boxes are also put under the chicken coops which are not being used and many of the hens make use of these. Though most of the layers will not desert the nests in the building if everything is kept clean and the building is kept darkened during the daytime, outside nests are cooler and more inviting at this season and from these we gather the largest number of eggs. The work of keeping the building clean is simplified somewhat when all the layers do not loaf inside every morning until they have the opportunity to go on a nest. W. F. Purdue.

WHITE DIARRHOEA.

Dear Sir: I see reports of so many losing their little chicks with bowel troubles, so I thought I would tell my experience. I used to lose a great many of my little chicks from this cause, tried a good many remedies and was about discouraged with the chicken business. Two years ago they began to die and I thought I would try Walker's Walko Remedy. I used two 50c packages, raised 300 White Wyandotte chickens and never lost one or had one sick after getting the medicine. Readers can get it by sending 50c (M.O.) to the Walker Remedy Co., U. 8, Lamoni, Iowa. I wouldn't try to raise incubator chicks without it.—Mrs. C. M. Bradshaw, Beaconsfield, Iowa.—Adv.

POINTERS.

—Earl Bloom, Bridgewater, Iowa, is making a 50 per cent cut in prices of Single Comb Brown Leghorn eggs for the remainder of the month of June. See advertisement on page 10.

—Farmers who want to get a good start with Barred Plymouth Rocks are now presented with an opportunity to do so at a very low cost through the advertisement of Earl Bloom, Bridgewater, Iowa, in which he offers eggs for hatching during the remainder of June at one-half his regular prices.

—Mrs. L. C. Reese, Prescott, Iowa, is making special prices on eggs and baby chicks on page 10. She has one of the very best flocks of Bradley Bros. strains in the West, and all of the cockerels and the hens in her flock are tested birds. If you want something choice in the Plymouth Rock line send Mrs. Reese your order at once.

SHARPLES
MECHANICAL MILKER

The March of Mechanism

ONCE perfected, a mechanical device inevitably overcomes every barrier against its use. The invention of the reaper swept away ten centuries of the scythe.

Mechanical progress is swift and certain.

Men have milked by hand since the dawn of husbandry. Yet in four years over 2,000 Sharples Milkers have been installed. This is prophecy of the new era in dairy science.

That such progress should be made in so short a time is largely due to the universal confidence of the dairymen in the Sharples product. For thirty-two years the name of Sharples has stood for correct principles and sturdy quality.

The elimination of the drudgery of hand-milking will effect a great culable economy of labor in the dairy and on the farm.

Cows are more contented when milked by the Sharples. The milk flow is greater, and teats and udders are kept in perfect condition.

There is a dairy near you in which a Sharples Milker is working successfully. Let us tell you how you can inspect it.

Illustrated Booklet on Request.

DAIRY

WOMEN ON DAIRY FARMS.

To the Editor of The Homestead:

With the growth and development of dairying the work on the farm and with the stock has become more and more of a man job. On some of the largest and best organized dairy farms all the work is done by men—the milking, the separating, the washing, the bottling, and even the cooking. However, it is not with reference to professional dairy farms that this is written. Rather it is hoped to reach the reader with whom a few dairy cows are kept in connection with other farm activities.

The writer in traveling about finds a wide variation in the attitude of women toward the dairy. One genial lady on a farm which he has visited often finds peculiar delight in being with the cows. She is city raised and city trained, never having lived on a farm until she married. At first she could not distinguish one Jersey from another. Then she began to note differences in horn or other features. Finally, she knew every one perfectly and had an affectionate regard for each. When a new barn was built and it was necessary to train the cows to go to the new stalls the lady was out every time to direct the cows to their proper places. She was perfectly happy in that. She knew the cows better than the boys and succeeded in putting them into their proper places. She now declares that she would not leave those Jerseys and return to the city for any consideration.

On another farm near the one just mentioned is one where about forty cows are kept. There is a family of three or four grown daughters, who with the small boys do the milking. There the young ladies take delight in the work. Notwithstanding, they are cultured and genteel in their home. Two or three have been students at the state college.

Why should ladies from the city and others who have had the opportunity of a college education love cows and delight to be among them? What makes the work they do at the barn a recreation and a pleasure instead of a drudgery? Undoubtedly, one of the fundamental reasons in both cases mentioned, as well as in many others, is that the conditions surrounding their work are pleasant. The barns on both places are clean, sanitary and well lighted. The cows are high grade on one place and pure bred on the other. There seems to be an instinct in all normal women to seek some outdoor life. Further, it is perfectly natural for them to seek some pleasurable activity. The small amount of work they do takes them away from their regular daily tasks and forms a really pleasurable recreation.

Women have a sympathetic nature which gives them a peculiar understanding of the cow. A woman on the farm needs to have an intelligent understanding of her husband's business. Through helping somewhat with the work she can gain that understanding. Once having that knowledge she is an able assistant and counselor in the business.

The development of creameries, cheese factories, condenseries, etc., has removed much that formerly was hard work for the woman. She no longer has large, heavy cans of milk to handle, and lift in or out of a cooling tank. It is not necessary for her to churn large batches of butter and deliver it to the grocery store and barter it for household necessities. In short, there has been a certain relief and release of hard work for women on the dairy farm.

Woman's instinct for cleanliness and order makes her exceedingly valuable in an advisory way about the farm. Nowadays, cleanliness counts for so much. Not all women are content to give up the old way. Frequently one is found who makes a high grade of family butter. No product finds a more ready sale and more genuinely appreciated welcome in the city home than first-class farm butter made by some lady who is known to be neat and clean in all her work. Many families are willing to pay extra for such butter.

The selling of raw milk or cream to a jobber creamery has had another decided effect upon the woman of the farm. Formerly in many cases the expenses of the household had to be met by the exchange of butter and eggs. Now in the best-managed households the weekly or monthly checks are added to the bank account and the household expenses are met on a regular allowance as they should be. Unfortunately, in far too many families this new order has not yet become established. Sometimes actually the cream checks have gone to the bank and nothing done to reimburse the lady for the amount which she formerly received for butter. Almost universally, however, the farm dairy is being separated from the household. This is as it should be. The dairy is a part of the business of the farm and should be conducted as such. Woman, to a large extent, has been relieved of the drudgery. She may help if she has time and inclination, and as she finds pleasure and recreation from it, but it is no longer her manifest

The Duroc Jersey boar shown in the accompanying illustration is Severns' Crimson Critic. He is a son of Crimson Critic, the boar shown and used by Briggs Bros., Seward, Neb. The boar shown herewith was one of the largest and best produced in the country a year ago. He is also the sire of nearly all of the spring pigs owned by Mr. Severns this year. He will probably be shown at the Nebraska State Fair this season, and if properly conditioned will make a splendid showing. Mr. Severns has a few bred sows for sale. Address, mentioning The Homestead, Wm. Severns, Tamora, Neb.

BEATRICE

the Money-Making Separator. Differs from high-priced separators in price. Differs from low-priced separators in quality. Really in a class by itself. The Beatrice is the separator that is washed perfectly by mechanical means in two minutes. It has the good points of all, the drawbacks of none, and exclusive features of its own. The Silo That Men Want

Silos have been in use long enough for men to know the kind they want. They want STAVE silos. They want silos with heavy steel frames. That's how the Saginaw came to be the favorite. The Saginaw has a Steel Frame—like a modern, big city building. It has the Angle Steel Rib that prevents "cave-ins." It has the All-Steel Inner Anchor and Heavy Malleable Base Anchor which keep the silo on its foundation and perfectly erect. It has Steel Spline-Dowels, which interlock staves and make a solid wall. And the heavy, all-steel Door Frame forms a rugged frame-work to build around. Just remember these facts in buying your silo.

This Whirlwind Filler is a crackerjack. Fast as lightning. Cuts and shreds perfectly. Knives and cutting head are both adjustable. Can remove knife for grinding in 30 seconds. Runs in 4 wide-apart bearings that hold it absolutely rigid. Heavy cutter head insures uniform cutting, no matter how uneven the feeding. Fan blades can't get loose, because they are part of the wheel. Feed table is just waist-high. Easy-running. It's a marvel at cutting, shredding and elevating silage.

Send Postal Now and get Book 84 on Silos or Book 84 on Silo Machinery, or both. They are FREE. (66)

duty to do the milking, care for the milk and feed the calves.

The fabled dairymaid has passed into history and tradition. All recent practical operations where it has been attempted to hire girls to do the milking have failed. In Buffalo county, Nebraska, it was tried but did not succeed. In Utah several hundred cows were assembled near one of the towns and girls were hired as milkers. All went lovely so long as the dairymaids in their white caps and aprons carrying their shining pails were some distance from the cows. When milking was attempted there was trouble. The range cows were accustomed only to the manipulations of the calf and objected strongly to having human divinity do the milking. After vain attempts the cows went back to the range and the dairymaids returned to the ordinary paths of life. Truly dairying now belongs to the men of the farm.

H. E. McCartney.

MARKETING CONFERENCE REPORT READY.

The report of the first conference on marketing and farm credits held in Chicago, April 8th, 9th, and 10th, is now ready for distribution. It contains in full all the addresses presented at this remarkable meeting, and a complete stenographic report of the discussions. A complete list of the accredited delegates is included for reference.

Without doubt, this is a most comprehensive presentation of the important problems connected with the marketing and distribution of farm crops, and the institution of farm credit system. The best thought of the leaders in all educational and industrial lines is set forth in a most interesting way. The book should be in the hands of every producer and every consumer and every reference library in the United States and Canada. Without doubt the program presented at this conference was the most thoughtful, and most carefully considered in the history of similar gatherings. The best-informed and the brightest men in the country were in attendance and took an active part in the discussions.

These proceedings will be a splendid help to everyone interested, and who is not? Copy can be secured by sending $1 to the secretary of the first conference on marketing and farm credits, 1408 Steger Bldg., Chicago. Every farmer, every grower, market gardener, live stock raiser, in fact, everyone should inform themselves on these important topics, for they must be met and to be forewarned is to be forearmed. The experience of co-operators, the things to avoid, the things to do, are all set forth in this book. Order a copy at once and study it carefully. It will save you hundreds of dollars and enable you to take part in formulating some system of co-operative effort particularly adapted to your own lines of work.

IOWA DRAINAGE REPORT.

The report of the 1913 annual meeting of the Iowa State Drainage Association has been issued by Prof. W. H. Stevenson, Ames, Iowa, secretary of the association.

The report is an exceedingly interesting and valuable illustrated pamphlet of 100 pages, and will be sent to any address for twenty-five cents.

This report contains many papers and addresses of great importance and value to everyone who is interested in the drainage of farm lands. Every landowner, engineer, and tile manufacturer should read the reports of the standing committees of the association. Many landowners and drainage men will also be interested in the following addresses and discussions: "Co-operation in Land Drainage," "Ditching Machines and Implements;" "Outlet Protection of Drain Tile of Various Sizes;" "Roads and Drainage;" "Inspection of Drainage Improvements;" "Tile Curves," and "Specifications for the Laying of Drain Tile."

This report contains in full the tentative standard specifications for drain tile, sewer pipe and pipe laying which were prepared by Dean A. Marston, of the engineering division of Iowa State College.

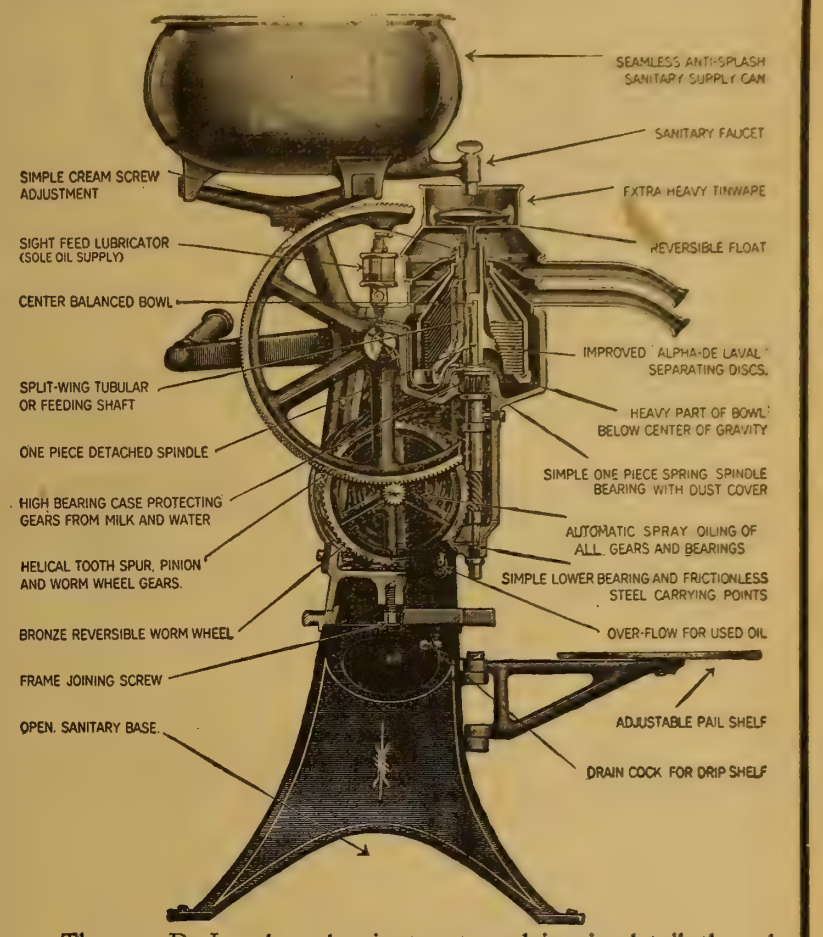
DE LAVAL
The Best Constructed Cream Separator

EVERY year the superiority of the De Laval over all other cream separators becomes greater. Every year the De Laval offers separator buyers a better machine than the year before.

Note the improved features of the latest De Laval machines as shown in the illustration below, representing the very latest and best in cream separator design and construction.



The new De Laval catalog just out explains in detail the advantages of De Laval design and construction and why the De Laval is superior to all other cream separators. It will be mailed free upon request to nearest office.

THE DE LAVAL SEPARATOR CO.
NEW YORK CHICAGO SAN FRANCISCO SEATTLE

Pure-bred Registered
HOLSTEIN CATTLE

Farmer-dairymen seeking to improve their herds for dairy purposes should consider the item of meat production just as the farmers of Holland have done in developing the Holstein-Friesian breed.

Just as this breed exceeds all other dairy breeds in the profitable production of milk, butter, cheese and veal, so it also exceeds them in profitable beef production. The beef is excellent in quality and not even the special beef breeds produce veal equal to Holstein-Friesian veal.

Send for Free, Illustrated, Descriptive Booklets.

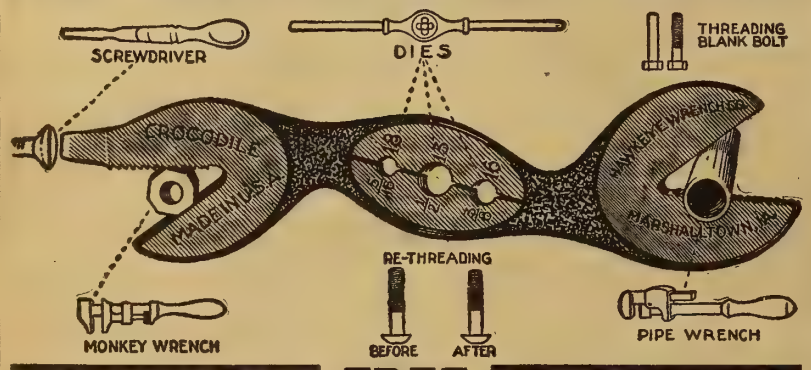
A HANDY WRENCH FOR HARVEST AND HAY MAKING



THIS WRENCH IS FREE BY PARCEL POST

The months of June and July find the farmer busy with his harvest and hay making. It is then that he needs a wrench that will answer every purpose around the binder, mower or rake. We have just such a wrench in our famous "Six in-One Crocodile."

This wrench is drop forged from the finest tool steel, scientifically tempered. Every Wrench is Guaranteed. It has six handy tools in one—pipe wrench, nut wrench, screw driver and three dies for cleaning up and re-threading rusted and worn out threads. Dies fit all standard farm machinery. It requires no adjustment, never slips, and is simple and always ready for use.

HERE IS MY OFFER:

Send me only $1 for one year's subscription to The Iowa Homestead and I will mail you one of these crocodile wrenches free of charge by parcel post. **This offer is good only till July 1.** Use the coupon below and mail all orders to

WITH THE EDITOR.

When two young people are in love with each other to the extent that they are pledged to marriage, it is well for them to face the future from many points of view. To specify one—there should be a thorough understanding as to the financial arrangements under which the firm about to be incorporated is to be carried on. Lovers should take time from the romantic business of lovering to consider the prosaic business of probable resources and their disposition.

When a man is courting a girl he is apt to think little of what is to follow in case he is fortunate enough to win her. The woman, if she love her lover, feels that it will be a joy to meet his wishes, and sacrifices her preferences after they are married. After marriage, to both alike, naturally and inevitably, comes the realization that they are individuals as well as comrades and partners and that as individuals they must face the money question.

If a couple can bring common sense, a disposition to play fair and a mutual desire for the happiness and comfort of the other to bear upon the pocketbook question the danger of friction upon other matters will be reduced to a minimum. And the time to discuss it is before and not after the marriage ceremony.

Let the prospective husband tell his betrothed frankly what his resources are; let the prospective wife frankly tell her betrothed what she expects as his business partner; let them quietly and sanely arrange for the financing of the home they are to make—and know that they are safeguarding themselves against storms which have shipwrecked many a craft which set out with sails flying.

HOME AND HOMEMAKING.

LITTLE HELPS BY THE WAY.

Be yourself today, regardless of what happened yesterday. Be all that you are or can be today if you would create most nobly for the future.

Begin a course in serenity during your off hours. In the first place, don't undertake too much. To be always "catching up" with things that should have been attended to hours earlier is fatal to peace. Especially during the hot weather you must guard against this; you must determine just how much you can do and refuse to undertake more. It is humanly impossible to be in two places at once or to do two things at once. Don't try.

Good, better, best!
Never let it rest
Till your good is better.
And your better best.

TO GET RID OF FLIES.

It is a crime not to have screens or at least mosquito netting at all doors and windows, but in spite of these some flies will get in. Have nothing about to attract them; keep all food carefully covered. Leave no slops standing except in closely closed cans, which should be often scalded out and disinfected. To clear a room of flies close doors and windows and sift a good strong insect powder, such as is used for poultry, on window sills and everywhere. Leave the room for an hour or more, then sweep up the dead flies and burn.

Or, darken the room, by drawing all the shades, leaving only a bit of sunlight at one window. The flies will go to that light and may be "swatted" with a dust cloth or a newspaper folded into a flat paddle.

A very old medical journal gives the following advice: "Put a little oil of bay in a saucer and set it on the window sill, or paint the window sill with varnish, paint or hard oil in which oil of bay has been mixed. No flies will stay in the room." A dram, or ten cents' worth of oil of bay in half a cup of hard oil is about the right proportion.

EGG WAYS.

Baked Eggs, Madrid Style.—Make a cup of thick tomato sauce, or chop the canned or stewed tomato fine without straining it, seasoning it with onion juice, salt and pepper. Mix with this a couple of link sausages that have been cooked and chopped into small pieces; pour the mixture into a dish and break upon it as many eggs as the space will allow without crowding; set in the oven and cook until the whites of the eggs are firm.

Baked Eggs With Ham.—Add a teaspoonful of onion juice to a cupful of finely chopped ham; beat six eggs light, stir the ham into them, season with a little pepper—no more salt will be needed than is supplied by the ham—a tablespoonful of minced parsley, and turn the mixture into a frying pan in which is a tablespoonful of melted butter. You can either stir the mixture as you would for scrambled eggs until the eggs thicken, or you may cook it as you would an omelet, loosening it from the bottom with an omelet knife and folding it when done. In either way it is very good.

Eggs With Corn.—For this you may use either the fresh corn, boiling it and cutting it from the cob, or the canned corn, turning it from the tin a couple of hours before it is to be used. Separate the whites and yolks of five eggs and beat the latter a few minutes, the whites until stiff. Put the corn with the yolks, season to taste with pepper and salt, then stir in the whites lightly and cook in a shallow saucepan for five minutes or until the mixture thickens. If you prefer you can cook in an omelet pan and serve with or without folding.

AMONG OURSELVES.

Many times have I been asked to furnish topics for discussion at the meeting of some of the farm women's clubs to which in increasingly large numbers our readers now belong.

While there are some topics that are perhaps more especially feminine than others, yet in these meetings it is well to get away from such lines of thought. So I have been recommending that our friends watch the editorial pages of our papers. There they will find discussed the livest topics of the day; the sifted information that furnishes a firm foundation. You will find it well worth while to take up almost any one of these articles, read it aloud, and then discuss it.

In a recent number, you may have noticed topics: The Pure Shoe Law, Purity of Water in Farm Wells, The Geographical Center, and others which were well worthy of note and informative.

It is not merely the reading, but rather the quiet, gentle, open-minded talking over such subjects that will give us the ability to rightly hold our own in the political life that is more and more largely opening up to women.

Rights and duties and duties and rights: these agitate society in the city, on the farm, everywhere. One of our farm women has this to say on a subject that comes up with great insistence:

I think that women are often themselves to be blamed for outdoor work being required of them. When a girl is married and goes to live on a farm, she is usually well and strong, with all her furnishings new and in order, and with sewing all done for months ahead. She has leisure, is anxious to help and takes up as many outdoor duties as she can. It soon becomes a matter of course for her to do this work, and it is considered a part of her duties. Another year, she has more work to do for the house, considerable sewing and perhaps a little one who needs all her time, but she is expected to keep up her outdoor work also. Now, if she had said at first, "Just now I have no sewing to do, and can help you," and had spoken often of the fact that next year she should be unable to do it, and that some other person must then do the work—that it was not, properly, in her line of duties—very few men would be disappointed when she dropped the outdoor work. In any case she should refuse, firmly, but pleasantly, to continue doing it. I believe in husbands and wives helping each other in sickness or in unexpected emergencies. The men of my family have often done all the housework when I was ill or wished to go away, and I have often done all the outdoor work, even to sawing wood, when the men were ill or suddenly obliged to go away and no help could be procured, but in both cases it was considered a favor and was never continued when the occasion had passed. A woman owes it to herself and her family that she shall not work beyond her strength, or for so many hours that she shall not have time for recreation and reading.

Now, I have the pleasure of introducing to you two of our women who are developing into story tellers. Mrs. Margaret Ainsley will tell you

BROWNIE No. 3

You can make good pictures with a Brownie Camera.

Made by Kodak workmen in the Kodak factories, the Brownies are efficient, durable, practical. Made on the Kodak plan, they are simple.

Take for instance the No. 3 Brownie. It is substantially made in every detail. Though it makes 3¼ x 4¼ pictures, no focusing is required. It's always ready. It has a carefully tested meniscus achromatic lens; is fitted with the Eastman Rotary shutter for snap shots and time exposures, and with a set of three stops. There are two finders; one for vertical and one for horizontal exposures, and two tripod sockets. It loads in daylight with Kodak film cartridges for four, six or twelve exposures. The covering is a tasteful and durable imitation leather, the metal parts are heavily nickeled. Price, $4.00.

With a Kodak or Brownie no dark room is required for any part of the work—loading, unloading, developing or printing. You can readily finish your own pictures or can safely send the film cartridges by mail to a professional finisher.

You can make good pictures with a Brownie.

On Time We sell monuments, tombstones and markers direct from the quarries, at a very large discount from usual prices. Over 200 styles to select from. We sell on monthly payments, allowing long time to pay. All lettering done by experts. Our guarantee is backed by $7,000,000 capital.

Send for our free Portfolio, quoting quarry prices, and picturing all the most desirable designs. (431)

SPIEGEL, MAY, STERN CO.
3672 Wall St., Chicago, Ill.

how Mrs. Brown "used her head to save her heels," as the saying is:

"Why, Mrs. Brown, have you gotten your clothes ready to hang out so soon? And how do you happen to have two shirts and three pairs of everyday socks for your husband in one washing, and that many stockings for yourself? Your washing is larger than mine and yet you have finished sooner than I could."

"Oh, good morning, Mrs. Day. Why, I have this many shirts, socks and stockings because we wore them. You know the oftener one changes clothing the easier they are to wash and the less strength one has to expend rubbing the most soiled places by hand. Consequently, they do not wear out so quickly, because much rubbing of clothing is very wearing on them. We have provided several changes of clothing for ourselves so that we can change often." "I never had thought of that. You must have other ways of saving time and strength, too, for you seem to do your work easily and not feel tired all the time." "I do. See my dishes through the window? Ever dry yours that way? Have two old sheets folded twice. Wash the dishes in soapy water, put in a deep pan of hot water, then place on the sheet to drain. Usually, every drop of water evaporates and I don't have to touch them with a towel. Of course the glassware and silverware must always be wiped. Here are some of my holders. I sew a little ring in one corner to hang them up by. It is more convenient than a loop. The rings cost only two cents a dozen. You notice I have rugs instead of carpets. They are so much less work, no tacking down, pulling up, or stretching. By the way isn't the last magazine we subscribed for a splendid number?" "I haven't opened it yet." "You don't mean to say you've read it already?" "Yes. When one member of our family finishes his meal several minutes before the rest he reads aloud. We accomplish so much reading in that way and then we get to talk it over with each other, too. That is about the only time we have for reading aloud in the summer." "Well, Mrs. Brown, you have cheered and encouraged me wonderfully. I must go now. I'm anxious to put some of your suggestions into practice. Run over and see me soon." "Yes, I will."

And through the pen of Mrs. F. C. Bright we make the acquaintance of a housekeeper who is wise in her day and generation:

Not long ago a neighbor lady dropped in on an errand and we sat visiting as women will do. The time passed very quickly and I was not aware that supper time was at hand. I happened to look out and saw the men coming from the field, the sight brought me to realize that it was fifteen minutes to six. I insisted upon Mrs. B. staying to supper and asked to be excused for a few minutes. At exactly six o'clock I announced supper, everything was in order and the family seated themselves to the following supper: potato salad, cold ham, rolls and butter, cookies, wafers, radishes, pickles, canned peaches, iced coffee. Not a bad supper for a hot day and on fifteen minutes' notice? After the men had finished and gone to do the evening chores, Mrs. B. and I sat chatting and eating wafers and sipping the iced coffee. We were discussing the effect of the reciprocity bill upon the price of eggs, etc., when all of a sudden Mrs. B. remarked, "What a lovely cool dining room you have. We all nearly melt every night at supper time. I do not mind it at noon, but at supper time I get so heated I cannot eat a bite and enjoy it." And then for the first time she saw that I had no fire. "How on earth did you make salad and coffee and no fire?" "Oh, I replied, I just did that along as I had time and it came handy. The salad dressing I made several days ago, and the coffee I made at breakfast. I made the pot full on purpose so as to have it for supper, the same as I do with my tea when I make that for dinner. So I always have either cold tea or coffee ready for supper when it is a very hot day, but when it is a little cooler I always have a warm supper. When we have finished breakfast I turn the the remaining coffee and cream in this large water pitcher, sweeten it and, presto! part of my supper is ready. All I had to do was to set it in the ice box and when I brought it to the table put a piece of ice in the pitcher. And my salad, well, there was a dish of cold potatoes and a little sack of onions right handy and a cup of salad dressing, so it was but a very few minutes' work to have a nice salad ready. And the can of peaches I brought from the cellar when I got potatoes for dinner. The radishes I gathered when I went to the garden to get lettuce for dinner, washed them the same time and put them on the ice to crisp. And to set my table I lifted the spread (a flour sack nicely bleached and hemstitched). My centerpieces, also plates, glasses, knives, forks and spoons were all there. My pickles I always keep on the table in an old-fashioned covered sugar bowl filled with vinegar." "Well, I declare," said Mrs. B. "You make everything so easy. I should have to spend the whole afternoon to do what you did in fifteen minutes, then be so tired I could not visit at all. And you use a nice, plain, white oilcloth to eat on! I never thought of getting the white ones, but I do hate a dark oil cloth." "I do too," I replied, "but I can spend my time to better advantage than to stand and iron table cloths, where there are farm hands and children." Mrs. B.'s visit now had to end. We had enjoyed ourselves every minute and realized that the "unexpected guest" had been a real pleasure, and that our little chat had been of benefit to us both.

And so may more of us do! It is a matter of using the things we have in a different, and it is to be hoped, more effective way—a way in which by wise forethought, we have that precious article, time, at our disposal for the betterment of ourselves, our home folks, and our neighbors.

THE YOUNG FOLKS

For the best letter received each week we offer twenty-five cents; second best, a silver badge; third best, a pansy badge. Send letters to Aunt Mary, Hawley, Minn.

FIX UP THE HOME.

(First prize.)

Have you ever taken notice when traveling through the country on the railroad or going out for a pleasure drive some Sunday, of things that are generally distasteful to your eye? In most cases it is trifling things that could be put in good-looking order with very little effort on the part of the owner.

It may be that you see a house or barn that has cost hundreds of dollars to build, and just for the sake of saving a few dollars it has been called finished without the paint just because it will serve the purpose without it. Such a building cannot be called unsightly, but it really does not look good, and it does not give a person a very good impression; and most of all it goes to show that the owner does not take a great deal of pride in it, and it was built to gain the almighty dollar instead of being a comfort and a pride to the owner as well as to the community. You might say that it contains all of the modern conveniences and would not be any better with the paint, but if we have the right spirit we will not look into this matter for mere dollars and cents, but should be willing to sacrifice in order to make things pleasing and inviting to the eye of the public as well as to ourselves.

The same thing can be applied to many other things, such as fences, wood lots, pastures, fields, etc., that are allowed to go along in a happy-go-lucky way because it will serve the purpose as well without being trimmed up a little along the edges.

I think the same thing should apply to our farms and homes as applies to us personally. What would you think of a man that did not get his hair cut more than twice each year or a shave about once a month, and went to church on Sundays in his working clothes? He serves the purpose as a man all right, but what kind of a man? He surely does not think very much of himself. There is no reason why we should not be as particular about our farm home and surroundings as we are about our dress and personality.

I do not believe in using the old farm as a mere tool to grind out the dollars, when really it is the only place on earth we can call "home, sweet home." At least it is the place where we are to spend the greatest part of our lives here on earth, and if we are to enjoy life and get the most of happiness and pleasure out of it, we must try to make our surroundings pleasant; not only that, but help and do a good turn to our neighbors when we are given the opportunity. I do not mean that we all can enjoy luxuries and have things fixed up O. K., but the humblest can have things inviting and be of good use to humanity if he chooses.

—Christ S. Hansen.

Program and Social.

(Second prize.)

I will attempt to tell how we raised money to secure an organ for our school. As we were the only school in this town that had no organ we thought it was high time we were getting busy and be in the same standing as the others. We prepared a "Perry Program" consisting of twenty-four numbers, relating to Perry's victory on Lake Erie. The program lasted for one hour and thirty minutes. After the program we had our "Avoirdupois Social." Each lady brought with her a basket in which she had a lunch for two; also a card with her name on it. The baskets were placed on the table. Each gentleman wishing a basket selected it, opened it, read the name, and then found the owner. He then weighed the lady owning the basket, and paid one half cent per pound for every pound she weighed. Of course, the heavy women brought

a good income. As there were quite a number of baskets, the income was not very small. The net amount was twenty dollars. Those that did not get baskets purchased lunch at ten cents a plate. There were about eighty-one people there and all had a good time. —Long Pete.

A Liberty Lover.
(Third prize.)

I have been wanting to give my opinion for a long while. I think the subject of ambitions a most interesting one. My ambition is to have a pretty home all by my lonesome and be a harmless old maid, who wouldn't hurt anything. Lily said some time ago that it was her highest ambition to be a good wife and mother, and Aunt Mary approved, but I think aunt Mary must either be an old maid, or have a good husband, which is a very rare thing indeed! (The good husband, I mean.) I, myself have no ambition that way. I say with Patrick Henry, "Give me liberty or give me death," and what married girl can have liberty?

I think it would be good for all boys to have to live the life of a girl for just one year; yes, one year would cure them of their—well, you might say their habits, for it may be be just a habit that makes them so thoughtless and selfish.

Now, honestly, how do you like my opinion? —A Future Old Maid.

PLEASANT FIELDS OF HOLY WRIT

Save for my daily range among the pleasant fields of Holy Writ I might despair.—Tennyson.

THE INTERNATIONAL S. S. LESSON

2d Quar. Lesson 11, Gen. 47; 1-12. June 15, 1913.

JACOB BEFORE PHARAOH.

Filial piety and brotherly love shine in the character of Joseph with greater brilliancy than any jewels that studded his rich regalia as viceroy of Egypt. Even if he had not rendered his great humanitarian service to famishing nations and won a place in the select company of the world's prime ministers, these lovely personal traits would save him from oblivion. For Joseph's blood was always thicker than water. It mattered not that his brothers had been envious and cruel. He forgave and loved them. He used all the arts he had learned in statecraft to reform them, crowding back his natural feelings. He kept incognito, that no mixed motives should dominate them. He used various devices to remind them of their guilt and lead them to repentance. When thoroughly satisfied they were really new men, he revealed his identity, and that, too, without any "I am greater than thou" manner, but with such a cataract of affection as fairly swept them off their feet and waked the echoes of his palace. What is more, he acknowledged them before king and court. Clad in robes of state decked with insignia, he took these rustic, sun-burnt, barefooted shepherds by the hand and led them up to Pharaoh's jeweled throne and acknowledged them as his own brothers. He scorned the curling lips of envious courtiers when his own lowly origin was then revealed. He faced them with dauntless courage when he saw their racial prejudice against shepherds kindling. He obtained for them the reservation of the fattest pasture-land that even Egypt could boast. Right royally did Joseph act the brother's part. Affecting as the meeting between the brothers was, that between father and son was even more so. After two decades of separation they fly into each other's arms: the father, who had kept the blood-stained coat as token of a son believed to have long since perished; the son, who through tribulations deep had climbed unaided and by his own intrinsic merit to glory and a commanding position of world-wide power. And Joseph no more hesitated to present his father to court than his brothers. The patriarch in the presence of Pharaoh makes a scene for poet and painter. Jacob's words to Pharaoh are an elegy. Well may he call his life a pilgrimage. Gerar, Padanaram, Succoth, Bethlehem, Beersheba, Egypt, are only a few of the milestones. His days also were comparatively few, for his grandfather had lived forty-five years and his father fifty years longer than himself. His life, too, had been checkered with "evil." He has suffered the ills inseparable from duplicity, had robbed his brother and thus exiled himself. The deceptions he had practiced on others had been his own bitter fate. Cursed with profligate sons and robbed of one pre-eminently virtuous, and, to end it all, now famine stricken—that word "evil" surely sums his whole life.

OUR FASHION DEPARTMENT.

ALL PATTERNS, 10 Cents Each.

THIS department is prepared especially for The Iowa Homestead. We can supply our readers with high-grade, perfect-fitting, seam-allowing patterns at 10 cents each, postage prepaid. Full directions for making, as well as the amount of material required, accompany each pattern. When ordering, all you have to do is to write your name and address plainly, tell us the correct number and size of each pattern you want and enclose 10 cents for each number. We agree to fill all orders promptly and guarantee safe delivery. Address all orders to The Iowa Homestead, Des Moines, Iowa.

6098 Ladies' Empire Kimono.—This charming negligee garment is an entirely new design and one that is sure to appeal to the woman of refined taste in matters of apparel. It is simple to make and may have long or short sleeves. Cashmere, crepe, soisette, silk or wash fabrics may be used for its development.

The pattern 6098 is cut in sizes 34, 38 and 42 inches bust measure. Medium size requires 3⅞ yards of 36-inch material and ½ yard of 27-inch contrasting material. Price of pattern ten cents.

6124 Ladies' Skirt.—This design gives us a four-gored model, with panel front and back and small plaits at the lower part of each panel. The waist finish may be high or normal as preferred. This style is one which will be pretty in serge or linen.

The pattern 6124 is cut in sizes 22 to 30 inches waist measure. Medium size requires 5 yards of 36-inch material. Price of pattern ten cents.

6103 Misses' Dress.—This charming and youthful frock shows several of fashion's latest features. It is a simple, but altogether delightful model and one suitable for dressy wear or for general service. The dress has the conventional front closing and three-gored skirt. The sleeves may be long or short.

The pattern 6103 is cut in sizes 14, 16 and 18 years. Medium size requires 4⅞ yards of 36-inch material. Price of patter ten cents.

6173 Misses' Blouse Waist.—We have in this design the new Balkan blouse which is so very becoming to young girls and to slender women as well. It may be made plain in middy style or the fulness may be gathered into a hip band, this being the latest manner.

The pattern 6173 is cut in sizes 14, 16 and 18 years. Medium size requires 2¾ yards of 36-inch material. Price of pattern ten cents.

NEWS OF THE SALE RING

Stanton's Short-horn Sale.

One of the most successful sales of recent years was made at Sittyton Grove Farm, Wheaton, Ill., June 2d, by Thomas Stanton, when forty-six head of Short-horns were sold for $25,605, making the excellent average of $556. The recent purchase by Mr. Stanton of the entire herd of George J. Sayer, McHenry, Ill., gave him an oversupply of Short-horns and he selected the tops of the Sayer including all the show cattle to which he added a number of the best things in his own herd, and offered them to the public. The attendance was large and included not only many representative Short-horn men, but also many new men, a number of whom were buyers and the cattle were widely distributed, going to Iowa, Illinois, Wisconsin, Minnesota, Missouri, Indiana, Ohio, Virginia, Ontario and Manitoba. The top of the sale was $2,000, paid by James Yuille, Winnipeg, Manitoba, for the three-year-old bull, Browndale Sultan, by Avondale, the contending bidders being Robert R. Ward, Benton, Ill., and A. G. Stevenson, Port Huron, Mich. Mr. Ward later bought Roan Sultan, the good son of Glenbrook Sultan, for $1,050. The top of the females was $1,980, paid by Anoka Farms, Waukesha, Wis., for the undefeated two-year-old heifer, 78th Duchess of Gloster, the contending bidders being James Yuille and Mr. Yuille paid $1,760 for the yearling show heifer, Sittyton Lady 2d, by Glenbrook Sultan, and he also took the winning show cow Imp. Fair Start 2d, with a roan bull calf at foot by Roan Sultan, for $1,675. The richly bred Rosewood cow, Autumn Rose, went to C. J. McMaster, Altona, Ill., for $1,400. The sale list tells an interesting story, and shows the demand for good cattle. Eliminating all the show cattle and the report of the sale is the story of a very successful event with an average of $459. In addition to Mr. Stanton's cattle two bulls were consigned by Smith & Heissever, Oran, Mo., which were sold at satisfactory prices, but do not appear in the report or figure in the summary. Mr. Stanton conducted the sale in his usual satisfactory manner. Col. Carey M. Jones did the selling and did a most excellent day's work. He was ably assisted by Colonels Reppert and Cottingham. The following is a detailed report:

FEMALES.

Don't Lose Another Hog—You Just Try Merry War Powdered Lye

E. Myers, President, E. Myers Lye Company

If an epidemic of hog cholera should break out in **your** neighborhood, what assurance have **you** that it wouldn't attack **your** hogs? How are **you** fixed to prevent that dread disease from killing off **your** hogs like flies and wiping out **your** pork profits? Be on the safe side—don't wait—hog cholera breaks out suddenly—**ravages** and **kills** quickly! You **can prevent** it—easily and at a very small cost. Just mix with your hog feed a little MERRY WAR POWDERED LYE. (Directions on every can.) **Feed twice daily.** It's the **proven preventive.** Thousands of practical hog raisers and farmers **know** this by **actual experience.**

Read These Convincing Letters

J. E. Vawter, Beverly, Kans.—"25 hogs lost 1 mile east; 50 hogs lost 2 miles north; 20 hogs lost 2½ miles south of me, but I used Merry War Powdered Lye and escaped loss."

Mrs. Joseph Giesken, Parnell, Mo.—"After we began using Merry War Powdered Lye we never lost a hog."

Don't Experiment—Refuse Substitutes

Don't be persuaded to try an ordinary, old-fashioned lye as a possible preventive of hog cholera. At best, it would be a doubtful, perhaps a **dangerous** experiment. MERRY WAR POWDERED LYE will **not** hurt your hogs. It is the specially prepared lye that is **safe** to feed to hogs as directed on every can, and **there are no substitutes.**

MERRY WAR POWDERED LYE is not only a **safe preventive** of cholera, but it is also the best hog fattener, and all 'round conditioner the world has ever known.

Users say it positively destroys worms. It keeps the hogs on their feed, makes them fat and sleek, skins free from scurvy and keeps the digestion in such perfect condition that every pound of feed is changed into profit making flesh and fat. One week's trial will convince you.

Prove This For Yourself. MERRY WAR POWDERED LYE is for sale at most dealers, 10c per can (**120 feeds**). It is convenient to buy in case lots—4 dozen cans, $4.80. Costs only **5c per hog, per month** to feed regularly—by far the best and much the cheapest hog insurance you can buy. If your grocers, druggists or feed dealers' can't supply you, write us stating their names. We will see that you are supplied; also send you FREE a valuable booklet "How To Get the Biggest Profits From Hog Raising."

Order Direct from us in case lots—4 doz. cans, $4.80—if your dealers' won't supply you.

Which Kind Do You Want?

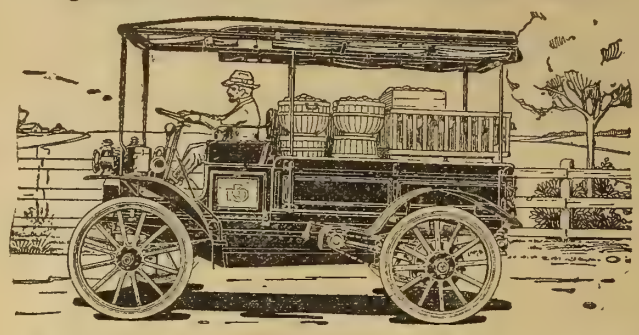
Get Your Produce to Market Cheaper, Quicker and Oftener With This



REO Model H 1500 lbs. Capacity MOTOR TRUCK

Mechanically Perfect—a Giant of Power Costs but $750

On good roads—the equal of any two horses that ever ate their $2 worth of feed a day; on sand and through mud—the equal of any four. Yet it works from morning till night on a pittance of gasoline and oil—say forty cents worth of the former and a nickel's worth of the latter.

Fasts when not busy; needs no veterinary; no blacksmith; doesn't get frightened at a blowing newspaper; litters up no stable; requires no hay loft and grain bin; saves barn space and hired help; and can be operated by any man or grown boy who knows enough to pour fuel into a funnel. Lastly—costs but $750.

As Uncle Sam said to Mexico: "I ain't arguing; I'm just telling you." There is no argument—can be no argument in the matter at all. All we ask is that you see for yourself that—at $750—we have really produced a motor truck answering perfectly and exactly to the needs of the farmer who wants to haul his produce to market quicker and cheaper.

Write us for full description of this powerful little truck. Tell us also something about the work you expect of it, and we can give you some interesting facts and figures, also the name and address of the nearest of our 1100 dealers who can show it to you.

REO MOTOR TRUCK COMPANY,
Lansing, Michigan.

Do You Want to Make Up Lost Time in the Corn Field?

By that, we mean do you want your corn to ripen from one to two weeks earlier than it would under ordinary methods of cultivation?

Corn is going into the ground late this year, on the average fully two weeks.

This means that you must make the most of the growing season, and that you cannot afford to overlook any method of cultivation which will mean the quicker ripening of your crop. The use of

Tower Cultivators Means Earlier Ripening

Corn cultivated by our method ripens two weeks earlier than where shovel plows are used. This is not guess work—it is the result of actual experience of corn growers.

You cultivate the corn the right way when you use **the Tower System.** It does not dig and tear up the roots. It works in close to the plant, and cuts the weeds off so that they are soon killed by the hot sun. It leaves a loose mulch on top which conserves the moisture and promotes rapid growth.

Nature calculates that each corn root shall work for you, furnishing nourishment to grow and mature a **good ear of corn,** it is your duty **to assist** and **not resist—to promote** and **not prevent** the growth of the root system. Fifteen minutes—with the use of one finger—in the corn field will prove the root system to your satisfaction. The **Tower Cultivators** cost no more than shovel cultivators—are well made and durable. Your dealer will sell you and take care of you, if not we will. There are some imitations, but the **real Tower** always has the name "Tower" on the tongue—look for it.

Our corn book for the asking. Yours for sound corn,

(One right way)

Bay's Short-horn Sale.

A successful sale of Short-horn cattle was held at Aledo, Ill., June 4th, by John M. Bay. It was his first annual offering, although he has been breeding Short-horns for a good many years and while values did not rule high, yet the fact that nearly all the cattle were bred by Mr. Bay made the sale a financial success for him, and yet buyers were enabled to secure cattle at values that left them a good margin. The cattle were presented in good condition and Mr. Bay added to his already wide circle of friends by his satisfactory method of doing business. Col. Carey M. Jones was the auctioneer and did a most excellent day's work. The following is a list of all sales amounting to $100 or over:

A PAVED COUNTRY HIGHWAY.

To the Editor of The Homestead:

Piatt county, Illinois, built a trial stretch of paved road in 1912, patterned after roads that have been built in the adjoining county of Douglas. The county had hotly discussed various methods of improving its earth roads, all agreeing that we could not stand the cost of gravel or macadam, when a gentleman who had taken a large part in promoting brick-paved roads about his home section in Douglas county, was invited to talk about these roads in the Piatt County Farmers' Institute in January, 1912. His description so pleased the people that the several factions almost united in adopting the ideas he suggested.

A petition was readily signed by the requisite number of voters and land owners asking that the question of extending one of the brick-paved streets from the city limits of Monticello to the cemetery, three-fourths of a mile distant, passing the county fair-ground entrance, be submitted to the tax payers of Monticello township to be paid for by special township tax if approved at the following annual election of township officers in April. The township comprises forty-eight square miles. The voters favored the road and a tax was levied to pay for it.

The specifications called for a paved road sixteen feet wide, to occupy but one-half of the highway, with a concrete curb and gutter along the outside, a regular arched foundation overlaid with five inches of grout, then a cushion of one inch of clean, sharp sand on which regular paving brick four by four by nine should be laid. This was essentially the construction of the city pavement, of which it is a continuance, except that the city pavement occupies the full width of the street and has curb and gutter on both sides. The inner side of the township pavement has a concrete slope to permit vehicles to pass at pleasure from pavement to dirt road or vice versa.

The pavement was completed in December and meets with general approval. The earth roads of the corn belt are ideal roads when not too wet. It is found that when muddy the pavement is used altogether, thus eliminating the cutting up of the soft earth half of the road. The actual working width of the paved portion is fifteen feet.

The cost of this stretch was greater than such a road must cost if its use becomes general. It should be built without curb and gutter, the width may be reduced to nine feet and the paved part may be placed in the center, thus giving opportunity to use the earth strips on both sides. The engineer and contractor who built the pavement for Monticello township says that on our prairie roads such pavements without curb and gutter and with good concrete culverts where needed can be built at a cost of $1,000 a mile for each foot in width. The road as built cost us nearly $16,000, but this includes the cost of two expensive concrete bridges full width of the road.

A second petition for a mile and three-fourths extending from the city in another direction was turned down by the voters at the recent April election chiefly because they think that the entire township ought not to have to bear all the cost when a favored few get the most benefit. The road already built was different, as it extended to the cemetery and at times the earth road was nearly impassable. All the township uses that stretch.

The concrete pavement is discussed, but no concrete surface can compete with the hard-burned paving brick. Gravel roads are not found durable enough to warrant their construction on our prairie roads; they require too much repairing.

Subscriber.

The department of agriculture has published a bulletin on "Raising Guinea Pigs." The author, Mr. David E. Lantz, assistant in the Bureau of Biological Survey, says: "The rearing of Guinea pigs requires no extraordinary knowledge and no great outlay of capital. Little space is needed to accommodate the animals, which are hardy and easily managed. They make interesting pets and are useful food animals. The constantly increasing demand for them in scientific investigations and medical research insures a ready market for reasonable numbers at prices that should be remunerative to the producer."

Galloway's Famous Pumping Engines

Wm. Galloway, Pres.

Get My Special Engine and Pump-Jack Combination Offer—NOW! Yes, sir. Do it today. Don't wait a minute. Just sit right down and drop me a postal and say, "Galloway, send me your special pumping engine offer." I am out after the pumping engine business and I am going to get it because I am making the best pumping engine outfit ever made and selling it at a price never before equalled. You can't imagine the number of uses you can put one of these little engines to until you see my **Special Pumping Engine** catalog. It's something new and different and I have a copy waiting for you, free. Just write me for it without fail today. Don't wait until your windmill blows down or the calm hot days get here when the windmill won't run and you have to toil and sweat pumping water by hand for a lot of live stock. No, sir; don't do it. Be prepared. Get my catalog and special offer. That's the first step. Then—

$24.75 And Up

I'll Save You $25 to $300

on the first cost alone. I'll save you $25 to $50 on the best pumping outfit made. On my larger engines I can save you as high as $300 and more. Remember, we make engines in sizes from 1 3-4 h. p. up to 15 h. p. My 1 3-4 h.p., air cooled, little "Boss of the Farm" engine sells for only $24.75—an unheard of price. The same style of engine at your dealers costs from $45 to $65. Now, that's just a sample of what buying direct from Galloway means in money saved. Get my special pumping engine offer right away. Write today.

FREE Service Department. When it comes to help or information for proper installing to get the most profit out of your engine, just call on my Service Department composed of engine experts. Think of it. I not only save you money right at the start but put at your disposal a corps of experts who will tell you how to install your engine, size pulleys to use with different machines, anything, in fact, you may want to know, and this service don't cost you one cent. It's just another advantage you get when you buy of Galloway.

Write Today for My Catalog and Special 1913 Business Proposition

Here's a final clincher. My 1913 Special Business Proposition. I've got a new plan which will help you get your engine partly or entirely without cost to you in the end. No canvassing, no soliciting, no agent's proposition, for we don't sell through agents—but just a straight business offer. Will give full details when you write me. Send for special pumping catalog—offer—and my new bed rock engine prices. Don't lay this paper down and forget it. Write me now. Address me as below:

Wm. Galloway, Pres., WILLIAM GALLOWAY CO.
1554 Galloway Station
Waterloo, Iowa

M. T. White, western Iowa and Nebraska (north of the Platte river). Address 4015 Izard St., Omaha, Neb.

Carlos C. Palmer, eastern half of Iowa and Minnesota and swine division in Illinois. Address 2714 High St., Des Moines, Iowa.

Fred V. Johnson, Wisconsin, Illinois, Indiana, Ohio, Michigan and Kentucky. Address 924 Hearst Bldg., Chicago, Ill.

A. T. Cole, Missouri, Kansas and Oklahoma. Address 3900 Holmes St., Kansas City, Mo.

John C. Halderman, Kansas. Address 4347 Harrison St., Kansas City, Mo.

A. W. Hopkins, Wisconsin. Address 201-202 Washington Blk., Madison, Wis.

J. C. Price, southern and western Nebraska. Address 145 So. 28th St., Lincoln, Neb.

C. C. Carlin, special assignments in central, southern and northern Iowa. Address 715 Clinton Ave., Des Moines, Iowa.

FIELD NOTES.

C. J. McMasters, the progressive Short-horn breeder at Altona, Ill., claims October 14th as the date for his annual fall sale. Full particulars will appear in these columns in due time.

Twenty very choice Duroc Jersey fall boars are advertised for sale by W. J. Wendt, Remsen, Iowa, on page 22. These are big, lusty fellows and he is pricing them at from $25 to $50 if taken right away. Write him about these boars at once.

W. Doolittle, Woodland, Mo. breeder of O. I. C. and Chester White hogs pays express on all pigs sold at weaning time. His is one of the good herds of the country and our readers will make no mistake in ordering from Mr. Doolittle. See advertisement on page 23.

Kendall's Spavin Cure is advertiseed on page 17. It ought not be necessary to do more than call the attention of our readers to this fact, because Kendall's Spavin Cure is universally recommended as the most valuable preparation for the cure of spavin and like horse affections. Among those who have written with reference to it is Louis Gratton, Ringwood, Ill., who says: "I have used Kendall's Spavin Cure with good results. I recommend it. I believe it to be the best remedy on the market." The "Treatise on the Horse," which is offered free to readers of this paper is spoken of as follows by E. J. Newman, Barrett, Minn.: "Please send me Kendall's Treatise on the Horse. I have had one for the last twenty-five years and now it is worn out. The book has saved many doctor bills. Kendall's Spavin Cure is O. K." Orders for the spavin cure or requests for copies of the Treatise on the Horse should be forwarded to Dr. B. J. Kendall Co., Enosburg Falls, Vt.

F. P. Healy, Bedford, Iowa, in his advertisement on page 24 of this issue states that he has the largest herd of registered Shetland ponies in the state. He asks Homestead readers to send a two-cent stamp for price list and catalog containing several pictures of the ponies he has for sale.

H. J. Rompf, Marion, Iowa, announces in an advertisement on page 10 that he has now ready for shipment a number of pedigreed Scotch Collie puppies. These are of good colors, whites and sables, from working parents and sure to make cattle dogs. They are quite intelligent, have plenty of grit and otherwise desirable. Note that they are sold at $10 each.

A. D. Jones, Dunlap, Iowa, the breeder of big-type Polands reports sixty good spring pigs on hand and a lot of fall boars and sows. These are sired by J.'s Dry Creek, Orange Price and Miller's Tecumseh. Mr. Jones has quite a few descendants of old Mollie Fair in his herd as well as other noted big-type strains. He will have some good boars to offer the trade this fall.

J. C. Porter, Ogden, Iowa, is still offering for sale some excellent September and October Duroc Jersey boars, as well as gilts of the larger sort. They will weigh from 250 to 275 pounds, have plenty of length and bone and good quality. They are sired by a grandson of Ohio Chief and their dams are by Crimson Wonder Again and High Col., the latter a son of Freed's Col.

Two good Chester White herd boars, bred from prize-winning ancestry, and used at the head of the G. H. Tutt herd at Marathon, Iowa, are advertised for sale, together with ten splendid sows bred for fall farrow. He is making the price on these two herd boars at $50 and they are well worth the money. He is pricing the sows bred for fall litter at $40 and up. Send him an order at once.

The Wabers potato digger advertised on page 9 is a machine having a construction especially adapted to its purpose. It is built to move smoothly with no erratic movements, does its work correctly and in the best possible manner. Its claims are supported by hundreds of testimonials, some of which together with illustrated descriptions may be obtained in Catalog C, 1912, for which address Wabers Mfg Co., Racine, Wis.

On page 21 Davenport & Mack, Belmond, Iowa, make a change in their advertisement. They are offering for sale an excellent nine-months-old Scotch Rosemary Short-horn bull calf together with two older ones of Scotch-topped lines of breeding. They advise us that they have sold the Scotch Lancaster bull which they have been advertising in these columns to A Hohman, Larchwood, Iowa. This is an outstanding good bull and one from which good words will later be heard. For prices on the young bulls above referred to write to the address given.

Twenty-five very choice big-type Poland China brood sows, all bred for early fall farrow to Mouw's Big Sioux are advertised for sale by George Glynn, Sioux Rapids, Iowa, on page 23. Mr. Glynn has no better sows in his herd than these he is offering for sale. He has more sows than he can handle and this is the only reason he is offering these for sale. He also offers to sell his splendid two-year-old herd boar, Smooth Jumbo, and he is the making of a great herd boar. Mr. Glynn guarantees satisfaction on these sows he is offering for sale, as they are as good as he has in his herd.

John De Young, Sheldon, Iowa, one of the oldest breeders of Duroc Jerseys in the northwestern part of the state, has 175 spring pigs this year and he has some good ones. They are sired by King of Cols. and out of an Orion Chief sow, and Big Bone Climax, a son of Crimson Climax. Mr. De Young expects to have a splendid lot of boars for his fall trade and you will hear from him later in the season through The Homestead. He has always had good and well-bred boars at the head as well as a lot of good brood sows. When in his neck of the woods drop in and inspect his herd and he can fit you and with a good pig later in the season.

H. D. Clore breeds polled and horned Hereford cattle and advertises them on page 23. Under date of June 6th he writes: "My little advertisement in The Homestead is bringing lots of inquiries for polled Hereford bulls and I have made several sales. Among them was a fine calf to J. C. Kinney, Oakley, Iowa. I also sold an outstanding young bull to T. A. Norman, Russell, Iowa. Each of these gentlemen has a fine herd of horned Herefords. I still have some splendid young bulls that would suit the most discriminating buyers. It is only necessary for customers to see these animals to be convinced." Address inquiries for information or prices to H. D. Clore, Lucas, Iowa.

A public sale of fifty head of imported Hereford cattle will be made at Aurora, Ill., October 24th, by George Leigh and William George. The cattle are now in quarantine, having landed May 20th. This is the first importation of Herefords that has been made for ten years, and it is significant that Mr. Leigh made the last importation in 1893. Included in the present importation are fourteen head of bulls, among them Farmer, considered by thoroughly competent judges to be the best two-year-old Hereford bull in England this year. In addition there are thirteen yearling bulls ranging in age from twelve to sixteen months. Since 1881 Mr. Leigh has imported over 1,700 head of Hereford cattle to this country. In the present importation he is associated with William George, the well-known banker and stockman of Aurora, Ill.

On page 24 of this issue of The Homestead will be found the advertisement of Fred Galliers, Albia, Iowa, offering two Black Norman stallion colts for sale.

The Walker Remedy Co., Lamoni, Iowa, have for a number of years been making patient investigations into the merits of different preparations adapted to the use of poultrymen. A result is Walker's Walko Remedy, a cure for dirrhoea that is so deadly where large numbers of young chicks are raised. This remedy is so thoroughly effective that it has received the unsolicited commendation of hundreds of farmers who have absolute faith it its merits. One lady in particular writes that though she used but two packages she raised 300 chicks without having lost a single one. See the announcement on page 11 and forward orders to the Walker Remedy Co., U-8, Lamoni, Iowa.

Holstein Bull for Sale.

A fourteen-months-old Holstein bull eligible to registry will be sold for $50, if taken within the next few days, by Ed Freese, Nora Springs, Iowa. This is a growthy calf and comes from good ancestors. If interested write Ed Freese, Nora Springs, Iowa, mentioning The Homestead.

Smalling's Durocs.

S. O. Smalling, Laporte City, Iowa, has about sixty nice spring pigs sired by Chief's Model 2d, Prince of Wonders and a son of Col.'s Prince. He expects to hold a bred sow sale in February. Mr. Smalling is working along right lines and has been buying the right kind of seed stock.

W. C. Seybold, the Auctioneer.

In a recent interesting letter received from W. C. Seybold, Harvard, Neb., an auctioneer of ability and a man that either sells or buys pure-bred stock, he says the following among other things: "Salesmanship is an art, but ability to buy wisely is genius. Don't let opportunities slip away like last winter's snow, but arrange to sell your stock now, or if you need to replenish your herds, the time is equally opportune. The breeders that do not try for better things never find them. This is not a bid for business on a bubble guarantee, but I do conduct sales of any kind anywhere, and I have always given satisfaction." If interested, write Col. W. C. Seybold, Harvard, Neb.

John Hansen's Durocs.

In a letter just received from John Hansen, Herman, Neb., he says: "I have forty spring pigs and they are coming along fine just now and I expect to make them look like they will be worth the money this fall. I have not got a runt in my bunch and this is going some for this time of the year. They are sired by Sunbeam Lad and Nebraska Col. The former boar is a son of Gold Dust Boy by Gold Dust Wonder, he by the Iowa State Fair grand champion boar, Gold Dust Jim. I also have a nice bunch of fall yearlings and they are also doing well." It will be remembered that Mr. Hansen went out to the Nebraska State Fair last fall, the first time he ever showed, and he came away with the grand champion ribbon on his noted sow, Sunbeam Girl. Just keep your eye on Mr. Hansen as he is going to have something for the boys this fall.

Ladoux Chester Whites.

Those of our readers who are interested in Chester Whites will be pleased to know that F. W. Ladoux, Spirit Lake, Iowa, has eighty spring pigs that he is bringing along for his fall trade. They are sired by Gold Coin 21349, a splendid boar he is using at the head of his herd. There are forty of these that are sired by this hog. He has three litters by Gold Dollar and the remainder are out of sows he purchased at the various sales last winter. One of these litters is sired by Ike and is out of the second highest priced sow in the John Holst sale last winter. Another litter is out of a granddaughter of Nora 2d, the champion sow at the Iowa State Fair. Mr. Ladoux has fifteen fall boars that are sired by Gold Coin and there are some right good ones among the bunch. Quite a few of these will make good herd boars and he is offering them at $35 and $40 as long as they last. It is a good time right now to send him an order for one of these boars and you will be sure to get a good one. When writing him kindly mention The Homestead.

W. E. Epley's Polands.

Some of the best state fair propositions that we have seen for a time we encountered on the Epley farm, Diller, Neb., a few days ago. Mr. Epley has been buying and breeding a lot of good Poland Chinas for the past several years, and just now he has some that are good. A senior yearling sow that is the equal of anything that we have seen in a long time is here. She is mighty big, and we know that she has made an immense growth since in the winter. If she keeps it up and carries it as well as she is now doing she is bound to make it interesting for some one at the fair this fall. She is sired by Big Chief, an extra good breeding boars by Hamilton & Son's noted boar, Choice Goods. Her dam is a daughter of Hutch Hadley, one of the best individual boars ever sired by Big Hadley, and the dam of Hutch Hadley was Lady Hutch by the noted Big Hutch. This is a line of breeding that is not so well known as some, but we doubt very much if there is anything in the country bigger and better than this pedigree outside of the Big Hadley cross that is in it. Some under-year sows and boars are sired by Hutch Hadley, also a few by Expanson Chief, and they are also extra big. They will bear inspection this fall, and remember that Mr. Epley will make a sale on November 6th if all goes well.

Poland China Bred Sows.

Anyone wanting some good Poland China bred sows for fall farrow can buy them of C. M. Peterson, Dunlap, Iowa, and he has some good ones for sale. He can spare about ten of these and they are bred to Henry Bar Bone, one of the best boars he has ever owned. Write him about these sows and send him an order.

A Good Scotch Bull for Sale.

On page 21 Powell & Son, Linn Grove, Iowa, advertises a good, young white Scotch bull for sale sired by the Iowa State Fair champion, King Cumberland 2d. He is out of a daughter of the noted show bull, Ceremonious Archer, and he is a royally bred Miss Ramsden. He will make a splendid herd bull for some enterprising breeder. Write the Powells about this bull at once or go and see him.

Choice Hereford Bulls.

On page 23 A. Spooner & Son, Mondamin, Iowa, advertises fifty head of choice young bulls for sale and they are good. We had the pleasure of looking these bulls over last week and found them in excellent condition. Their breeding and individual merit will entitle them to a place at the head of the best of herds. Anybody wanting a right good Hereford bull, or a car load, should lose no time in going to see these bulls. When writing him kindly mention The Homestead.

Angus Bulls in Chicago Sale

Late entries for Manager Judy's sale of Angus cattle at Chicago next Wednesday, June 18th, bring the total number up to sixty head, and included are seventeen head of bulls that should command attention. These bulls include a number of highly bred herd-heading propositions as well as some extra strong steer getting bulls. The very choicest blood lines are represented in the offering, and buyers should not overlook it. Remember the day, next Wednesday, June 18th, at Chicago.

Duroc Jersey Fall Boars.

A good lot of fall boars and some good fall sows are advertised for sale by L. L. De Young, Sheldon, Iowa, on page 22. These are sired by Crimson Advance, a son of Advance 5th. He is pricing these at $25 and $35 and will sell pairs or trios as his customers desire. He has 100 head of spring pigs and these are sired by Model Chief I Am, a son of Model Chief Jr., by old Model Chief. Send Mr. De Young an order for some of these boars or sows as you desire, and kindly mention The Homestead.

Carriage Quality.

It is a generally accepted fact that in the purchase of any tool, machine or implement it is a good policy to buy those of high quality. This argument is especially true in the case of carriages. The Kratzer carriage advertised on page 8 is a vehicle which is built for the purpose of giving special service to the buyer. Every article of material is selected with particular care and in its construction attention is given to every detail so that the finished product is as good as it can be made. Fee catalog and price list may be obtained by writing to Kratzer Carriage Co., 104 West First St., Des Moines, Iowa.

Good Fall Boars for Sale.

On page 23 F. E. Jackson, Hurley, S. D., is offering some very choice Poland China fall boars for sale sired by Dale's Expansion and out of daughters of Big Tom, Big Victor and Golddust Hadley. The sire of these fall boars is regarded as one of the greatest boars today in South Dakota, and the dams of these pigs were the tops of the most prominent sales throughout the West. He is offering some that are good enough to head any herd and at reasonable prices. He also offers some good sows bred to Dale's Expansion for fall litters. This boar, Dale's Expansion, was the best fall boar that Henry Dorr sold in 1911, so you may know he is a good hog. Write Mr. Jackson at once about these boars and sows and please mention The Homestead when doing so.

Angus Sale at Chicago, June 18th.

Fifty head of well-bred and well-made Aberdeen Angus cattle will be offered at public sale at Chicago, Wednesday of next week, June 18th. These cattle have been carefully selected for this offering by M. A. Judy, the veteran breeder, showman and expert judge and sales manager, and the buying public can rest assured that the cattle will be the sort that are satisfactory in every way. Representatives of the Trojan Erica, Blackbird, K. Pride, Queen Mother, Heatherbloom and other popular families, are listed in abundance, all consigned by breeders of experience and established reputation for producing the very best class of cattle. The time was never more propitious for buying beef cattle than right now. The demand is keen and the supply is short. Such conditions show conclusively that the breeder of beef cattle is coming into his own again, and that for many years to come prosperous conditions are bound to prevail in the cattle breeding and feeding lines. Such being the case it is the wise man who takes advantage of conditions and puts himself in shape to participate in this prosperity, which is not coming, but is here. A number of exceedingly good young bulls are cataloged for this sale, among them some herd-heading prospects and a number that are just what the corn-belt farmer needs for the siring of the market-topping steers. This will be the only offering of Angus cattle east of the Mississippi river this spring, and the buying public should not overlook it. The demand for cattle is so strong that there are not many available, and when

the opportunity is afforded to place public sale values upon a strong lot it should not be passed by. Remember the date, Wednesday of next week, June 18th, at Chicago. Any desired information and copies of the catalog can be secured by addressing M. A. Judy, West Lebanon, Ind.

Ficke's Durocs.

Hugh M. Ficke, Long Grove, Iowa, has an excellent herd of well-bred Duroc Jerseys. He has 140 spring pigs largely sired by Premier Gold Bond, a grandson of that great sire, Golden Rule. He has one nice litter by Cherry Chief, out of a Proud Col. sow, and other litters by Royal Col., Professor 2d, S. E.'s Premier, Eclipse and B. & C.'s Perfection. There are ten fall boars by Premier Gold Bond and they are a big, stretchy, smooth lot. A little later in the season Mr. Fricke will offer boars for sale to our readers and we want to say he will have the kind that will suit. They will have the size, bone and quality that breeders like.

Record Price for a Draft Colt.

There was recently sold in the East St. Louis horse market the highest-price three-year-old draft gelding ever sold in that market. This colt weighed 2,140 pounds, was sired by the imported Shire stallion Milestone Harold, imported by Trumans' Pioneer Stud Farm, Bushnell, Ill., was bred and raised at Paris, Ill., and sold by Holland-Nugent-Maxwell Bros. Company to J. G. Truman for the record price of $625. This gelding will be shown at the leading state fairs and horse shows the coming fall. As evidencing the keen demand for good graft geldings it may be stated that at the same date seventeen head consigned by Halstead Bros., Tecumseh, Neb., sold in the auction for $5,012.50, an average of $295.

Porter's Duroc Jerseys.

Writing under date of May 31st, J. C. Porter, Ogden, Iowa, breeder of Duroc Jersey hogs, has the following to say: "I have still for sale a few more large, vigorous boars of October farrow. They now wegh from 175 to 200 pounds each, not fat, but just in fine breeding condition. I will send these boars out by express, charges prepaid, at $40. This offer holds good only for the next thirty days. I have also ten very choice open gilts for sale sired by R. J.'s Chief, a grandson of Ohio Chief and out of dams by Crimson Wonder Again and High Col. These gilts weigh from 225 to 250 pounds. I have eighty spring pigs that are coming along in fine shape. They are the get of R. J.'s Chief and King Gano." Requests for information should be addressed to J. C. Porter, Ogden, Iowa.

Gilbert Johnson's Poland Chinas.

With ninety spring pigs and a good bunch of fall gilts, Gilbert Johnson, Osceola, Neb., is in better shape than ever to take care of his Poland China trade. Mr. Johnson made one of the real good Poland China sales of Nebraska last season, and those that purchased got extra good values in most cases. Mr. Johnson has used good-breeding material in his operations all the way through and his herd at present consists of as good a bunch of big sows as most anyone can show. The present herd boars are Hather's Hadley 2d, the sire of the great show boar, Hadley Over, and Choice Orange by Big Orange. These boars are both breeding very nicely. Hather's Hadley 2d was a proven sire when Mr. Johnson bought him, and Choice Orange is coming up to all expectations. Mr. Johnson will hold a fall sale, October 11th, and at that time will put up an offering that will be deserving of the attendance of the good Poland China breeders. Watch The Homestead for further announcements.

Peter Mouw's Great Sale.

The big-type Poland China breeder who is going to want a herd boar the coming fall will be particularly interested in the forthcoming sale of Peter Mouw, Orange City, Iowa, on June 25th. It is full of herd-boar propositions, especially for those breeders who are wanting the large-type kind. In last week's issue we told our readers of the many herd-boar propositions he is listing for this sale, and if you are wanting a big boar, bred along Peter Mouw's strictly big-type lines and backed by his most noted large-type strains, then you will be interested in this sale. Eight head of these boars will be sired by Big Jumbo and they will all be over a year and under three years of age. He has been carrying these boars along with a view of making herd boars out of them and now that he is going to make a trip abroad with his wife he concluded to make a midsummer sale and is therefore cataloging them for this occasion. Oakwood Jumbo, Square Jumbo and Tecumseh Jumbo will all make extremely large boars and great herd headers. The same can be said of Iowa King, Younb Jumbo, Chief Price, Long Jumbo and Long Orange. There are a lot of other good big boars in the Mouw offering, and the catalog will tell you all about them. It is possibly the greatest line up of strictly large-type boars that Mr. Mouw has ever sold in a public sale and it is seldom, if ever, that so many herd-heading boars are offered at one time. Behind these boars is the blood of the most noted strains in the Mouw herd, so that when you buy one of these you get the blood that has been making the big-type hogs famous. He is selling Great Lady D. in this sale. She is a two-year-old sow and is a daughter of Great Wonder. She is one of his best brood sows and she will be bred for fall litter. He well also have a number of his best young sows bred for fall litter and the choicest of his fall sows will sell open. It will be a great place to buy Peter Mouw's most famous big-type Poland Chinas, the kind that has put him in the king row as well as many of the breeders who have been buying his hogs for the past number of years. Write for his great catalog and kindly mention The Homestead. Mr. M. T. White will attend this sale and will attend to any bids sent in his care. See page 23.

Swale's Jerseys.

C. J. Swale, Fredericksburg, Iowa, has a good herd of Duroc Jerseys headed by the prize-winning boar, Chief Select Jr., and C. J.'s Chief. Chief Select Jr. is a son of the noted sire, Chief Select, and has proven an excellent sire. Mr. Swale has used this boar three years and owing to the fact that he has several daughters in the herd Chief Select Jr. would be sold at a very low price for such a good boar. Mr. Swale has sixty spring pigs by Chief Select Jr., C. J.'s Chief, by Notcher F., and Bill Wonder by Crimson Wonder Again. Mr. Swale has decided not to show this year and will sell a three-year-old show sow sired by Model Wonder. She is in fine form to fit. Four fall boars by Bill Wonder and C. J.'s Chief are for sale. Watch this paper for future announcements from this herd.

Reubel's Bros.' Polands.

Few herds of Poland Chinas in the state of Iowa has stood the test of time better than has that of Reubel Bros., Marathon, Iowa, and they are still breeding good hogs just the same as they did years ago. In earlier days these breeders were located at Rockwell City, where they founded one of the best herds in the state, and later on bought the old Stangland farm at Marathon, and since that time have been gradually adding to their herd until today it is looked upon as one of the best herds in the Northwest. These breeders have 130 head of spring pigs this year and they are sired by Chief Again Price, Price's Giant and three litters by Peter Mouw's herd boars. The first-named boar is owned by Reubel Bros., and M. P. Hancher, and he was one of the best prize-winning boars seen at the state fairs in 1911. He is a son of that noted old boar, Chief Price Again, and his pigs in this herd look very promising. Another boar in this herd that is siring some good things is Price's Giant, a boar bred by Henry Dorr, and some of the very best brood sows these breeders own are daughters of his hog. They also have some good pigs by Reubel's A Wonder, a son of old A Wonder, that they formely owned in the herd. These breeders will not hold a fall sale, as they are figuring on selling their boars at private treaty, but they will hold a sow sale as usual the coming winter when they expect to have a great line-up of the best sows that will be sold in the Northwest.

Vanderslice Bros. Herd of Chester Whites.

The writer recently visited the Vanderslice Bros., Cheney Neb., and wish to report a still better lot of pigs, both in number and quality than these gentlemen had a year ago. This herd has always been a high-class one, and today it is a little better fixed than ever. One of the most interesting things about this herd just now is that the old herd boars, All O. K. is still at the head and breeding better than ever. He is ten years old, and has sired a wonderful lot of high-class boars and sows. Probably no sire in the West has done so well, and he looks good for some time yet. The younger boar is Fancy Goods, a Stevenson-bred boar and he is mating well on the All O. K. sows. Some new sows have been added from time to time, but they rarely compare with the older ones sired by the old boar. Among the many that do show up well, however, is a gilt from the Satre herd of Jewell, Iowa. She is real nice and raising a bunch of nice pigs. Vanderslice Bros. are ready to ship boars at any time from now on, and early orders will, of course, receive the choice selections. When writing mention this paper.

E. T. Ketchem's Poland Chinas.

Among the newer Poland China herds of Nebraska the writer wishes to mention the one owned by E. T. Ketchem, Shickley, Neb. Mr. Ketchem has been breeding Polands for about three years and has spared no means to get the extra good ones. He has bred pure-bred hogs for a number of years, and is familiar with the right principle for getting the good ones. His herd boars have been of the extra big sort, and his sows are of the same kind of stuff. Progressive Monarch by the old Schaldecker boar, Nebraska Boy, by the noted Long Boy by the Gritters-bred boar, Longfellow, is the sire of most of the spring pigs. This boar was sold recently, and was rated at 1,000 pounds. The writer never saw him, but he had done service in two of the best herds of that section of the country and was well liked by all the breeders of that section. Some other pigs are by Mastodon King by King Mastodon Jr. King Mastodon Jr. was sired by Wheeler's old boar, King Mastodon, and was used by J. A. Schaldecker, Grafton, for a couple of seasons and is now in the Ed Hickey herd. These two boars have given Mr. Ketchem a good line of stuff, and coming as they do from a sow bred that is practically of the same line of stuff, coming from Blackburn's herd that was strong in the blood of Longfellow M. by Longfellow 2d. Mr. Ketchem will offer the spring boars at private treaty and will book orders for them from this time on. Mention The Homestead when writing. We forgot to mention that Mr. Ketchem has one extra choice fall boar. He is a bit on the blocky order and he is priced low. He is real good not to head an extra high-class herd we do not mean, but yet a choice boar.

Freese Has Good Durocs.

Ed Freese, Nora Springs, Iowa, has a herd of Duroc Jerseys that he can be proud of. He has 110 spring pigs that are looking fine. They are sired by Sensation Wonder, Nebraska Crimson, Successor and King's Bud. His main herd boar is Nebraska Crimson, a son of the good breeding boar, I Am A Perfection Wonder, and we want to say Mr. Freese is fortunate in having such a good sire at the head of his herd. Mr. Freese will sell King's Bud by King Kant. He is a yearling boar of good length, smooth and has a good set of feet and legs. Fifty dollars will buy this boar, and he is a bargain at that price. Mr. Freese has a good bunch of sows sired by King of Cols. II, Kelly's Pilot Wonder, Chief Select, Golden Model II, Good E Nuff, Harding's King of Cols., Ohio Chief II, and Muncie Money Maker. Watch for Mr. Freese's advertisement in later issues of The Homestead.

Pratt Offers Yearling Duroc Boars.

M. S. Pratt, Frederika, Iowa, has for sale four yearling and two fall Duroc Jersey boars. Two of the yearlings are sired by the 1911 International grand champion boar, Volunteer, and out of M. C.'s Dream II by Chief's Col. and she out of the $700 grand champion sow, Mc.'s Dream. There is one yearling sired by Model Wonder and one by Proud Ohio Chief out of a B. & C.'s Col. sow. The two fall boars are sired by Pratt's Leader, a Crimson Wonder-bred boar. The fall boars have lots of size and are of good quality. These boars are priced worth the money and they are bred as good as any in the land. Mr. Pratt has over 100 spring pigs, among them a good litter by Golden Model II out of a Chief Select sow, a litter by Cherry King, dam by Proud Col., others by Crimson Ohio Chief, Crimson Chief II, I Am A Volunteer and Ohio Chief Wonder. In this herd are daughters of B. & C.'s Col., Golden Model L., Volunteer, Chief Col., Mc.'s Dream, Chief's Col., Proud Col., Proud Ohio Chief, Iowa Muncie, Col. Advance and others. This is enough breeding to suit anyone. If in need of a boar see page 22 and write Mr. Pratt mentioning The Homestead.

Barr & Son Offers Good Boars.

On page 21 will be found the advertisement of W. H. Barr & Son, Elliott, Iowa, who are offering some good Poland China boars for sale. They write us as follows about them: "As we have more herd boars than we have any use for we have decided to sell Mastodon Prospect. This is the good boar I had at Villisca, but since the death of Mrs. Barr and the breaking up of my home at Villisca, the boys and I have decided to sell this boar. We are doing business from the farm at Elliott now, and owing to the fact that we have other herd boars there is the only reason we have decided to sell this splendid hog. He is a son of B.'s Mastodon and his dam is Long Prospect 2d. In ordinary flesh he will weigh 550 pounds, and the pigs we have by him are looking fine. We are also offering seven good fall boars and some choice sows bred for fall farrow. We are also booking orders for spring boar pigs and we have 100 head to select from." Write W. H. Barr & Son, Elliott, Iowa.

Hazford Place Herefords.

Hazford Place comprising one of the largest tracts of land in Kansas devoted to the production of pure-bred cattle is owned by Robert H. Hazlett, Eldorado, Kan. The modern type of Hereford reigns supreme on this ranch and first consideration is of the cattle and their welfare. Good cattle form the breeding herd and better ones are being produced. A ride over the broad pastures and a close inspection of the mature cows leads one to think further improvement impossible, but on returning to inspect the youngsters one sees that a great work is being done in molding even more superior Herefords. Mr. Hazlett ranks among the constructive breeders, he loves good cattle and his happiest moments are passed among his pets "the white faces." The herd was founded with superior females, headed by the two great breeding bulls, Beau Beauty and Beau Brummel 10th and today one finds a great string of cows by these bulls in the herd. Beau Brummel 10th probably ranks among the greatest of the breeds' sires of females, that are great producing cows and none are for sale from Hazford Place. In order to further perpetuate and stamp the type Mr. Hazlett later secured Beau Santos another son of Beau Brummel and Publican by Paladin and their get show that no mistake was made. Caldo 2d by Printer, a former herd bull and Beau Sturgis 2d by Beau Brummel 10th are also in service. They with the 150 breeding cows all of the richest and strongest Anxiety breeding form one of the choicest practical working herds to be found. The writer was particularly impressed with the character, fleshing quality and scale found throughout the herd and it is from such herds that bulls that make good are secured.

Ellerbroek's Poland Chinas.

A representative of The Homestead recently visited the herd of Mrs. Peter Ellerbroek & Sons, Sheldon, Iowa, and found them with ninety head of good pigs. Our readers will remember that Mr. Ellerbroek died last winter and the wife and boys are going right on with the herd. Their present crop is sired by their former well-known herd boars, Ellerbroek's A Wonder, A Wonder A (a son of Fesenmeyer's A Wonder), Peter's Jumbo, Ellerbroek's Wonder and Longfellow Again. They will not hold a fall sale, but will hold a winter brood sow sale as has been usual with them. They will have some good boar pigs for sale the coming fall sired by the above-named boars. They will book orders for a sprin- pig at any time from now on. When writing them kindly mention The Homestead.

Quiet Dale Angus.

Last week the writer had the pleasure of visiting Quiet Dale Farm, owned by H. J. Hess, Waterloo, Iowa. We found his Angus herd in nice breeding condition, headed by the two Trojan Erica bulls, Egbert and Edale. Edale is a son of Earl Eric of Ballindalloch and topped the Escher sale of 1911. His calves are showing up in fine shape. Egbert is a three-year-old bull by Peter Sterling, and is doing good work in the herd. The herd numbers around 125 head, forty of which are promising young calves. Blackbird, Trojan Erica and Pride are the leading families represented and among the breeding matrons are a number that were winners in the Quiet Dale show herds of past years. Quiet Dale is well known as a place where prime beeves are fed and at the present time 120 Angus steers are on feed. Lt is well worth while to inspect this plant and Mr. Hess is glad to entertain anyone interested in the production of pure-bred cattle or high-class steers.

George Glynn Offers Sows.

On page 23 will be found the advertisement of George Glynn, Sioux Rapids, Iowa, who is offering some good, big-type Poland China sows and a good herd boar for sale. In a recent letter he has the following to say about them: "I am offering twenty of those good sows that will farrow all the way from June 15th to August 1st, and they are bred to Mouw's Big Sioux, a son of Big Black Bone, and his dam is Lucy by Surprise Wonder 4th. These sows that I am offering are sired by Bright J., Youngfellow and Crow's Kind. Some of these are yearling and some are two year olds. These are choice sows, but I have too many sows on my place and I am selling some of the very best I have in the herd. I have a few open sows for anybody that may want them. I also have two choice boars that I have been holding, and I have decided to sell them. They are sired by Smooth Jumbo and Alfonso. I have a very heavy-boned boar for sale by Smooth Jumbo and he will make a good herd boar. The others I am pricing at $40. The sows I am not afraid to send anywhere as I know they will please. I am asking from $50 to $75 for these and they are as good bargains as were ever offered. I am offering a good herd boar for sale in Smooth Jumbo and I am pricing him at $200 and he is the best bargain that can be had at the present time. He is a son of Crow's Kind, he by Big Orange and he is out of a dam by Wintermute's Jumbo. Just tell the boys I am offering some splendid sows and some good boars and I am pricing them where they will sell." Write or go and see Mr. Glynn and get some of those good bargains he is offering for sale.

Albert Smith & Sons' Poland Chinas.

One of the really choice herds of Nebraska type Poland Chinas of that great hog-breeding state is owned by Albert Smith & Sons, Superior. These gentlemen have been at the business for about fifteen years, and today the herd is strong in the blood of those that have made for material advancement. Smith's Big Hadley, one of the highest priced sons of the great and only Big Hadley did service in this herd for about four years. Many of his daughters are still in the herd and in other leading herds of the country, and they have absolutely made good. Another very valuable boar in the herd is Jumbo Jr., by Nebraska Jumbo. This is to our way of thinking one of the most valuable sires within the state. His get are always in demand, and they mature into the very finest kind of brood sows and the boars are also good, a feature that many great boars are lacking in. Some will sire good boars and others good sows, but it is rarely that a boar will sire those of both sexes that are really toppers. We think that Jumbo Jr. does it. A still newer boar in the herd is a son of Big Victor. He is Victor's Prospect. We did not like this boar so well a year ago, as we did the older boars of the herd, but he is certainly siring a great line of stuff, especially gilts. Another boar from the Simpkins herd was used last year, a former state fair winner, but his pigs are not so stretchy as those by the other boars, and do not appeal to the writer quite so strong, but they would certainly look well in herds that have not so much size as the Smith herd. Smith & Sons will sell a very choice lot of boars in the fall sale that will be held on October 29th. Herd-boar prospects are on hand in plenty right now. We forgot to mention that these gentlemen have a litter of four by the cham-

NEXT WEEK'S SALE PROGRAM

Ayrshires, William Galloway, Waterloo, Iowa.

pion Columbus. The litter is not large, but the pigs are very good. Should you write Smith & Sons, kindly mention this paper.

Held Bros. Offer Bulls.

On page 22 Held Bros., Hinton, Iowa, advertise a choice lot of young Scotch and Scotch-topped bulls for sale. These are sired by Victor of Wayside 2d, a son of the well-known show and breeding bull, Money Musk, and Sir Valentine, a son of Gloster Valentine. They have some very choice Scotch bulls that are good enough to head any herd, and some good Scotch-topped bulls that many breeders and farmers can afford to buy. These breeders are very reasonable in their prices on these bulls and there are certainly some good bargains among the bunch. They also have some splendid German Coach stallions that they will sell. They have more good German Coach stallions and mares, most of which are imported, than any other firm in the West. They can spare a few good young stallions and they are pricing them where they will sell. These breeders have 200 Poland China spring pigs and they will be right for the boar trade the coming fall. They also have some good Shropshire sheep for sale. At the present time they are desirous of selling the young bulls and if any of our readers want a bull it will pay them to visit the herd of Held Bros. and make a selection. When writing them kindly mention The Homestead.

Low Farmers' Vacation Fares.

Farmers who wish to make an extended vacation trip may serve their purpose by taking advantage of the low rates offered by the Canadian Northern Railway in the announcement which appears on page 5. The prices quoted are unusually liberal even for vacation time railroad fares. In addition to that they give the vacationist an opportunity to inspect the splendid lands thrown open by the Canadian Northern Railway and to be obtained at an insignificant cost to actual settlers. The prices named in the advertisement are round trip figures and good for twenty-five days with stop-over privileges. Stops may be made at Chicago, Des Moines, Minneapolis, Sioux City, or any of the prominent stations named in the advertisement. As a preparation for this trip it would be well to obtain the free books mentioned in the advertisement. They give a lot of information that is of special interest and would be of much benefit to those who make the trip. Send for these books to R. N. Bell, General Agent, 66 West Adams St., Chicago, Ill.

Grant Lynn's Durocs.

We recently visited the herd of Grant Lynn, Spirit Lake, Iowa, and found him with eighty good spring pigs and a lot of good fall boars and sows. His old boar, Evergreen Chief, looks good to us and he is one of the best boars today in northern Iowa. He is one of the largest and best sons of Charlie Veak's old High Col. and he is out of a daughter of Model Prince. He has proven an unusually good sire and some of the best things he has in his herd are by this hog. He has two other good boars in G.'s Crimson Wonder, a son of Crimson Wonder Again, and Lynn's Golden Model, a son of Golden Model 31st. His spring pigs are sired by these three boars and he will be well fixed for the fall trade. He has nineteen head of fall boars and we have not seen a better bunch this spring. These are all sired by Evergreen Prime and King's Defender. There are a lot of really choice herd boars among these and he will have them at Des Moines if nothing happens them. He might be induced to sell some in the meantime and the man that is looking around for a herd header will do well to drop in and see him. Later in the season we will tell you more about what he will have for sale.

G. A. Kissinger's Polands.

A crop of very choice pigs, although somewhat limited in numbers, is being raised by G. A. Kissinger, Milford, Neb. Mr. Kissinger has a herd of Poland Chinas that the writer is glad to recommend to readers of The Homestead. He has in very truth one of the very choice herds of the great hog-producing state of Nebraska. His sow herd is one of the best we have seen to date, and as to boars, he is lined up in a splendid way. He has the old boar, Hillcroft Model, and last fall he purchased the futurity boar, Big Martin, of Mr. Lonergan. Big Martin is coming along nicely. He will have a hard job equaling the older herd boar, but he may do it. At any rate, he is doing well at this time. Big Martin is by Big Tom, the 1911 champion at the Nebraska State Fair. Big Tom was bred by Thos. A. Shattuck and was sired by Momentum, by Pan Ex. The dam of Big Tom is Anna Belle by Belle Metal. A full brother to Big Tom was the top boar in Shattuck's last fall sale and went to head the herd of W. J. Graham, Howard Lake, Minn. We simply cite this breeding to show that Big Martin has it in him to make a great boar. However, Hillcroft Model is one of those big, heavy-boned, smooth boars that one cannot help but like. He is also the sire of the greater part of the excellent herd of sows that we just mentioned, and it is really as a sire that he rates high. Mr. Kissinger has a few fall boars, real good ones that he can spare, and he will have a nice bunch of spring boars a little later on. Mr. Kissinger has a litter out of a sow bought in the Pfander sale that are looking good. They are out of a daughter of Long King and are sired by King of Wonders by A Wonder. This boar is rated very highly by Pfander & Sons, and these pigs look like they would make good hogs. Keep the Kissinger herd in mind and if attending the Nebraska State Fair see his exhibit. The junior champion sow at the state fair a year ago was bred and shown by Mr. Kissinger.

Cushman Mfg. Co., 804 N. Third, St. Joseph, Mo.

Hurless' Chester Whites.

On this page Harry Hurless, breeder of Chester White hogs, Ogden, Iowa, informs our readers that he has now for sale a number of excellent fall boars weighing from 150 to 200 pounds each. They are the get of Mahaska Boy, he by Grand Leader and representing a prize-winning strain of blood. Mr. Hurless also has a large number of spring pigs which are now old enough to ship. These are by three different sires. He believes them to be the best lot he has ever raised. They are from littlers of eight to fourteen. Write for particulars.

Rude & Son's Durocs.

The firm of A. Rude & Son, Moorehead, Iowa, report 130 spring pigs and a number of good fall boars on hand. They are using three good boars in their herd, viz.: High Col., a son of W. B.'s Model Chief and he was a first-prize boar at Des Moines, Hamlin, Huron and Sioux City last year and he is doing great work for them as a breeding boar. Then there is old Iowa Col., (a little better than a half brother to Col. Willetta), and he has also been a splendid breeding boar in this herd. Rude's Crimson Wonder I Am, is a son of that old state fair champion, Crimson Wonder I am, and he is getting them some good pigs. They will not make a fall sale, but they will make a winter sale as usual at which time they will have some good sows to offer the boys.

Farver's Big-Type Polands.

Among the many good herds of large-type Polands in northwest Iowa is that of E. E. Farver, Ocheyedon, the owner of that 1,000-pound boar, Farver's Goliath. This hog is a son of Chief Price Jr., and is out of Model Crow and he is a boar that will beat the 1,000-pound mark with a little meat on him. There are few that have anything on this boar when it comes to size and smoothness. He is assisted by E.'s Defender, a son of Big Defender and the most of his spring pigs are sired by these two boars. He has a choice lot of full sows sired by Farver's Goliath, that are all right, and he is holding a lot of these for brood sows in his own herd. His spring pigs are doing well and he is going to have some nice boars for his fall trade, and there will be some splendid herd boars among these. The Farver herd has become recognized as one of the best today in northwest Iowa. This fall when you are going to want a boar pig remember the Farver herd, because he will have something that all the boys can use.

Powell & Son's Short-horns.

One of the best Short-horn herds today in northcentral Iowa is owned by H. H. Powell & Son, Linn Grove, and it is made up almost entirely of Scotch cattle. The two bulls at the head of this herd would be a credit to any of the more noted herds in this country, and when you look this herd over you will have ample evidence of their ability as breeders. Red Archer 278105 is the senior bull in service, and he is a son of that noted champion, Ceremonious Archer, a bull that Senator Frank Lowden thought enough of to pay $5,000. He is unquestionably the best son of Ceremonious Archer that has been used in any western herd. His dam is Pure Grove Meldred 3d, a daughter of Imp. Marquis of Zenda, regarded as one of the greatest show and breeding bulls used in Canada the past ten or twelve years. This bull tips the scales at 2,300 pounds in breeding condition and while a large bull is low set and close to the ground and he has proven a most excellent breeding bull in the herd. A great many of the females in the herd are daughters of Red Archer. Their other bull is King Cumberland 2d, a junior champion at Des Moines in 1911, and he is a full brother to the grand champion bull, King Cumberland, that went to the Elmendorf Farm at $5,000. Both of these noted bulls were bred by the Powells and they still have Miss Walpoole, the dam of these two noted winners on their farm. There are about ten or twelve daughters and granddaughters of Miss Walpoole in the herd, together with her great prize-winning son, King Cumberland 2d. They have reduced him in flesh since he was at Des Moines, but he still looks the same to us and were they to take him out again it would take a good one to beat him. As a breeding bull he is doing wonders and his calves now on the place are as good as you will see anywhere. They are uniform, well developed and are of the type that the most progressive breeders are now looking for. In other words, this great son of Cumberland's Last and Miss Walpoole must be regarded as one of the best bulls used in the West today. After you look his calves over in the Powell herd you will have to give it to him. The older matrons now doing service in this herd are daughters of such well-known bulls as Fitz Eustace and old Red Knight, Imp. Gay Lathario, Imp. Fancy's Pride, Superb Goods and other noted sires and represent such well-known Scotch tribes as Duchess of Gloster, Miss Ramsden, Lancaster, Early Bird, Bonnie Bell and other popular tribes. Just now they have a good yearling white bull for sale in Lindwood Cumberland, a son of King Cumberland 2d, out of Miss Ramsden by Ceremonious Archer. His mother is a half sister to Miss Walpoole and he is a well-bred Miss Ramsden. He is a splendidly balanced bull from end to end and will make a 2,200-pound bull when matured. Some breeder who is looking for a right good young bull to head their herd should go and buy this fellow. When writing Powell & Son kindly mention The Homestead. See this page.

ANIMALS AND THE CHILDREN.

To the Editor of The Homestead:

It hardly seems that it would be necessary to remind parents that they should impress it very forcibly on their children that they must never, under any circumstances, fasten the leading strap on an animal to themselves. Yet I have known of children who were dragged to death by frightened animals because they had the strap fastened to their waist. It is almost as bad to have it wrapped around their hand, for in an emergency there is seldom time to unwind it and the results are as bad as if it was fastened to the body.

I grew up on a farm where several horses were raised, and was out among them from the time I could navigate. They seemed to know us and we were never hurt by them. I say we, I mean the other members of the family, but we were taught that while things were this way ordinarily, we must always avoid unnecessary risk.

Another thing that should be kept close watch over is the treatment of the sheep. It is very funny for some men to double up their fists and teach a lamb to butt it so with his head. One may have lots of sport with him, but that lamb grows up and does not forget this early training. Sometimes they acquire the habit without teaching. Anyhow, look out for them. A full grown buck hits hard, many times hard enough to knock a man down, and a child is an easy mark. I speak this from experience, for I have met them myself when a child.

We had one when I was a child who developed the habit, how, we never found out, for father never allowed them bothered. It was customary for me to go after the cattle, while my father took care of the team and he would meet me at the head of the lane. On this one night my younger sister went with me.

The cows were nearer the house than usual, so it only took us a few minutes and father, judging from the time it usually took us, ran in to see how the baby was—who was ill. As a result we came through the lane into the barnyard before he came out, and there met the flock of sheep. In a twinkling the buck was upon me. We had some stone fence, and the number of times I went head first into that fence were more than a few. Childlike, of course, I always got up on all fours, and there's nothing much more aggravating to a sheep than to have one back up to it. He would have butted me to death in a few minutes had not little sister run screaming to the house and father came flying out to see what was the trouble. As it was I lost three teeth and the number of black spots had to be enumerated with more than one figure. I well remember the next day when some children came to see me, and mamma came to the couch and told me I had better get up, how surprised I was that I could even walk.

Some will probably say that father was careless to allow us to go out among them, but he always taught us to look out and try to keep in the clear at all times, if possible. No evidence of crossness had ever been seen in any of the sheep before, and this one was thought perfectly safe. However, I learned that it was bad form to have my back toward a sheep and it is well to teach children as much, even though your sheep are as gentle as ours appeared to be.

Another thing that should be discouraged on the farm is the wearing of bright red. I well remember how we girls at home used to want so much to wear red dresses—other children did—but we were never allowed to, because of the stock. I have seen a bull, who, if he saw a red garment passing in the road, would bellow and paw and tear the ground as only an angry bull can. Turkey gobblers, too, object very seriously to red, and one often hears of a gobbler's mauling a little child.

If a grown up person carelessly allows these things to happen he alone is to blame, for he is supposed to have common sense, but it seems too bad to allow little children to be dragged to death or killed for lack of warning on the part of the parents. Of course, in the majority of cases, people do not realize the danger themselves, or there would be no delay in teaching such dangers to the children.

I could call the name of a ten-year-old boy who only last season came very near being killed by such an accident. He was holding a horse for his elder brother, at home, by the roadside. Not thinking he looped the rein around his hand. Presently an automobile flipped around the corner and was so close that the horse was so frightened before the elder brother could get to him that he began to jump and jerk and run. He dragged the boy quite a distance and, had the rein not broken, would have killed him, no doubt. Caution the little ones about such in due time, and you may save a limb or even the life of some of them.

PETER MOUW'S GREAT MIDSUMMER SALE

75 HEAD OF HIS CELEBRATED BIG-TYPE POLAND CHINAS

ORANGE CITY, IOWA, WEDNESDAY, JUNE 25, 1913

35 HEAD CHOICE HERD BOARS--35

18 tried boars and 12 to 15 fall boars. Eight sired by **Big Jumbo** ranging in age from one to two years and every one an outstanding herd boar. The **greatest offering of strictly big-type boars of herd-heading character that has ever been offered in one sale in this country.** Read the field note about these boars.

M. T. White will represent The Homestead at the sale and will care for any bids sent in his care.
AUCTIONEERS: BENSON AND COTTINGHAM.

Peter Mouw, the originator of big-type Poland Chinas.

40 CHOICE SOWS AND GILTS--40

I am selling **15 tried sows and summer gilts** all sired by my most noted herd boars and all bred to my best herd headers for fall litter. Also 25 of my very choicest fall gilts—the pick of the herd—all of which will be sold open. These are all of my own breeding and are the best I have in the herd. Write for catalog at once and kindly mention The Homestead. Address

PETER MOUW
ORANGE CITY - - - - IOWA

POLAND CHINA SWINE.

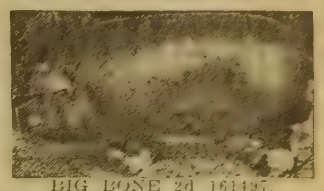
COOPER'S BIG-TYPE POLAND CHINAS. Guaranteed Cholera Immune

100 HEAD of pigs of spring farrow for sale, either sex, can furnish boars and gilts unrelated. These pigs are from sows weighing from 500 lbs. yearlings up to sows of over 800 lbs. in weight, representing the biggest blood lines and the most noted families of the breed. They are sired by Big Expansion, the 800-lb. 2-year-old son of the noted Dorr's Expansion; Big Bone 2d, weighing 900 actual pounds, and a son of the great Big Bone, Chief Leader, an outstanding 14-months-old boar weighing 500 lbs. today, and other boars of same likeness. These pigs will be ready to deliver beginning in June. They are from immune sires and dams and have received the double treatment. We will guarantee them cholera immune at

$35.00 EACH OR THREE FOR $100.00.

We will refund your money if they die from cholera. We guarantee them to be breeders; we guarantee safe delivery and record everything; have orders booked now from 9 states. If you want the biggest of the breed send us your order. We guarantee satisfaction.

W. H. COOPER - - - - - - - - - - HEDRICK, IOWA.



BIG BONE 2d 161197.

J. O. JAMES' SENSATIONAL PIG BARGAINS

I WILL book orders up to 100 head of spring pigs sired by my half-ton, **Big Orange, Ott's Big Orange,** who weighed 700 pounds on the scales just turned 19 months. **Big Sensation, Big Orange's King, A Wonder Giant** and **Gritters' Best.** All strictly big-type boars and out of extra big, long, heavy-boned matchless sows, many of them weighing from 700 to 800 pounds. These sows averaged 9½ pigs to the sow, many of them 10 to 13 pigs. I want you to write, describing just what you want. It makes it easier to pick the pig that will suit. I am pricing these pigs low for quick sale for June delivery, or at weaning time, for orders booked during May, or while they last, **$25** to **$35.** Must be bought during this month to get this price on them. Many of these pigs will be worth $100 to $150 by October. You can save from $75 to $100 by buying now. The early buyer catches the bargains. The dams of these pigs are sired by Big Orange, Big Sensation, Pawnee Nelson, Long King's Equal, Big Ex and Longfellow Jr. You can't beat sires, dams, pigs or prices. We guarantee our pigs to be as represented. Let me hear from you at once as orders are coming fast. Mention Homestead when writing. **J. O. James, Braddyville, Iowa.**

C. F. Adams' Big-Type Poland Chinas

I WILL sell spring pigs sired by my great herd boars, **Big Halvor** (generally conceded to be one of the very best big-type boars in Iowa), **Maid's Halvor 1st,** a son of **Big Halvor** and out of the mammoth sow, **Long Maid,** and one of the grand young boars of the breed, **Mammoth Jumbo,** a son of the noted **Big Jumbo** and **Grand Chief,** bred by John Miller. These pigs are out of a herd of

Sows That Cannot Be Surpassed for Size and Quality

These sows are bred in the purple, many of them being sired by the great sire, **Big Halvor,** others by **Coming Wonder, Big Nelson,** etc. I know I can please you in a pig and that you will be more than pleased with the manner in which they develop. These pigs will be worth three and four times what I am asking for them within the next year. Write me for prices, mentioning Homestead
C. F. ADAMS - - - - - - - - - - - - - - - - - - OWASA, IOWA.

12 HIGH-CLASS POLAND CHINA FALL BOARS

WAYSIDE HERD OF HAMPSHIRE SWINE

WE are sold out of boars; have nothing but fall pigs, male and female, and 10 extra good spring yearling gilts for sale. These gilts weigh from 275 to 300 lbs. We are pricing them worth the money. Quality and good breeding are our aim. Nothing but good individuals shipped off. Can ship by Adams or U. S. Express. Write today.
MIKE SHARP & SONS, COAL VALLEY, ILLINOIS

DE KALB'S HAMPSHIRES

300 HEAD in the herd. Anything you want in the Hampshire line. The best bred herd in America. Write me your wants. Address
H. D. DE KALB, DE KALB, IOWA.

Valley View Hampshires Nothing left at present but fall pigs. Address Fred Wheeler, St. Charles Ia.

MULE-FOOTED SWINE.

Mule-Foot Hogs
Oldest breeder in the State. Pedigreed stock for sale
Samuel Johns, Sec. A., Wilmington, Ohio

350 BIG-TYPE Mule-foot hogs, all ages. America's champion herd. Ponies and White Leghorn eggs. Address J. Dunlap, Williamsport, Ohio.

When writing to advertisers please mention The Homestead.

GALLOWAY CATTLE.

IF you want the best Galloway cattle--Oxford Down sheep, see the Maple Grove Stock Farm, where the prize winners are bred; undefeated get of sire for three years in succession. 21 bulls for sale. Address C. S. Hechtner, Charlton, Iowa.

POLLED DURHAM CATTLE.

WAYSIDE POLLED DURHAMS, Poland Chinas, Wayside Victor, roan, Scotch bred 3 yr. olds, and calves 6 to 12 mos., choice big-type fall pigs, either sex. E. J. Augspurger, Pulaski, Ia.

When writing to advertisers please mention The Homestead.

HORSES.

FRANK IAMS
IS RETIRING FROM "HORSE BUSINESS"
CLOSING OUT All his Show and Business Stallions at..... REDUCED PRICES

Iams is making a "clean up" of his horses. All will be sold at "some price." He has his "Paris Winners and Best Stallions" in his barns. Prize Winners, $1,000.00 and $1,200, some higher. His 1913 "show" stallions must be sold in 30 days.

Iams is making **prices $200 to $500 "less than formerly"** on **each stallion** to make a **"Quick Clean Up"** (In next 30 days)

Paris Prize Winners at Cost in France

Buy a ticket to **"Iams town"** and **take advantage of Iams' "Reduced Prices."** Never were such choice **"Big Prize Winners"** offered at **such "Big Bargains"—all must be sold.** They are **"Model Drafters."** Iams' **"Old Customers"** make his **"Best advertisers."** His **"Percheron Stallions"** are the **very best he ever imported.** They are of **"Big Size,"** large **bone, model, smooth "Drafters"** of **quality,** fine **form, finish and style, fast movers.** Among them are several

"PRIZE WINNERS AT PARIS"

NOGENT-le-ROTROU and **CHARTRESS** (three largest shows of France). **They are all fully acclimated and in the "Pink of Condition." They were bought to sell. All must be sold at some price.** I know **France and leading breeders there. I speak the languages and know how to "Buy Horses"** at **"Big Bargains,"** and I **divide "The Bargains"** with **my customers. Iams has a choice collection of**

IMPORTED PERCHERON STALLIONS

3 to 6 years, "Registered and Inspected" by **Governments of France, weight 1,800 to 2,500 lbs. All "Branded," Approved, "Registered and Inspected"** by **Governments of France and U. S. and Certificates "Stamped" O. K. All inspected by a Nebraska Deputy State Veterinarian and Certificates of "Health and Soundness" are given** with **each Horse.** Iams sells

IMPORTED WINNERS AT $1,000 AND $1,400

(few higher.) **Terms cash,** or **one year's time** at **8 per cent bankable note, one and two years' time Land Security at 6 per cent; $100 less price for cash than time. Iams pays freight and buyer's fares, gives 60 per cent breeding guarantee;** can place **$1,500 insurance. Iams backs up his ads** with a **$500 guarantee** that you **find the Horse as represented. Write for Horse Catalog. It has a $1,000 "Bargain" on each page.**

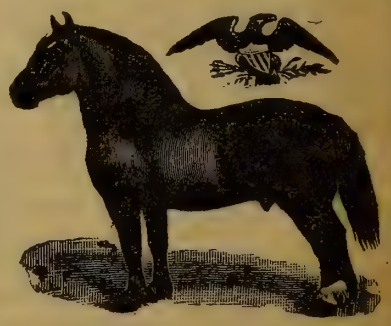
Special Sale of Percheron and Belgian Stallions
For Next Thirty Days

New importations arriving! Two large importations received since January 15th. Another importation of stallions and mares now on the water. More arrived in April. We have at any time of the year more BIG-TON, HIGH-CLASS PERCHERON and BELGIAN stallions than any other firm in the United States.



HOLBERT HORSE IMPORTING CO
A. B. HOLBERT, Prop. GREELEY, IOWA

Purchase Percherons.

There is a fundamental reason why the breeding of draft horses will continue profitable.

From 1900 to 1910 the population of the United States increased 21%. Horses increased only 8%. Cattle decreased 8%, hogs 7%, sheep 14%.

This means increased tilled acreage and increased demand for horse power.

For full information address Wayne Dinsmore, Sec'y, Percheron Society of America, Union Stock Yards, Chicago, Illinois.

STALLION colts for sale.—Two 2-year-old French Draft colts, cheap for cash. Sire Chacal (58077) 41415, 1st dam Toddy 12164, 2d dam Primrose 6495; sire Chacal (58077) 1st dam Lucy 12162, 2d dam Doll 13061. Fred Galliers, Albia, Ia.

PALESTRO I. 52027(67506) will make the season of 1913 at my farm 2 mi. east of Garner, Ia. Palestro I. is a black sired by Mon Jarret(47526) by Theudis, by Besigue, by Brilliant III. and dam traces to Brilliant III. Write for terms. Henry Moll, Garner, Iowa.

PERCHERON AND BELGIAN Stallions and mares, selected and imported under my personal supervision. Ea. a splendid animal and offered at extremely low prices. Call or write V. W. HARMS, Fairbury, Illinois.

SHETLAND PONIES

STRICTLY choice lot of stock, best of breeding and attractive prices. C. S. Bratt, Arapahoe, Neb.

FOR SALE Two Shetland pony stallions, one and two years old, full brothers, matched. weight of eldest 560. S. A. Wolcott, Gilmore City, Ia.

STALLIONS

Home-bred draft stallions $250 to $650. Guarantee to sell you imported stallions for less money than any firm in America. Come to a live stallion market and see all draft breeds. A. LATIMER WILSON, Creston, Iowa.

SHETLAND PONIES.

THE little gentle kind. One of the largest herds of registered ponies in the state. Send a two-cent stamp for price list and catalog that contains several pictures.
F. P. HEALY Bedford, Ia.

Stooker's Stock Farm

OFFERING just now some very choice Percherons, A pair young stallions and a few mares. Write for full information. Address
F. A. STOOKER, Dunbar, Nebraska.

AN EXTRA LOT OF YOUNG CLYDESDALE STALLIONS that I will sell at right prices. Address R. O. Miller, Route 1, Lucas, Iowa.

PERCHERONS Imported and home-bred stallions and mares from $200 to $900 each. Address H. REDENIUS, RUSHMORE, MINNESOTA.

$2.00 to $12.00
For 20 Minutes' Work!

You know that every man who has anything to do with the *making, selling* or *repairing* of an automobile *MAKES BIG MONEY.*

Well, here is a chance for YOU to get in on the same kind of a good thing.

If you have any "get up" in you, you can easily clean up $10 per day.

And the beauty of it is, you don't need any experience nor, in truth, any money to speak of. A ten-dollar bill just about covers the cost of your equipment.

"Sounds most too good to be true," you are saying.

But don't judge too soon. First send the Coupon below and get a detailed explanation of this Wonderful Offer. *Then see if you ever before saw such a money-making opportunity.*

Our Agents Make $10 Per Day!

We know YOU can make big money out of this because hundreds of other men, no smarter than you, are now doing it. They are making $10, $12, $15 and even $20 a day.

Yet some say they first answered our advertisements more out of curiosity than with the expectation of really getting hold of a small fortune.

They were agreeably *SURPRISED* when they found what we had to offer them. You too, reader, will be surprised at our Proposition, for it is quite impossible to picture in mere words the bigness of this offer.

How the Money is Made

Here is a very simple looking apparatus. Weighs less than four pounds. No bigger than your two fists. You can easily carry it any place. It is the celebrated POSITIVE STEAM TIRE VULCANIZER—the most *wonderful* device ever designed for repairing automobile tires.

You—anybody—can operate it.

Here's about all there is to it:

Lay a piece of fresh rubber over the spot to be repaired. Then clamp the Outfit to the Tire, pour a little water in one compartment and a little gasoline in another. Then light it. In 20 minutes the tire is repaired and is as good as new.

You see, the new piece of rubber is welded, by heat, right to the tire. The patch can never wear out. You can repair *inner tubes* and *outside casings* with the POSITIVE STEAM VULCANIZER.

And remember, it's all done in 20 minutes.

What do you get for the job?

Anything from $2 to $12. Do you know of any other profession that pays as much as $2 for 20 minutes' work?

Plenty of Work!

Unless you have thought about it before you don't realize what a tremendous lot of tire repair work is done every day.

There are nearly a MILLION AND A HALF automobiles in this country. That means SIX MILLION TIRES now in use. And every one of those six million must be repaired from time to time.

Most of those tires are being used by farmers, as you know. You know lots of farmers who own automobiles. Those men are now shipping their damaged tires to city shops for repairs. Not because they *want* to, but because they have always *had* to. You can be sure that not one of those farmers likes to pay for express charges or repair prices such as city garages charge. Neither do they like to wait for days and weeks to get their tires back.

Automobile owners in your locality will be tickled to death when they find you ready to do their tire repairing. *They'll come to you to save time and trouble.* And you can accommodate them.

Perhaps you yourself own a car. If so, you know what a nuisance and expense it is always to be sending tires away.

A S-T-E-A-M Vulcanizer

This is no ordinary hot air vulcanizer. It's the S-T-E-A-M type. Works on the same successful principle as the vulcanizing machines in big city garages and big tire factories. There is nothing else like it outside the big cities.

Yet it is *small, light*—and *very inexpensive.* It's so *fast* and the work is so *perfect* that it amazes all who see it.

Send Us the Coupon

Now if this big Money-Making Offer interests you, *don't wait a week or two before investigating it.*

Send in the Coupon at once and thus get started right away. It's just as important to get a quick start in a business race as in a horse race or any other contest.

Send us the Coupon and we promise you a *REAL* Money-Making Offer—perhaps the best you ever saw or *will* see for years to come.

If the Coupon is mailed today, you will get our Special Proposition BY RETURN MAIL.

Clip and Mail at Once!

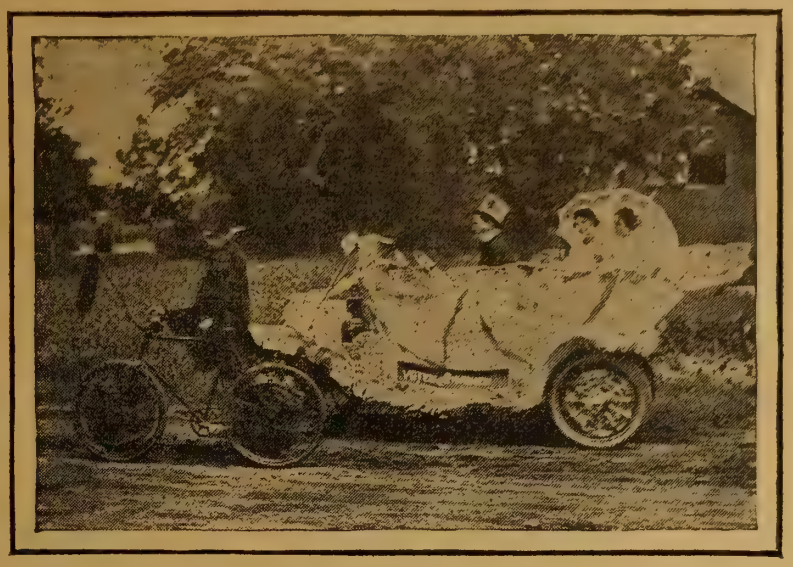
PLAY DAYS FOR FARM WORKERS

How a Series of Get-Together Festivals is Bringing Townspeople and Farmers into Closer Friendly Relationship and Proving Mutually Profitable.

PROFITABLE farming depends upon many things, none more important than these: the contentment of every member of the farm household, and mutually pleasant and profitable co-operation between farm dweller and nearby town dweller. Any scheme or plan which can provide both of these important factors is worthy not only endorsement but emulation.



FIRST PRIZE IN AUTOMOBILE PARADE AT ALDEN'S 1913 EGG DAY.

In order to bring the farmer and the townsman into closer and more pleasant relationship there have sprung up, within the last few years and quite generally throughout the grain belt, a variety of celebrations or "days" which depend for their success upon co-operation between the farmer guest and village host in the gentle art of giving and having pleasure. These events are not inspired by mercenary motives; the farmer guest is every bit as welcome when he leaves his pocketbook behind as when he brings it with him, full to bursting. The town host has learned that there is an inevitable, although indirect profit sure to accrue when the relations between him and the farmers of the immediate vicinity are so friendly as to inspire more frequent visits, when the list of purchases is first submitted to the storekeeper in the nearby town instead of being sent direct to the mail-order house or to the city department store. The farmer has learned that he is not always looked upon, in village or city, as a sheep led to the shearers; that he is welcome as a good fellow, well met, and that the pleasure which such town celebrations give every member of the farm household furnish that necessary break in the routine of work which makes for willing service for all, the entire year around. The occasion for bringing farmer and townspeople into closer and more friendly relations may be, and is, given various names, but the underlying principle is the same: mutual enjoyment. In one town it takes the name of Egg Day; in another Watermelon Day; in another (where the sturdy Dutch predominate) Sauerkraut Day; in another (where beets form the greater part of the produce raised) Sugar Beet Day; in another Bean Day, and so on throughout a long list, varying according to the principal crop of the vicinity or the principal amusements of the people dwelling thereabout. Take the little town of Alden, Iowa, for example, a typical country town of 800 population, set down in the midst of a prosperous agricultural vicinity and dependent upon farm patronage for its perpetuity. Anything which will tend to bring the farmer into town oftener, which will induce him to buy his staple necessities in Alden (rather than in the larger cities of Marshalltown, Fort Dodge, Waterloo, or Des Moines) necessarily appeals to the storekeeper. On the other hand, anything which can give him innocent pleasure or amusement in Alden, easily accessible to all members of his household, appeals to the farmer, for it is not every tiller of the soil who can attend the state fair or take vacation trips, even in these piping times of agricultural prosperity. And so it is that Egg Day has come to be an annually recurring festival of commingled farm and town fun. It is a festival, pure and simple, for no one seeks financial gain. At one o'clock on Egg Day all of the stores of Alden are closed and merchants and townspeople generally join with the farm visitors in participating in the festivities. The program

A WORD ON CULTIVATING CORN.

The following communication from Mr. A. A. Burger, formerly of the Iowa Agricultural College, and now farm adviser for the Blackhawk County (Iowa) Crop Improvement Association, deals with the important principles that should be kept in mind:

To many, the cultivation of corn is a simple operation. Practice has made it so, but in the very reason of its simplicity is to be found the reason for its improper practice. As with many farm operations, they are done in a certain way because they always have been done in that way, with the question of the reason why, or what the ultimate effect might be, never even receiving a passing thought.

Cultivating corn is one of the most careful operations of the farm. It is also one of the most important. It requires over two months of every year in the production of our principal money crop—more time and more labor than any other single phase of our farming operations. It therefore deserves more attention. Whether it is to be attributed to the lack of a better understanding of what is best or whether it is a matter of practice—a failing to do what we know is best—is immaterial. Hundreds of acres of Iowa corn could be increased in yield if better cared for. It need but be said that we may find abundant proof in every locality.

Deep cultivation is a common practice. For the first cultivation this is desirable, and also for the second. It is desirable, also, to get as close to the plants as possible. This keeps the soil mellow below and destroys weeds which cannot be reached later. After the second cultivation, the root system of the plant is beginning to be established and to plow deeply or to allow the shovels to run too closely will destroy the root system, which cannot but impair the vitality of the plant, ultimately to reduce the yield. The last cultivations should not be more than three inches deep and in many cases it is advisable to use a surface plow. The trouble is that oftentimes our cultivators run much deeper than we suspect. Close examination will show that even at this depth, many roots are destroyed, especially during wet weather. However, this is not altogether avoidable if a good mulch is to be maintained. The essential thing is to watch the depth of cultivation, especially during the last cultivations. Avoid pruning the roots.

Just when to cultivate is a difficult question to answer. We cultivate during dry weather to conserve moisture and during wet weather to set free moisture. There are, of course, conditions such as rainfall, sunshine, etc., which cannot be controlled. As a rule, however, the soil should be cultivated after a rain, soon enough so that the surface will not crust to form clods. And under favorable conditions, land should not be plowed when moist enough to produce the same condition. There is a common opinion that during dry weather corn requires more frequent cultivation. We cultivate to destroy weeds, to keep the ground in good physical condition, to aerate the soil and frequently, early in the spring to kill insects. During dry weather if there are no weeds and there is a good dust mulch, cultivation is not so necessary. It is more often the case that after the corn is "laid by" the soil is beaten firm by heavy rains and a hard crust is formed. Many of the most practical farmers have found by experience that it pays well to go through between the rows with a single-horse cultivator. It is not impossible thus to increase the yield five to ten bushels per acre. In fact, it has often been done.

When, therefore, is corn laid by, and how many cultivations should it receive? Corn is best "laid by" when in the best condition to produce a maximum crop. This is not determined by the number of cultivations, not by the Fourth of July as the last day of grace, according to the practice of many, nor altogether by the size of the corn. Cultivate whenever cultivation is necessary to destroy weeds or to form a dust mulch. This will determine also the number of cultivations necessary. Often it would be profitable to cultivate corn after it has been "laid by."

It is true, as stated by Mr. Burger, that no hard-and-fast rule can be laid down as to the number of times corn should be cultivated. The important factor as the roots develop is to avoid disturbing them, and, secondly, it is most desirable to maintain the efficiency of the dust mulch as late in the season as possible. In this connection, however, one fact must be kept in mind, namely, that in the case of late-planted corn maturity can be hastened to some extent by laying the corn by early. In other words, it is possible in the case of late corn to do more harm than good by unduly lengthening the season of cultivation.

SCHOOL CREDITS FOR CHORES.

A country school-teacher in Oregon has proved himself a genius in the solution of the problem of bringing school and home closer together. He has devised a plan for giving country school children credits for chores done at home. Thus, for example, there is a ten-minute credit for every horse cleaned, a five-minute credit for every cow milked and a fifteen-minute credit for washing and drying the dishes. These credits mean something to the pupil, for when a child has 600 credits he or she is granted a holiday, not oftener, however, than once in twenty days. This keeps the attendance at school regular and at the same time puts a premium upon the humdrum routine work of the barn and the house which many school boys and girls shirk all too often.

Here is a complete list of the credits as given by this Oregon schoolteacher for home chore work:

Building fire in the morning, five minutes; milking a cow, five minutes; cleaning out the barn, ten minutes; splitting and carrying in wood (twelve hours' supply), ten minutes; turning cream separator, ten minutes; cleaning horse (each horse), ten minutes; gathering eggs, ten minutes; feeding chickens, five minutes; feeding pigs, five minutes; feeding horse, five minutes; feeding cows, five minutes; churning butter, ten minutes; making butter, ten minutes; blacking stove, five minutes; making and baking bread, one hour; making biscuits, ten minutes; preparing the breakfast for family, thirty minutes; preparing supper for family, thirty minutes; washing and wiping dishes (one meal), fifteen minutes; sweeping floor, five minutes; dusting furniture (rugs, etc., one room), five minutes; scrubbing floor, twenty minutes; making beds (must be made after school), each bed five minutes; washing, ironing and starching own clothes that are worn at school (each week), two hours; bathing (each bath), thirty minutes; arriving at school with clean hands, face, teeth and nails, and with hair combed, ten minutes; practicing music lesson (for thirty minutes), ten minutes; retiring on or before nine o'clock, five minutes; bathing and dressing baby, ten minutes; sleeping with window boards in bedroom (each night), five minutes; other work not listed, reasonable credit.

In addition to allowing vacation days for 600 credits, there are weekly and monthly contests to see which pupil can get the largest number of credits. The result is such an interest and enthusiasm about the chores as has never been kindled before. The plan seems to be altogether worthy of emulation. It provides the incentive for home work, recognizes that the boy or the girl who has to work at home should be honored and rewarded by the teacher for this handicap on his or her time and opportunity to study, and makes for a close, harmonious co-operation between home and school that can hardly fail of good results.

A HOUSEWIFE'S RELIEF AT THRESHING TIME.

It is a well-known fact that there is considerable rivalry among the households of almost every community in the serving of refreshments during threshing time. It has come to the point where it amounts to a real burden on many a housewife and it is not surprising to find communities in certain parts of the corn belt who are doing away entirely with what might be called the threshermen's picnic dinner. Instances are reported from Ohio and other cases are cited from Indiana where in the so-called "threshing rings" every man who attends a threshing brings his own dinner with him and goes to his own home for supper. This works no hardship on a single individual and it is a custom that we predict will spread very rapidly. Nearly all city workers are obliged to carry their midday meal with them when they go to work in the morning and the workers are in just as good health as those found on the farms. The practice means such an enormous saving of household labors that it should be taken up by every community when once attention has been called to it.

Possibly the subject is one that will bear discussion pro and con and we shall be pleased indeed to have our readers submit their individual opinions relative to the merit of the two plans of furnishing meals during threshing time.

GO SLOW ON PIT SILOS.

Some of the experiment stations in their publication of silo bulletins have given detailed information on the construction of underground or so-called pit silos. As the result of the distribution of these publications we predict that not a few farmers will make the very serious blunder of trying this type of silo.

To begin with the underground silo is not a wholly inexpensive proposition as one might first be led to believe. At the present cost of labor one can easily compute how long it will take a farmer and his hired help to dig a hole into the ground twelve, fourteen or sixteen feet in diameter and anywhere from twenty to thirty feet deep. After the pit is dug it may be found that the expense incurred has been a wholly useless one on account of seepage water. Even though the walls are cemented as they should be this will not keep the cistern silo dry. While it is true that ensilage is a moist product the plan has never been recommended to cure it out in a state of complete saturation.

We would advise those who are thinking favorably of the pit silo to carefully formulate plans in advance about getting the ensilage out of the pit when it is needed for feeding purposes. The hand-over-hand plan is recommended, but we venture to say that those who recommend this system have never tried it out, as it is both a man and time killer. Horse power can be utilized, but it is time consuming and a more or less troublesome task as compared with the system of throwing the ensilage down hill into a feed cart.

There is still another objection to these emergency ensilage holes. At filling time dangerous gases are generated and on account of these being heavier than air they remain in the pit. To enter a silo at filling time is therefore a dangerous undertaking—just the same, indeed, as going into a well filled with carbonic acid gas.

In our opinion the stations are not serving their constituents well when experimental makeshifts of this character are endorsed. There are certain types of silos that have been thoroughly tried out and have been found satisfactory in every way. A genuine service can be performed for the agriculture of the state if the station can in an educational way induce men to adopt the most modern plan of saving at least a part of the corn crop by, first, the erection of a type of silo that has stood the test of time, and by the filling of the same annually in accordance with the most up-to-date plans of ensilage making.

STAMPING OUT CHOLERA WITH SERUM ALONE.

Veterinarians are by no means agreed on a specific plan to be carried out in fighting the hog cholera scourge. In one camp we find those who believe that the serum-alone method is all sufficient, while the followers of another cult proclaim the efficacy of the simultaneous method, a plan that necessitates the use of virulent cholera blood along with the serum. Both plans are effective in their own way, the main question being which is the more expedient.

During this period of contention the presentation of a specific instance showing what a farmer has accomplished and the success he has had in the saving of his own herd will be of interest. We refer to the case of Mr. W. H. Cooper, of Keokuk county, Iowa. When cholera broke out in the Cooper herd a year ago a supply of serum was at once secured. Believing that as the disease was already present there could be no special virtue in the simultaneous plan, Mr. Cooper used the serum alone. The pigs were divided up into bunches and a sick hog was put in each lot, thus making exposure to the disease an absolute certainty. It was the belief in this case that a mild form of cholera would be contracted and the required degree of immunity therefore imparted. In this respect the results were all that could be desired. There was some loss, to be sure. Sows with pigs aborted, but in thirty days after the treatment the herd was in normal condition.

When the fall litters on the Cooper farm were from four to six weeks old the serum plan was again used and the excellent record made of not losing a single individual, although cholera-infected animals were again introduced into the herd in order to bring about a more permanent immunity. The two treatments referred to were made last year and the same plan was carried out with the spring pigs this year with an equally good record made in so far as the treatment was associated with loss.

While this plan is analogous to the simultaneous method of inoculation, as a matter of fact it is the belief of Mr. Cooper and the veterinarians under whom the work was carried on that the danger of loss from this plan of transmitting real cholera to the individuals in the herd is much less than where the blood of a diseased animal is injected directly into the circulation. If real cholera is contracted, and of this there is little doubt, the form it takes is exceedingly mild, and yet it seems to accomplish the desired end, namely, the establishment of a permanent immunity from the disease.

PARCEL POST AIDS RURAL MERCHANT.

Far from being of injury to the country merchant the parcel post is proving to be of actual and profitable service. A government investigator has been traveling through the grain belt looking into conditions and makes this unofficial report:

The large mail order houses are not getting the business away from the small country merchants under the parcel post system. Only the merchant who is satisfied to sit by the stove with folded hands all day is noticing any decrease in his sales. The parcel post is a blessing to the enterprising country merchant. Every up-to-date farmer has a telephone and he uses it in ordering his necessities. Formerly it was next to impossible for the country merchant to deliver goods to customers living more than a mile or two distant. And even that required the expense of maintaining a horse and wagon. The result was that the farmers either ordered from the mail order houses or went after the goods themselves, and they preferred the former method. Now the country merchant can deliver his orders within a radius of twenty miles or more by using the parcel post. The farmer would rather telephone his order than go to the trouble of writing to a mail order house, so the country merchant has the advantage. All the country merchant needs to do now to increase his business 25 per cent or more, and many of them are doing it, is to keep an extensive stock on hand.

The chief opposition to the parcel post, before the service was installed, came from country merchants and old established express companies. The merchant has already found that the service increases his business, rather than decreases it. What the effect has been upon the express companies we are not in a position to say, but if the experience of the country merchant holds good the express companies themselves are not much the loser, while the consumer and particularly the farmer is so much bettered by the innovation as to make it an unqualified success all along the line.

Reports having to do with the loss of swine by disease last year indicated that, taking the country over, the loss was 110.1 head out of each one thousand. Of course, in the principal hog raising states the percentage of loss was very much greater. Only four times in the last quarter of a century has the percentage of loss exceeded those above noted. In 1898 the loss was 100 per thousand. Since that date there was a steady decline in loss up to the beginning of 1911, when there began an increase of swine disease which was more rapid and disastrous than any previously recorded. The total loss for the year endig March 31st was 6,738,283 head. In Iowa the loss was 1,395,200 head, or nearly twice as many as in any other state. Missouri is credited with having had a more fatal form of disease than was known elsewhere.

THE STAVE SILO IN SUMMER.

The silo has now become so common that several may be seen from one viewpoint in most sections of the corn belt. We have counted as many as sixteen from no very high elevation. These are practically all stave silos and are empty during the summer months, so of course a few words on the care of the stave silo during the summer season will be of general interest.

We have found that the months of May and June are hardest on stave silos, simply because of the fact that they are quite apt to be neglected during the early part of the summer, when there are so many other matters coming up for attention on the farm. A stave silo dries out fast after it has been emptied when the sun begins to shine warm and there is a breath of heat in the southwest wind. The joints begin to open fast if the weather is warm and the wind drying soon after the silage has been taken out, and it is then the tightening of the hoops need attention. In reality, as fast as the staves shrink the hoops should be tightened. First of all, however, a chisel mark should be made on every lug before any tightening is done, then, before filling in the fall, every hoop should be loosened back to this mark. Those who are careful to do this have little trouble with warped and twisted staves or broken lugs or hoops when refilling and the moisture of the silage brings full pressure on the sides again. Even if the silo does appear loose when the hoops are loosened back to the mark, the moisture of the silage will quickly swell the staves tight.

But the main thing now is to keep the staves tight and all guy wires well fastened to good anchors. A large per cent of the stave silos that are taken down by wind would not go if every hoop was kept tight at all times, the guy wires well looked after and all covered with a good roof, well braced around the top to keep staves from caving in before the force of a high wind. Looking after the hoops on a stave silo every two weeks, during hot, dry weather, is a good habit to form.

CONGRESS NAMES ROAD COMMITTEE.

That the good roads problem looms larger than ever before is evidenced by the fact that the present congress has created a committee on good roads, for the first time in history. This committee immediately takes rank among the most important, having to determine the question of whether federal aid shall be forthcoming in the building of interstate roads and, if so, in what manner it shall be apportioned and expended.

It is of more than passing interest to note that a grain-belt congressman, Mr. Shackleford, of Missouri, has been chosen chairman of this important committee. This would seem to indicate that those in authority in congress realize that the grain belt is the section of the country where the biggest returns are to be expected from a federal investment in roads. At any rate, with a grain-belt man at the head, the committee's work should be of value to this particular section of the country even more than to any other.

An outline of what this new committee on roads may do is sent to us by a Washington friend:

This committee promises to be one of the foremost of the house for some time to come and to be much in the limelight. For some days, there has been a lot of pulling and hauling under the surface to get places on the good roads committee.

The awakening of interest on the subject of good roads is so marked in most of the states that scores of members of the house would like to have a finger in the business of shaping up highway legislation. Hitherto, the subject has been considered in an incidental sort of way by the postoffice committee. Now, with a great committee on good roads created, it will be gone into by that body in exhaustive fashion and will no doubt receive more enlightened attention from the house than it has ever received before.

The committee will undoubtedly take prompt steps for comprehensive study of the good roads problem. And while there are many public men who contend that federal aid to road making would be a great mistake and would lead to a riot of extravagance and that it would be much better left to the states, there are few members of congress who are not interested in the subject and glad to have a committee established to have jurisdiction of it. Moreover, there are distinct signs that this congress is going to embark in legislation for federal aid to good roads on a large scale. The strong demand for it from the South is one of the factors which will influence a democratic congress to such a decision.

With Senator Bourne, of Oregon, proposing a three-billion-dollar bond issue for a gigantic road-building campaign (the federal government to loan the money to the various states on their fifty-year 4-per-cent bonds) and congress appointing a committee to discuss ways and means of co-operation between nation and states, the prospect of far-reaching and systematic progress in road building in the near future is brighter than at any time in the past.

MORTGAGES AND FARM AUTOS.

It is difficult for the average easterner to realize the extent and stability of the agricultural prosperity of the grain belt. Stories of farming success are looked upon, all too often, suspiciously and even incredulously, as though they were so exceptional as not to show a wide-spread average of prosperity. The reason is that the East is a section of extremes, immense riches on the one hand, dire poverty on the other; while the West (and particularly the grain belt) is a section of high general average of prosperity.

The difficulty which the easterner has in getting at this difference is well shown by an item in a Topeka newspaper which records the story of how eastern financiers were alarmed when they read of the large number of Kansas farmers who are buying automobiles. The easterners became scared for the security of their Kansas-farm mortgages; they lay awake at night and pictured the Kansas farmer plastering a mortgage on his quarter section in order to joy ride around the country in an automobile which he could not afford. The imagined picture became so dark that the eastern financiers got together and sent one of their number out to Kansas to investigate. Here is the result, as set forth in the Topeka newspaper:

A short time ago one of the big eastern insurance companies, a concern which has several million dollars invested in loans on Kansas farms, became somewhat excited about the reported extravagance of the Kansas farmer. The insurance company's officials seemed to be of the opinion that the Kansas farmer was borrowing money and mortgaging the old homestead for the purpose of buying automobiles. So a local mortgage company which handles this insurance company's Kansas farm loans was instructed to investigate and report the number of autos owned by its borrowers in this state. The investigation was made accordingly, inspectors being sent to each county. The result of the investigation was the information that only one farmer with a mortgage on his farm was the owner of an auto, showing that Kansas farmers are not inclined to mortgage their homesteads to indulge in the luxury of owning autos. And the one farmer who had both an auto and a mortgage was a prosperous man with plenty of property, who could well afford to own an auto who was in shape to pay off his mortgage any time he wanted to stint himself a little on his ready cash.

The result in Kansas should set the easterners' minds at rest for the entire grain belt. The farmer is not mortgaging his homestead in order to buy automobiles. When a mortgage is placed it is for the purpose of buying more land, more stock, more machinery or building a new modern home. The automobile is a side issue of prosperity; a by-product of fertile fields. Neither is the automobile the luxury to the farmer that it is to the average city man. The farmer needs it in his business; it provides quick and easy communication between farm and town, between fields and market. A dollar spent for a farm automobile is a dollar well invested, where all too often when spent for a city automobile it comes perilously near to being squandered.

SILO SAVES BEEF CATTLE SUPPLY.

Pessimistic reports sent out by the department of agriculture in regard to the decline in the number of cattle are offset by the reports made by beef-cattle men in the West and Southwest, where the silo is being given credit for saving what might otherwise be a serious situation. The day following the publication of the report from Washington that the beef cattle supply had fallen off fifteen million head in the last six years, the Kansas City Star published a statement that St. Louis and Kansas City have received nearly 140,000 more cattle thus far this year than in the first five months last year and continued with this optimistic report of conditions in the Southwest:

Men at the stock yards say that the use of the silo is a big factor in replenishing the cattle supply. Texas, Oklahoma, western Kansas and parts of Colorado began using silage extensively last fall. The result was that cattle went through the winter in excellent condition and developed good flesh with a limited supply of grain, cottonseed meal and cake. For two months past such cattle have come in competition with the supply from corn-belt feed lots. Many western cattle, fattened on little other feed than silage, sold at $8 to $8.25 a hundred pounds, almost as high as the prices for steers fattened on grain.

Silos are being erected rapidly all over the Southwest. Monday, J. F. Douglass, of Beloit, Kan., said at the Kansas City stock yards that more than 100 silos had been sold, to be put in Mitchell county this year. He built two large ones last year and this year fattened 400 steers and heifers.

Cattlemen of the Southwest say that the silo has solved the problem of winter feed and put the old range country in a position to get both the breeders' and the feeders' profit from cattle. They figure that such a condition will result in more beef.

The Star adds that live-stock men "feel more complacent now than for some time over the supply of cattle." If conditions generally are as promising as they are in the Southwest the situation is not nearly so dark as it has been painted.

The total number of cattle in British South Africa, according to the latest census, was 463,923. The increase in the seven years since the last census was at the rate of 264 per cent. The number of cattle owned by natives was 330,400, or slightly two-thirds of the whole. The increase in the European-owned cattle during the seven-year period was 440 per cent and in native-owned cattle, 209 per cent.

Cultivation of the Corn Crop.

By S. M. Jordan

ONE of the chief essentials is about in its beginning just now in the production of a good crop of corn. We assume that good seed has been put in the ground and if all the counties have prepared as good seed beds as have been prepared in Pettis county, Mo., and the planting has been as well done with as high quality seed, certainly up to the present we have reason to expect a bumper crop. However, without the necessary kind and amount of cultivation we cannot expect the very best results.

No absolute rules can be laid down, as there are a number of conditions that must always modify the methods used in cultivation. We cultivate the corn to keep the soil loose and aerated; to conserve the moisture; and to keep down the weed growth. I think, however, it is quite a general rule that level cultivation should be practiced on all rolling ground, but sometimes on very flat land that has a clay subsoil about all we can do is to do some ridging to get rid of surplus water that we sometimes have. If we knew the season was to be very dry, then the ridging would not be best, but in all lands where surface drainage is good as little ridging as possible will nearly always give best results.

It sometimes occurs that on account of wet weather we may be kept out of our fields a long time and the weed growth has become very great and the soil badly run together. In an occasion like this it seems necessary to let the shovels down pretty well and even ridge the ground if the season is excessively wet. If the season is about what we want and the seed bed has been prepared good and deep and the ground loose, there is no occasion for deep cultivation. It is entirely safe, however, to cultivate deep at the first plowing, but we should run the plow shallower every time after the season progresses. Late cultivation should merely stir the surface of the soil because it is a fact that whenever corn roots are cut off the plant is injured to that extent, hence we should avoid root pruning just as far as it is possible. Where too much ridging is done on upland we lose the greater portion of every heavy summer rain. The land is arranged for drainage and instead of the water soaking into the ground it runs rapidly away carrying our most fertile soil with it. Then, when the sunshine comes out and forms a crust on the surface where the ground is ridged there is much more surface exposed for evaporation than where level cultivation is practiced.

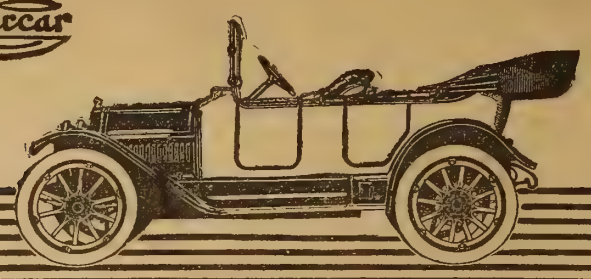
The crust that forms on the ground after a rain is like blotting paper to take the water out of the soil and it thus passes off the enormous amounts into the air. This crust contains vast numbers of cracks that are much like chimneys to let the water escape. By breaking this crust with a harrow or some shallow-working implement the crust is broken, the cracks filled, and it is much like spreading a blanket over the ground to keep the water in. If the season should be very dry the first half of July we had better not be in a hurry about laying the corn by; it will be better to go between the rows with something that will keep a dust mulch, and about each week or ten days is often enough. I believe that this late working was the chief means of saving as much of our corn crop as we did in the severe drouth of 1911.

During the regular time of cultivation it is a difficult matter to cultivate the corn too much. Under ordinary season conditions once a week is, perhaps, the best. If these cultivations on the spot where you are trying to grow a bumper yield are done just as soon as the ground is in fine working condition, following a rain, best results are sure to follow this method.

It will no doubt be found in many places that the corn louse and a small flea beetle will give us more or less trouble this year. The corn root louse especially is distributed over a very wide territory and is in, perhaps, every field in Missouri, and the only thing that can be done from now on is the best possible cultivation. Where this pest gave you trouble last year, it is well to begin working the crop before it comes up, using a harrow for this purpose. One or two or even three harrowings may be given the corn after it comes up. The weather during the winter and spring has not been such as would destroy these insects to any great extent and it is my impression that the corn will suffer a great deal this year, especially where very late plowing or a winter plowing was not done. Where we find ants burrowing around the little hills of corn we can rest assured that the plant lice are on the roots of the corn. This thorough work has a tendency to give the corn a better chance to grow and also has a chance to separate these ants from the plant lice. The ants take care of them and place them on corn roots as a first choice; however, foxtail, crabgrass, smartweed and others make very good food for them, but to allow these weeds to grow in the corn could give the corn no service since they would remove the lice from these weeds to the corn as soon as the corn begins to grow.

And now, with a pull all together for the fanciest cultivation ever done in cornfields, it certainly looks to me like a splendid crop will be the result. While I would not double the corn crop if I could in the event that it would reduce the price, I would grow the same crop on half the number of acres if I could. This would give us other acres for growing other crops or grasses, allowing us to keep more sheep and cattle, allowing us to rotate our crops, and save our hills that are washing away by growing corn upon them. So if we can find the methods by which we could continue to grow the same crop on half the acres it would certainly be wise to do so and, in addition, give the farmers much less hard work to do, making it possible to enrich his soil and his pocketbook at the same time.

Cartercar



You can learn to drive in 30 minutes!

Even if you have never seen a Cartercar you can take it out on the road and in 30 minutes you drive it perfectly. It's so simple—so easily controlled—there's nothing to confuse. This is the car that has no transmission gears—not even a clutch.

Unlimited Speeds

All controlled by one lever. You also have power to easily climb 50% hills. No jerks nor jars — meaning double tire mileage.

Electric Starter

All Cartercars equipped with the excellent "Jesco" Electric Starting and Lighting System. Both lights and cranking controlled by one small knob.

Send for new Catalog and find out about this remarkable service car.

Cartercar Company, Pontiac, Mich.

Write Quick & Cut Out Shoveling in Hot Harvest!

EVERY blessed farmer who buys his Sandwich Elevator **before** harvest gets **double** work out of it! This summer, it will store his **small grain**—then crib his **corn** next fall. You, too, can get **double value**—you, too, can cut out the senseless slavery of shoveling load after load till you drop.

"The Sandwich Farm Elevator is the best investment I ever made in hard labor-saving machinery," writes Herman Frey, Melvin, Ia.—one of an army who say the same.

Sandwich (Eternal / Cypress) Farm Elevator

Solves the **hired-man** problem and even lightens the **house-hold** work by cutting out the **keep**—the **expense**—of extra men. And it pays you a profit too!

"Had my crop picked 1c a bu. less on account of my elevator," says C. H. Keller, Marshall, Minn.

50 Bushels in 3 to 4 minutes

The Sandwich fills your bins—your cribs—**chuck to the top** lickety split! "Unloaded 50 bu. corn in 4 minutes," writes I. E. Orendorf, Heyworth, Ill. Others crib 40 bu. in 2½ minutes with the Sandwich.

No Leg-Breaking Platform

The Sandwich wagon-jack is **overhead.** "Works to perfection," says A. J. Anderson, Boone, Ia. You drive right under—with even the **tallest** load. And it dumps it in the hopper in a jiffy. Then hitch on any power—horse or engine—and it's off with a flying start.

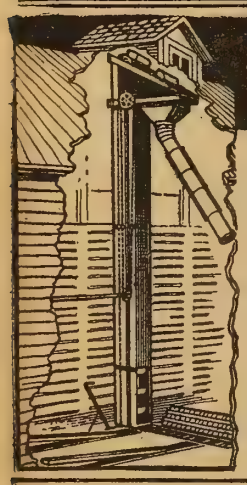
Cypress Body Outlasts Steel!

We make less money using "the wood eternal" but we make more **friends** and more **sales.** This is why it is called the **Everlasting** Sandwich and is fast crowding other elevators from the market.

Write Right Now for FREE Book

Last season we got **late** orders for 60 **carloads** we could not supply. These were from farmers who **waited.** They had to shovel. But they couldn't blame us. We warned **them** as we are **warning you now!** Our Elevator Book comes **free** by return mail the minute your request arrives; also the **name of** a Sandwich dealer close by. Address today 170 **B** St.

(9) SANDWICH MANUFACTURING CO., SANDWICH, ILL.



A MACHINE LIKE YOUR GRAIN DEALER USES

THE "Hart" Bucket Elevator is the most massive and securely made elevating device you can buy. Will work under all conditions and handles all kinds of grain, even coal, most economically. Withstands continuous usage without causing trouble This machine, when installed, requires less room, will not block your driveway and is always ready for use.

FINEST quality material is used. Buckets are made of pressed steel 16 inches wide attached to No. 77 sprocket chains. The "Hart" machine absolutely cannot clog. Grain cannot splatter over or carry back at the top. The special front panel, encasing the buckets, makes it impossible for grain to drop elsewhere than into the bin. Machine can be operated with overhead lift or log dumping device.

THE elevator can be installed in any of your cribs—or if you intend putting up a new barn or crib, ask for our **architects plans, furnished free,** to fit your exact needs. Just tell us capacity desired and type of elevator and we'll send information that you should have. Remember—buying the "Hart" machine means having a real elevating plant. Write today for catalog.

FARM FURROWS

TURNED BY A PRACTICAL FARMER

An Iowa subscriber is anxious to secure plans for a barn large enough for six or eight cows and for a team of horses. The barn is intended for a fifteen-acre farm and presumably space will be allowed in it for a certain amount of grain and roughage. Those who are able to furnish information along this line will confer a favor not only on this subscriber, but upon many others if they will submit their plan to the editor of this paper.

An Illinois subscriber, Mr. D. G. Roberts, calls attention to the fact that it is not a good plan to use wire fence in the bottom of hog houses. According to his experience the wires will soon rust out and, as he says, "It is just play for an old sow to raise it up in order that her litter may work under." When this condition results Mr. Roberts says it is very difficult to clean a pen.

The days are long enough now so I can get all the work I want and give my teams all they should have if I do take long noonings. On a hot day it is a good idea to lengthen the nooning one hour.

Any disk tool is a great pulverizer. A friend of mine used a disk plow this season, and he tells me most of his land was left by this plow in better shape than moldboard plowing often is after two harrowings.

Another good thing about a disk tool is it cannot be used when the soil is too wet. A disk simply will not work in wet soil. Something like this, that will hold us back when we ought to be held back, is a good thing. Much harm is done every year by working soil that is too wet.

I have a neighbor who says he takes no stock in the new movement to make loans more easily obtained by farmers, at lower rates of interest. His idea is that farmers find it is so easy to secure loans now the temptation to go in debt is too great. I am sure there is something in this theory.

If it's anything for the auto it seems there is an extra price attached to it, but I presume common use will reduce the cost, the same as it has reduced the cost of all other machine parts. I can remember when mower knives and guard plates cost ten cents each, and we paid another five cents each to get them riveted in. Auto supplies offer opportunity for price reduction.

If there is corn to be cut for the forage, either to put in the silo or in the shock, it is a good idea to use the thickest stand for this purpose. Not only will more tons be secured from a given acreage, but the thinner corn usually yields a better quality of ears and husking is not so tedious. Deliver me from husking real thick corn, so thick that the ears are nubbins. Plan on cutting this.

The farm that is equipped with a small gasoline engine has the very best "elbow grease" necessary to turn the grindstone. As a boy, I never did like "cranking" a grindstone, and as a man I never was much stuck on pedaling and holding the sickle at the same time. A small gasoline engine belted to a grindstone makes sickle grinding hum.

There is nothing like good concrete for durability, and cement is now cheap enough so its first cost is almost less than lumber. Of course, we all know its final cost is much less, because concrete work is practically everlasting.

Nothing improves the appearance of a farm home more than a few things which cost very little money. Two things which may be mentioned are paint for the buildings and a well-kept lawn in front of the house. Go by a farm where the buildings are well painted and there is a nicely arranged lawn, and it is impossible to think of that as a poor farm. The appearance automatically stamps it as a desirable piece of property.

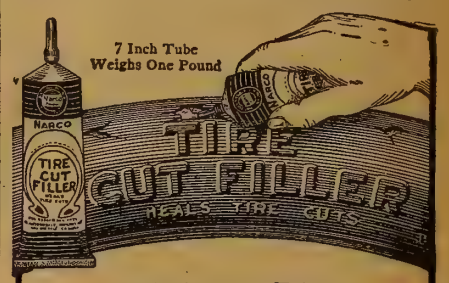
Pastures are fine this spring and the let-up on the work of doing chores after the cattle are turned out makes us turn a deaf ear to those who tell us to keep our cows in their stalls all summer. The time may come when we will do this, but when it does there will be few farms of 160 acres or over.

Pigs that arrive in this world in the heat of summer stand a smaller chance of becoming thrifty shoats than pigs that come when the weather is cooler. One summer I had several sows farrow in July, and the pigs that were saved seemed to be stunted by the heat. Since then I have not felt like giving much for sows that farrow in midsummer.

The seed-corn tester and the new planters should make the guessing at what the stand of corn will be a thing of the past. Mice, gophers and other pests will take their toll as usual, but it is poor seed and poor planting that have caused the most trouble.

The galvanized iron-fence post is now for sale at some dealer's in nearly every town. They look all right, especially the corner posts and braces, but with these, as with any corner or end post, it will take a little time and patience to set them.

It takes an "artful dodger" to plow corn successfully crosswise of a field where poor checking has been done. Stretching the wire too tight is the cause of a great deal of poor checking.



Save Your Tires!!

Fill the holes. Heal the cuts and cracks. Protect the tires against quick tire destruction caused by sand, sticks and stones creeping into cracks and getting between the outer casing and the body of the tire.

Reduce Tire Expense 30 Per Cent

Keep your tires always new and strong with

NARCO TIRE CUT FILLER

Heals Tire Cuts

a self-vulcanizing, non-inflammable compound, heavy with rubber. A combination cut filler, rubber cement and mastic. Fills the holes and unites the torn parts of the tire with a permanent plug of resilient rubber.

Easy to Use—clean cut; fill with compound from convenient, collapsible tube with long, tapering spout. Heals over night and *becomes like a part of the tire.*

Fill Out the Coupon—Enclose one dollar and we will send you *prepaid,* large tube of Tire Cut Filler. Begin saving on tire expense *now.* You can't lose by it—

Our Guarantee

Money refunded if not satisfactory. Ask your dealer.

CURRENT EVENTS

DUTY upon articles in the agricultural schedule of the Underwood tariff bill now bids fair to be according to the duty which foreign countries put upon the importation of similar articles from the United States. For instance, cattle from Canada would be dutiable at from 22½ to 25 per cent ad valorem, the Canadian tariff on cattle; meats would be dutiable at two and one-half to three cents a pound; wheat, ten to twelve cents a bushel; oats and rye, nine to ten cents a bushel; flour, fifty to sixty cents a barrel; rye flour, forty-five to fifty cents a barrel; oatmeal, fifty to sixty cents a barrel. This is the latest move in the consideration of the bill by the finance committee of the senate and is said to meet with the approval of President Wilson, who is engineering the safe passage of the bill through congress. Another month, at least, will be spent in the discussion of the bill, the senate making haste slowly in its consideration.

INVESTIGATION of President Wilson's charge that a pernicious and insidious lobby is at work in Washington to prevent the passage of the Underwood tariff bill, particularly as it applies to free sugar and free wool, discloses the fact that the Hawaiian sugar producers have already spent $100,000 in their effort to kill the proposed free sugar provision, paying $12,000 a year to a man to represent them at Washington and providing for the publication of numerous articles in the various newspapers and magazines. This is the first disclosure of systematic lobbying conducted by affected interests, although it has been shown that a number of the senators have financial interests which will be directly and vitally affected by the passage of the bill which they are considering. President Wilson, undoubtedly, spoke advisedly in what he said on the lobby, and the present inquiry bids fair to open the eyes of the country so that such insidious, but none-the-less effective perversion of popular will can hardly be successful again, in as full measure as in the past.

THE United States Supreme Court handed down an important decision last week, confirming the power of the state to fix reasonable freight and passenger rates on traffic wholly within the state, until such time as congress shall choose to regulate these rates. The decision came in the Minnesota freight rate cases and gives to the state board of railroad commissioners the power to demand and enforce a passenger rate of two cents a mile, instead of three, in all cases where such a rate would not work such a hardship on the railroad as to be practically a confiscation of property. The main lines traversing Minnesota were shown to be abundantly able to stand the reduction. The decision is important, as the railroad commissioners of eight states filed briefs and took a hand in the litigation. It is important to Iowa, for instance, inasmuch as it confirms the power of the state board of railroad commissioners to enforce the law passed by the last legislature demanding a reduced rate to the Iowa State Fair. Other states are equally interested, their power to reduce both passenger and freight rates now being assured, in all cases where the order does not cut down the receipts and profits of the road so as to be unjust and confiscatory.

LABOR troubles have been more than usually numerous, protracted and bitter the past year. Following the conviction of the McNamara brothers on the charge of blowing up the plant of the Los Angeles Times, in which outrage twenty-one lives were lost, a large number of officials of the iron workers and bridge builders' union were convicted of shipping dynamite over the country and planning outrages in the campaign to bring capital to the terms and will of union labor. About the same time occurred the prolonged labor warfare at Lawrence, Massachusetts, in which the Industrial Workers of the World (a new form of unionized labor) sought to dictate terms to the employers. Following the settlement of that affair, an indictment was returned against one of the leading capitalists of Massachusetts, the head of the biggest woolen manufacturing concern in the country, on the charge of "planting" dynamite in order to throw suspicion upon the laborers, by making it appear that they proposed to use the dynamite to blow up mills and factories. This capitalist was acquitted last week, but immediately the charge of jury tampering was preferred. A day or two later the West Virginia miners, who have been on a strike for months and have been kept in order only by the show or exercise of armed force, again came into prominence through the indictment, in Charleston, West Virginia, of the president of the United Mine Workers of America and eighteen other officials of the union, charging them with violating the Sherman anti-trust law by entering into a conspiracy to restrict the amount of coal mined, by refusing to allow non-union men to work in the mines and even limiting the amount of work to be done by the union men themselves. America is on the brink of a serious conflict between capital and labor, the aggravated labor situation being as serious a menace as any which confronts the nation today. Calm and patriotic counsel may bring about a compromise, but the gravity of the situation is generally recognized.

AMERICAN SHORT-HORN HERD BOOK.

Volume 79 of the American Shorthorn Herd Book has just come from the press. It contains 20,000 pedigrees, the bulls being numbered from 350,001 to 359,004 and the cows from 104,001 to 115,000. The price of this volume to non members is $2.00 at the office of the association or $2.30 prepaid. Those interested should write Secretary Roy G. Groves, Record Building, Union Stock Yards, Chicago, Illinois.

The Ohio Experiment Station has begun a campaign against the ox warble fly, considered one of the most harmful insect pests of live stock in the state. This fly deposits its egg upon the hairs of cattle, particularly on the legs just above the hoofs. The animal licks the hairs with its tongue and this way the eggs are transmitted to the gullet when the young maggots dig their way to the back under the hide, causing severe irritation.

The Voice of Reconstruction

When a flood sweeps over a vast area, desolating the cities and towns which lie in its course, the appeal for assistance gets a unanimous response from the whole country.

With all commercial and social order wiped out, an afflicted community is unable to do for itself. It must draw upon the resources of the nation of which it is a part.

In such an emergency, the telephone gives its greatest service when it carries the voice of distress to the outside world, and the voice of the outside world back to those suffering.

At the most critical time, the nearest telephone connected and working in the Bell System affords instant communication with distant places.

And always the Bell System, with its extensive resources and reserve means, is able to restore its service promptly, and in facilitating the work of rebuilding, performs one of its highest civic functions.

Dip for Dollars

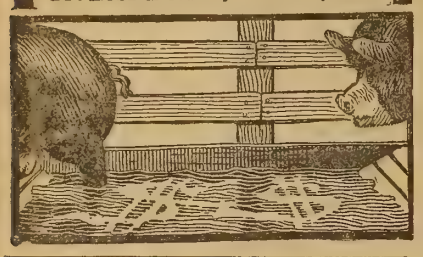
Dipping sheep and swine is a paying proposition. Every time your stock pass through a Dr. Hess Dip solution they increase in value. This is because Dr. Hess dip renders them less liable to disease and free of tantalizing vermin. *It's the healthy hog that puts on the fat*, hence

Dr. Hess Dip and Disinfectant

—because it makes for hog health—also makes for your profit. Dr. Hess Dip is approved by the Government as an official dip for sheep scab. It destroys all germ life and is therefore a sure preventive of contagious live stock diseases. A splendid disinfectant and deodorizer. Sold on a money-back guarantee if not satisfactory.

Write for dip booklet.

Dr. Hess & Clark, Ashland, Ohio



"INGECO" Engines

A BIG MONEY SAVER

An engine that you can bet your last dollar on to work right in all kinds of weather—a fuel saver — an easy starter — a steady worker.

The "INGECO" is just that kind of an engine and besides its reliability it has a record for keeping out of the repair shop—it is a marvel of simplicity—there is nothing to get out of order. Once set it runs constantly without trouble.

From 1½ to 60 H.P. Stationary, Portable, Semi-Portable Types.

Find out about "INGECO" Engines before you make another move on the engine question—you'll be ahead in money and satisfaction.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper: but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit $1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

RECOVERY OF NOTE.

A Subscriber, Earling, Iowa.—In 1893 A gave his promissory note to B for a certain sum of money which note was due and payable in October, 1893, in the state of Nebraska. A left Nebraska in December, 1893, and has not been in the state since. Can B collect the note from A?

Answer.—A promissory note is barred by the statute of limitations in five years after it is due, but where the maker of the note departs from the state of Nebraska after his note is due, his absence will not be counted as part of said five years, and when he returns he may be sued and judgment obtained against him for the amount of the note.

DISEASED HOGS—DAMAGES.

A Subscriber, Boyden, Iowa.—(1) Can a man ship pigs from South Dakota to Iowa and sell them without having them inspected? (2) Some pigs were shipped from South Dakota to Iowa and sold to several parties in Iowa. Three of the buyers claim that their other hogs were infected with cholera from these pigs and five or six other buyers claim the pigs were healthy. Can the three buyers who lost their hogs from cholera recover damages and if so how much?

Answer.—(1) There is no provision of law requiring pigs so shipped, to be inspected. (2) If the buyers can prove that the pigs they bought were infected with cholera and by reason thereof they infected their herds, they can recover damages to the extent of the injury they suffered.

O. I. C. BOAR—SPOTTED PIGS.

Mr. Wm. Bartlett, Pierce, Neb.—I am a breeder of O. I. C. hogs. I bought a registered O. I. C. boar from a man in Iowa. The boar is a fine hog and duly recorded. I bred forty registered O. I. C. sows to the boar, and four of them had spotted pigs. I have been breeding O. I. C. hogs for twelve years, and these pigs are the only spotted ones I have had. Is the seller of this boar responsible, and can I recover damages from him?

Answer.—You cannot recover damages from the seller of the boar, unless you can prove that he misrepresented the pedigree of the boar to you. If he represented the boar to be pure O. I. C., when, in fact, it was not pure bred, but a grade boar, you can recover damages. An expert breeder might tell you whether spotted pigs constitute conclusive evidence that the sire is not pure bred O. I. C.

DRAIN ACROSS ROAD.

Mr. T. H. White, Hopkinton, Iowa.—Last year A tiled some of his land and discharged the water on B's land. Then B tiled from the end of A's tile, running into public road, discharging water into a culvert where it runs across the road into my field. The steady flow through the tile drain keeps a strip of my land so wet that I am compelled to put in tile, starting where B's tile ends on the other side of the road from my land. Must I bear the expense of tiling across the public road, or is it the duty of the township road district to do it?

Answer.—You must bear the expense of tiling across the public road. The law does not require the road district to do it.

TREES ALONG DIVISION LINE.

A Subscriber, Yankton, S. D.—Under the laws of South Dakota can I compel my neighbor to cut out a row of walnut trees that are growing along the fence dividing our farms? The trees belong to my neighbor.

You cannot lawfully compel your neighbor to cut the trees.

LAW ABOUT GRADE STALLIONS.

A Reader, Atlantic, Iowa.—What is the law of Iowa about keeping for service a grade stallion?

Answer.—The law provides that any owner or keeper of a stallion kept for public service, for which a state certificate has not been issued, must advertise said horse by having printed hand bills or posters, not less than five by seven inches in size, and have printed thereon immediately preceding or above the name of the stallion, the words, "Grade Stallion," in type not smaller than one inch high, said bills or posters to be posted in a conspicuous manner at all places where the stallion is kept for public service. Also, the owner or keeper of every stallion or jack, over two years old, kept for public service, sale, exchange or transfer, shall make oath that the stallion or jack is, to the best of his knowledge, free from hereditary, contagious or transmissible disease, or in lieu thereof, get a certificate from a qualified veterinary to that effect, and file same with the secretary of the state board of agriculture.

PARTNERSHIP BETWEEN BROTHERS—SETTLEMENT.

A Subscriber,————Iowa.—Two brothers, A and B, entered into partnership and bought eighty acres of land, taking the deed in A's name. A few years later they in like manner bought town property taking the deed in B's name. Sixteen years ago A married and moved to the eighty-acre farm. He and his wife worked hard and put all their earnings on the place in many improvements and paid all taxes thereon, while B worked in town and used his earnings solely for himself. He sold the town property for $1,000 and invested the money in other property, in Dakota land, and finally in a quarter section in eastern Colorado. He has had from the eighty-acre farm three horses, cow and calf, grain, hay, farm implements, wagon and harness, and about $500. At the time he sold the town property the eighty-acre farm was worth $40 per acre. A thinks they should either settle on that basis, or that he should share in B's property in Colorado, while B is not willing to allow A to share in the Colorado property, but wants half of the eighty-acre farm at present value. Please suggest what would be a fair and just settlement for both parties.

Answer.—B seems to be very unreasonable in his demands. A fair settlement would be an equal division of the value of the town property and the farm at the time the town property was sold; town property at $1,000, farm at $3,200, B paying A the $500 and interest, and the value of the horses, cow and calf, hay, grain and other personal property which he has received from the farm.

DIVIDING PARTITION FENCE.

Mr. Earl J. Wilkinson, Lyons, Iowa.—My neighbor and I are in a controversy about which half of the partition fence belongs to each. Please tell us the legal rule for deciding such a matter.

Answer.—It is usual and customary for owners of adjoining land to agree between themselves as to which part of the partition fence each will build and keep up. Where they are unable to agree, only one way is open to them, viz.: either party may call upon the fence viewers to meet and determine the matter and it is then the duty of the fence viewers to give notice to both parties of such meeting, and there determine the portion of the fence each is to build and keep in repair. Such decision binds both parties, unless an appeal should be taken. Some expense attends this proceeding, and it is, therefore, better for the parties to agree, if possible, and thus avoid the expense.

MECHANIC'S LIEN.

Mr. A. H. Wilcox, Odessa, Iowa.—B built a house for A and A promised to pay therefor about two months after the job was done, but did not do so. How long after the job was done can B secure a mechanic's lien to secure his pay?

Answer.—B is required by law to file his mechanic's lien within ninety days after the completion of the job.

CURE THAT SPAVINED HORSE

In three weeks' time you can have a good, sound driver or work horse in place of a lame, spavined animal, by using **Bo-Spav-O**—the remedy that is guaranteed to positively remove and cure a bone spavin without blistering or leaving scar or blemish of any kind. A simple, humane, easy-to-apply remedy that quickly makes bone spavins disappear. Used for three years and not a single failure. Write today for interesting circular and further information.

PLAY DAYS FOR FARM WORKERS.

(Continued from page 3.)

for "Egg Day" varies little from year to year. It opens in the forenoon with a decorated automobile parade, prizes being awarded for the best decorated autos in the parade. In addition to the prizes, a souvenir is given every entry. This feature of the program is followed by a picnic dinner in the park, all the picnickers being furnished coffee, cream and sugar.

At one o'clock the athletic program of the day is given on the main street of the town. As befits the day, the contests are all of an egg nature. One of the races is for children twelve years of age or under. Twenty eggs are placed three feet apart, in rows, a row for each contestant. The runners then pick up one egg at a time and deposit it in a basket at one end of the row. The contestant that first lands all the eggs in his row in the basket, unbroken, wins first prize. Another egg race is similar to the foregoing, except that it is open to all and each contestant must place each egg in his row in the basket, unbroken, with a spoon. If an egg is touched by the hand, the contestant is disqualified. The hurdle egg race is open to all and the distance is one block. Each contestant carries an egg on a tennis racket, and the one who arrives at the finish tape first with his egg unbroken and untouched by his hands, wins first prize. Another event that is open to all is called the "crowbar egg race," and is for a distance of twenty-five yards. The contestants are required to roll an egg the requisite distance with a crowbar and deliver it at the goal, uncracked and unbroken. In addition to these contests there is the horseback egg race and the novelty egg race, the details of which are usually kept secret until the entries are complete and the races are ready to be run. Following this part of the program, there is a baseball game between two well-known teams from other cities and towns, the teams playing for a purse of $100.

But a big feature of the day and one that appeals to all, although more particularly to the women from the farm, is the egg exhibit at the city hall. First and second prizes are offered for the heaviest dozen eggs from the following breeds of poultry: Silver Laced Wyandottes, Black Minorcas, Barred Plymouth Rocks, White Wyandottes, Rhode Island Reds, and Brown Leghorns. A prize is also given for the heaviest hen, goose, duck and turkey eggs.

The day closes with a big display of fireworks and to many this feature is the star part of the program. The display is set off on the river bank opposite the park and is witnessed by thousands of people every year. The program for the day is varied with good music, both instrumental and vocal, the management seeking to entertain and amuse all classes.

The success of Egg Day in the past has demonstrated its popularity and insures its perpetuation. The fact that all the amusements are absolutely free to the farmer visitor and that he is made to feel cordially welcome adds to the pleasures of the day, while his own participation in the races and his wife's competition for the prizes at the city hall egg contest add that personal touch which makes the day his own fully as much as the townsman's.

What Egg Day is for Alden, Watermelon Day is for Webster City, Sugar Beet Day is for Steamboat Rock, Sauerkraut Day is for Ackley, and so on through a long list which in Iowa alone shows the popularity of this plan for harmonious social co-operation between farmer and townsman. In Webster City a bustling town of 7,000 population, in the northern part of the state, the annually-recurring Watermelon Day brings thousands of farmers into town and gives unalloyed pleasure to hosts and guests alike. The big feature of the day is the watermelon feast. To take care of this big feed, arrangements are made for two or three car loads of watermelons that are ready for the knife. These are piled up in a huge stockade and when the hour arrives to "cut the melon," the fruit is carved and a quarter served to each and every comer, free. If the local crop is good, the melons served are grown in Hamilton or adjoining counties and shipped to the refreshment committee. If not, the melons are shipped in for the feast, since the day would not be "Watermelon Day" without this big melon banquet.

The dominant idea of the day, and always a prominent feature of the occasion, is that one day in each year shall be set aside by the merchants and business and professional men of Webster City in order that they may serve as host to the people of the country contiguous to their city. It is the big day of the year, when these men extend a hearty invitation to the farmers in the Webster City territory to come to town and leave their pocketbooks at home, for everything pertaining to this celebration is free in every sense of the word, and this fact has probably been a big factor in the success of the festival, all joining in a jolly good time with no fear that they are going to be mulcted in some manner, either directly or indirectly. In fact, this is the day when the business and professional men of the city rub elbows with their friends and customers from the country, and freely "set 'em up," all around.

In addition to the big melon feed, which always makes the biggest kind of a hit with the crowd, plenty of entertainment is offered throughout the day. A large platform is erected in the city park, on which is given a free vaudeville program that is first-class in every way. Two or three bands usually afford plenty of music during the day, while in the forenoon a big industrial parade is given that does credit to the city and county.

Aside from refreshment stands and a merry-go-round, everything is free. To meet this expense, the commercial interests of the city contribute liberally, usually raising from $700 to $1,000 to meet the cost of the celebration. Usually some noted speaker is on the program and an athletic program adds zest to the day's fun and entertainment. Two years ago, President Taft was the speaker. (See photograph, copyright by Svenson.)

This occasion is looked forward to with much anticipation by thousands of people within a radius of thirty miles of Webster City every fall, for Watermelon Day rivals Fourth of July in importance on the year's calendar.

What is being done, with such glowing success, in these typical Iowa towns may be done, with equally enjoyable profit and pleasure, in practically any other town of the grain belt. The celebrations are to be commended for their festival spirit, for the innocent pleasure and amusement furnished, for the recreation which they provide to farmer and townsman alike and for the opportunity which they occasion for the farmer to become better acquainted with the men who buy his produce, who sell him his household necessities, who doctor his family, who try his lawsuits and who preach to him often on Sunday, but know him all too little on week days. All work and no play makes not only a dull boy of Jack and a dull girl of Jill, but a dull man of Jack's father and a dull woman of Jill's mother. Whether it be Road Drag Day (one of the latest forms of co-operation) or Bean Day or Egg Day or Sauerkraut Day, once there is innocent pleasure, friendly contest for supremacy in raising crops, and harmonious social relations between the man of the furrows and the man of the pavement, the occasion is almost bound to be mutually enjoyable and to linger pleasantly in memory from one year's end to another, making farm life more attractive and satisfying and knitting whole communities closer together.

PROFITS FROM RURAL LOANS.

"It is a good thing for the country, as well as for themselves, that our Jewish population is more and more turning to agricultural pursuits," says the Boston Transcript. While the purely technical aspects of the industry are comparatively strange to them and they require considerable training and direction, they are capable of being our instructors in some of its broader relations. The question of rural credit unions is one that has been put before congress by a president of the United States. The governor of Massachusetts has sent special recommendations to the legislature on the same matter.

But the report of the Jewish Agricultural and Aid Society for 1912 gives an account of three such credit unions by Jewish farmers, in states of New York and Connecticut. Loans equal to twice the amount subscribed by members of these unions are granted. After five months' trial these organizations showed a profit of 9½ per cent on the capital. After ten months the profit was 11½ per cent on the investment. While all this has been on a small scale, it seems to demonstrate the workableness of the system.

—A good leather collar is best for a horse to wear if it fits, but if it does not, a cloth collar seems better, simply because it is so flexible it will conform itself to the shoulder's shape. In hot weather, though, the cloth collar absorbs and retains too much sweat.

DAIRY

SUMMER CARE OF CREAM FROM COW TO CHURN.

To the Editor of The Homestead:

In the summertime the best place to milk is out of doors, in the pasture, or in a clean, roomy corral. Take a clean, well-scalded pail, turn the cow so that the milker's back is to the wind, brush off the flanks and the udder with a damp cloth, then with clean, dry hands pump one stroke of the milk from each teat out on the ground and empty each cow's milk into the pails or cans, which are arranged at the nearest point of the milking place to the separator. The milk may be now taken to the separator, which has been made perfectly clean and every part of which has been thoroughly scalded with hot water since the last skimming. Use shotgun cans as cream receptacles, covering them with the can lids or a clean scalded cloth thrown over the spouts and the cans. Allow the cream to be exposed as little as possible to the air at any time. When the skimming is complete, taste the cream, and if it is off flavor set it aside and dispose of it as off flavor. Deliver the cream to the ice box, tub or tank, immediately. Keep it as near forty degrees as possible until removed to the creamery. When the cream is twenty-four hours chilled it can be poured into the shipping cans.

Under no circumstances should warm cream be put into cold cream. Despite all care, undesirable bacteria will get into the surface of the cold cream and, like a lot of hungry beasts, await their opportunity when warmed up by new warm cream, to commence intense action and put the whole batch with an off flavor.

Ice boxes, tubs, or cold water tanks should be under cover, a well-house being an ideal place for them. The shipping cans should be removed from their cooling receptacles to the wagon and kept covered from sun until delivered to the ripening tank or vat of the creamery. Where the cream is shipped by railway, it should not be exposed to the sunshine more than ten minutes before the train starts. A coarse sack slipped over each can while in transit, would stop much of the trouble in shipping cream.

Boiling water, ice, water at forty degrees, absolute cleanliness and sanitary covering of the cream from the time it leaves the cow in the milk until it reaches the churn is the profound secret of gilt-edged cream in the churn. There is nothing new in all this. Everyone knows it. It has been proved time and again. The question is, how many live up to their knowledge? Upon the answer depends one's success or failure.

The best method of cleansing the milk and cream vessels is by careful scrubbing, first with lukewarm water to remove the milk or cream adhering to the receptacle, and again with warm water. If a cleansing agent is used, a third washing will be necessary to remove all traces of it. Then scald the vessels. It is not enough to pour a little boiling water into each can, rinse it around, and call them scalded. They should be filled with boiling water and allowed to stand covered for a few minutes, or better still, submerged in boiling water, and exposed to the air and sun in some place where no dirt or dust can blow into them.

The dairy barn is a sanitary problem, for when milk is taken from the cow in a closed stable it becomes charged with bad bacteria in spite of all precautions. The air in a stable, as soon as the cows begin to move about, becomes laden with floating dust which serves as airships for all kinds of bacteria which seem to be able to navigate to the milk pail. Make the barn as sanitary as possible by cleanliness and disinfectants. It is well to keep a barrel of saturated lime water in a safe and handy corner, also a garden sprinkling can and give the floors a sprinkle of the lime water once a day. Keeping a hand sprayer or pump and spraying the ceilings and all the inside fixtures at least once every two weeks with lime water, is a good plan, too. Every milk pail should have a lid to slip on, as soon as each cow is milked, and the milk removed from the barn as soon as possible, to the separator room.

Farm premises are charged with many kinds of bacterial life, both good and bad. The good give pleasing flavors to milk, cream and butter, likewise the bad, disagreeable flavors. These develop flavor in all stages of heat, from zero to 112 degrees. To destroy as much of the bad life as possible and to keep inert the rest, is a problem to contend with, from the cow to the churn. The butter makers can ripen the cream to a nicety if they can but get good, sweet cream. The spoiling of the highest grade of appetizing butter is done in the treatment of the milk and cream between the cow and the churn. W. H. O.

EVILS OF PREMATURE CREAMERIES.

Prof. J. H. Frandsen, of the dairy department of the Nebraska Experiment Station, has recently called attention to the loss that the community may be called upon to share in by the premature development of a creamery. He points out that there are many districts more or less thinly settled and other sections where people are somewhat indifferent to dairying under which the small co-operative creamery can scarcely hope to be successful. Creameries under these conditions are operated more successfully under the centralized plan.

If on the other hand there are so many as 600 dairy cows in a locality, and if in conjunction to this there can be found strong sentiment in favor of the dairy industry; there is no good reason, according to Professor Frandsen, why a co-operative creamery should not be successful and satisfactory to its patrons.

At this point Professor Frandsen calls attention to the opportunity that is created for what he calls the "creamery promoter." It is the business of this type of salesman to dispose of creamery equipment and in order to do this some sort of an organization has to be effected. Hundreds of instances can be found today in all states of the corn belt where disaster has followed in the wake of these promoters for the simple reason that sufficient dairy sentiment has not been found in these localities to foster the industry after it has been established.

Professor Frandsen gives wholesome advice to those communities that are thinking of establishing on the co-operative plan when he says:

Do your own organizing and order everything needed direct from a reliable creamery supply house. The creamery organized by the farmers' own initiative not only is better and cheaper, but is on a more substantial foundation from the very first and better able to weather successfully any little storm that may come. If the sentiment and interest in the community is not developed sufficiently to make possible the organization of a creamery by their own efforts assisted by disinterested outside help, such as that from the experiment station officials and others vitally interested in the permanent development and prosperity of the dairy industry, the chances are that the creamery promoter cannot develop enough interest and mutual confidence among the farmers to make the co-operative creamery a success after the promoter's influence is withdrawn.

When a sufficient amount of interest in a co-operative creamery has manifested itself, the first thing to be done is to carefully ascertain how many dairy cows within a radius of seven or eight miles can be counted on regularly for the support of the creamery. In taking this cow census, special emphasis should be laid on the necessity of getting the actual number of cows that can be counted on to furnish cream for the new creamery. If fewer than about 600 available cows are found in this territory, the project had better be indefinitely postponed.

If it be found that there is a sufficient number of cows to give reasonable assurance of success, then the organization should be given most careful consideration, and again I would advise that the farmers do their own organizing and that not too many city people without cows be admitted. I would qualify this by saying that frequently on account of superior training it may be desirable to select a well-

SILO of Clear Fir at 40% to 60% Saving

Silos cost too much, because silo manufacturers pay too much for materials and want too much profit. We produce our own material and sell you direct at one small profit.

Seattle Silos

are made of the finest fir that grows, from our forests in the famous Puget Sound Region. Close and straight of grain. No sap or knots. Wonderfully durable.

The doors are swinging and quick detachable. Door bars form strong ladder from which hoops are easily tightened. A newly patented idea. *Write today for special silo folder* and delivered prices. We can usually arrange practically carload rates even on single silos. Special offer to one farmer in each township.

Save 40% to 60% on Lumber and Millwork

Cut out the five needless middlemen. Put their price-doubling profit in *your pocket.* Buy of the producer. We own thousands of acres of timber land in Washington, Oregon and British Columbia. One continuous operation, from tree to shipping platform—one overhead expense—one profit to pay. We guarantee materials of better quality than you can buy locally or your money refunded. All orders shipped within 24 to 48 hours. Delivery takes an average of two weeks.

Write today for catalog and price list. Send bill of materials, if possible, for estimate.

"Siloil"

Another Big Saginaw Success

True to our promise to improve the Saginaw Silo if it ever became possible, we have brought forth a wonderful wood-preservative called "SILOIL." We now offer the Saginaw SILOILED YELLOW PINE SILO and guarantee it to have many of the qualities of redwood. This remarkable oil, applied by our special High-Temperature Absorption Process, makes yellow pine absolutely insect and worm proof, rot-resisting and fire-resisting; prevents staves from swelling or shrinking, thus doubly insuring a solid, immovable structure.

SILOIL penetrates so thoroughly and is such a perfect preservative that it multiplies by ten the life of your silo. SILOIL is a permanent thing. SILOIL never evaporates, never dries out, cannot wash out or blister. Has the same preservative qualities as the ancients used on wood statues 2,000 years old. When you buy your Saginaw Silo, specify Siloiled Yellow Pine and you will get an investment that pays big dividends.

Write! By all means write for full particulars of this latest and greatest Saginaw success. We have a handsome new circular No. 34, just out, that explains. Send postal now to

WM. GALLOWAY COMPANY
13 Galloway Station, Waterloo, Ia. 463

trained business man as financial manager.

The most satisfactory way of raising the money is for each member to sign an agreement and to be jointly responsible for the amount borrowed. When such an agreement is signed by a goodly number of responsible farmers, the money can generally be secured at a reasonable rate of interest, and with this money a creamery can be erected and equipped. As soon as the creamery begins operation, arrangements can be made for a deduction of one or two cents per pound of butter to go into a "sinking fund" out of which the debt is paid. The payment is so gradual that the farmer hardly notices it. This plan has the advantage of requiring each patron to pay exactly in proportion to the amount of butter manufactured for him.

The cost of a creamery building will be from $1,000 to $2,500, depending on the locality, kind of construction, and cost of material and labor. Such a building usually consists of a main work room, engine and boiler room (including space for refrigerating machine), coal room, refrigerator, store room and office.

Machinery for a gathered cream plant will cost approximately $1,200. If refrigerating machinery is included the cost will be from $800 to $1,000 more. The total cost of a creamery with complete equipment would therefore vary from $2,200 to $4,700 for a gathered cream creamery. This estimate, of course, does not provide for a large commission for a promoter, but, rather, is made on the assumption that the building is constructed by the responsible local contractor submitting the lowest bid, and that the needed creamery machinery is ordered from a reliable creamery supply house willing to furnish the same for the lowest cash price. From facts and figures at hand it is estimated that the plan suggested would save the community from $1,200 to $2,000.

Attention might be called to the fact that the most serious objection to the "promoted creamery" is not so much the original loss which comes from investing in a building and in machinery as it is the setback which the dairy interest suffers wherever creameries fail. It means the creation of the prejudice against the industry which can scarcely ever be lived down. As the dairy departments of all the experiment stations are taking this matter up first hand with those who propose to establish co-operative creameries, it is suggested that the aid of these departments should in all cases be sought.

A GOOD ROADS TIP.

A Chicago newspaper complains very bitterly, indeed, and with apparent justification that "Illinois is stuck in the mud of bad roads." Of the 94,141 miles of public highways in that state, not counting city streets, less than 10 per cent are covered with any form of hard surfacing. And then it demands that all able-bodied men in the penal institutions should be employed in crushing stone for roads, or later in road building. All of which is sound and sensible, as it is bound to be, when founded on the pioneer experience of Colorado in convict labor and road improvements, says the Denver News.

Since Tom Tynan, warden of the penitentiary, began the work of the building and repairing Colorado roads with some of his charges, he has contributed more than $35,000 worth of convict brawn and muscle to the state. Most parts of the state have benefited by this enterprise, and only the limitation of resources has prevented other sections from reaping the results of Tynan's skill and ingenuity. And the Colorado warden is not through by any means. He will actively co-operate with the state highway commissioner, supplementing the appropriation already available for good roads by the continued employment of the men in his keeping, a very valuable contribution by reason of the experience they have had.

Illinois can obtain kindred results by the appointment of the right kind of warden, and by judicious combination of humanity and labor. In this connection it can get the best advice in the world from Tom Tynan, warden of the Colorado penitentiary.

John H. Wallace, game warden of Alabama wants the United States Government to immediately make treaties with other countries of the western hemisphere for the protection of migratory birds. Such treaties would practically be an extension of McLean bill, passed at the last session of congress which provides for federal protection of migratory birds.

Ask your neighbor to subscribe for The Homestead.

The Sign of a Good Dairy Farmer

WE USE THE DE LAVAL Cream Separator

There are more than a million such signs on the best farms the country over. They are almost invariably a badge of prosperity and practical progressiveness. They are a most impressive object lesson to the farmer who hasn't one. They point the sure way to better things in dairying.

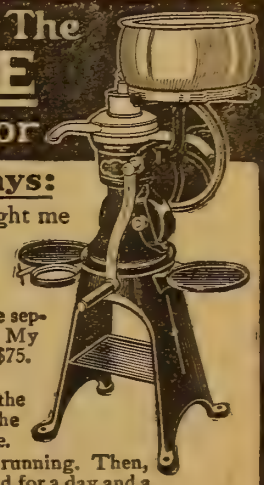
Where there's a De Laval user without a De Laval User's Sign a new enameled sign will be gladly sent him free of all cost.

Where there's a dairy farmer—big or little—without a De Laval Separator the De Laval User's Sign—that badge of prosperity and progressiveness—will come to him with his separator.

Why not buy a De Laval Separator now? Try one any way, through the local agent, and satisfy yourself. This will cost you nothing and may save you much. There never was a better time to make so important and self-paying an investment than right now—and the "sign of a good dairy farmer" goes with it.

THE DE LAVAL SEPARATOR CO.
NEW YORK CHICAGO SAN FRANCISCO SEATTLE

Why He Prefers The BEATRICE Cream Separator



Farmer Onswon says:

Years of experience have taught me one indisputable fact: There is only *one* separator which combines high quality with moderate price—that is the BEATRICE. Most every farmer is aware that the average high-grade separator of big capacity costs from $100 to $110. My BEATRICE, with 1000 pounds capacity, cost me $75. Why pay more? There is no better machine. *Less than 2 minutes* is all the time it takes to clean the machine with the patented device. It will leave the machine thoroughly clean and sanitary. Try it and see. My BEATRICE beats any machine I ever had for easy running. Then, the close skimming. Why, I've let skimmed milk stand for a day and a half and you couldn't find a speck of cream on it. And—I haven't done so little repairing since I owned a separator. That's a point *you* want to consider.

The BEATRICE is a guarantee of separator satisfaction. That's what you want. Ask your dealer or write for booklet to the nearest address below. 600 lbs. capacity, $55. 800 lbs. capacity, $65. 1000 lbs. capacity, $75.

POULTRY DEPARTMENT

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

HANDLING LATE CHICKS.

To the Editor of The Homestead:

Many people are of the opinion that late chicks cannot be handled successfully and that to attempt to raise late chicks will end in utter failure. As a matter of fact, late chicks are no harder to raise than those hatched in March, April or May.

Oftentimes it is not possible for one to hatch chicks as early as usual on account of unforeseen troubles. There is no reason why one should be at all backward about setting eggs a little late in the season.

There are only two things to be remembered in raising late chicks, especially those hatched during June or July. In the first place, abundant shade must be provided and the sleeping quarters made as cool as possible, and, in the second place, care must be exercised that the chicks do not have the opportunity of getting out early in the morning when the grass is wet. This is very important. We have had promising chicks killed from the effects of getting wet early in the morning and later, when the sun became hot, they died.

The usual excuse offered for not raising late chicks is that "they stand around and sleep themselves to death." But if you had examined those very chicks we are confident that you would have found something else wrong with them. A chick is just as much a lover of life as you are, and you may be assured that it will not simply stand around and sleep because it happened to be a June or July chick.

Not very long ago we examined one flock that had this "disease," and the owner was very much surprised to find that her chicks were suffering from "lice." The owner was a victim of a popular verdict—being June chicks they were expected to do nothing else but die.

An examination of another flock revealed the fact that they were forced to sleep in badly ventilated quarters with chicks three or four sizes larger than they were. As a result the larger chicks got the best places to roost and usually tramped the little fellows until they were stunted.

It is imperative that June or July chicks have a place to themselves and they should naturally be given a little extra attention and care, for they come at a time of the year when you are apt to neglect them too much. As far as disease and lice are concerned for late chicks, that lies in your power. It is not any harder to fight lice on June or July chicks than it is to fight them on April or May chicks. As a matter of fact, I would rather take the later chicks when it comes to a question of fighting vermin.

About the only thing that is not in favor of the June or July chick is the fact that it will be a late layer. It has been stated that a young pullet comes into her greatest laying power exactly one year after being hatched. Such being the case, it can be seen that a June or July chick would not make a strong layer at the time of the year when prices are high. But, the question of when a pullet will lay her best is not fully decided. It is usually a question of the individual pullet or the care she has received. There are many breeders that claim to have their pullets in good laying by the time they are seven months of age. If such be the case, June or July-hatched chicks would come just at the right time to catch the high prices.

Where it is the purpose of the poultryman to raise fowls for the markets, there is nothing that will be a greater assurance of success than to hatch the fowls intended for late markets, during June or July. Fowls of the larger breeds hatched during those months should be in the best of flesh for the Thanksgiving markets and will even make good on the Christmas markets.

There can be no doubt that June and July-hatched chicks make the best birds to put in the show room. Practically every good winner last winter at all the large shows was a

DOGS.

Scotch Collie Pups

I HAVE 6 male pups, sable and white in color, six weeks old that are out of an excellent working bitch. Their sire is also a good worker. Both are natural heelers. Price $5.00 each for the next two weeks. Better order at once if you want one.
J. E. SMITH - - - VICTOR, IOWA

SCOTTISH TERRIERS

THE best little rat, watch, pet and stay-at-home dog on earth. From puppies to grown ones for sale. When writing please state just what you want.
S. Harr, Riverside, Iowa.

SCOTCH COLLIES

HOMESTEAD readers interested in the very best Collie should write us. Our stock is direct from the very best imported and of strains noted for their winnings and intelligence. Address A. A. Martin & Son, Route 4, Box 107, Lincoln, Nebraska.

MINORCAS.

MINORCA EGGS for sale from prize-winning pens of Rose and Single Combs. Elmwood Poultry Farm, Blakesburg, Ia.

BRAHMAS.

Heavy-Weight Light Brahma Eggs Shipped by insured parcel post. Address Frank Johnson, Monroe, Iowa.

June-hatched bird. In fact, at one of the prominent eastern shows it was found that 90 per cent of the male birds in all classes were late summer hatched.

In view of the above facts we can not see where there is a logical reason for refusing to raise a few chicks during the late months of the incubating season. The earlier chicks are out of the way by that time and there is no reason why every farmer should not avail himself of the opportunity of adding a little more to his profits from the poultry yard. Of course, it will take a little more work, but in what way can you return money to the farm without work?

If there is an incubator on the farm, we would advise that the late chicks be hatched by that means, for it will remove the bugbear of lice. However, a good hen will do just as well.

The hen should be given the means of taking a daily dust bath all during the incubation period. This is an important thing in successfully raising late chicks. In addition, she should be given a good and thorough dusting once each week with a good insect powder.

Just as soon as the chicks are dry, take them away from the hen and place them in a fireless brooder. We would not advise the use of the hen under any circumstances for brooding the late chicks. You will find that they will do better and will be better contented without her.

For the first two weeks feed them all they will eat of dry bread crumbs. But do not feed them until they are seventy-two hours old nor allow them to have a drink until that time. This is important. Moreover do not allow them to drink during the first week except at the regular feeding periods, which should be five times each day. This is the best remedy for white diarrhea we know of—starting them properly.

At the end of the second week, the bread crumbs are discarded and cracked wheat given them. The wheat is the best thing for young chicks that can be obtained. Now, under no circumstances, allow them to have access to cracked corn at this stage of their growth. If you cannot obtain the cracked wheat, feed them on oatmeal or steel-cut oats. It will answer the same purpose of the wheat. If you are fortunate enough to have both, they may be fed alternately.

The object in feeding chicks at any time of the year is to induce the greatest possible growth without injuring the chicks in any way. While corn is possibly an advantage in inducing a good growth, it is not to be recommended until the chicks have obtained their full development.

Continue to feed the chicks five times each day and the water may now be left before them all the time. The tendency of little chicks is to drink too much, especially during the first two weeks, which causes a reaction to take place, resulting in the disease known as diarrhea.

Of course ample shade is necessary for success in raising late chicks. This may be applied in many different ways and it little matters what the shade is, just so the chicks have it and are kept as cool as possible. Early in the morning it is best to put them in the direct sunlight on a bare run where there is no grass. As the day becomes warmer, remove them to a shady place, in the orchard, or allow them to roam at will. But do not allow them their freedom until the grass has dried off.

Plenty of shade with good intelligent attention will work wonders with late chicks. If given the opportunity they will do even better than chicks hatched earlier in the season.

Chesla Sherlock.

RAISING GEESE.

One of our subscribers, W. G. McGreger, of Garfield county, Nebraska, desires some information in regard to raising geese. He writes the following:

I have recently commenced to keep geese and find the following trouble: Have seven geese which run at large and have all the grass and grain they will eat with plenty of pure water to drink, but none in which to swim. One goose after another has become affected with some trouble in their legs, being unable to stand up or walk. Otherwise they appear to be well, eating and drinking and flopping around. This trouble generally lasts a week or two when they generally get over it. None have died.

What method should be used in setting geese? Can they be handled and set like chickens or must they be allowed to select their own nest? I find that they sit near one another and steal each others eggs. I am in the sand hill country with acres of grass going to waste and am sure that goose raising would be very profitable here if I could get well posted in the business.

It will pay anyone situated where there is an abundance of grass to raise geese. They are natural grazers and will do very well with nothing but grass and water, though a very little grain is advisable through the laying season.

The geese in question have become too fat. If they are killed and examined their livers will be found to be enlarged. That they recover is probably due to the fact that they did not have access to so much grain while they were disabled. Water for them to bathe in is desirable, but not absolutely necessary. A dry shed bedded with clean litter that will protect them from the weather is all the shelter needed.

The best all-around breed is the Toulouse. It grows to a very large size and will come more nearly making good under any and all conditions. In this, as in everything else, it pays to get pure-bred stock for the foundation.

This breed will lay from fifteen to twenty eggs and then become broody. By far the better plan is to set the eggs under chicken hens, five under a small hen and seven under a large one. If removed to isolated quarters a goose will soon give up the maternal prospects and begin laying again. They will lay three clutches in a season if promptly broken up.

Goose eggs hatch in about thirty days. Some breeders dip the eggs in warm water when it is nearly time to hatch. Even experienced breeders' ideas conflict about this. Many outside issues must be determined by the keeper himself. If the weather be hot, dry and windy by all means supply moisture.

It is necessary to be very careful when the goslings begin to escape from the shell. Many hens resent the presence of the peculiar looking aliens and proceed to peck them to death. If a hen is quiet and "owns" them she may be left with them for awhile. If not, they are very easily raised without the hen, as it is usually warm weather.

The goslings should not be fed for forty-eight hours; just kept quiet. The first feed is tender grass. Water should be given in a shallow vessel filled with stones to keep the little fellows from getting wet. Contrary to the popular belief young geese cannot stand soaking rains. A little later they may be fed corn bread that has been made with soda and sour milk and dampened; also cracked corn that has been scalded. But by far the greater part of their feed should be grass, clover and other bulky green stuff. If a hen is kept with them they learn to eat much sooner. It is advisable to confine them in a movable pen for a couple of weeks, allowing the hen to come and go as she chooses. If permitted to follow either a chicken or goose mother the first few days of their life they do not get enough rest. As a rule geese are not troubled with lice, but the goslings will become infested from a chicken mother and should be given attention.

If a gosling lives to be two weeks old and is kept out of beating rains, barring accident they will almost invariably live. Considering the small cost to raise them, the rapidity with which they get their growth and the profit realized, this industry has a bright outlook where pasture is abundant.

TO SHOW ROADS OF ALL AGES.

One of the most elaborate collections of road models ever displayed will be shown by the United States office of public roads at the Panama-Pacific Exposition in 1915. Logan Walter Page, treasurer of the bureau, began today preparations for assembling this unique exhibition.

Reproduction of old Roman roads, French roads and all the various types of modern highways will be included in the models. Miniature reproductions of road machinery, as well as every other known device used in the building of roads, will appear in the exhibit.

For years the bureau has been displaying at various national and international expositions and elsewhere and in its railroad educational cars samples of the work it is doing, but the showing it is preparing to make at the Panama-Pacific Exposition will be the most complete yet made.

Whitsitt's Short-horn Sale.

The twenty-fifth annual sale of Short-horn cattle at Prairie Heart Farm, of Whitsitt & Sons, Preemption, Ill., June 13th, drew a large crowd. For nearly half a century Short-horns have been bred upon the acres of this rich Illinois farm, and a great many cattle have gone out from it that have been profitable investment to those who secured them. The present offering, the twenty-fifth public sale that has been held there, had too many young things in it to make a very high average, but the fact that practically everything sold was produced on Prairie Heart Farm hade it profitable for the Messrs. Whitsitt and yet gave the buyer plenty of leeway. The bull demand was not as keen as it would have been a month earlier, owing to the lateness of the season, yet the very satisfactory average of $134 was made on the seventeen head sold, and the list included several youngsters that were too young to sell well. Collins Bros., Viola, Ill., topped the sale at $300, giving that price for the two-year-old Claret bull, Red Marshall, and at that price he was a decidedly good investment. Iowa, Illinois and Indiana buyers took the cattle, and the sale was conducted throughout in a highly satisfactory and honorable manner. Col. Carey M. Jones did a most excellent day's work in the box, assisted in the ring by George Burge and S. D. Lipton. The day was a beautiful one, and a satisfying lunch was served on the handsome lawn. The following is a list of all sales amounting to $100 or over:

FEMALES.

Rosebud 3d, calved 1911; Wickham Bros., Mt. Vernon, Iowa	$135
Lady Margaret, calved 1911, and b. c.; Otto Klawonn, Coal Valley, Ill.	130

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 639, Aurora, Missouri.

WITH THE EDITOR.

It begins to look as if girls attending the rural schools of Kansas were to have similar opportunities to those of their town cousins who have the advantage of lessons in scientific cookery. The state superintendent of schools is co-operating with other Kansas educators to make domestic science a course in every school in the state. Two important steps have already been taken.

Opinion having been sought of the state's attorney to discover if it would be legal to make such a course obligatory the ruling has been made that the purchase of necessary equipment and that of raw foods and supplies for carrying on the work is as necessary a part of the school outfit as the purchase of coal for heating or books for the library. This makes it possible to push the movement and establish the new course even in school districts where the ever-present "old-fogy" with his moss-back ideas and his little hammer will oppose the innovation.

The other important step already taken is that the domestic science department of the state school of agriculture has commissioned Miss Lewis, of the home extension branch, to compile a text-book and course of study in domestic economy for use in the schools of the state—the course to be arranged with special reference to the needs of rural schools.

High school students have for some time had the opportunity to take a course in domestic science, but except in large cities pupils in the ward schools and in the rural schools have been denied this study which is so fraught with possibilities for the home. Country girls are less apt to be ignorant of household hygiene and the art of cookery than their city sisters, but they, too, should learn the scientific side of it and so be able to become intelligent as well as capable in the handling and preparation of food.

HOME AND HOMEMAKING.

WE TWO.

We two make home of any place we go;
We two find joy in any kind of weather.
Or if the earth is clothed in bloom or snow,
If summer days invite, or bleak winds blow,
What matters it if we two are together?
We two, we two, we make our world, our weather.

We two make banquets of the plainest fare;
In every cup we find the thrill of pleasure.
We hide with wreaths the furrowed brow of care,
And win to smiles the set lips of despair.
For us life always moves with lilting measure;
We two, we two, we make our joy, our pleasure.

We two find youth renewed with every dawn,
Each day holds something of an unknown glory,
We waste no thought on grief or pleasure gone;
Tricked out like hope, time leads us on and on,
And thrums upon his harp new song or story.
We two, we two, we find the paths of glory.

We two make heaven here on this little earth;
We do not need to wait for realms eternal.
We know the use of tears, know sorrow's worth,
And pain for us is always love's rebirth.
Our paths lead closely by the paths supernal,
We two, we two, we live in love eternal.

—Ella Wheeler Wilcox.

THE FULL LIFE.

There is more in life than eating and drinking and clothes. Can we not make time or get time for rest, for reading, for recreation, by systematically portioning out the work so that the children may have their share, that by working together we may then have time to study and play with them. Or we may find it possible to slight some part of the work and so get time for the ride or the visit. Let us plan for a little vacation if it is only for a day, or for a little picnic with "father and the children," eating our supper in the woods, where the novelty and the fresh air and the happy comradeship with our own family will put new life and vigor into our tired bodies.

WORTH REMEMBERING.

For disinfecting the sickroom take half a cupful of common salt and two or three ounces of sulphuric acid. Upon the salt pour one-half ounce of the acid and stir; every fifteen minutes repeat this until all the acid is used.

As a remedy for tired, aching feet, there is nothing better than to soak them in warm buttermilk or ordinary sour milk. Heat it on the back of the stove and dissolve in it a teaspoonful of baking soda. Put into a small basin, so it will cover the entire foot, if possible, and soak the feet for fifteen or twenty minutes.

In case you are so unfortunate as to have a fire start, remember that you must never throw water upon burning oil. Smother the flame with sand or some similar substance, or with a heavy blanket. In case a person's clothes have been set on fire, they should lie at once on the floor and the flames should be beaten or smothered out. Standing or running about increases the draft.

No kitchen outfit is complete without a bottle of carronoil. This is no new concoction. It is an old, old remedy, whose equal for soothing and healing burns has not yet been found. The preparation can easily be made at home by mixing equal parts of raw linseed oil and lime water. An emergency bottle should always be at hand in case of danger from too close contact with steam or heat of any kind. Housekeepers in country districts where medical aid is difficult to obtain will find this recipe invaluable.

AMONG OURSELVES.

Do you know, I am inclined to believe that Cain and Abel fell out over "rights" and "duties?" And a lot of the troubles the world has seen have originated in the manner in which these rights were taken and these duties were performed. It is a serious matter. Our friend Mrs. Hawley will discuss this subject for us from the standpoint of "making the best of things." "Making," by the way, is a process that frequently requires considerable effort, and persistence. It is quite different from letting things "slide:"

We hear much in these days about "making the best of things." It is certainly nice to be able to make the best of things, providing we do it! But do we? If the tired, overworked wife endeavors each day, smiling, to bear the heavy burden laid upon her and give in return for that burden her life blood without a protest, is that making the best of things or is it simply forced endurance? What is it to make the best of things? To my mind it is making things the best we can. The general view of "making the best of things" tends to keep up the general rule of things without bettering the condition of affairs one whit. Will such a proceeding as that better the condition of woman? No! It is that very thing that largely is the cause of woman's condition today. Is it not time for women to arise out of her meek submission to these things and insist that things be made better? If the husband can without the consent of his wife use the earnings of the farm or business as he sees fit, and hires any help he wishes, to make his own labor less, then the wife has the very same right! Now, is it making the best of things for her to say, "Oh, he will do that way and just won't let me hire help or outside work done and so I will have to make the best of it and do it all myself?" Pshaw, woman, where is your strength? Is it all devoted to submission? If a woman has so much work laid upon her that she cannot enjoy the same privileges that the man does then let her make the best of things, by the use of her strength in making surroundings that are wrong, better. Submission to that which is wrong, is not right, and just as long as any woman submits to those things she helps to keep the general condition of woman bad, very bad. If the man is a public-minded man with a wife who is also public-minded, the two should work together. The man should be very glad to hire work done for the wife as well as for himself, and to give his wife just as much spare time as he is ready to take for himself. But if the wife should not be of the same mind as the man it matters not. He should treat her as he treats himself, for "God created man in his own image, male and female created He them and gave them authority over all the earth," and the man and the wife are "one flesh." Their authority is God given and was given to both, not to one alone. Let woman arise out of her submission to burden-bearing and slavery and take unto herself that which God gave her. It is hers by divine right, and "making the best of things" is taking that which God gave her and by so doing helping

to make the world better. Remember that quiet, smiling submission is not making the best of things If we live as we should, we will not think so much of ourselves as we do of others and of what we are doing to uplift others. Are we living so that the world will be better for our being in it, and so be better for our children? Or are we just drifting on from day to day making the best of things. I say, no, sisters; it is all wrong. Arise and help for the sake of others to make this world better. You will never regret it. Let us be up and doing while we may. Do you want your daughter to live the kind of life you are living? No. Well, come to the front then and lend a hand, and win the reward that comes to everyone. And when on earth thy work is done and thy new work in Heaven begun, then you'll forget the crown you've worn while thinking still of others.

These talks on farm and home economy are valuable incentives to keep us in touch with what is being done in other places; our community (and we in it) may be far behind in the real partnership of husband and wife; but when we know what are conditions elsewhere, what other farm people are doing, it starts the seeds of thought to sprouting, and by and by the blade will show forth and then we will expect the fruit—a fruit of better things.

In lieu of an original contribution Sister A. S. Marshall sends to us from South Dakota a note and a little poem which she counts good enough to pass

Forty and one years ago Montgomery Ward & Company started the first mail order business in the history of the world.

It has had many imitators, but the strict standard of service and honesty—its foundation stone—has been the great distinguishing mark between this business and that of those who copied our methods.

From a bare little barn the business has passed to building and building until it is now housed in the enormous structure shown herewith—the greatest of its kind and the largest concrete building in the world, comprising nineteen million cubic feet.

The fifty acres in this building and the many other acres in its branches at Kansas City and Fort Worth, Texas, are filled with things *you* need.

This immense structure, and the great buildings of its branches, are monuments to the wisdom of the millions who insisted on buying their household and farm necessities at the lowest possible cost—with all the middlemen's profits cut out.

Without the confidence of millions of customers in forty and one years these buildings would not have been possible.

To those who are not customers of Wards we send this message:—

The Mirror of the immensity of these buildings will be found in the famous Ward book of bargains—1000 pages—weighing over three and one half pounds.

This great book—the real solution of the high cost of living—will be sent to all who ask for it—Free—upon request without any obligation whatever.

A post card will bring it. Why not sign and send now. Address Dept. Y17

Montgomery Ward & Co. CHICAGO KANSAS CITY FT. WORTH, TEXAS

The House That You Built

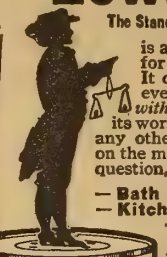
This is the house built by the folks
who wanted to buy the goods they used
at the lowest possible price.
This is the home of the sure square-deal,
where profits are short and values *real*,
Where furniture, foods and clothing are sold,
as well as the needs of farm and fold.
This is the source—the home of supply—
where there's *never* a question of prices high.
This is the house that *you* built.

Cleans like Magic Without Scouring

In addition to its value on the farm as a preventive of hog cholera—as a disinfectant—as a water softener and for making soap—

Lewis' Lye

The Standard for Half a Century



is a household necessity for cleaning purposes. It cleans anything and everything like magic, *without scouring* and does its work with less labor than any other so-called cleanser on the market. It is, without question, best for cleaning

— Bath Room Fixtures
— Kitchen Utensils
— Milk Pans or Churns
— Woodwork
— Windows.

Lewis' Lye—the purity and full strength of which is guaranteed—is the only lye made and marketed by manufacturing chemists. Booklet describing the many uses of Lewis' Lye, mailed free on request.

along. It is entitled "Little Things That Count:"

How often in our busy life
We speak a bitter word;
We care not who the listeners are,
We care not where 'tis heard.
We do not know within our heart
To what it may amount,
And, truly, it is only one
Of little things that count.

We often wound the trusting heart
By being insincere;
We do not think that which we do
May cause a lonely tear,
We give it but a passing thought,
And bother not about
The little things that rise and cause
The trusting heart to doubt.

We often wrong within ourself
The ones who love us true,
Because they tell us of a fault;
We're all impatient, too.
And do not down the angry words
That to our lips may mount,
But watch and wait; 'tis only one
Of little things that count.

How often from our very heart
We let our anger rise,
And never mind the pleading looks
That come from soulful eyes;
We crush, we bruise, in passion's hour,
And scorn the falling tear;
Little things, oh, little things,
What sorrow wrought you here!

You count, oh, yes, you little things,
You count, but not for gain;
You count to sadden trusting hearts,
You count for naught but pain.
You count as clouds in someone's sky,
You darken someone's day;
O cruel little deeds and words,
We can't undo, unsay!

Then ever speak the kindly word
Instead of one of pride;
'Twill banish sorrow from a soul,
And anger turn aside,
The loving word and deed and glance,
Is borne on angel winds,
And angel voices echo true:
Be kind in little things.

I have been so pleased with some of the poems Among Ourselves that I think some would appreciate these lines from Kathryn Murray. How often the least of things we may do or say, will either gladden or sadden the hearts of others? If we all would save the poems and short verses collected here and paste in a scrap book we would have a treasure for ourselves as well as for our children in after years. Let us save them all.

Of all people on earth, it is the farmer who ought to appreciate the value of "little things." Does he not deal with these "little things" day in and day out, year by year, seeds and cuttings, each one dropped or set in its prepared place; the furrows are turned one by one, little stream after little stream fills the milk pail, one by one the forkfuls fill the hay mow; one by one the eggs are laid, eggs that so often feed and clothe the farm family? Oh, the one-by-one steps we take to accomplish the one-by-one tasks! "Little things." Yes, and they have a vast content in a lifetime to weigh for evil or good.

Have you boys that you are training for a life of manly worth? Lucile Masden knows that "The Sky Pilot" will be your helper in that great and heavy task. The other Ralph Connor books are fully as good to help give a boy real ideas of true manliness:

"The Sky Pilot," by Ralph Connor, is not a new book, but one I think every one should read. The scene is laid in the foothills of the Rocky Mountains. The sky pilot is a young missionary who went out to work among the rough cowboys, did a great work. He was dubbed "the Sky Pilot" at first in ridicule, but won his way into the hearts of the cowboys and became a real pilot to more than one. We can all learn a lesson from the life of little Gwen, who had never herd of God till the coming of the pilot. After her accident she chafed at her misfortune for a time, but gave her life into the keeping of the master and the cowboys loved her all the more. The pilot worked among them and became a true friend. He died as he had lived, trusting God that it was for the best. After his death the cowboys took up the work that he had left unfinished; the pilot's life living on in their lives.

And we must have a word today for our kitchen service department: so "Sister D. C." has a word for our listening ears along that line. "If asked in a kind way," she says, "there is the secret of securing co-operation, more particularly in new and untried lines." The right time, the right place, the right way are essential parts of successfully putting plans into operation. And never forget the word of appreciation:

Where there is only one to do the work where there is a large family or a lot of help, I think she would find this plan a great help. Have each one take his dishes out from the dining room to the kitchen as he leaves the table. I think all men if asked in a kind way would be glad to do it, as it would be no work for them and a great help where there is only one pair of hands to do everything. When she went to do the dishes the dining-room table would be cleared. It not only saves steps, but saves the table cloth from being soiled, as the dishes are never packed upon it. Ask your men.

HOW AWFUL!

(First prize.)

One night last summer we had a bad storm when papa was away. Our little sister was much impressed. Next day she came to mama with the following question: "What if we had an awful storm, and the wind blowed the roof off, and

ATLANTICA, A SILVER BADGER.

the rain wet our beds, and we had to go down cellar, and the wind blowed our lamp out, and there was a big dog down cellar, and he had great big eyes and big teeth, and he barked at us, and we didn't have stones to throw at him, what would we do?"—Zelah.

A Morning Walk.

(Second prize.)

One of the pleasantest things I enjoy is a long walk in the springtime. I usually get up about four o'clock in the morning, help my mother get breakfast, and after breakfast I have my share of the morning household duties. Then I take my walk.

It is good exercise to take a walk to the woods, especially if they are not too far away. As we live close to the woods, I walk there each morning.

I find the air very cool, and pleasant. The birds are singing in the forest and the squirrels are frisking from tree to tree. I learn the names of many birds, and I love to hear them sing. They are not afraid of me, and they sing their sweetest songs, as I sit under the trees to rest. The squirrels will come very near me, and eat corn from my hands. There are many kinds of flowers that grow in the forest. A large stream goes through the woods. On the banks of the stream, and in the edge of the water many beautiful flowers grow. The flower I admire most is the water lily; it is a very beautiful flower. There are also many other beautiful flowers in the woods. I know the names of most of the flowers.

In the fall I gather the nuts, which are of a great variety. There are

Trojan Steel Gates Are Real Gates.

Made of 15-8 high carbon steel tubing all No. 9 galvanized wire mesh, special hinges, self-locking latch, raises at either end, absolutely hog tight, bull proof and wear proof. Strongest, best looking and longest wearing gate in the world.

You Can Get One FREE

Sold on 30 Days Trial. Guaranteed by $10,000 Bond.

You take no chances. We ship the gates. We let you try them, test them, compare them with any other at any price. If they are not the best ship them back at our expense.

Sold Direct from Factory at Factory Prices.

You save middleman's profit. That's why they cost less than others; that's why more Trojan gates are sold than all others. Investigate.

Write for Catalog and Full Particulars of Our Introductory Free Gate Offer.

Our proposition is fair and square. One gate free to one farmer in each county for helping introduce.

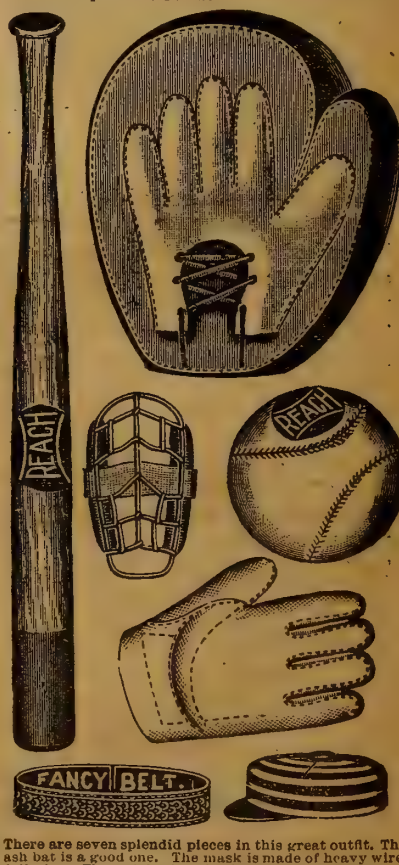
Free to Boys

Solve this Puzzle

H--S W-G--R

Can you fill in the blanks above and complete a well known baseball players name? You can if you try. Just write and tell me whose name it is and I will tell you how you can get the fine complete baseball outfit pictured below.



There are seven splendid pieces in this great outfit. The ash bat is a good one. The mask is made of heavy wire, full size. The catcher's mitt is thickly padded, very heavy and has patented fastener. The glove is of tanned leather and has patent clasp. The ball is strongly stitched and will last. A neat, adjustable belt and a dandy cap complete this great outfit. Remember you get the whole outfit of seven pieces for a little easy work. Write me today and I will tell you just how to get it.

A. M. PIPER, 840 Popular Bldg., Des Moines, Ia.

also many oak trees. I love to roast the acorns, and am very fond of them. I find it very interesting to watch the squirrels gather and store away the nuts for winter. The brook sings of spring, as it goes onward to seek the ocean, where it is happy to be free again.

I find many interesting things, and when I get home I feel much refreshed. It is very pleasant to take a walk in the morning and breathe the cool, fresh air. I think every boy and girl should do the same. It will make them strong and healthy.—Izetta Bowlby, age 13.

A Strange Man.

(Third prize.)

About twenty years ago there was a man that came to our country; he came from Bohemia, so he was a Bohemian. This man is very queer; he says he took but one drink of water in his life. He is quite an old man. He drinks about twenty cups of coffee a day. He has been in poor health for years.

This shows that a person needs water. This is a true story, for I know him; he is one of our neighbors.—Alpha Pittsley, age 12.

PLEASANT FIELDS OF HOLY WRIT

Save for my daily range among the pleasant fields of Holy Writ I might despair.—Tennyson.

THE INTERNATIONAL S. S. LESSON

2d Quar. Lesson 12, Amos 5; 1-8. June 22, 1913.

THE BLINDING EFFECTS OF SIN: TEMPERANCE LESSON—THE STORY.

The old accepted idea of a prophet was far too mechanical. It reduced him almost to an automaton, moved by an infinite will and speaking words the import of which he himself did not at least fully understand. The very derivation of the word "prophet" should have corrected this false notion. It signifies "to boil over." What the prophet observed in ethical conduct of people and moral tendencies of church and state was lodged in mind and heart like water in a kettle. Reflection upon it was like fire. His feelings seethed within him until they boiled over in hot denunciation of evil. The Hebrew prophet was essentially the reformer of his age. He was pre-eminently patriotic and devout. Of this Amos is a striking illustration. Amos's prophecy has been described as a thunder storm rolling over all the surrounding kingdoms touching Judah, and finally settling down upon Israel. This epoch in the history of the northern kingdom has been, not inaptly, called its "Indian Summer," because of its glory, and also the nearness of the winter of its desolation. The ancient limits of the kingdom and its former splendor were regained under Jeroboam II. Wealth was suddenly poured into the coffers of the princes. It was the wealth of conquest, always attended with the temptation to oppression and luxury. You will search in vain for a more graphic description of a self-indulgent people than Amos gives. They enthrone violence at once, and esteem judgment deferred. They recline upon ivory divans. They stretch themselves upon their couches—beside their banquet tables laden with every delicacy. They use for an ignoble purpose the instruments which David invented for the worship of God. They substitute bowls for wine cups. They use the finest oil in their boudoirs. How can such sensualists perceive, much less be grieved for the moral havoc made of their country? The prophet speaks their doom. The banquet, before which they stretch themselves, shall be swept away before they can eat it. Are they first in luxury? They shall not lose their rank. They shall be first in captivity also. The cup of Israel's iniquity is full. So the Lord says, by the voice of Amos: "I abhor the excellency of Jacob, and hate his palaces. Therefore will I deliver up the city with all that is therein."

IOWA WEATHER AND CROP BULLETIN.

The following climate and crop bulletin is issued by the Iowa Weather and Crop service from the central station at Des Moines, for the week ending June 15, 1913:

With the exception of light local showers over the northern half of the state on Friday night or Saturday, the week was dry and generally clear. The temperatures were, however, unseasonably low during the first four days, and light frost occurred in many localities on one or more nights. While the weather was too cool for corn and garden truck all conditions were exceptionally favorable for field work, and the cultivation of corn has progressed rapidly. About all of the early planted fields have been plowed once and many of them twice. Practically all of the corn is planted, but some low ground that was intended for corn is still too wet to plow and will be used for cane, millet or buckwheat. The acreage of corn will, however, be about the same as last year. The cool, dry weather has been beneficial to small grain, most of which is heading nicely and is in fine condition. Considerable alfalfa was cut and put up without injury by rain, and clover will soon be ready to harvest. Haying will begin in the southern counties during the coming week, with every indication of heavy yields. Strawberries are beginning to ripen, but need rain to mature a full crop. The week closes with much warmer weather, and all indications are promising, but rain would be acceptable to soften the surface of the ground.

The following summary by the secretary of the state horticultural society shows the average condition of fruit on June 1st: apples, 73 per cent; pears, 48; American plums, 51; domestic plums, 48; cherries, 54; peaches, 71; red raspberries, 77; black raspberries, 83; blackberries, 85; grapes, 89; currants, 78; gooseberries, 70; strawberries, 76 per cent of a full crop.

Report on the acreage of staple crops cannot be given, as data have not been received from township assessors.

George M. Chappel, Sec. Dir.

A bill to create a abureau of public high-ways in the department of agriculture, was introduced in congress by Representative Campbell, of Kansas. An appropriation of $24,000,000 to be used in co-operative work among the states in proportion to population was proposed.

"Slickerine" WATERPROOFS DUCK

"Sheds Water like Yours Truly"

ABSOLUTELY WATERPROOF STACK AND MACHINE COVERS

OUR stack and machine covers made of the very best quality of duck and treated with **Slickerine** wear twice as long as others and are absolutely waterproof. Your own honey. Send today for free catalog of **Bee Supplies** and sample copy of the **American Bee Journal,** oldest bee paper in America and indispensable to the bee keeper. Dadant & Sons, Box C, Hamilton, Illinois.

OUR FASHION DEPARTMENT.

ALL PATTERNS, 10 Cents Each.

THIS department is prepared especially for The Iowa Homestead. We can supply our readers with high grade, perfect fitting, seam allowing patterns at 10 cents each postage prepaid. Full directions for making as well as the amount of material required accompany each pattern. When ordering, all you have to do is to write your name and address plainly, tell us the correct number and size of each pattern you want and enclose 10 cents for each number. We agree to fill all orders promptly and guarantee safe delivery. Address all orders to The Iowa Homestead, Des Moines, Iowa.

5998 Misses' Dress.—A charming dress for the miss and small woman is presented in this design. The dress closes at the front and has a two-piece skirt which may be made with either the empire or regulation waistline. The collar, vest and cuffs are made of contrasting material and striped fabrics is very nice for this purpose.

The pattern 5998 is cut in sizes 14, 16 and 18 years. Medium size requires 5⅝ yards of 27-inch material, ⅝ yard of 27-inch contrasting goods. Price of pattern ten cents.

6170 Children's Dress.—This pretty little dress is cut in one piece. It can be made with or without the belt. The pattern provides for a pair of bloomers which is attached to an underwaist. Linen, percale, gingham or silk can be used to make this dress.

The pattern 6170 is cut in sizes 2, 4 and 6 years. Size 4 years requires 2¾ yards of 44-inch material, ⅛ yard of 27-inch contrasting goods and ⅜ yard of 36-inch material for the underwaist. Price of pattern ten cents.

6105 Ladies' Apron.—A splendid apron design is here offered and one that any woman can finish in a few hours. The pattern includes separate sleeves. The apron may be made of gingham, percale, chambray or sateen and is a good-looking as well as a serviceable model.

The pattern 6105 is cut in sizes 34, 38 and 42 inches bust measure. Medium size requires 5 yards of 27-inch material. Price of pattern ten cents.

6141 Boys' Dress.—This dress is just the thing for the small boy who has not yet worn the regulation bloomers. It is made with a removable shield and can have either the long or short sleeves. Linen or gingham can be used to make this dress with the collar and belt of contrasting material.

The pattern 6141 is cut in sizes 1, 2 and 3 years. Size 2 years requires 1½ yards of 44-inch material, ¾ yard of 27-inch contrasting goods and 15½ yards of braid. Price of pattern ten cents.

6172 A New Four-Gored Skirt.—For all tailor-made styles and also for many others the skirt with plaits somewhere about it is a pronounced favorite. The four gores give a center back seam, and the side front seam provides a convenient place for the closing. Serge, linen or cheviot can be used to make this skirt.

The pattern 6172 is cut in sizes 22 to 30 inches waist measure. Medium size requires 3⅝ yards of 36-inch material. Price of pattern ten cents.

FIELD NOTES.

Guy J. Pote, Bridgewater, Iowa, has for sale a number of Shetland ponies as will be noted in the advertisement on page 21. He quotes reasonable prices on them.

Louis Moeller, Everly, Iowa, has nicely marked Fox Terrier pupies both male and female, also two grown females, that he is offering for sale in his advertisement that appears on the poultry page of this issue.

Thirty Duroc Jersey fall sows and twenty-five fall boars are advertised for sale by L. L. De Young, Sheldon, Iowa, on page 23. He is pricing these at $25 to $35 and can fill orders for pairs or trios as parties wish.

Ten head of good Chester White sows bred for fall farrow and a good herd boar are offered for sale by G. H. Tutt, Marathon, Iowa, on page 23. Fifty dollars takes the boar and $40 gets the sows. Send him your order at once.

John I. Dripps, Springville, Iowa, announces on page 21 that he is now ready to fill orders for good Poland China boars of fall farrow at the rate of $35 to $40 each. They are from 250 to 275 pounds and good enough for anybody. Write him for prices.

One of the largest herds of registered Holstein cattle in the middle West is maintained at Woodlawn Farms, Sterling, Ill., and there is not a want in the Holstein line that cannot be well and satisfactory filled at this big breeding establishment. Bulls of the strongest breeding are at the head of the herd and the females are all either cows with a record or from high-producing ancestry, so that no matter what you buy at Woodlawn you can rest assured that you are getting something that is right. Manager Williams invites inspection of the herd, knowing that it is of the highest class, and will always give a good account of itself. If you are in the market for Holstein cattle you will make no mistake by getting in touch with Woodlawn Farms. The advertisement appears on page 11.

High-grade Holsteins cows and heifers, due to freshen soon, are offered on page 11 by W. C. Kenyon & Son, Elgin, Ill., who will supply one or a car load.

C. Toom, Pella, Iowa, announces in an advertisement on page 21 that he has for sale seventy-five head of high-grade Angora goats. They may be seen by calling at the farm near Howell Station, located on the Wabash.

Some good Short-horn bulls are advertised for sale by W. M. McLaughlin, Shelby, Iowa, on page 22. He also offers a splendid herd bull for sale. If any of our readers are wanting a good bull it will pay them to call and see Mr. McLaughlin.

F. P. Ryan, Ryan, Iowa, offers for sale a good registered Holstein-Friesian bull, three years old. He is described as an individual of high excellence and will be sold at a reasonable price to a quick buyer. Write to the address named.

J. A. Penn, Alta, Iowa, wants to buy a male Black and Tan Rat Terrier dog. Any reader of this paper who has a strictly good animal of this description for sale should write to Mr. Penn. He does not require that the animal be recorded, but he does want a pure-bred one.

Some unusually good big-type Poland China sows bred to Mouw's Big Sioux for fall litter are adxertised for sale by George Glynn, Sioux Rapids, Iowa, on page 23. Any breeder that sends an order for these sows will be well pleased, as they are bred right and are right in every way.

Breeders of Short-horn cattle will be interested in the announcement that J. A. Richardson, Wall Lake, Iowa, will hold a public sale on December 9th and that C. A. Oldsen of the same place will sell on the following day. Both have good herds and will put up an excellent lot of cattle.

Maurice Green, R. R. 1, Wayland, Iowa, who breeds Aberdeen Angus cattle, now has for sale his herd bull and a number of younger bulls. The herd bull is a son of the noted Prince Ito and therefore carries blood lines as good as the breed affords. Write him for prices or further descriptions.

Readers who are admirers of Shetland or Welch ponies will be interested in the herd owned by Theodore S. Simpson & Sons, Aurora, Ill., which is advertised on page 21 of this paper. The herd numbers more than 300 head and is therefore prepared to supply good ponies of any description and at reasonable prices.

If any Homestead readers are on the market for a good Duroc Jersey fall boar they should read the advertisement of W. J. Wendt, Remsen, Iowa, on page 23. He has quite a number for sale and they are good and he is pricing them from $25 to $50 as long as they last. Order one of these now and save on the boar you would otherwise buy this fall.

The good, old Electric steel wheels advertised on page 8 have rendered hundreds of thousands of dollars' worth of service to farmers who realized its merits and made use of it. The low steel wheel is right serviceable and a labor saver from every point of view. Illustrated catalog and special price list may be obtained by writing to Electric Wheel Co., 58 Elm St., Quincy Ill.

Some corking good Poland China fall boars are advertised for sale by F. E. Jackson, Hurley, S. D., on page 23. These are sired by the great boar, Dale's Expansion, a hog that is regarded as one of the best in the northwest. He was the pick of the boars in the Henry Dorr herd in 1911. Mr. Jackson also offers some splendid sows for sale bred for fall litters to this same boar. Try him with an order and mention The Homestead when writing him.

Any young man who has extended experience in the care of hogs may learn of an excellent situation by referring to the advertisement of the Woodlawn Farm Co., Sterling, Ill., which appears on page 7. Woodlawn Farm raises both pure-bred and market hogs, so that the opportunity to take charge of that department is one having a wide and promising feature. None but dependable men need apply for this place. Send inquiries to the address named.

The big Montgomery Ward & Co. advertisement on page 15 suggests the wonderful magnitude of the business operation of that firm. For forty years Montgomery Ward & Co. have been selling goods to farmers on the mail order plan. They have sold millions of dollars' worth and saved their customers an immense amount of money. They are still continuing to do so. The big free catalog containing 1,000 pages of bargains may be had by sending a postal card request to Montgomery Ward & Co., Chicago, Kansas City, Mo., or Ft. Worth, Texas.

A few days since a representative of this paper visited the Duroc Jersey herd of A. R. Olson, Woodward, Iowa. It was in Mr. Olson's herd that the great hog, Golden Model, achieved such wonderful popularity, and a good many daughters of that great hog still remain in the herd. Mr. Olson has about fifty spring pigs, the get of A. R.'s Professor and A. R.'s Golden Model. A. R.'s Professor is by V. Professor and his dam is by a son of Ohio Chief. The hog is a good one, having a magnificently arched, broad back, deep, smooth sides and an excellent set of teeth. A. R.'s Golden Model is by Golden Model. His dam was a daughter of Model Chief and his grandam a daughter of Topnotcher Chief. The sires in the herd are by Golden Model, Advancer No. 1, Waveland Col. and S. E.'s Defender. They are an exeellent lot of brood sows with plenty of size and nice finish. One of them in particular is a full sister to the great Waltemyer Bros. hog, Golden Model 2d. She has an excellent litter of six pigs by A. R.'s Professor, and from the lot a selection will be made to show at the Iowa State Fair.

W. Z. Swallow, the veteran breeder of Poland China hogs, whose activity in Poland China circles covers a longer period of years than any other breeder now in the business, is fitting a few good pigs for the fall show at the Iowa State Fair. They are real big ones, as competitors will find out when they are driven into the ring.

M. W. Young, Ankeny, Iowa, who has expended a good deal of careful thought as well as considerable cash in the establishment of an excellent herd of Chester White hogs, has, as a means of bringing his herd into greater prominence, determined upon the holding of a public sale on October 14th. Later announcements will appear in this paper concerning the consignment.

Ed Seckington and C. B. Hilfiker, North English, Iowa, will hold a public sale of big-type Poland Chinas on October 23d. They expect to sell about sixty head of good boars and gilts of approved blood lines. Mr. Seckington will have some good fall boars by Big Bone I. X. L. and a fine lot of spring pigs by Black Jumbo by Big Bone and Grand Chief. Mr. Helfiker will have some good fall gilts by Young Expansion and his spring pigs will be sired by Blue Valley Chief, Long Expansion and Victor Price. Full particulars will appear in The Homestead in due time.

Anyone interested in veterinary medicine should write the St. Joseph Veterinary College, St. Joseph, Mo., for their 1913 announcement. The college is in its ninth year and expects to occupy a new building by next fall. They made a phenomenal increase in last year's attendance amounting to more than 50 per cent over any previous year, being the greatest in the history of the school. Upon completion of the three-year course of seven months each year the degree of doctor of veterinary medicine is conferred upon graduates. Dr. F. W. Caldwell will lend his assistance to any student desiring to find employment to pay part of expenses. The expenses including tuition, board, room and books is very reasonable. For further information write to above address.

Mastodon Prospect for Sale.

On page 23 W. H. Barr & Son, Elliott, Iowa, offer the big-type Poland China yearling boar, Mastodon Prospect, for sale and he is a boar that is good enough to head any herd. They also have some good fall boars and some bred sows for sale and at prices that everybody can afford to buy. Write them at once about these.

The Latest Cartercar.

The advertisement of the Cartercar on page 6 tells the whole story in a few words. Every possible device which will insure safety, good service and ease of operation has been employed in the construction of the Cartercar. Each of these devices is fully described in the new catalog, for which write to the Cartercar Co., Pontiac, Mich.

Linwood Cumberland For Sale.

On page 22 Powell & Son, Linn Grove, Iowa, advertise to sell a splendid young Scotch bull for sale in Linwood Cumberland, a son of the Iowa State Fair champion bull, King Cumberland 2d. He is a royally bred Miss Ramsden and is good enough to head any of our best herds. Make it a point to write Powell & Son about this bull and do it right away.

Missouri Auction School.

Those who contemplate entering the field as auctioneers should write the Missouri Auction School, 1400-04 Grand Ave., Kansas City, Mo., for their big catalog of Home Study Course. It is free and at the same time you will get complete information of the actual practical course which opens August 4th. See advertisement on page 21.

Short-horn Bulls for Sale.

Anybody wanting a good Scotch or Scotch-topped bull should read the advertisement of Held Bros., Hinton, Iowa, on page 22. They are offering some splendid young Scotch bulls for sale that are good enough to head herds, also some choice Scotch-topped bulls. Their prices are very reasonable on these bulls. Write them at once or go and see the bulls they are offering for sale.

Scotch Collies for Sale.

In the Poultry Department Le Roy, Brown, Lamoni, Iowa, starts a Scotch Collie advertisement and he is offering some very choice sable and white puppies for sale. He writes us as follows regarding them: "They are sired by Hilander II. 148502, dam Willing Lassie 148503, two of the very best heel driving dogs in the state. I am offering the females at $5 and the males at $10 each. I am sure any one ordering will be pleased with these puppies." Send your order to Mr. Brown for one of these at once and kindly mention The Homestead.

Lineweaver's Durocs.

H. W. Lineweaver, South English, Iowa, has the best lot of spring pigs we have ever seen on his farm. They are largely sired by H. & B.'s Ohio Chief, a grandson of old Ohio Chief. This boar is certainly doing great work for Mr. Lineweaver, having sired a great lot of good Durocs. There is also a litter by Model Wonder, one by Golden Model 30th, and one by Select Again. Mr. Lineweaver will make a sale on October 10th and will sell the choice of his spring pigs together with some extra good fall yearling and spring yearling sows sired by Select Again and H. & B.'s Ohio Chief. Mr. Lineweaver has been working along right lines in his breeding operations and he can be proud of the high quality of the Durocs he will sell in this October sale. Full particulars will appear in due time.

Sanosen for Hog Worms.

On page 8 of this paper there appears an advertisement announcing the merits of Sanosen as a means of destroying hog worms. It is a concentrated and powerful preparation, yet cheap and thoroughly effective. The advertiser announces that it not only destroys worms, but rids the animals of them permanently. Note the price named in the advertisement and send orders to the Downs Mfg. Co., Bloomfield, Neb.

Harding's Duroc Specials.

On page 21 of this week's issue R. J. Macedonia, Iowa, is offering twelve good fall boars sired by the great boar, Col. Gano, and Chief's Protection and he is also offering from ten to fifteen yearling and aged sows bred to Col. Gano for fall litters. This is one of the first times that sows have ever been offered for sale bred to this great boar. We have maintained that Col. Gano was one of the greatest show and breeding boars now living and we will stand by our opinion. The breeder who wants to buy a sow bred to this noted sire should lose no time in getting their order to Mr. Harding. When writing him kindly mention The Homestead.

Brown Sells Short-horns.

In a recent letter from Perry O. Brown, Lamoni, Iowa, he says: "I just sold Grigsby & Barber, Skidmore, Mo., seven choice young heifers, E. C. Lindberg, Essex, Iowa, six, and G. A. Bonewell, Grinnell, Iowa, six. Also a good young bull calf to B. M. Murray, Tuskego, Iowa, and one to R. H. Gorsuch, Lamoni, Iowa. These were all sold the same week. Business has been good with me and you can say to Homestead readers that I always have something good on hand. Tell the boys to write me or come and see me if they are going to want anything in the Short-horn line." See page 22.

Henderson's Chester Whites.

H. T. D. Henderson, Keota, Iowa, a well-known breeder of Chester White swine, has 100 spring pigs largely sired by Perfection Chief and Joe O. K. He has a few litters by Elmore's Choice, Silver Tip and Chief Combination. There are some extra good spring pigs in the lot and a number that look like the making of herd headers. There are three December boars sired by Joe O. K. out of a Combination 2d dam that are good. Mr. Henderson has three fall gilts that would make a strong show in the under-year class at any state fair if properly fitted. Mr. Henderson will start an advertisement in The Homestead later in the season.

The New Detroiter.

A sensation in the way of automobiles is the Detroiter of which considerable mention is made in the big advertisement on page 24. The Detroiter has all the advantages of other high-class cars with some others that they do not have. It is sold at the remarkably low price of $850 fully equipped. It is made in five models, twenty-five horsepower, equipped with speedometer and with electric lighting system and all other conveniences now in demand. Our readers who want complete information should write to the Briggs-Detroiter Company, 603 Holbrook Ave., Detroit, Mich., or T. G. Northwall Company, distributors, Omaha, Neb., or Illinois Automobile Company, distributors, Chicago, Ill.

Westrope Sells Bulls.

Bull trade has been good with J. G. Westrope, Harlan, Iowa, and he has sold to the following parties: Sam Morgan, Jr., Henderson, Iowa; J. P. Loomis and J. P. Mayhew, Villisca, Iowa, each got a good young bull. Also Henry Jacobs, Walnut, Iowa, and D. A. Cobb, Harlan, Iowa. These parties personally selected their bulls and were well pleased with their bargains. He still has a Cruickshank Victoria sired by American Goods, the $1,200 son of old Choice Goods and he has a good two-year-old bull sired by a son of Nonpareil Prince. He also has quite a few good young bulls on hand and he is offering these for sale at prices that are within the reach of any farmer or breeder. Write Mr. Westrope about these bulls or go and see them.

Osborn's Durocs.

The other day we dropped in on O. E. Osborn, Weston, Iowa, and found he had about 125 head of good pigs and they were coming along fine. These are sired by the Col. Gano boar that he bought in the Seddon's sale last fall and by the way, this boar has done fine. He is large and he is good and he is going to make a pretty good showing this fall if nothing happens him. He very much resembles his sire, in conformation, color and general makeup. His pigs are showing up well and it looks like he is going to develop into one of the best boars Mr. Osborn has ever owned. The remainder of his pigs are sired by the Valley Col. boar that topped the Barker Bros. sale last fall. Mr. Osborn has a good yearling boar for sale and some good fall boars.

Reduction of Tire Cost.

Only a short time ago tire cost was one of the biggest expenses the motorist had to meet. A journey of any length over rough roads and a resulting blow-out or deep cut in the outer casing meant new tires immediately. Now, however, these things can occur many times before new tires are even considered. This change has been brought about by Narco Tire Cut Filler, a rubber compound that successfully heals tire cuts. An advertisement of this product appears on page 6. It is a scientific combination rubber cement, cut filler and mastic—non-inflammable and self-vulcanizing. It repairs, cuts, cracks, blow-outs and punctures, filling up the cuts and healing quickly. When healed it has formed a permanent plug of resilient rubber, welding the torn parts of the tire together and a part of the tire itself. The National Rubber Company, St. Louis, Mo., manufacturers

of Narco Tire Cut Filler, will send a large-size tube prepaid to every reader of The Homestead who writes for it, enclosing $1, money order or currency.

Scotch Collies for Sale.

J. E. Smith, Victor, Iowa, has six male Scotch Collie pups six weeks old, sable and white in color and from an excellent working sire and dam, that he will sell for $5 each if taken within the next few days. The dam is a natural heeler and is a very valuable assistant on Mr. Smith's farm. This affords those wanting a Scotch Collie an opportunity to get one at a very reasonable price. They cannot help but please you. See the advertisement in Poultry Department and send Mr. Smith your order.

Nagel's Chester Whites.

E. L. Nagel & Son, Deep River, Iowa, well known for a number of years as exhibitors and breeders of high-class Chester Whites, were recently visited by a Homestead representative and we found an excellent lot of the Chesters. They have about seventy-five spring pigs and they are a fine bunch, largely sired by their noted sire of champions, Lewis E., and they also have some great pigs by Col. Evans, a son of Combination 2d. They are fitting Combination 2d for show and he bids fair to make trouble. They also have some extra good under-year sows and boars sired by Col. Evans and Lewis E. This herd is looked upon as one of the foundation heads for breeders to get foundation stock. Their advertisement will appear later.

Scotch Bull Bargains.

K. F. Dietsch, Orleans, Neb., is offering just now two very choice Scotch Short-horn bulls. These bulls are of the real herd-header sort, and they are bred as well as the very best. They are right up to the imported cows, and from excellent sires. Mr. Dietsch has one of the very good Scotch herds of Short-horns to be found within the state, and these bulls are out of some of his very best cows. Mr. Dietsch is a very progressive farmer, one that keeps nothing but the best in the way of live stock, and readers of The Homestead need not hesitate to order the bulls by mail, for you will be given a square deal absolutely. These bulls are being priced at just aoout half what they would bring in any of the good sales, and if this money is worth saving, write as above at once.

Isaacs' Durocs.

The other day we called on E. H. Isaac, Red Oak, Iowa, and found him with 125 head of spring pigs and his brother Jim has 100 head and we just want to say to you that they have pigs that are good for sore eyes. When it comes to raising pigs they will all have to take off their hats to these breeders. They are breeders who do not say much, in fact, they do not say enough, but they do raise good pigs and they are splendid hogmen. Mr. Isaacs' pigs are sired by Belle's Chief I Am, Big Crimson and Jumbo Critic, and his brother's pigs are sired by Jim's Mogul, a boar that he secured of Carey Cameron, Herman, Neb., and Valley King 3d, one of the top pigs in the Barker Bros. & Crowell's sale last fall. These breeders are going to have a splndid lineup for their fall sale later in the season.

A Good Agents' Opportunity.

The Positive Tire Vulcanizer which is advertised on page 2 of this issue is one of the most practical tools that has ever been put on the market for the automobile owner. It sells practically on stating the price, and does the work quickly and thoroughly. Any man who has had much experience with automobiles will realize that it will save from 50 to 75 per cent of his tire bill. It is very handy, convenient and can be put in the ordinary tool box of the automobile as it takes up very little room. We would suggest to any of our readers who are looking for a good agent's proposition that they fill out the coupon in the advertisement on page 2 and get further information. The company expects to back up their agents by giving them a line of co-operation. In writing the manufacturers, the Positive Tire Vulcanizer Co., Davenport, Iowa, do not fail to mention The Homestead.

Gates' Old-Fashioned Spotted Poland Chinas.

J. D. Gates & Sons, Ravenwood, Mo., breeders of spotted Poland China hogs have upwards of 200 head of spring pigs that are now ready to go to those looking for choice pigs at weaning time. These are sired by Spotted Giant, Spotted Mastodon and Peitzman's Wonder, three boars Mr. Gates selected as being the kind that sire pigs that grow big and prove valuable as breeders. They have made good and the pigs he now offers are spotted, have the bone, stretch and quality so essential in a pig that is expected to make good. Spotted Giant is rightly named, he is better than an 800-pounder now and is not nearly full grown, he is spotted and sires spotted pigs and if Mr. Gates finishes him off for the fall shows he will be a factor in any of the shows where big-type Polands are shown. His great, wide, arched back, full rounding hams, good head and character cannot fail to gain recognition. Spotted Mastodon and Peitzman's Wonder are sires of pigs in the same class with the Spotted Giant pigs and Gates & Sons are prepared to furnish large numbers that are not related. Among the good-producing sows in the herd is Comet, Miss Harkrader, Miss Harkrader 1st, 2d, 3d and 4th, Miss Spotted Giant, Miss Hutch and others of like quality. The senior member of the firm has been breeding big-type hogs for twenty-five years and has never lost sight of size and quality. Some of the very best boars of the herd have done service in his herd and all his hogs are so bred that they cannot fail to breed on. Gates & Sons have bred practically every member of the herd so that they know how to mate their hogs for best results. They record in the Standard Poland China Record Association and furnish pedigrees with every pig. On shipments by express they guarantee safe arrival and they guarantee everything to be as represented. They invite inspection of their herd as they know visitors will be pleased with their herd headers and string of brood sows. Note page 21 for their advertisement and if you want some of their hogs order now before the best have been sold. When writing these gentlemen kindly mention this paper.

Vaughn Offers Scotch Bulls.

W. W. Vaughn, proprietor of Wildwood Farm, Marion, Iowa, is offering for sale Scotch King, the fourteen-months-old Scotch bull sired by Rub, King, he by Diamond King and out of a dam by Brawith Lad, second dam the great imported breeding cow, Claudia 4th. Scotch King is a strong, growthy wide-backed, heavy-quartered bull that should head some herd. They also have a twelve-months-old bull by Brawith Lad out of Rosemary 15th by Scotch Ringmaster, that is an extra good low-down, smooth, good-ribbed bull that will suit someone looking for a high-class herd bull. This calf has the breeding, individuality and quality that will please the critical judge. They also have eight good line strong quartered calves from nine to thirteen months of age that are priced worth the money. Visitors are always welcome and they invite anyone interested in a good bull to inspect what they have before buying. They recently sold an exceptionally good ten-months-old calf to head the herd of W. A. Lynn, Grundy Center, Iowa. See page 21 and when writing kindly mention The Homestead.

Love's Ayrshires.

One of the very best Ayrshire herds that will be found in the West today is owned by Archie Love, Omaha, Neb. The herd now numbers about thirty head, but he expects to add to it, and with the natural increase it will not be long before he will have Aryshire for the trade. Some time ago Mr. Love and Mr. Fred Nash became interested in Ayrshires and together they purchased one of the best herds in Kentucky. Many of the cows in this herd were noted winners with splendid records as producers. Mr. Love and Mr. Nash divided the herd and both of these gentlemen have the nucleus for two of the best Ayrshire herds that have been established in the West. The Love Farm is located west of Omaha, and he has erected one of the finest and most up-to-date dairy barns that has been seen in the West. It has all the modern improvement and was built along the most sanitary and scientific lines. An artificial lake easily accessible to the cattle is one of the features of the farm, together with good pastures and well-laid-out roadways, and with other improvements now in mind it will not be long before he has one of the most complete dairy farms that will be found in the West.

Col. E. D. Snell, Auctioneer.

With this issue of The Homestead, Col. E. D. Snell, Cambridge, Neb., is starting an advertisement in which he asks a share of the pure-bred auction business of the country. The writer is well acquainted with Colonel Snell, and we wish to say that for the past number of years he has enjoyed a splendid business, and that we know that he has sold for many of the leading stockmen of the country, and has given universal satisfaction. He is a man of a great deal of experience, well posted on modern breeds of stock, and certainly has a money-getting way with his selling. He is clean and forceful, a gentleman in every particular and a person that The Homestead readers would be pleased to have as a friend. There is not the least doubt as to his ability as a salesman, and he is in position to furnish those that apply, a fine lot of recommendations. His best reference, however, is the fact that every man that employs him once seeks his service later. His prices are right, and we would like to see those that are in doubt as to whom to employ, to give Colonel Snell an opportunity to demonstrate his ability. We are confident that he will continue to get the business once he is tried out. The writer recommends him absolutely. See page 21.

Recent Pioneer Stud Farm Sales.

Manager J. G. Truman, of the Pioneer Stud Farm, Bushnell, Ill., writes: "We had the pleasure of selling recently to William Fancher, Keokuk, county, Iowa, the imported Percheron stallion, Kolcotar. We are interested in this sale particularly for the reason that this is the seventh stallion that we have sold to Mr. Fancher. He has perhaps the best stud of Shire, Percheron and Belgian stallions in the state of Iowa today that are kept exclusively for public service. Other sales that we have made this month, not previously reported are: The imported Shire stallion, Abbott's Haymaker, to W. T. Head, Hendricks county, Ind. This horse was shown by us at four of the leading state fairs last fall and was never out of the money at either fair. This is the second stallion that we have sold Mr. Head this year. An imported Belgian to Foster & Trent, Laramie county, Wyo. The imported Shire stallion, Wrydeland's Commander, to W. Miller Osborn, Oneida county, N. Y. An imported Percheron mare and foal to that enterprising breeder, C. G. Corey, Houston county, Minn. This is the fourth imported mare we have sold him this season. William Yates, Laramie county, Wyo., purchased an imported Shire stallion, D. G. Rainigh, Laramie county, Wyo., purchased an outstanding imported Shire stallion. Walter J. Hill, son of J. J. Hill, St. Paul, Minn., purchased the noted imported Shire stallion, Gold Cup, bred by His Majesty King George of England, and imported by us this spring. We still have an extraordinary fine collection of Shire and Percheron stallions for sale and are making attractive prices in order to make room for our annual June importation that left London on the 14th inst. It is very encouraging to us to note the success of the Shire mare, Carlton Graceful, champion at the recent Calgary show and also of the Shire stallion, Pride VI, champion at the Edmonton show. Both of these animals were purchased from us, which fully demonstrates that the Truman horses are in a class by themselves."

Messenger's Hampshires.

Clayton Messenger, Keswick, Iowa, the well-known breeder of Hampshire swine, is a man who has attained a national reputation as a breeder and exhibitor during the past few years, probably better known as the owner of the undefeated champion boar, Messenger Boy. This great boar is looked upon by the majority of breeders as the greatest Hampshire boar living today. Nearly every breeder has an ambition to own a son or daughter of this great boar. Mr. Messenger recently refused $1,250 cash for Messenger Boy and after looking over the grand bunch of sows and young stuff sired by this boar we believe Mr. Messenger was wise in refusing this tempting offer. About 200 spring pigs, a large number of them sired by Messenger Boy, were found on the Messenger Farm. They are a very promising lot and a sale of seventy-five boars will be held the fourteenth of October. This event will interest every breeder of Hampshire swine in the United States. It should attract breeders from many states as the high quality of the offering, the breeding and the integrity of the man selling will justify a large attendance. The show herd this year will be largely sired by Messenger Boy and on our recent visit we saw some sows in the different classes that looked like champions. See page 23.

Chief Select Dead.

On June 10th the noted Duroc Jersey boar, Chief Select, owned by William Reed, Rose Hill, Iowa, died. This is one of the greatest losses the Duroc Jersey breed has suffered in a long time. While it is a great personal loss to Mr. Reed, yet the benefit of the progeny of Chief Select upon future generations in the Duroc Jersey breed is hard to estimate. In Mr. Reed's hands this boar was working wonders as a sire. His sons and daughters were in demand throughout the entire corn belt. Chief Select was considered by many as one of the greatest, if not the greatest breeding boars in the state. He has sons at the head of many of the very best herds in the land and they are making good. A great boar like Chief Select when in the hands of a real constructive breeder like William Reed, has the greatest opportunity possible to work general improvement in other herds. It is only in the hands of a master breeder that such great boars can be of the greatest benefit to the breed, and that is why it is unfortunate that the death of this great boar should occur at such an inopportune time. Mr. Reed has at different times refused what seemed exorbitant prices for Chief Select, but he knew that he could not obtain another boar to fill his place. Every Duroc Jersey breeder will extent sympathy to Mr. Reed in his great loss.

Col. N. G. Kraschel, Auctioneer.

Readers of The Homestead and thousands of stockmen throughout the West will recognize the illustration herewith of that rising young auctioneer, Col. N. G. Kraschel, Harlan, Iowa, who has done such splendid work the past several years in the selling of pedigreed live stock. Few men in any profession have risen any more rapidly nor have they done any better work than has Colonel Kraschel since he came into the West and solicited the patronage of the western breeders. In turn he has given them the very best he had and his work has been thoroughly satisfactory. He is an orator of no mean ability, a gentleman both on and off the block, a student of pedigree and values and withal a char-

acter who has dignified the profession he represents. Breeders have liked him because he was honest, reliable and trustworthy, and this has been a marked feature of the sales that he has conducted. That it pays is best evidenced by the rapid rise of this capable young auctioneer, and his career has just begun. He has made many of the most prominent hog sales throughout the West of late years and also has been on a lot of the best cattle sales, and his work there has been well received, so much so, that he is booked for some of the leading sales the coming year, and we predict for him a splendid future. To any breeder, whether it be cattle or hogs or horses, who contemplates making a public sale and wants a capable, painstaking and competent auctioneer, we will say to them that they will not make any mistake if they employ Colonel Kraschel. He will get you the money, and he will get it for you in a way that you will feel well repaid for engaging him to conduct your sale. Write for dates if you are going to make a sale this fall or winter. See page 21.

Harrison & Harrison Offer Angus Bulls.

With this issue of The Homestead Harrison & Harrison, the well known Angus breeders of Indianola, Neb., start an advertisement in which they offer a choice lot of Angus bulls of serviceable ages and they also have for sale at all times a choice lot of the very best fashionably bred females and young things. The writer recently paid a visit to these famous herds, better known as the "Alfalfa Head Quarters Angus," and we wish to say that we were much pleased with the very fine lot of stock we saw. We were especially pleased with the young bulls that we saw on the farm that were the get of Blandin, the great Black Cap bull used in this herd last season. Blandin is sired by Imp. Prince of Benfield. This bull has sired a lot of calves that are little short of sensational. He looks as though he was in the big-money class as a sire, and we would earnestly recommend [illegible] to the readers of The Homestead. As good a bull calf as the writer has seen in many years we saw on the farm recently, and he is by Blandin. His dam is Black Bird of Maple Leaf and his grandam is by the celebrated Moon Eclipser. The pedigree is right, and we do not believe that we can quite do the bull justice in a description, but we trust that Messrs. Harrison will show him that stockmen generally may get a look at him this fall. There are a number of beautiful heifers by this sire as well as a number of young bulls, and they are uniformly first class. There are also a a choice lot of young things sired by a son of the great and only Black Jam. We recommend these cattle. Write Harrison & Harrison, Indianola, Neb., for full description of the stock for sale. See advertisement on page 21.

Pine Hedge Duroc Jerseys.

When A. P. Alsin, Boone, Iowa, lost his noted herd boar, Muncie Chief, he met an experience which would have disheartened most breeders. Not so with Mr. Alsin. He realized that the cause of success in the Duroc Jersey business is keeping everlastingly at it and keeping the best herd boar to be found. As a successor to Muncie Chief he selected a son of that great hog called Muncie Again. Muncie Again has most of the merit which go to make a good Duroc Jersey and some that are in the extraordinary class. He has sufficient size, smoothness and finish and a wonderfully strong bone. Muncie Again comes by all different qualities legitimately. His dam was a daughter of Proud Advance, one of the greatest sow sires of the breed, and his second dam was the noted grand champion sow, Violet Blossom 5th, an undefeated show sow as well as a wonderful producer. Mr. Alsin also has in service this year, Junior Jim's Col., a good hog and one which possesses a pedigree of remarkable strength. His crop of spring pigs is perhaps a little better than usual, although lacking somewhat in numbers. Most of them are by Muncie Chief and Nebraska Belle's Ohio Chief. Mr. Alsin is offering for sale a two-year-old hog which won fourth at the Iowa State Fair last fall. This is Muncie's Last, which showed in a class of twelve months old and under eighteen last fall. He is by Muncie Chief and his dam traced through Ohio Chief lines of breeding to Violet Blossom 5th, the grand champion sow above mentioned. Further information concerning this hog and the reasonable price at which he will be offered may be obtained by writing to A. P. Alsin, Boone, Iowa. Additional facts concerning the herds will appear in a later issue of this paper.

Peter Mouw's Great Boar Offering.

Just one word more to Homestead readers regarding the Peter Mouw sale of his famous large-type Poland Chinas that he will sell at his farm near Orange City, Iowa, on June 25th. It will be one of the sales where admirers of the big-type Polands will find herd-boar proposition and there should certainly be a large attendance of those who want to purchase boars to place at the head of their herd. Eight of the boars he is selling are sired by that great boar, Big Jumbo, and these range in age from a year to under three years of age. Mr. Mouw has held these boars and has grown them with the idea of making herd boars and now that he is making a trip to Europe has concluded to call a mid-summer sale and dispose of the entire lot. There are boars in this offering that any of our best breeders can use, and boars that will beat the 1,000-pound mark when matured. Among the number is Oakwood Jumbo, a two year old and used successfully in the herd; Square Jumbo and Tecumseh Jumbo, two of the best two-year-old boars that will go into any sale this year; Iowa King and Long Jumbo, that will beat 1,000 pounds quite a little when grown out, as well as a lot of others. There will be a lot of young boars in the Mouw sale that will have a right to make as good boars as many that are today heading good herds and come directly from the Mouw herd. For those breeders who are wanting to buy big-type boars to place at the head of their herd we will by all means encourage them to attend the forthcoming sale of Peter Mouw. The boar offering, however, is not all that Mr. Mouw is selling. He is cataloging about forty head of sows of his best and most noted breeding. Some of these

will be bred sows, bred for fall litter, and some will be fall sows sold open. It will be an easy matter to buy herd sows in this sale or young sows to go into a fall or winter sale. The Mouw sale should attract one of the largest crowds of breeders of the season. Write for his catalog at once and kindly mention The Homestead. Bids sent to M. T. White, Homestead representative, in care of Mr. Mouw will receive attention on day of sale.

Economy Stock Farm Durocs.

We had the pleasure of looking over the Durocs on the Economy Stock Farm, Shenandoah, Iowa, one day last week, owned by James J. Doty, and found a lot of good things in the herd. We found there that grand old show and breeding boar, Chief's Col., and while he does not look like he did when he was in show shape, yet he is still doing business, and they have quite a number of good things sired by him on the farm. There have been few boars that have done more for the breed than has old Chief's Col. He is probably the best son of old King of Cols. and he is out of an Ohio Chief dam, making him one of the best bred boars living. He himself was a grand champion boar at the Illinois State Fair in 1908, was also senior champion and headed first-prize aged herd at the same show. His get have always been in demand by the very best breeders, and Mr. Doty bought him to place at the head of his herd because of his ability to sire the class of stuff that the breeders are looking for. He is assisted by Highland Chief, a grandson of Ohio Chief and out of a daughter of Golden Echo, he by old Golden Rule. Most of the spring pigs are sired by these two boars, and they have 200 head of them. There are a few litters by Capt. Gano, a son of the noted show boar, Col. Gano, and one litter by Cherry Chief. The latter litter are good and they are out of a Proud Col. dam. They are offering for sale the two-year-old herd boar, Highland Chief, and he is a boar of pronounced individuality and a most excellent breeder. Some man who is looking for a good breeding boar will get a good bargain in this hog. They are also booking orders for spring boars from now on and they have twenty good fall boars on hand that they want to sell right away. These fall boars are sired by Highland Chief, and they have some of these that are about as good as you will find anywhere. They are offering some splendid bargains in these fall boars if taken soon, and those who order first are going to get the pick of the bunch. Among the other good things they have is a yearling boar called Future Fame, and he is a good son of L. E.'s Valley and out of a dam by Pilot Wonder, second dam being by old Advance. He is an outstanding junior yearling boar and one of the best things we have seen in our travels this year. They are not pricing this boar, as they do not want to sell him, but he is one that they are all going to look at before they get through. Another good yearling boar that they have on hand and will sell is a son of King The Cols. and out of a Proud Chief dam. Here is a boar that has lots of stretch, plenty of bone, and will make a herd boar to any breeder who is looking for a herd boar, as he is a good hog and has a splendid outcome to him. Then they have another good, toppy yearling by Morton's Top Col., and he is out of a granddaughter of old King of Cols. Here is a boar that will look good to a lot of men who are looking for a herd boar. They will sell either one or both of the last-named boars, all the fall boars and will book orders for the spring boars. They also have a choice lot of sows bred to Chief's Col. for September and October litters and they will sell these at any time. The herd is under the management of Mel Kraschel, one of the best known breeders and judges of Durocs in the West, and a man who has from time to time acted as judge in the best show rings in the East and West. He will be pleased to show you the herd at any time, and will take pains in selecting for you just what you want if you send an order. Write the Economy Stock Farm, Shenandoah, Iowa, at any time for further information regarding what you want and kindly mention The Homestead. See page 21.

NEWS OF THE SALE RING

Bellows Bros. Short-horn Sale.

June 10th was an ideal day for holding a public sale and the throng of breeders assembled at Parkdale Farm, Maryville, Mo., to attend the Bellows Bros. sale of Short-horn cattle showed their appreciation of the work these breeders are doing in producing up-to-date Short-horns. The forenoon was devoted to inspecting the breeding herds, the farm and the sale stock and all pronounced this one of the most instructive and enjoyable days ever spent at a breeding plant. The noonday luncheon served in the Bellows style under the broad shade trees that decorate the lawn was over at one o'clock and the crowd filled the spacious tent to overflowing. Colonel Woods in one of his most eloquent talks paid high tribute to the late Col. Geo. P. Bellows and that he is missed by all, was evident. After a few remarks from Mr. Renick, manager of the record association, the sale was started. That the cattle pleased the buying public is best shown by the general average of $490.10 paid for the forty-eight lots listed. One of the disappointments of the sale was when the roan yearling Marr Emma bull, Diamond Emblem, was knocked down at the moderate price of $1,095. D. E. Reiber, Morrill, Kan., purchaser, secures one of the best youngsters sold this year and he should prove a valuable acquisition to his herd. This bull either sold for one-half his value or many other bulls sold during the past six months have sold far too high. He was the top of the sale and is one of the best bulls the Bellows Bros. ever sold. Diamond Goods, his sire, is proving a great breeding bull and his get were appreciated. Corner Stone, one of the best prospects for a breeding bull went to Farmers Farms, Farmington, Minn., at $810 and was a bargain. The University of Illinois took Diamond Knight at $840. The top on females was $1,000 paid by C. F. Curtiss, Ames, Iowa, for Queen of Beauty, a roan three-year-old cow with rare breed character and quality. She is the dam of Corner Stone. Ogden & Son, Maryville, Mo., secured a valuable pair in Beatrice and her white heifer calf at foot at $815. Parkdale Victoria with heifer calf at foot by Diamond Goods, was a bargain at $810 and Rees & Son, the purchasers, secured one of the bargains of the sale. Columbia 12th with red heifer calf at foot by Diamond Goods and rebred to him went to A. O. Stanley, Sheridan, Mo., at $800. They are a valuable pair and will fit well in the select herd owned by Mr. Stanley. The Bellows Bros. reputation for square, open dealings in every transaction was upheld and their manner of conducting sales adds to their reputation as constructive breeders and business men. Cols. Woods, Jones, Reppert and Hosmer were the auctioneers. Following is a complete list of sales:

BULLS.

Corner Stone, calved October, 1911; Farmers Farms, Farmington, Minn.	$ 810
Diamond Abbott, calved April, 1911; Claus Ehler, Bennet, Neb.	500
Diamond Emblem, calved January, 1912; D. E. Reiber, Morrill, Kan.	1,095
Diamond Sultan, calved February, 1912; S. W. Ward, Lamont, Iowa	575
Diamond Knight, calved December, 1911; University of Illinois, Champlain, Ill.	840
Butterfly Sultan, calved March, 1912; D. M. Johnson, Storm Lake, Iowa.	405
Diamond Marr, calved December, 1911; Geo. White, Emerson, Iowa	400
Sultan's Crown, calved September, 1911; J. M. Woods, Washington, Iowa	500
King Abbott, calved November, 1911; Fred Sutherland, Skidmore, Mo.	300
Mildred Sultan, calved May, 1911; E. H. Boss, Hale, Mo.	610
Sweetheart Sultan, calved March, 1912; F. T. Clamp, New Providence, Iowa	360
Diamond Beau, calved January, 1912; A. T. Worstley & Son, Kent, Iowa	400

FEMALES.

Choice Victoria, calved January, 1910, and b. c.; E. H. Boss	415
Victoria Miranda, calved February, 1905; Tom Stanton, Glen Ellyn, Ill.	510
Parkdale Victoria, calved July, 1909, and c. c.; H. Reese, Pilger, Neb.	810
Sinnissippi Victoria, calved November, 1904; Geo. Thompson, Viborg, S. D.	505
Victoria Adelaide, calved August, 1909; D. E. Reiber	315
Sweetheart 2d, calved September, 1906, and c. c.; F. A. Jackson, Hurley, S. D.	500
Emma Belle, calved March, 1911; Owen Kane, Wisner, Neb.	375
Scottich Queen, calved March, 1911; E. H. Boss	350
Scottich Queen 4th, calved April, 1905; W. W. Burge, North Platt, Neb.	505
Butterfly 12th, calved January, 1906; A. G. Duffy, Kirksville, Mo.	225
Butterfly 2d, calved March 1909, and b. c.; W. W. Burge	715
Butterfly, calved July, 1905, and c. c.; Tom Stanton	500
Columbia 11th, calved November, 1909, and c. c.; F. W. Harding, Waukesha, Wis.	600
Columbia 12th, calved May, 1910, and c. c.; A. O. Stanley, Sheridan, Mo.	800
Columbia 13th, calved June, 1911; C. F. Curtiss, Ames, Iowa	300
Beaver Creek Spicy, calved February, 1906, and b. c.; Ogden & Son, Maryville, Mo	500
Fancy Spicy, calved June, 1910; S. P. Emmons & Son, Mexico, Mo.	250
Queen of Beauty 20th, calved July, 1909; C. F. Curtiss	1,000
Lovely of Parkdale 3d, calved April 1907; H. C. Stevenson, Leavenworth, Kan.	440
Lovely of Parkdale, calved January, 1905; J. T. Judge, Carroll, Iowa	410
Cherry Grove Lady 3d, calved April, 1906, and c. c.; E. H. Boss	570
Beatrice, calved September, 1903, and c. c.; Ogden & Son	815
Lady Lancaster 2d, calved September, 1905; Evans Bros, Maryville, Mo.	250
Lady Bess, calved January, 1904; Geo. Allen & Son, Lexington, Neb.	280
Roan Beauty, calved September, 1903, and c. c.; W. B. Bonnifield, Ottumwa, Iowa	465
Boan Bess, calved September, 1906, and b. c.; E. H. Boss	535
Jealous Maid, calved November, 1906; J. H. Christ, Skidmore, Mo.	410
Rain Drop, calved April, 1911; D. E. Reiber	390
Hampton Mary, calved February, 1906, and c. c.; E. H. Boss	575
Mint Drop 15th, calved January, 1909, and c. c.; E. H. Boss	500
Butterworth, calved July, 1907; A. G. Duffy	250
Princess Victoria 4th, calved August, 1910; E. H. Boss	450
Princess Victoria 5th, calved August, 1911; James Sloss; North Bend, Neb.	295
Missie's Gem, calved March, 1911; D. E. Reiber	230
Diamond Lady, calved March, 1911; E. H. Boss	375
Diamond Lady 2d, calved June, 1912; E. H. Boss	310

SUMMARY.

36 females	$16,725; average	$464.58
12 bulls	6,800; average	566.66
48 head	23,525; average	490.10

Qwens Bros.' Short-horn Sale.

On June 12th, Owen Bros., Homestead, Iowa, held their sale of Scotch Short-horn cattle as previously advertised. While the outcome of the sale was successful the cattle should have brought more money. The demand for bulls was not as strong as in other sales and the fact that there was such a large number of females cataloged had a depressing effect upon prices. A large amount of breeders were in attendance from several states. The most of the cattle remained in Iowa. The sale was conducted in a straightforward, business-like manner and the sellers made many friends by so doing H. C. Lewis, Council Bluffs, Iowa, secured the top female of the sale in Beauty May 5th at $350 and she was a decided bargain. Courtier's Crown, a three-year-old herd bull, was the top of the sale, selling to A. C. Austin, Crook, Colo., at $410. The offering throughout was very uniform and the average given below indicates a strong demand for good cattle when the number sold is taken into consideration. Cols. Fred Reppert, Carey M. Jones and George H. Burge conducted the sale in a very satisfactory manner. A list of those selling at $100 and above is appended:

FEMALES.

Happy Pride, calved August 1910, and c. c.; J. E. Mann, Woodbine, Iowa	$305
Beauty May 5th, calved November, 1906; H. C. Lewis, Council Bluffs, Iowa	350
Geraldine 13th, calved November, 1909; Wm. Durant, Wellman, Iowa	250
Missie Maid 2d, calved March, 1911; J. W. Frizzell, Brooklyn, Iowa	190
Missie Maid 3d, calved January, 1912; Thos. Brown, Hawley, Iowa	140
Happy Pride 3d and Happy Pride 4th, twins, calved June, 1912; Wm. Herkelman, Elwood, Iowa	250
Golden Lassie, calved August, 1910; J. E. Mann	265
Golden Lassie 3d, calved July, 1912; Wm. Herkelman	125
Gipsy Girl, calved 1909; Robt. Owens, Jr., Homestead, Iowa	160
Sunshine Lady, calved November, 1909; Robt. Owens, Jr.	140
Sincerity Maid, calved November, 1909; John Gregg & Son, Clarence, Iowa	225
Lady Aberdeen 3d, calved November, 1908; Chas. A. Saunders, Manilla, Iowa	215
Red Crest, calved December, 1908; H. Prichard & Son, Walnut, Iowa	230
Red Crest 3d, calved April, 1911; E. B. Thomas, Audubon, Iowa	160
Red Crest 4th, calved May, 1912; Wm. Herkelman	125
Lady Pride 2d, calved September, 1906; H. C. Lewis	230
Courtier Lady, calved May, 1908; J. M. Bay, Aledo, Ill.	185
Courtier Lady 2d, calved May, 1911; M. E. Slemmons, Iowa City, Iowa	175
Scottish Queen 2d, calved January, 1912; W. B. Robinson & Son, Robinson, Iowa	110
Lotis Lily 2d, calved September, 1911; David D. Jones, Williamsburg, Iowa	125
Lady Bess 3d, calved March, 1911; Chas. Wilkins, Nauvoo, Ill.	110
Beauty's Lassie 3d, calved October, 1911; Chas. Wilkins	110
Susan Lady 4th, calved October, 1906; H. Prichard & Son	215
Lady Susan 2d, calved May, 1911; H. Prichard & Son	165
Duchess 2d, calved October, 1911; David D. Jones	125
Glossy Maid, calved January, 1912; David D. Jones	125
Gracidan Gem, calved January, 1910; H. Prichard & Son	250
Secret Victoria, calved November, 1909; Henry Durant	245
Victoria Gem, calved June, 1911; Grant Marquis, Aledo, Ill.	250
Beauty's Pet, calved August, 1912; Wm. Herkelman	125
Beauty Girl 9th, calved November, 1909; E. R. Silliman, Colo, Iowa	185
Secret Butterfly 2d, calved January, 1910; Fred C. Wiley, Mt. Union, Iowa	200
Hampton's Queen 3d, calved September, 1905; H. Shafer, South Amana, Iowa	155
White Stockings, calved October, 1908, and c. c.; R. Sherlock, Williamsburg, Iowa	115
Lady Royal 2d, calved January, 1907; H. Prichard & Son	180
Emma, calved July, 1910; Iowa State College, Ames, Iowa	305

75 cattle	13,910; average	185

The Rees Short-horn Sale.

The sale of Howell Rees & Son at South Omaha, on June 11th, attracted one of the largest crowds that has been sent at this point in a number of years and it seemed they were all there for business. A great number came from the Bellows sale the day before, and with the new faces that came, made it one of the most representative Short-horn gatherings seen in the West in a long time. The cattle were presented in nice condition and were well received by the buyers present. The top of the sale was the great cow, Lady Violet 4th, and she went to E. A. Hess at $900 and was a great bargain at that figure. She is certainly a grand specimen of the breed. She is a three-year-old daughter of Ruberta's Goods and is out of a daughter of old Choice Goods, and we are strictly within bounds when we say she is one of the greatest cows that has gone through a sale ring in a long while. The top of the bull sale was the yearling roan, Secret Goods, a son of Ruberta's Goods, and he was secured on order for J. C. Morman, Crofton, Neb., at an even $500. Shortly after he was sold an offer of $600 was made for him by a gentleman representing Mr. Duryea, of Tennessee, and Mr. Morman was wired accordingly. Later on a message was received from Mr. Morman accepting the offer, and the bull therefore becomes the property of Mr. Duryea and will be seen in his show herd the coming fall. The Rees offering made an average of $324.67 on everything and the bulls averaged $371.66. Mr. R. E. Baldwin, Osceola, Iowa, sold eight head in the sale and he made an average of $190.62. Below we list the two offerings in their entirety. Colonel Woods cried the sale, assisted by Colonels Jones and Reppert.

FEMALES.

Lady Marengo 2d, calved Sept., 1906; Thos. Stanton, Wheaton, Ill.	$500

Lyndale Alexandria, calved May, 1911; Perry O. Brown 105
8 head .....$1,525; average., $190.62

It is easy enough to figure a high cost. We once had a neighbor who figured that it did not pay to raise and feed hogs. He allowed himself ten cents for every time he fed his hogs, this for the work of feeding. Figuring in this way, then counting in the worth of the feed fed, he came out away behind with that bunch of hogs, so he claimed there was no profit in raising and feeding hogs. It may be that by some such route as this, the gentleman figures that it cost twenty-five cents a pound to put weight on cattle.

Purchase Percherons

NOW is the time to buy Percheron mares, with foals at foot, rebred for 1914 foals.

BUY THREE IN ONE

See the mares in pasture or infield work.
See the kind of colts they are suckling.
You can buy more intelligently now, than any other time of the year. For information, and full lists of Percheron Breeders, address Percheron Society of America, **Wayne Dinsmore, Sec'y. Union Stock Yards - - Chicago, Ill.**

BELGIAN EMPORIUM OF AMERICA.

A CHOICE collection of Belgian stallions and mares constantly on hand. Several importations annually. Catalog on application. Address
HENRY LEFEBURE - - Fairfax, Iowa.
Eight miles west of Cedar Rapids.

Purchase Percherons

There is a fundamental reason why the breeding of draft horses will continue profitable.

From 1900 to 1910 the population of the United States increased 21%. Horses increased only 8%. Cattle decreased 8%, hogs 7%, sheep 14%.

This means increased tilled acreage and increased demand for horse power.

For full information address Wayne Dinsmore, Sec'y, Percheron Society of America, Union Stock Yards, Chicago, Illinois.

STALLIONS

Home-bred draft stallions $250 to $650. Guarantee to sell you imported stallions for less money than any firm in America. Come to a live stallion market and see all draft breeds. A. LATIMER WILSON, Creston, Iowa.

POLAND CHINA SWINE.

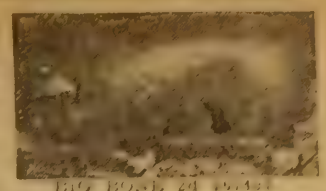
COOPER'S BIG-TYPE POLAND CHINAS. Guaranteed Cholera Immune

100 HEAD of pigs of spring farrow for sale, either sex, can furnish boars and gilts unrelated. These pigs are from sows weighing from 500 lbs. yearlings up to sows of over 800 lbs. in weight, representing the biggest blood lines and the most noted families of the breed. They are sired by Big Expansion, the 800-lb. 2-year-old son of the noted Dorr's Expansion; Big Bone 2d, weighing 900 actual pounds, and a son of the great Big Bone, Chief Leader, an outstanding 14-months-old boar weighing 500 lbs. today, and other boars of same likeness. These pigs will be ready to deliver beginning in June. They are from immune sires and dams and have received the double treatment. We will guarantee them cholera immune at

$35.00 EACH OR THREE FOR $100.00.

We will refund your money if they die from cholera. We guarantee them to be breeders; we guarantee safe delivery and record everything; have orders booked now from 9 states. If you want the biggest of the breed send us your order. We guarantee satisfaction.

W. H. COOPER - - - - - - - - - **HEDRICK, IOWA.**



J. O. JAMES' SENSATIONAL PIG BARGAINS

I WILL book orders up to 100 head of spring pigs sired by my half ton, **Big Orange, Ott's Big Orange,** who weighed 709 pounds on the scales just turned 19 months. **Big Sensation, Big Orange's King, A Wonder Giant** and **Gritters' Best.** All strictly big-type boars and out of extra big, long, heavy-boned matchless sows, many of them weighing from 700 to 800 pounds. These sows averaged 9½ pigs to the sow, many of them 10 to 13 pigs. I want you to write, describing just what you want. It makes it easier to pick the pig that will suit. I am pricing these pigs low for quick sale for June delivery, or at weaning time, for orders booked during May, or while they last, **$25** to **$35.** Must be bought during this month to get this price on them. Many of these pigs will be worth $100 to $150 by October. You can save from $75 to $100 by buying now. The early buyer catches the bargains. The dams of these pigs are sired by Big Orange, Big Sensation, Pawnee Nelson, Long King's Equal, Big Ex and Longfellow Jr. You can't beat sires, dams, pigs or prices. We guarantee our pigs to be as represented. Let me hear from you at once as orders are coming fast. Mention Homestead when writing. **J. O. James, Braddyville, Iowa.**

C. F. Adams' Big-Type Poland Chinas

I WILL sell spring pigs sired by my great herd boars, **Big Halvor** (generally conceded to be one of the very best big-type boars in Iowa), **Maid's Halvor 1st,** a son of **Big Halvor** and out of the mammoth sow, **Long Maid,** and one of the grand young boars of the breed, **Mammoth Jumbo,** a son of the noted **Big Jumbo** and **Grand Chief,** bred by John Miller. These pigs are out of a herd of

Sows That Cannot Be Surpassed for Size and Quality

These sows are bred in the purple, many of them being sired by the great sire, **Big Halvor,** others by **Coming Wonder, Big Nelson,** etc. I know I can please you in a pig and that you will be more than pleased with the manner in which they develop. These pigs will be worth three and four times what I am asking for them within the next year. Write me for prices, mentioning Homestead

TWO very choice Red Polled bulls and a limited number of females for sale. Also spring and fall Duroc Jersey boars. Nels H. Holm, Osceola, Neb.

$850 Fully Equipped Detroiter $900 Special Equipment

A smashing value—a car that has made the selling record of the world in the past two years for all cars of its class—that has left behind 181 other makes of pleasure cars in point of quantity because it has far outstripped them in point of quality—why, friends, is there anything you could want in an automobile that the DETROITER does not afford you for $850 or $900? You must pardon the makers of this splendid car if they seem to boast a little bit—but you know how it is with those things of your own that have just clean passed way beyond your expectations—that yearling colt—that stand of wheat—that field of big onions down in the lowland—that orchard on the hillside—that blue ribbon herd of yours; for everybody has something that is better, that stands for his hard work and high ambition. And with us, it is the DETROITER car.

You Will Be Proud, Too.

When you get a Detroiter you, too, will be justly proud. The Detroiter is no makeshift—not a skimp, not a covered-over weakness, not a false economy in any part of it.

We built this car on the assumption that its very goodness would sweep the country from end to end; that men would everywhere demand it because all owners said it was right. And our record shows we hit the nail square on the head. Honest building and beauty of line and finish, not surpassed at any price, have given the DETROITER its success.

Other Makers Said We Couldn't.

When the Detroiter first appeared two years ago, manufacturers everywhere said we couldn't build the car for the price. They didn't take into consideration that the very quality of this car made the sale of it so easy that our sales expense per car is next to nothing. When you buy a Detroiter you pay no heavy "selling overhead," just as you pay the lowest "factory overhead." Our net profit per car is less than many manufacturers expend in "selling overhead" alone. And so we did it—although the manufacturers said we couldn't.

The Nine Big Features.

1. Long stroke motor.
2. Platform rear spring.
3. Multiple disc clutch.
4. Full floating rear axle.
5. Extra capacity radiator.
6. Enclosed valves, all on one side.
7. Left side drive, center control.
8. Extraordinary braking surface.
9. Ball bearings throughout.

What Such Construction Saves You.

It is such construction that makes possible the Detroiter record,—20 to 25 miles to the gallon of fuel—and over 100 miles to the quart of lubricant. No five-passenger automobile made surpasses this record. Other cars with such features average in price $3,555.80—TheDetroiter costs you $850 or $900.

A Car For Hardest Use.

Naturally a car with ball bearings that cannot wear out and never need adjusting—with the costly platform type of springs that absorb every jolt—with the long stroke motor that works without depreciation—with the extra large radiator that keeps the motor cool under all circumstances—with the full floating rear axle that is three times as strong as other types—with such a light car weight (1,900 pounds) and oversized tires—such a car lasts. Not one season, nor two, nor three is the life of a DETROITER—but with any reasonable care, less care than you give a good horse, it will live as long as tough steel can endure.

This Is the Day.

So get in touch with our nearest dealer, and do it now. The DETROITER has no seasons. The car you choose today has every latest improvement. Nothing is held over till "next season." There isn't a single experiment in the whole car. Every detail is tried and proved.

Five Models For Your Choice.

Any one of five models—touring car or roadster—at $850 for standard equipment, or $900 for special equipment. All with the same 25 h. p. long-stroke motor, 104-inch wheel base, 32 x 3½ inch tires (oversize for long life), Speedometer, Prest-O-Lite or battery lighting system, quick detachable, demountable rims, etc., at the $900 price.

If you are not going to town this week, send us your name and receive a Detroiter catalog.

YOU CAN DO IT WITH A REO

Many Farmers Are Beginning to See the Tremendous Possibilities of the Reo Truck

Did you ever stop to think how much time you take, and land you use, just to raise horse feed? You work your head off to raise grain and hay to keep horses that loaf a third of the year. Why not cut that expense in half—or better? Why not take a tip from the big city trucking companies that discarded horse-haul long ago? For horses have proved too expensive for the cities even where they can work all the year round.

How about the farm then, where horses stay in the stall days at a time?

The Reo Model H Truck can carry 1500 pounds anywhere that horses can go—quicker and cheaper.

You owe it to yourself to investigate. Don't leave it to your children to learn that a motor truck is as far ahead of horse-haul as a binder is superior to a cradle. Learn it for yourself. Let us send you some good, sound, honest, reliable information about trucks on the farm.

REO MOTOR TRUCK COMPANY
LANSING, MICHIGAN

Model H
Capacity 1500 pounds.

Safeguard Comfort and Carriages!

Use GOODYEAR Carriage Tires

Goodyear Wing Tires Save Money and Trouble. Easiest Riding! Insure Longest Carriage Service.

The secret of the remarkable durability of these tires lies in the patented wing. It preserves the base. The wing extension prevents mud, grit and water from entering, which would cut, grind, loosen and destroy the base.

Those are the troubles bought with ordinary carriage tires. That's why they are expensive and unsatisfactory. That is impossible with Goodyear Wing Tires. The base remains sound. The tire stays on—gives long wear, about twice the ordinary—made of tough, springy rubber—gives perfect satisfaction. Insist on Goodyear Wing Tires—you'll get the world's best.

"Eccentric" Cushion Tire

Eccentric Cushion Tire

An improved cushion tire—superior to any other. The retaining wire hole below the center allows 50 per cent more wearing depth—wears that much longer—saves you that in money. And it absolutely prevents the tire from coming off the rim. The hole being below the center, does not crack out. The tire stays firm in channel. High grade, resilient rubber assures comfortable riding and saves the carriage—assures you perfect satisfaction. Our latest carriage tire book sent free. Gives full information. (1225)

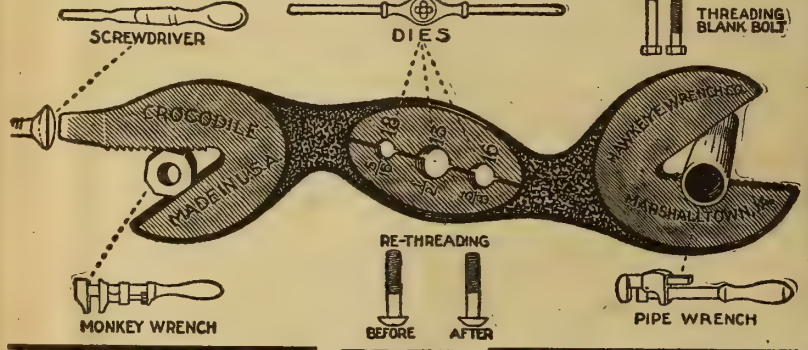
A HANDY WRENCH FOR HARVEST AND HAY MAKING



THIS WRENCH IS FREE BY PARCEL POST

The months of June and July find the farmer busy with his harvest and hay making. It is then that he needs a wrench that will answer every purpose around the binder, mower or rake. We have just such a wrench in our famous "Six in-One Crocodile."

This wrench is drop forged from the finest tool steel, scientifically tempered. Every Wrench is Guaranteed. It has six handy tools in one—pipe wrench, nut wrench, screw driver and three dies for cleaning up and re-threading rusted and worn out threads. Dies fit all standard farm machinery. It requires no adjustment, never slips, and is simple and always ready for use.

HERE IS MY OFFER:

Send me only $1 for one year's subscription to The Iowa Homestead and I will mail you one of these crocodile wrenches free of charge by parcel post. This offer is good only till July 1. Use the coupon below and mail all orders to

The Iowa Homestead

DES MOINES, IOWA, THURSDAY, JUNE 26, 1913.

Modern Household Arrangement

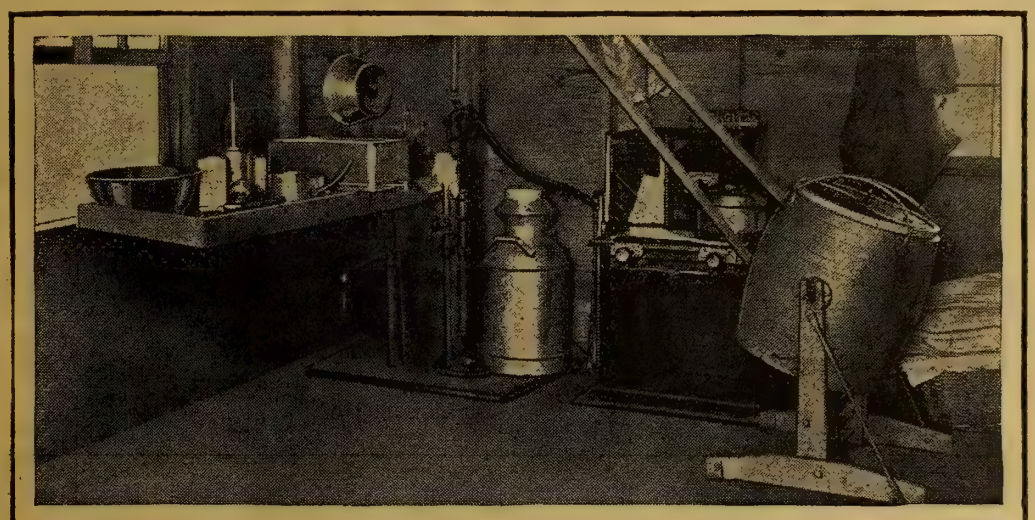
Work Room Which Concentrates Heavy Tasks of the Household into a Separate Apartment and Removes Them From the Residence—Enhances Cleanliness and Promotes Sanitation.

WAYSIDE FARM, an unpretentious quarter section located in Rock Island county, Illinois, has inaugurated a system of improvement affecting the convenience for handling the heavier work of the farm home that is worthy of the emulation of other farmers. This is a work room, in which are installed a cream separator, churn, washing machine, wrinsing tub and wringer, laundry stove, gasoline cook stove and a gasoline engine. There are also work tables, a pump connected with a soft-water cistern, and hydrant from water tank.

The building is not an expensive one. It measures twelve by eighteen feet on the ground, with a seven-foot wall. It is built with a single thickness of good quality barn siding, and has a substantial shingle roof. The floor has a finished cement surface on a four-inch gravel concrete base. The floor slopes from all directions to a drain-pipe connection, so that it may be flushed by a hose attached to the hydrant. There are two doors, that shown in the picture opening into the driveway and the other on the north side and connected with the kitchen, which is about twenty feet distant. There are two windows on the south and one each on the east and west. A shade tree on the west affords protection from the rays of the afternoon sun.

A FARM HOUSEHOLD WORK ROOM.

The engine base is a solid block of cement 12x30x36 inches, built into the floor. It stands one foot above the surface of the floor, and one and one-half feet in and below the floor. This gives it absolute solidness and rigidity. The separator base is a block of concrete eighteen inches square, but set even with the surface of the floor. The other machines are bolted to pieces of 2x4 two feet long embedded in the concrete. The method by which these pieces are fastened is novel, but effective. In each piece a number of spikes were driven into the center of both narrow edges about half way. Each piece of wood was then placed on the floor while in process of construction so that when the concrete work was completed the top of the wood laid flush with the floor, with the protruding spikes solidly embedded in the concrete on each side.



SECTION OF WORK ROOM SHOWING WASH-UP SHELF AND WATER CONVENIENCES.

The engine is of one and one-half horse power, and it furnishes power for the cream separator, the churn, the washer and the wringer. It might also easily supply power for a farm electric light plant.

The application of power to the machines relieves the family of a lot of the hardest kind of drudgery, reduces the time required to do it, and makes it possible to do it much better. The ladies of Wayside Farm are loud in their praise of this little house and its equipment. They find no difficulty in operating the engine. In winter the little laundry stove furnishes enough heat to keep the room comfortably warm.

The plan removes all the mussy and odorous work from the home, gives an added incentive to neatness, and affords an important sanitary condition which, in itself, has a value which more than justifies the expenditure for the building. It has advantages over a basement arrangement on account of light and ventilation, as well as in that it involves no running up and down stairs. The latter point is an important one, particularly where there may be a considerable quantity of milk to be handled. The washing up of the cream separator is done at the table shown, where water, drain, and sunshine through the window are all convenient.

This building and its plan of equipment were awarded a prize in a competition which this paper held a year or two since, the subject being plans for a work room and the application of power to the laundry machines, churn and cream separator. A few additions suggest themselves as a means of still more enhancing its value. An inexpensive plan of providing hot water might be used by putting a hot water coil in the laundry stove. The addition of a good-sized sink instead of the shelf-table shown in the engraving would prove more satisfactory. The addition of stationary tubs, to which both hot and cold water could be piped, would economize floor space and also reduce the labor of handling water for washing and rinsing. Such a room, given all the appliances that add to its convenience, might often occupy a kitchen space that would be rendered useless by it. Many kitchens are unnecessarily large and involve a great deal of work in merely keeping them in order. The tendency of builders is to restrict kitchen space to actual needs, and to eliminate everything except absolute essentials. With washing, ironing, fruit canning, churning and the care of the dairy utensils removed from the kitchen, its size may be reduced and its attractiveness increased.

THE LAUNDRY OUTFIT.

CREAM SEPARATOR AND ENGINE.

THE HOMESTEAD

A PRACTICAL JOURNAL for the FARMER, STOCKMAN, FRUIT GROWER, POULTRYMAN, GARDENER, and HOUSEKEEPER

BY JAMES M. PIERCE

JAMES ATKINSON, Editor-in-Chief

ESTABLISHED IN 1855

Entered at Des Moines Postoffice as second-class matter

PUBLISHED EVERY THURSDAY

SUBSCRIPTION RATES—Single subscription, $1.00 a year. In clubs of ten, 75 cents a year and an extra copy to getter up of club. In clubs of fifty or more, 30 cents a year. Single subscription three years in advance, $1.50; five years in advance, $2.25; ten years in advance, $4.00. Subscription price in Canada, $1.50 a year. Remit by draft, registered letter, postoffice or express money order. In changing address, send both the old and new addresses. In renewing, give the same name and initials as you gave before or state both the old and new names, and explain why you make the change. In case of errors or failure to receive the paper within two weeks, promptly notify the publisher. Address all letters to

THE HOMESTEAD COMPANY,
Des Moines, Iowa.

WHAT AILS THE ALFALFA?

Judging by the tenor of many inquiries received by this paper all is not smooth sailing for those who are experimenting with alfalfa for the first time. An Iowa subscriber outlines his difficulties in the following communication:

I seeded six acres of alfalfa during the first week of August last year and it resulted in a perfect stand and produced a growth of eight or ten inches last fall. It seemed to start out well this spring, but about the first of June it began to turn yellow and a large part of the leaves took on a spotted appearance. I cut the crop quite early in the belief that I would get a larger yield than if it were left because it actually seemed to be dying out.

The soil on which this alfalfa was grown is well drained and while my farm never produced alfalfa before, yet sweet clover is grown in this locality and I was rather under the impression that the soil would be properly fertilized for the crop. Do you think it would be worth my while to try to save this stand or would it be better to plow it up and start over again?

A Missouri subscriber who seeded alfalfa in the spring of 1911 was well pleased with the results obtained last year, but he calls attention to the fact that the crop is now turning yellow and that it has anything but a healthy appearance. The same problem presents itself to this subscriber, namely, whether or not he should plow it up or try to assist the crop by the application of fertilizers or by the use of the right kind of bacterial life.

It must be kept in mind that the growing of alfalfa is not always as simple a matter as one might be led to believe from the advice given by the so-called enthusiasts.

There might be two reasons why the Iowa subscriber whose communication appears above is disappointed in his crop. In the first place his soil may be acid and if that is the case there is only one way to fit it for the growing of alfalfa, namely, by the application of considerable quantities of lime. The acidity of the soil may be tested by taking a sample of the surface soil to a depth of five or six inches, making it thoroughly wet, almost the consistency of mud, after which a piece of litmus paper should be embedded in this wet mud and left there for a period of ten or fifteen minutes. If it turns red then the soil must be limed before it will grow alfalfa satisfactorily.

The other cause for the failure is the lack of the right kind of soil organism. Ordinarily we believe that in nine cases out of ten where alfalfa turns yellow it is due to the lack of these organisms in the soil. Whether this form of life is present or not can very quickly be determined by digging up an alfalfa root, carefully washing it off with water, after which small nodules ought to be plainly visible on the roots if the soil is inoculated. If there is no inoculation the roots will be smooth and the chances are that under those circumstances the crop will not present a healthy appearance.

There are three methods of inoculating an alfalfa field. In the first place 300 or 400 pounds of soil per acre taken from a thrifty alfalfa field will accomplish the desired results, particularly so if the soil is applied on a cloudy day. Another plan is to use a soil upon which sweet clover has been growing because the alfalfa and sweet clover organisms are identical. The third plan is to use artificial inoculation which may be applied either at the first seeding or by stirring it with the soil and putting it on in that way. Where a good stand of alfalfa already results but the crop seems to be spotted or yellow it will be quite worth while to try one of these plans, but we repeat that application should be made if possible on a cloudy day and the surface should be disked immediately in order to incorporate the freshly-applied material with the soil and thereby prevent its destruction by the rays of the sun.

BLACKBIRDS CAUSE PLAGUE.

The interesting theory is held by a writer in the American Journal of Veterinary Medicine that the horse plague which visited Kansas, Nebraska and other grain-belt states within the past year was caused and spread by the rusty blackbird and the mosquito. The writer is a practicing veterinarian of Kentucky. It is his belief that the mosquito which is the guilty culprit is not the kind that infests marshes and wet places, but a breed which is to be found swarming around the roost of the rusty blackbird. He outlines his theory in this manner:

This new species of mosquito has no preference for swamps, but will be found swarming around the roost of the blackbird, and can be seen in the day time as well as at night, especially about an hour before sunset. They have only one set of wings, which are carried straight out from the body and are inclined to have a spot of darker color than the other part of the wing. They fly very slowly.

Blackbirds are very plentiful in this country; they have multiplied very fast, or it may be that since electric lights around which they congregate have become plentiful we notice them more. Moreover, we are told by good authority that birds are refractory to the trypanosomes (parasites) but when their blood is swarming with the trypanosomes and a mosquito draws this infected blood from the bird, the parasite will remain in the stomach of the mosquito for a few days when a pupa is formed and this pupa is deposited on blades of vegetation, only to be taken up by a suitable host (a horse, for instance).

The doctor does not suggest any remedy for the plague, but adds the hypothesis that the disease in horses, mules and cattle is closely akin to the disease which has been afflicting human beings of recent years, particularly throughout the South: pellagra. If his contention is right another indictment has been added to the long list already returned against the mosquito and the house fly as disease disseminators. The remedy in the case of the fly is comparatively easily applied; kill him on sight and prevent his entrance to the house and access to food supply at all hazards. How to rid the country of the mosquitoes which infest the blackbirds' haunts is far more difficult.

GRAIN FOR HOGS ON BLUE GRASS.

A subscriber from Poweshiek county, Iowa, who is feeding seventy spring pigs, asks concerning the cheapest grain ration that he can use in conjunction with blue grass. In his case corn is worth fifty-five cents a bushel, oats forty cents, wheat ninety cents, barley eighty-five cents and tankage $2.50 per hundred pounds.

As the feeding value of blue grass and timothy is very similar we cannot do better in answering this inquiry than cite the case of an experiment conducted at the Iowa station. Pigs weighing practically sixty pounds each were carried on a timothy pasture for 112 days, the object being to test a ration composed of corn with one made up of corn and shorts and another of corn and tankage. Where corn alone was fed it required 451 pounds of grain to make 100 pounds of gain, whereas in the case of a ration composed of corn five parts and tankage one part it only required 398 pounds of grain to make 100 pounds of gain. The shoats fed corn alone made an average daily gain of nine-tenths of a pound each, whereas those fed tankage gained 1.3 pounds daily each.

The other grains mentioned by this subscriber are relatively too high in price to use economically, save only that a small proportion of ground oats or ground barley might be used to raise the protein content of the ration slightly and in addition add to the palatability of the grain by introducing variety.

That the use of some product like shorts, tankage or oil meal is advised in connection with blue grass or timothy is indicated by the results obtained when the Missouri Board of Agriculture endeavored to ascertain the practice of some eighty-three different farmers on this particular point. It was found that some 72 per cent of these feeders believed in using something in addition to corn when hogs were pastured on blue grass or timothy. Thirty-three per cent of those who responded to the inquiry used middlings, shorts or shipped stuff, while 23 per cent supplemented the grain and pasture ration with milk. Only 2 per cent had obtained satisfactory results in feeding oats, and about 1 per cent used wheat.

Attention should be called to one additional fact in this connection, namely, that where high-priced by-products of any kind are used special pains should be taken to see that every little detail of hog comfort is looked after. It goes without saying that it is false economy to feed tankage that costs $2.50 per 100 pounds to pigs that do not have sufficient shade to protect them during hot weather, or on the other hand, this ration is too expensive to use in the case of hogs that do not always have access to plenty of good water. Furthermore it will not pay to feed tankage to pigs that are infested with internal parasites or to those having skin troubles. It is true that we might add that it does not pay to feed even a corn ration to unhealthy hogs, yet it sometimes happens that hogs can be taken through the summer on a cheap ration and sort of pull themselves together when the fall rains begin, in which case they may be finished up on corn and grass alone.

We believe most strongly in dipping or spraying hogs from time to time to keep them free from lice and to bring the skin into a healthy condition, and furthermore we endorse the practice of using good worm remedies at regular intervals during the summer and fall months.

STICKING TOGETHER.

The idea of the farm credit society will not down. As tried out in France and Germany, whether under the general name of Raiffeisen banks, or otherwise, the plan has been quite generally successful, although, of course, it must be conceded that agricultural conditions are so different in Europe from those in America that it does not necessarily follow the farm credit plan would work as well in this country. That it is making progress, however, is evidenced by the following item taken from a recent newspaper. We purposely leave the name of the town blank:

An experiment that will be followed with much interest has recently been started in ————. A number of farmers have clubbed together to form a credit society and, I am told, the scheme is being well supported by the banks. This particular society has for its immediate object the purchase of dairy stock with the idea of setting going a local dairy industry. The cows are to be purchased with money advanced by the banks on the joint and several credit of the members of the society. A maximum limit is to be fixed beyond which no member will be allowed to go. This and various other details would vary in different districts and according to the precise purpose of any credit society.

It will doubtless be a surprise to most to be told that this item is from a paper published in Rhodesia, South Africa. From France and Germany to Rhodesia, is a long trip, longer than from France and Germany to the United States. Yet the underlying idea of the farm credit societies seems to have stood the long journey quite well. The underlying idea in all these plans is simply this: communal responsibility for individual loans. Nothing has more conclusively proved that whole communities rise or fall together than the present trouble in California over the Japanese farmers. They obtain a foothold by buying a small tract of land at an exorbitant price. Their presence, together with their manner of living, almost inevitably results in a rapid decline in land values in the immediate neighborhood, with the result that the Japs buy or lease other lands at a much lower price than they were obliged to pay for the initial foothold. We are not citing this to add anything to the present Japanese controversy, but simply to show that nowhere is communal spirit more important than in the country. The French and German credit plan, as transplanted to South Africa, is nothing much more than this: whole communities of farmers sticking by one another and guaranteeing each other's credit until the average of prosperity is raised for the whole community.

Whether the plan would work out in America is another matter. But it is coming in for adoption and discussion and is one of the big, vital topics of the day.

THE SWAMP DRAINAGE PROBLEM.

The present secretary of the interior, Franklin K. Lane, of California, believes that the government can do no better work than to assist in the reclamation of the swamp areas which are keeping thousands of acres of otherwise fertile land in the grain belt out of profitable cultivation. He proposes that the United States Reclamation Service, which has heretofore devoted its energies to putting water upon dry tracts, now reverse the operation and devote at least a part of its energies to removing water from too wet tracts.

The swamp drainage problem is undoubtedly a serious one. There are approximately 100,000,000 acres of swamp and overflowed lands in the country. Were all these acres to be planted to corn and produce but thirty bushels to the acre, the annual returns would be $1,500,000,000. As long as these acres remain in nonuse, through an overabundance of water, the net loss to the nation is at least this immense amount each year. Therefore, it is as highly important that these lands should be placed in cultivation as that the arid and desert tracts of the West should be reclaimed.

The history of the swamp reclamation movement is interesting. In 1850 congress passed an act bestowing upon the states all swamp and overflowed lands in the public domain within their borders. There were some exceptions. For example, in Minnesota, there was a considerable area of swamp lands in Indian reservations, which, of course, did not pass to the state. The lands were patented to the various states from time to time. In 1898 the Arkansas authorities entered into an agreement with the United States whereby they ceded back all of the swamp lands which had not theretofore been patented to the state. This accounts for the 100,000 acres of public swamp lands in that state.

The individual states have found the swamp problem too large and too far reaching for unaided solution. The bill which it is proposed to introduce in the present congress, after conference with Secretary Lane and numerous prominent congressmen, is designed primarily for the reclamation of swamp lands on the public domain, but authorizes the inclusion in drainage projects, under certain conditions, of state or private swamp lands contiguous to public lands located in the same drainage basin. Under the terms of the proposed bill persons who make homestead entry on drained public land must pay the cost of drainage in annual installments. The states which own lands which are drained by government projects must bear their proper portion of the expense. Land in private ownership which may be drained in this way must bear the full cost of the work, its owners issuing bonds or giving other proper security, the expense to be a first lien on the land until paid.

The drainage problem looms larger and larger as land values mount higher and the necessity of an increased production becomes more apparent. Already it has been suggested by one of the high officials of Iowa that if the state is unable to secure the land upon which to try the prison-farm experiment at a reasonable price, one of the swamp lakes in the northern part of the state be drained and converted into a farm. This is a sign that men's thoughts are turning more and more to the reclamation of those areas which now, through a superabundance of water, are withheld from the cultivation necessary

to make the crop supply equal the demand and to add to the annual crop output and wealth of the various states.

Iowa Swine Breeders' Association

IN THE history of organizations of the state of Iowa having the advancement of the live stock industry in view, none has been so effective as the Iowa Swine Breeders' Association. Its regular meetings have covered a greater number of years than any other association and the results that it attained have been most apparent in forwarding the interests of the pork producing industry both with reference to their application to the farmer and to the breeder. It was, therefore, a matter to be deplored that neither farmers nor breeders took sufficient interest in the association to turn out to the annual summer meeting which took place at Ames, June 18th. A corporal's guard were in attendance. The program, which had been announced, contained subjects of general interest to be discussed by men who were entitled to consideration. Neither the president nor vice-president was in attendance, and, therefore, the duties of the chair were performed by the second vice-president, F. J. Sexsmith, of Orient.

A brief and pointed address of welcome was given by Professor Curtiss, in this he ventured the statement that no organization was more welcome at the college than the swine breeders. He believed that they came together more as students and that they extracted more information from their meetings than did any other organization of any sort. He said that the modern improved hog represented the highest efficiency in the attainments of the business of animal industry. No animal converts grains into high-priced meats so readily, or with so great a profit as the hog. In support of this statement the professor said that although the state had just disposed of the greatest corn crop ever raised and at low prices, the hog had netted $1 per bushel for every bushel fed him.

The chairman of the meeting responded briefly, saying that Iowa's swine breeders were always glad of the opportunity to visit Ames and that they never failed to go home with an accumulation of information bearing on their business which was not available from other sources.

"Forage Crops for Swine" was discussed by Prof. John M. Evvard. The professor's talk was illustrated quite largely by tables showing different combinations of forage crops, the manner in which they were utilized and the objects attained. A lack of space prevents a reproduction of these tables at this time. Exercise and range on green crops were the principal elements in the production of profit-making hogs. In his treatment of the subject of ideal forage crops he went into details with respect to blue grass and timothy, on which hogs paid a profit of 75 cents per bushel for the corn fed them; on red clover the return for the corn used was 90 cents a bushel; on alfalfa, $1.03; rape, 92 cents; sweet clover, 91 cents; oats, clover and rape, 95 cents; oats, peas and rape, 87½ cents; green rye, 95 2-10 cents. As a permanent pasture he said that blue grass excels all others. Rape was important for its cheapness and quick growth.

The practice at the college station was to feed lye for the purpose of neutralizing acids caused by feeding corn. A self feeder was used in feeding tankage and grain. A good many questions were asked at the conclusion of Professor Evvard's statements. These brought out the facts that he believed that tankage might be the means of spreading cholera and that, as a prevention of such results, he urged that purchase be made only from a reliable factory. Contamination, he said, came, not from the material itself, but from exposure to cholera germs after cooking. He said sorghum for silage might be used with a value equivalent to that of corn in dry sections, but that in Iowa it was not advisable nor profitable. Sorghum makes good hay and there is no danger from the first crop. The danger from its use arises from second growth. Oil meal at $30 per ton is not as valuable as tankage at $50. Skim milk at 25 cents per hundred pounds has a value equal to that of tankage at $2.50 per hundred pounds.

The gentleman who had been assigned the subject of "How to Grow the Pig from Birth to Maturity" was not present, but an informal discussion on the matter followed. W. Z. Swallow said he started pigs with new milk, shorts and a little corn. He thought that the milk of one cow fed to a litter of five pigs would make the pigs have a value in the fall sufficient to pay for a good cow. R. R. Blake said he fed new milk, oil meal, and tankage and gave the pigs the run of a clover pasture. Secretary Hancher fed a variety, including oil meal, tankage, bran and shorts three times a day with shredded corn two times a day and gave them access to a blue grass pasture. He increases the proportion of corn as the pigs grow older. Nothing, he said, finishes a pig as well as corn. He fed bran to add bulk. He said that little pigs fed five times a day did well, but that for older ones feeding three times a day answered the purpose. He feeds tankage and oil meal on pasture. He slops before giving the grain feed. He uses 100 pounds of bran and 400 pounds of shorts and includes about a quart of salt to each barrel of slop. He believes in feeding often and only so much as the pigs will clean up each feeding time.

Col. H. S. Allen, Russell, Iowa, had been assigned "Handling Private Sales." He treated it briefly and concisely, saying that one of the first essentials of successful private sales is the delivery of goods advertised or described in correspondence. Animals should be in good condition at shipping time and should be shipped clean, free from lice and in substantial, clean and attractive crates. In correspondence stock should be described in a clear way and in such a manner that there may be no misunderstandings. Inquiries should be answered by return mail. If it is not possible to supply the kind of pig the buyer wants tell him so frankly. Mr. Allen cited the fact that his best customers in private sales were those who had been buying from him year after year, and who had been secured and held by him in the shipment of animals that would do them good. He thought it was important that the pedigree of an animal be furnished to the buyer promptly at the time of the sale. Touching on the subject of shipping on approval, Mr. Allen said that he did not believe in the plan at all times, although it had, in a great many instances, proven satisfactory. The chance of difficulty arises from the fact that buyer and seller do not always weigh a hog in the same light.

"Public Sales" was the subject of a talk made by Col. H. S. Duncan, Clearfield, Iowa. A public sale, he said, had a far-reaching influence on the hog-raising industry. It is educational. The public sale is a school for those who attend. It gives opportunity for acquiring information as to the comparative value of animals and gives inspiration to the breeder of pure-bred stock. It tends to encourage learning values, appreciating individuality and knowledge of blood lines. It is a successful means for the promotion of breeds. Success of public sales depends upon many details. After a sale has been claimed all stock for sale should be reserved for it. He urged that field men of reputable farm publications be interested because they have great opportunity to render assistance. Catalogs should be distributed freely. The interests of farmers being the basis of the pure-bred industry, it is important that they be induced to attend the sale. On sale day all of the minor details should have been previously disposed of. The selling should be prompt and there should be sufficient help so that the breeder can give his

(Continued on page 9.)

SPRAY!

Merry War Powdered Lye and Water Make The Best Mixture

Thousands of orchardists and vegetable growers have learned by **experience** that the **surest** way to make spraying pay the **biggest returns** is by making a spray mixture of MERRY WAR POWDERED LYE in the proportion of one 10 cent can to 15 gallons of water. If water is very hard use a little less than 15 gallons to each can. This makes 50 gallons cost **only 33⅓¢**; the same amount of Bordeaux Mixture when arsenate of lead is used costs from 40 to 66 cents at prevailing prices of its ingredients.

E. Myers, President E. Myers Lye Company

Better Than Bordeaux Mixture

MERRY WAR POWDERED LYE makes a **better** spray mixture than Bordeaux Mixture, Paris Green or any other combination of chemicals because it does not burn and sear foliage, injure buds or russet fruit. But it is quick death to all destructive fungus growths such as bitter-rot, blotch, scab, etc., and also effectively destroys the coddling moth, San Jose Scale and all other insects that are a menace to crop profits. To destroy Borers use one can to 10 or 12 gallons of water. The drippings act as **fertilizer, enriching the soil and increasing the yield.**

Read This Man's Letter "I have been using MERRY WAR POWDERED LYE for some time. Have used two cases this spring and find it fine for spraying orchard. I think it will do just what it is recommended to do." W. T. TAYLOR, Ludwig, Ark.

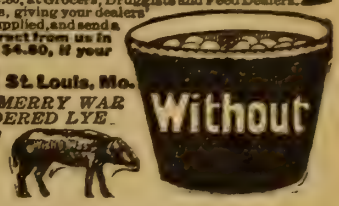
Warning! Don't let any one persuade you that any other lye will make as good a spray mixture as MERRY WAR POWDERED LYE. **There are no substitutes,** so be sure that you order by name and insist that your dealer supplies the genuine MERRY WAR. **Cut out and save these directions: 1 can MERRY WAR POWDERED LYE to 15 gallons of water.**

SOLD BY DEALERS EVERYWHERE

MERRY WAR POWDERED LYE comes in 10c cans. It is convenient to buy in full case lots of 4 doz. cans for $4.80, at Grocers, Druggists and Feed Dealers. If yours can't supply you, write us, giving your dealers' names, we will see that you are supplied, and send a valuable booklet free. **Order direct from us in full case lots—4 dozen cans $4.80, if your dealers' won't supply you.**

E. Myers Lye Co. Dept. 80S St. Louis, Mo.

Demand MERRY WAR POWDERED LYE for hog use.



APPLETON

Appleton-Goodhue Windmills will pump your water economically, work whenever the wind blows and keep at it for years. For a nominal sum we will *Insure for 5 years* against cyclones, tornadoes, anything but neglect. Why experiment; buy a simple, sturdy, safe, self-oiling, self-governing Appleton Goodhue outfit.

FARM POWERS

When the wind don't blow you will need an Appleton Gasoline Engine and pump jack. You can belt on to the pump, when needed, or run your churn, hand sheller, etc. For heavy work, running the husker or silo filler you have your pick up to 18 H. P. Hopper cooled, speed changing device, single side rod; a perfect engine. Write us today.

APPLETON MFG. CO., 339 Fargo St., Batavia, Ill.

KRATZER Quality CARRIAGES

"Built to Stand Wear and Tear."

Send Coupon for FREE Catalog

50 other styles in Buggies, Surreys and Wagons

"Majestic" Buggy No. 25

There are many buggies on the market these days that *look* fine enough when they are *new*—but there's more to a buggy than paint—there's only *one way* to protect yourself.

You can know you are getting a buggy of high quality throughout only by buying one made by a manufacturer with a reputation for high class work.

Kratzer Quality Carriages are sold by Reliable Dealers

They are made here in Des Moines; made *right* for the worst kind of roads; made of the very finest materials, beautifully finished. Some of them have been in service 15 and even 20 years—almost without repairs. When you buy a **Kratzer** you *know* you are getting the *right buggy* for your purpose; the best buggy made—and most economical in the end.

Buy a **Kratzer** *now*, and you will have a beautiful, easy-riding, easy-running buggy whose high quality will be a credit to you; and you will have a good buggy for many years.

Send Us This Coupon for Valuable Buggy Facts

Let us give you our catalog and the *real inside facts* about **Kratzer** buggies before you decide what buggy you will buy. If there is no dealer in you town, just mail the coupon.

FARM FURROWS

TURNED BY A PRACTICAL FARMER

I never have raised as good pumpkins and squash since there has been no prairie sod to sow them on. The old stack bottoms, when breaking up a prairie meadow, used to raise whoppers.

In the days when sickle sections cost ten cents apiece, and the average farmer thought he had to hire a blacksmith to rivet them on, we were very apt to think twice before filling a sickle with new sections, but now that it is possible to get them for four cents apiece, and most every farmer rivets them on himself, buying new is cheaper than spending too much time grinding out the old ones.

The silo has solved the problem of winter feeding so well that pasture for warm weather is becoming more of a question than feed for cold weather. At one time it was common to hear a farmer speak like this: "I could keep more cattle if I had more feed to carry them through the winter in good shape." The silo has changed this, and now it's pasture during the summer that's more important.

Sprinkle kerosene over the surface of all pools or barrels of water about the premises, and thus strike a death blow to the mosquito-hatching industry.

As we grow older we can't see why pushing the lawn mower is not just as good exercise for a young boy or girl as dancing the turkey trot to rag-time music, but we do little thinking it always seemed easier to husk corn all day at a husking bee and have a whooping good time all night than to go into the field and husk alone.

The self feeders and automatic waterers do not "jibe" with the old Scotch saying, "The eye of the feeder fattens his stock." The trouble with too much of the feeding done nowadays lies in the fact that too much of it is left with the hired help.

The old sow, at this season of the year, is a seeker after green food, and to do her best by her litter she must have it. Raising hogs in dry lots is the most expensive way possible to conceive, yet, as cheap as fencing now is, many persist in doing it.

A commonly accepted theory regarding the handling of alfalfa now is that the cutting should be done on a cool, rather cloudy day. It is claimed that a hot sun drives the moisture from the leaves into the stalk, and while the leaves (the best part of the hay) will quickly shatter, the stem dries slower than it does without a burning sun.

We talk of the hog as a mortgage-lifter. How about alfalfa?

"As homely as a hedge fence" has been a common saying as long as I can remember, but, at the expense of considerable elbow grease, a hedge fence may be trimmed into a thing of beauty. I have forty rods of it that I keep trimmed, and I can testify to the amount of work necessary to keep it down.

How things do move and improve! Now some fellow has invented an engine for attaching to the binder for running the binding apparatus of the machine, leaving nothing for the horses to do but pull the binder, thereby saving the work of two horses, it is claimed. It is claimed that the engine can be operated for from thirty to fifty cents a day, and weighs but 200 pounds.

A farmer need not be dressed up "sprucy-like," but there is no reason why he should go like a "hobo." He can be neatly dressed and fairly clean most of the time, even though he may get a little hay seed in his hair.

Soon the weather will turn so warm (and often dry) that the lawn trees will suffer materially for want of sufficient moisture. Put the generous amount of straw around the base of each tree, weight it down with pebbles or round rocks, and thus retain the surrounding moisture. This also will kill out the sod which often bars the air and light from the roots of the trees, while the tedious job of cutting or pulling the grass and weeds away from them will be avoided.

Don't put the calf's grain in its skim milk, unless you wish to bring on a bad case of the "scours" or other digestive ills. Feed the skim milk first, giving the grain and mill feed to the calf in a separate vessel afterward.

A feed coop for the younger chickens saves many steps. A big one can be made out of a bundle of lath, and feed put in it can be reached only by the young chickens. They soon learn to come to the coop for their feed, so there is no hunting up each brood to feed them and a long wait while they are eating, to "shoo" the old hens away.

If lower than thirty-six inch woven wire fencing is used on the pasture fence a barbed wire should be placed not more than three inches above and well stretched, otherwise the cattle will soon learn to poke their heads through and in a short time the fence will be an eyesore.

Is the corn planter in shape to go into the field to-morrow? If not, see that it is repaired before putting it away because that "to-morrow" will soon be here again. The same rule should be carried out with every piece of machinery on the farm.

I find, in making concrete walks, that one must allow considerable for expansion. Leave plenty of seam and the blocks will not be apt to crack.

Automobiles are sold on a commission basis, and if one buys a machine of a make sold by a local agent in some city, the local agent gets his commission just the same, while the purchaser loses the personal supervision of his car that a good agent gives every machine he sells. Where one is a beginner, this is worth a great deal.

The barn plan is not finished before an arrangement has been made for an easy stairway for climbing to the hayloft. Climbing is not a proper word. It should be walking. Doing the chores is hard enough without any climbing.

Mowing the roadside is compulsory in most states, but the law that makes it so is seldom enforced. A man ought to have pride enough in his surroundings to keep the weeds down without a law that tells him to do so.

Heretofore most "laws of the road" have given the worst end to the autoist, which has been necessary to keep the speed maniac under control, but now, in most states, there is a law which says a slower moving vehicle must turn out and give half the road so a faster moving vehicle may pass. This will touch up the road hog, who is found riding in all sorts of vehicles.

No-Rim-Cut Tires
10% Oversize

Controlled by Secrecy

The essential feature in No-Rim-Cut tires is made under lock and key.

We control it by secrecy.

Other attempts to make tires which can't rim-cut have cost fortunes in faulty tires.

No-Rim-Cut tires, for years and years, have served hundreds of thousands well. Not one has ever rim-cut.

That is why the demand centers on them. Goodyear tires have come to outsell every other tire.

The Secret

The secret lies in six flat bands of 126 braided wires. They are vulcanized into the tire base.

That makes the tire base unstretchable. The tire can't be forced off without removing a rim flange. So we don't hook the tire to the rim.

With this hookless tire you turn your rim flanges outward—not inward as with clincher tires. Then the tire, when wholly or partly deflated, rests on a rounded edge. Rim-cutting is made impossible.

Extra Capacity

No-Rim-Cut tires have 10 per cent more air capacity than the same rated size in clinchers. And air is what carries the load.

This over-capacity, on the average, adds 25 per cent to the tire mileage.

So the tires save rim-cutting and save over-loading. They save so much that they have become the most popular tires in the world.

The Vital Bands of Wire

But our braided wire bands are considered essential to a faultless tire of this type.

Again and again other ways have been tried. And thousands of tires came back for replacement because the ways were wrong.

So the demand has come to Goodyears, in an overwhelming way. We have sold over one million automobile tires in the past 12 months alone.

No Extra Price

Now, our mammoth production has brought down the cost of this wanted type of tire.

No-rim-cut tires used to cost one-fifth more than clinchers. Little by little the cost has been cut.

Now no standard tires of any type cost less than No-Rim-Cut tires.

Think what that means—tires that can't rim-cut, oversize tires at no higher cost than old-types.

Don't you think that it pays to insist on them?

CURRENT EVENTS

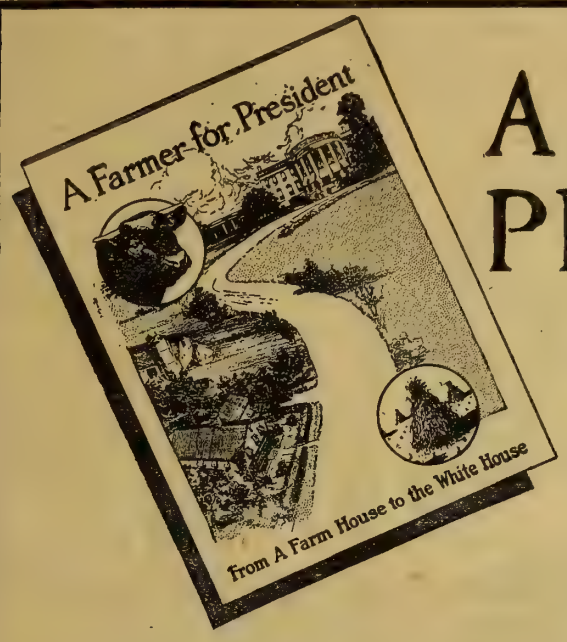
ILLINOIS is the first state east of the Mississippi river to grant woman suffrage. The legislature of that state has gone as far as it is constitutionally permitted in granting to women suffrage equal with men. Hereafter the women of that state will be permitted to vote for presidential electors; county collectors, surveyors, members of the board of assessors, members of the board of review and sanitary district trustees; and mayors, clerks, treasurers, aldermen and attorneys of towns and cities. Because of constitutional restrictions it was impossible for the legislature to grant women the right to vote for the great majority of state offices from United States senators and members of the legislature through the list to governor, judges of the supreme court and secretary of state, also for most of the county offices, such as sheriff, judge, treasurer, recorder and so on. The legislative action makes Illinois the tenth state in which women will have the right to vote on president in 1916, the list being as follows: Arizona, California, Colorado, Idaho, Illinois, Kansas, Oregon, Utah, Washington and Wyoming. The result in Illinois is looked upon as a great victory by the advocates of equal suffrage and a mammoth rally was held in celebration of the legislative action. An effort will now be made to bring about a constitutional amendment so as to give women complete suffrage. In the meantime the fight will not only be kept up in other states, but has already begun in congress to win the suffrage right for the women of every state with one nation-wide victory.

WITH the advent of hot weather congress is coming to realize that nothing is so desirable as to complete tariff legislation and adjourn. The senate finance committee has practically finished the consideration of the Underwood tariff bill and it will probably be in the hands of the senate by the time these words are read. A month or so will be spent in discussion on the floor, although it is practically certain that the bill will pass without amendment. Even with three democratic senators opposing the bill, because of the free wool and free sugar in three years propositions, the democrats can put the bill through with the vote of the vice-president. While the senate is thus engaged, two special committees are at work investigating President Wilson's charge that an industrious and insidious lobby is at work trying to prevent the passage of the tariff bill and investigating the charge that conditions are so bad in the mining regions of West Virginia that hundreds of the workers are in a state of peonage or industrial slavery. With all this, congress confronts a month of hot and hard work before adjournment can possibly be reached.

TWO-CENT railroad fare is declared to be legal in Missouri, Arkansas and West Virginia by the United States Supreme Court. As a result the state laws will be enforced and passenger rates reduced accordingly on all except the smaller roads and those which were able to prove to the court that the reduction would be unjust and confiscatory. The reduced rates become operative upon the Chicago, Burlington & Quincy, the Atchison, Topeka & Santa Fe, the Kansas City Southern, the Missouri, Kansas & Texas, the Chicago, Rock Island & Pacific (including the St. Louis, Kansas City & Colorado), the St. Louis & San Francisco, the St. Louis Southwestern, the Missouri Pacific, the St. Louis, Iron Mountain & Southern, the Wabash, the Chicago, Milwaukee & St. Paul and the Chicago & Alton. For the present the rates will not become operative on the St. Louis & Hannibal, the Kansas City, Clinton & Springfield, the Chicago Great Western, the Quincy, Omaha & Kansas City and the St. Joseph & Grand Island. This decision, following the one of a week prior, confirming the rights of the state to reduce rates and to govern intra-state traffic, in the Minnesota case, goes a long ways toward putting the people in authority over the common carriers and to reducing passenger and freight rates throughout the grain belt generally. Governor Major, of Missouri, declares that the railroads can be forced to refund all overcharges made since the state law was enacted, in 1905, in all cases where parties have proof of the overcharge.

PRESIDENT WILSON was justified in his charges against a persistent and insidious lobby. The senate investigating committee has discovered that interests which would be affected by tariff legislation have spent many thousands of dollars in trying to influence the public and the lawmakers, through the medium of publicity and lobbying. Last week's testimony disclosed that the sugar trust, for instance, succeeded in getting Senator Lodge, of Massachusetts, to order an article prepared by the trust's publicity department printed in the government records and sent broadcast over the country under his senatorial frank, resulting in a saving to the trust in the one item of postage alone, of many thousands of dollars. The disclosure simply confirms the general conviction that the franking privilege of office holders is grossly abused. "Leave to print" all manner of private documents and papers designed for personal gain is secured and the postoffice department is compelled to foot the bill of scattering this printed matter broadcast, adding to the postal deficit and discriminating against the private individual, compelled to pay a high rate of postage on everything sent out, in a most unfair manner. Publicity is proper, permissible and desired in many instances, so that the public may know both sides of the case, but to use the senatorial franking privilege to scatter private documents and thus save postage and give them an official sanction and endorsement is reprehensible, to say the least.

A correspondent writing recently in one of the South African newspapers remarks that there has been a remarkably rapid increase in the production of wheat in the Cape Province, and that within the next few years the area of land put under this crop will be enormously added to. The whole of the western seaboard from Cape Point northwards to opposite Saldanha Bay is well suited for the growth of wheat, and all that is necessary for a great forward movement is railway communication.



A FARMER *for* PRESIDENT

HERE is a striking little booklet written by a man who believes that somewhere in this broad land there is a farmer who is destined to become president of the United States.

Do you agree with him, and could you guess who that farmer is?

This booklet is frankly written to emphasize the leadership of the agricultural interests of America over all branches of industry. Incidentally, it is an advertisement for the Cross Country car—the result of forty years of manufacturing experience on the part of the Jeffery Company.

The success of the Jeffery Company is founded upon the same things that have brought success to the American farmer. This company is independent—likewise the farmer.

The car is an assembly of our own tried and proved products. We have sown carefully and have grown naturally, counting upon the future harvest rather than upon temporary gain.

The Jeffery Company was the first concern to advertise new cars in farm journals.

Sixty per cent of our output today is sold to farm residents.

This booklet will be interesting to every farmer.

The edition is not large, but we will send a copy free to every farm owner if he will fill out the coupon below, giving his full name and address, and the number of acres he owns.

We ask for this information because we know this booklet will be most interesting to successful farmers.

Regal

Unrivaled Service on Country Roads

THE car that will give you the best and longest service at the lowest purchase price is the one you will naturally buy. The Regal Underslung is just such a car. Hundreds of farmers, after a careful comparison of car values, have selected it. These cars are giving unrivaled service under every conceivable road condition. Regal Underslung construction eliminates the danger of skidding or "turning turtle" on the roughest or steepest roads. A Regal will take you safely where you would not dare to travel in any other car. You can take pride in its beautiful lines and low, rakish appearance.

Write today for instructive booklets about this dependable, long-lived car.

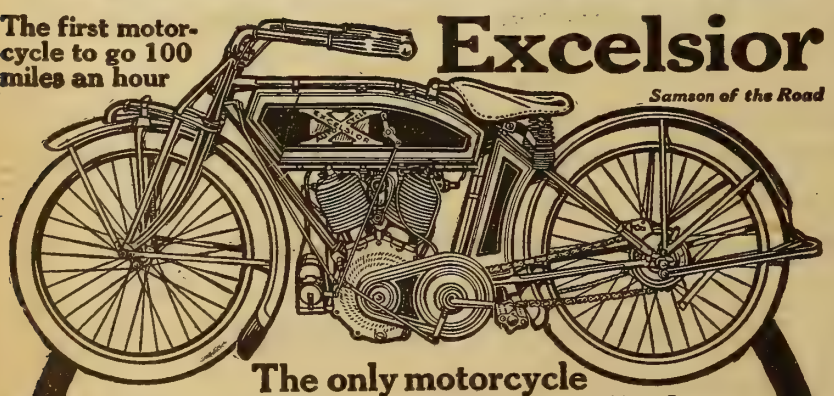
The first motorcycle to go 100 miles an hour

Excelsior

Samson of the Road



The only motorcycle with complete control in handle bars

You never have to take your hands off the handle bars of the Excelsior Auto-cycle. The right-hand grip controls the throttle. The left-hand grip operates the clutch. To slow up or stop takes just a slight twist. The simplest, surest of controls—a ten-year boy can do it—you can learn to run it in five minutes.

Excelsior Auto-cycle has wonderful motor
It's the most powerful engine ever put into any motorcycle. Every Excelsior victory is made with this regular stock design motor. These victories (see panel at left) prove the superior strength and durability of motor and entire machine.

Easiest riding on country roads
The Kumfort Kushion seat post and cradle spring fork absorbs all jars. Handle bars are so constructed that they can't twist on heaviest roads. The Excelsior holds best to the road.
The entire frame construction is re-inforced, and can be relied upon for strength and security.

Price reasonable, upkeep low, lasts for years
One Excelsior has run 59,000 miles. Others have run upwards of 30,000, 35,000 and 40,000 miles and still going. Its first cost is reasonable, its cost of maintenance low, its comfort and durability without an equal.
Excelsior Single, 4-5 H. P. Price - - - $200
Excelsior Twin, 7-10 H. P. Price - - - - 250

Write today for illustrated catalog and nearest agent's name
Learn all about how the Excelsior is built—how it has made racing record after record—how it is the fastest and most powerful, safest and most durable of motorcycles.
We'll also tell you where you can see the "X" and ride it. Write today.

Excelsior Motor Mfg. & Supply Co.
Department G., CHICAGO

Best at Portland, Oregon, Races June 9-13.

Excelsior won six firsts and one second out of seven events. An Excelsior 4 horse power single, which had run 68,000 miles in daily service, made five miles in five minutes flat—fastest time in its class.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit $1.00, addressed as above.

LAW QUESTIONS CONSIDERED.

WIFE'S SEPARATE PROPERTY—DIVORCE.

A Subscriber, New Bloomfield, Mo.—(1) A man married a woman who had some furniture in her own right before marriage. Can the husband hold or dispose of the furniture? (2) If the wife puts the furniture in storage at the house of her husband's people can she take it away and is she liable for storage charges? (3) If the wife puts up fruit, can she claim it as her own? (4) If the husband asks her to go with him to the country on a farm with his brother and she refuses and he goes without her can she get a divorce?

Answer.—(1) The furniture is the separate property of the wife, and the husband has no lawful right to hold it or dispose of it without her consent. (2) The wife is liable for the storage charges. (3) If she does so with her own separate means she can claim the fruit as her own separate property. (4) She cannot obtain a divorce for such cause. A husband has a right to choose where the home will be, and it is the wife's duty to go with him to such place and if she refuses she cannot obtain a divorce on that account.

LANDLORD AND TENANT—IMPROVEMENTS.

A Subscriber, West Union, Iowa.—Has a tenant the right to improve the rented premises by erecting small buildings, windmills, fixing pumps and the like, without the landlord's consent, and have the expense charged up to the landlord where there is no contract to that effect? (1) Can the landlord be compelled to pay for the same?

Answer.—A tenant has no right to improve the rented premises at the expense of the landlord, without his consent. (2) He cannot.

SECTION LINES PUBLIC ROADS.

A Subscriber, Lewellen, Neb.—My husband and I have 480 acres of land in Nebraska taken up under the Kinkaid act, and have a patent for the same. There are section lines on three sides of the land, but we have no road on which to go to town, and have to go across other people's land, and open forty gates. This country is rancher land with great herds of cattle on it, and it is dangerous to cross even on foot. How can we have a road established by law?

Answer.—In Nebraska, the section lines in every county are declared by law to be public roads, and the county board may, whenever the public good requires it, open such roads without any preliminary survey and cause them to be worked in the same manner as other public roads. No petition, notice or finding is necessary, but you should apply to the county board and show it that the opening of a road on the section line from your land to the town is necessary.

HAULING RENT CROP TO MARKET.

Mr. R. B. W., Afton, Iowa.—B rented A's farm for three years, 1912, '13 and '14, in a contract subject to the sale of the place with ninety days' notice before March 1st, B to deliver part of the crops to market as rent. Does this mean that B is to haul the rent part of the crops to market before the first of March each year?

Answer.—This is a question difficult to answer, because of the vague and indefinite terms of the contract between A and B, but it is our opinion that the rent part of the crop should be hauled to market each year before the first of March. Whether or not A is required to haul the rental crop of a year to market after the expiration of that year, is a doubtful matter.

CONTRACT FOR USE OF LAND.

A subscriber, Lorimor, Iowa.—A and B stock a farm together. A owns the farm, and B is to furnish all the labor as against the farm. Is B required to pay cash for one-half of the pasture land?

Answer.—Guessing at facts which are entirely omitted from the above statement we are of opinion that the labor to be performed on the farm by B was intended to stand even against the use of the entire farm, pasture land included, and that B is not required to pay any cash for the use of the pasture land.

Electrify Your Farm!

Electrify your farm and save hours of time, miles of steps and a big pile of dollars. The power, convenience and luxury of electricity can be at hand *all the time*—summer or winter, rain or shine—if you use a few French Dry Batteries.

They Help All

Just the pressure of a button or a twist of the wrist and *presto!* the gasoline and automobile engine is started; both party and exchange lines of the telephone are working; gates and doors are opened; call bells are rung and scores of other duties are performed. Everyone in the family will benefit by the use of a few

Think of having electricity "on tap" all the Father, instead of fussing with a dangerous acne lantern in the dark barn, now simply pushes the button of an electric flasher. Mother doesn't stumble down the dark cellar stairs risking life and limb any longer. She "switches on" a light at the head of the stairs and goes her way in safety. A telephone between the house and the barn is a great convenience.

The mail-carrier can press a button on the mail-box way out on the road, which rings a bell in the house telling the folks that there's some mail in the box. These and dozens of other helps are yours with French Dry Batteries.

Get the Genuine

If you want a battery that will deliver a strong current for a *long time*, insist on the genuine French Battery—the dry-cell battery with an army of satisfied users. Poor-quality batteries give weak current for a short time and then "peter out" entirely. Don't take chances! Your dealer will tell you the particular French Battery you need. If you want to know more about French Dry Batteries and how they can help you do your farm work, send your name and address on a postal. Write today.

SANDWICH
(solid steel—money maker)
Motor Press

Puts you—or your boys—in the big paying, fast growing business of baling hay! "Net profit $18 to $22 per day," write Swartz & Mensch, Dixon, Ill. Other hustlers making $200 to $800 net profits monthly. And these men are using the Sandwich!

Our special terms to responsible people let you start with little money. And you pay from your profits. Unless we *know* the Sandwich will make you stacks of ready cash, we could not sell this way.

Gas Engine on Same Truck

Here's the most complete hay baling outfit in existence. Full power is driven from engine to press by heavy steel roller chain. It does away with slipping belts. The Gas Engine is the best quality—hopper cooled type—gear driven magneto—4, 6, 8, and 10-horse power.

The Sandwich has a simple time-tried self feeder and a big feed opening. A great windrow baler. Beats every ordinary press from 2 to 8 tons daily. 25 tons are an everyday job for the Sandwich; often 30 to 40.

This Book FREE

IOWA SWINE BREEDERS' ASSOCIATION.

(Continued from page 5.)

personal attention to everyone in attendance. Colonel Duncan believes that for fall sales the farm is the best selling place, but that for winter sales, the town affords more conveniences and adds to the net results. He urged that in the case of winter sales January dates be used so as to avoid the congestion which usually takes place during February.

W. M. McFadden, secretary of the American Poland China Record Association, Chicago, Ill., talked on "Some Points to be Observed by the Breeder." As a prefatory remark he said that the Iowa Swine Breeders' Association had accomplished more results than any other swine breeders' association of which he knew. He advised that those who were engaged in swine breeding should make it their principal business. The great fault at the present time is that hog raising was made secondary to farm raising. It should be the central idea around which farm operations should circulate. A hog man should be a hog man 365 days in the year and should be enthusiastic every day. He should take pride in having a light, well-made, attractive crate. He should have stationery which would be a credit to him and to his business. It should have tastiness and add dignity to his operations. He should raise what people want instead of what he happens to like best. He believed it is an art for the breeder to be able in advance to realize the demands of the future and take advantage of them. The wise breeder is he who sees and knows fads and gets in line so as to avoid suffering from hog bubbles. Salesmanship is important. Individuality of animals should not be overlooked. Feed and care are strong features. No success can be obtained without well-bred stock to begin with, good care, good feed, and good sales. He believed that in the disposition of the stock the breeder should adopt one of three plans, either a private sale, a public sale, or through the influence of the show ring.

Col. John R. Tupper, Woodbine, Iowa, responded to the subject, "What to do with the Kicker in the Show Ring and Elsewhere." He disposed of it very quickly by saying, "Let the kicker kick." He found, he thought, that the results of kicking were more often serious to the kicker than to anybody else. On the other hand he felt the kicker was an angel as compared to the knocker.

Dr. Stange took up as the subject of his talk "Methods of Controlling and Eradicating Hog Cholera in Iowa." He stated that the eradication of hog cholera is most difficult in practice. Cholera had first presented itself in Ohio in 1833 and it had gradually spread until it was now common in practically every country in which hogs are raised. It seemed that hog cholera came in waves, that it would become prevalent for three or four years with increasing fatality and that it would then begin to disappear. This year, he said, it would probably reach the high point in Iowa and begin to grow less. Few disease germs have so great vitality as those of cholera. Carbolic acid does not injure them and the germs have been known to live for two years. Hogs that once pass through cholera do not have it the second time. Sucking pigs do not become readily infected. Some preventives may have merit. Most of them claim too much. There are two forms of hog cholera lesion, one of which appears in the lungs and the other in the intestines. When they have the form found in the lungs the affection is commonly spoken of as swine plague. This form is most serious. Buyers should quarantine animals brought to the farm for three weeks before permitting them to mingle with the farm stock. After an animal has been exposed to cholera the contamination will show itself in less than three weeks. Every precaution should be taken. Hogs should not have access to streams rising outside the farm. Streams are the most common means of spreading cholera. Stray dogs assist. Crows and pigeons

AMERICAN JERSEY CATTLE CLUB
324 W. 23d St., New York

DAIRY

MILKING FOR ALL THE MILK.

The way in which a cow is milked has much to do with keeping up a full milk flow for a definite length of time. It matters not how great the expense and pains the dairyman may take in the breeding, rearing and feeding of his dairy animals, unless the milking is correctly performed he will not realize the full returns that his cows are capable of giving him. If by thorough and proper milking a cow can be induced to give more milk during the period of lactation, it surely does not pay to slight this part of the dairy work.

At first thought the operation of milking appears to be a very simple one; the truth is, however, that milking is something of a fine art. Many farm dairymen seem to think that almost any hand can do the milking. But this is far from true or at least it is not advisable to have anybody and everybody do the milking, for there is all the difference in the world in milkers. One who understands the work and enjoys it can, when in practice, milk a cow in far less time and yet do more thorough work than a hand who milks mechanically and with no object in view beyond getting done as soon as possible. Carefully conducted experiments have proved that there is a large difference in the amount of milk obtained from the same cow in the hands of different milkers. The milker who is gentle in his movements is pretty certain to get all the milk from the udder that it contains, while a milker whose movements are rough is certain to lessen the milk flow materially in a few days.

A frequent change of milkers is a mistake, even in instances where two or more members of a family do the milking and each seems to understand the work to about the same degree. A cow soon becomes accustomed to her regular milker and if a change is made she will not give down her milk so well nor can the new milker perform the work so easily or thoroughly as the regular milker.

A good milker must be quick. This does not mean that he must go at the work in a rough manner, but it means easy and rapid milking, yet not so rapid that the cow's teats will feel more or less discomfort through the hands grasping them firmly and rapidly. Milk the cow dry before leaving her, but do not continue the stripping after the milk has all been drawn. The practice of stripping by mere drops when the milk has nearly all been withdrawn will often cause free milking cows to contract the stripping habit. The skilful milker will continue to withdraw the milk rapidly until the udder is empty.

It is very common for the majority of milkers to err in the other direction, however—that is, they do not take the time to secure all the strippings. Many milkers think it is not worth while to do this, but it is safe to say that few of them have ever taken the time to figure this matter out so they may know to a certainty whether it pays or not. Let us see whether or not it really does pay to get all the strippings at each milking.

Though the first milk drawn from the udder has a very low test, perhaps less than 1 per cent, the last strippings are very rich in fat averaging from 10 to 15 per cent, and, in exceptional cases, as high as 30 per cent of butter fat. This depends to some extent upon the individual cow and the stage of her lactation period. But if the last half pint of milk withdrawn should test as high as 12 per cent butter fat, a pint of the strippings would be equal to about six quarts of the first milk drawn. Supposing the average amount of strippings left behind at each milking to be half a pint, or a pint a day, during a lactation period of 300 days this will amount to about 310 pounds of milk, which will contain thirty-five pounds of butter. At thirty cents a pound, this butter will have a value of $10.50. Now this will be extra pay for thorough milking. Two minutes for each cow in adition to the regular time devoted to the milking will be sufficient to secure the last strippings, and the remuneration for this extra time will be at the rate from seventy-five cents to $1 an hour.

It must also be taken into consideration that, aside from the direct loss when the milking is not done thoroughly, there is another loss due to the fact that this practice will, if continued for even a short time, seriously interfere with the cow's productiveness. Nature will soon stop providing this extra milk if it is not taken.

Economy of milk production also demands that the milking be done at once after the udder has been touched. When the udder is touched by the milker's hands the signal is given through all the ducts and secreting surfaces to begin operations, and the quicker the milk is withdrawn thereafter the better. It will not do to clean the udder and then wait a considerable time before commencing to milk.

Each cow should be milked at the same speed and at a fixed time each morning and evening. Any changes in these matters will tend to irritate and excite the cow. A cow soon comes to know when her milking hour arrives and she expects and wants to be milked then. If disappointed, she probably will withhold a portion of her milk when the milker does make his appearance, and this is always a serious trouble. The only way in which a cow that has become confirmed in the habit of withholding her milk can be brought back to her former usefulness is to adopt regular methods for the milking, then, a skilled, intelligent milker should be supplied who has learned to manipulate and massage carefully the udder at that stage of the milking process when

WILCOX & STUBBS CO., DES MOINES, IOWA

the cow has become accustomed to withhold the remainder of her milk.

Dairy authorities have formulated various rules as to how a cow's teats should be handled during the milking operation, but nothing very definite can be said on this subject that will apply in all cases. Cows are of different dispositions and they have different lengths and shapes of teats, and the hands of milkers differ a great deal. Tugging at the teats is not to be recommended. Good milkers do not pull the teats; in fact, they move them very little. The milk works down into the teats during the process of milking; a little muscle at the end of each teat contracts and prevents the milk from running out of its own accord. The milker must grasp the teat in such a manner as to prevent the milk from going back into the udder when the teat is squeezed, at the same time the milk must be forced into the pail. By grasping the teat with the full hand with the thumb encircling it just above the forefinger, then closing in succession the second, third and little fingers, one after the other, the object is accomplished. By closing on the teat with the thumb and forefinger first the milk is prevented from going back into the udder, and by pressing with the other fingers in succession it is forced out. When once learned, of course, all the movements are made mechanically. The teats of all cows, especially those with short, hard teats, will not admit of this method of milking, and in these cases some other will have to be used, as the physical conformation of the teats renders most convenient.

Regularity in all things connected with the milking, smooth, rapid milking and a cheerful disposition in the milker are as effective for filling the milkpail as are good cows and well-balanced ration. W. F. Purdue.

INTEREST IN CREAMERY GROUNDS IMPROVEMENT.

The movement to beautify the grounds surrounding the creameries of Iowa is certainly a worthy one and should be a source of great benefit to the dairy industry. Prof. M. Mortensen, who originated the idea, has the hearty support of all the buttermakers and creamerymen in the state and the general appearance of the creamery yard will undoubtedly be changed until it becomes a credit to the community in which it is located.

It is the intention to encourage permanent improvement as much as possible in order that the grounds may have a clean, neat appearance throughout the entire year. The establishment of a level, well-sodded lawn, the construction of sidewalks and the building of cinder roadways to the receiving platforms will probably be among the first improvements to receive attention. At first thought it might seem that this would necessitate a great deal of work. However, the work of several men and a team can make a great transformation in the grounds of the average plant in a short time. After the first work is done properly the task of keeping up the lawn and drives is a small item.

In order to create an interest Professor Mortensen started a contest among the creameries. The decision of the judges is to be based on pictures taken of the plants at the beginning and close of the yearly contest. The judging and awarding of prizes will take place at the thirty-seventh annual convention, October 13th to 18th.

The prizes offered for the contest are very attractive and should arouse a strong contest. Professor Mortensen offers $20 as first prize, and at a recent meeting of officers of the Iowa State Dairy Association it was decided to add three other premiums. These are $15 for second, $10 for third and $5 for fourth prize, bringing the total offering to $50.

It is hoped that there will be a large number of entries and that the buttermakers of Iowa will show their ability to make their plants attractive as they have their efficiency in the manufacture of butter.

Farm wages, with board, in the United States averaged, for men, $10.09 per month in 1866; $13.53 in 1875, and $20.80 in 1909.

"DE LAVAL"
means a cream separator with the "trouble" left out

That's the way a user who has had a lot of personal separator experience and the opportunity to observe a great deal of other people's experience aptly describes the meaning of the name "De Laval" on a separator—"a separator with the trouble left out."

To many buyers of a cream separator and other farm machinery there's more meaning in that simple statement of fact than in a hundred other claims and arguments that might easily be made for the De Laval.

And if anyone would know how and why the "trouble has been left out" of a De Laval machine a new De Laval catalog—the most complete and interesting story of the cream separator ever published—to be had for the asking, will help to make it plain. See the local agent or address the nearest office as below.

THE DE LAVAL SEPARATOR CO.

POULTRY DEPARTMENT

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

VITALITY IN CHICKS LACKING.

One of our Nebraska subscribers sends the following inquiry:

What is the reason that little chicks do not feather out well? We raise Barred Plymouth Rocks only and have often had one or two chicks that did not feather out right. They seem to grow all right, but are bare and mostly die. Last season there were many of them and this spring about one-third of all we have are not feathering right. Some of these were hatched under hens and some in incubator. We feed chick food, wheat screenings, bran and corn meal mixed with some beef scraps, also plenty of pure water, charcoal and grit. Could we give them any other food that would make them feather out? We keep them dusted for lice.

The direct cause of undeveloped and twisted feathers can frequently be traced to diseased kidneys. Very little is known so far in regard to this organ in fowls. Our thought on reading the first part of this letter was that maybe wheat bran and beef scraps would help develop those tardy feathers, but reading farther we find that this flock of chicks is to be envied so far as feed and care are concerned. It is barely possible, but not at all probable, that the insect powder is injurious.

To get at the basis of the trouble we must go back one generation and possibly several generations. This flock of chicks is lacking in stamina or inherited strength. The parent stock is at fault some place along the line. There are many ways by which the vigor of the flock may be lost: Incorrect housing, overfeeding of some kinds of feed and not enough of something else, usually too much carbonaceous food and not enough green feed, lack of exercise causing a fat flabby hen that is no good as a breeder. A fat hen is good to see if she has hustled enough to be firm of flesh. Continued inbreeding will soon run a flock down and out of vigor. This brings the very pertinent question of line breeding to mind. To the novice inbreeding and line breeding are identical. There is a vast difference. This is a subject of itself and will be discussed in the near future.

The down that first appears on a chick is in reality the tips of the growing feathers. As the feather pushes its way out the down becomes worn off and the full-formed feather appears soon. It is barely possible that the place is infested with depluming mites, thus complicating matters.

If a flock of hens is fed for winter eggs, lay heavily from October until spring and then their eggs used for incubation, we are laying a foundation for failure and it doesn't matter how it is spelled, there is failure nevertheless.

By far the safest plan would be for our inquirer to dispose of his flock and start over. Only in extreme cases is this advisable. Two years of partial failure is an extreme case and it is unprofitable to take further risks.

THE DOUGLAS MIXTURE.

Several inquiries have been received recently from subscribers who have mislaid or forgotten the recipe for the Douglas mixture. It is composed of sulphuric acid one-half ounce, copperas one-half pound, this amount to be mixed with one-half gallon of water. This makes what may be known as a stock solution, one tablespoonful of which is placed in one gallon of the drinking water used for the fowl.

Ask your neighbor to subscribe for The Homestead.

POINTERS.

—Frank Faha, Jr., Dyersville, Iowa, writes that he has nearly 1,000 young Silvers, and for that reason he has changed his advertisement in this issue and is offering eggs now at bargain prices, 15 eggs for $1.25, 30 for $2, 100 for $5. Many of our readers have already sent for and received Mr. Faha's catalog and mating list, and consequently know the quality of his stock and matings. Readers looking for Silvers, with the wide-open centers and intense black edging, will make no mistake in buying eggs from these matings. See advertisement on this page.

KANSAS FARMS AND RANCHES FOR SALE 80 to 25,000 acres. Write for free list. V. E. NIQUETTE, Salina, Kansas

ADVERTISING NOTES.

One of our advertisers has gotten out a striking little booklet written by a man who believes that somewhere in this broad land there is a farmer who is destined to become president of the United States. The booklet is very interesting and we would suggest that our readers secure a copy of it. More about it can be learned by writing the Thomas B. Jeffery Co., Kenosha, Wis., whose advertisement appears on page 7 of this week's issue.

Excelsior motorcycles are advertised on page 8. While this vehicle possesses the high quality of others it also has an advantage in that complete control is obtained in the handlebars. The right hand grip contains the throttle, the left hand grip operates the clutch. The machine can be operated without removing the hand from the handlebars. Prices are reasonable and repair bills low. For descriptions or special prices write to Excelsior Motorcycle Mfg. & Supply Co., Dept. G, Chicago, Ill.

Farmers or others who contemplate the purchase of farm lands either for the purpose of engaging in actual farming or for that of investment will see from the advertisement of the Canadian Northern Railway on page 2 that an opportunity is now presented for a personal investigation of a great area of cheap farm lands at a most insignficant cost. The advertisement quotes railroad fares from principal western railroad points. Facts with reference to the land may be obtained by addressing a request to R. I. Bell, general agent, 66 West Adams St., Chicago, Ill., or E. I. Wright, general agent, corner 4th & Jackson Sts., St. Paul, Minn.

More and more the advantages of the gasoline engine as applied to transportation is making itself felt. Farmers have just begun to realize the advantage of a motor truck such as the Model H, Reo advertised on page 2 of this paper. The truck in question costs but $750 and has a carrying capacity of 1,500 pounds. On good roads it will handle as much of a load as any two-horse team and it will do so at a cost of keep which is far below that of the animals. It costs nothing when not in use and the risk of loss is practically nothing. The numerous advantages and benefits of the motor truck are described in a catalog for which address Reo Motor Truck Co., Lansing, Mich.

The Innocent (?) Fly.

Remember those verses you used to hear when you were just a little chap, about the spider and the fly? How, when the spider had his traps all fixed and then invited the fly into his parlor, you used to be sort of afraid that maybe the fly would get caught, and breathed a sigh of relief when he escaped from the wiles of his treacherous enemy? In those good old days the fly seemed to be a nice little fellow, but long acquaintance with him has revealed his true character. He is really the meanest, most exasperating creature on earth. It doesn't make any difference whether you are in the house or the fields, the flies are there first, and torment you with relentless energy. But it is the horses and cows which are practically unable to protect themselves, who suffer most from the flies. The poor animals go nearly crazy with pain and nervousness. And naturally in this condition horses can't do the work they ought to do nor cows give the quantity of milk you should get. In fact, animals injure and tire themselves more by fighting flies than by work. Twenty-six years ago a farmer who recognized the great loss caused by flies discovered a preparation which gave perfect protection to his own stock. He found that his cows gave three and one-half to five quarts more milk daily, and his horses did double the work when kept free from flies by his new preparation. Such a discovery was of too much value to all farmers and dairymen to be kept to himself, so he formed a company to manufacture Shoo-Fly—the name he appropriately gave his new article—and now for over a quarter of a century Shoo-Fly has been successfully protecting the animals of thousands of farmers all over the country. If your dealer doesn't have it, the Shoo-Fly Manufacturing Company, Dept. 40, 1310 Tenth St., Philadelphia, Pa., will send for $1 enough of their preparation to protect three cows for a month with their patented three-tube sprayer. Their faith in their article is so great that if it doesn't protect your animals to your satisfaction they will return your dollar. Every farmer and dairyman should at least send for the booklet telling about this valuable fly-repellent, which will be sent free. See page 10.

Teaching Agriculture at Highland Park.

Highland Park College, Des Moines, is one of the first schools in Iowa to prepare to comply with the law passed by the recent legislature which requires the teaching of elementary agriculture in the public schools after July 1, 1915. Pres. George P. Magill announces that an eight-weeks' course in agriculture will be included in the summer term at Highland Park College, which opened June 16th. Prof. A. N. Smith, a graduate of Iowa State College of Agriculture, has been secured for the new department. Under Professor Smith the summer students at Highland Park will be taught the fundamentals of soil culture, forestry, fertility conservation, stock judging and the other important features of farming. Professor Smith was born and reared on a farm in Jefferson county, Iowa, and attended the public schools of Fairfield. He was superintendent of schools at Milo for several years, and later was principal of the schools at Fairfield. Since graduating from Ames he has been in educational work in South Dakota, coming here from Aberdeen. See page 15.

Is This Your Nail

the kind *your* horses are shod with?

The *check mark* on the face of the head shows that it is a "Capewell" nail. Every "Capewell" is marked that way.

You ought to have "Capewell" nails used. They hold a horse's shoes under the severest strains.

They are *half again* as strong as any other nail made.

Easiest to drive and absolutely safe. *Wise owners* of horses insist upon the use of "Capewell" nails.

Not cheapest regardless of quality but the *best nail* in the world at a fair price. Any shoer can afford to use it.

Remember the mark on the head of the world's leading horse nail —a *check mark*. Reason Why Booklet Free.

Galloway's Famous Pumping Engines

Wm. Galloway, Pres.

Get My Special Engine and Pump-Jack Combination Offer—NOW! Yes, sir. Do it today. Don't wait a minute. Just sit right down and drop me a postal and say, "Galloway, send me your special pumping engine offer." I am out after the pumping engine business and I am going to get it because I am making the best pumping engine outfit ever made and selling it at a price never before equalled. You can't imagine the number of uses you can put one of these little engines to until you see my **Special Pumping Engine** catalog. It's something new and different and I have a copy waiting for you, free. Just write me for it without fail today. Don't wait until your windmill blows down or the calm hot days get here when the windmill won't run and you have to toil and sweat pumping water by hand for a lot of live stock. No, sir; don't do it. Be prepared. Get my catalog and special offer. That's the first step. Then—

$24.75 And Up

I'll Save You $25 to $300

on the first cost alone. I'll save you $25 to $50 on the best pumping outfit made. On my larger engines I can save you as high as $300 and more. Remember, we make engines in sizes from 1 3-4 h. p. up to 15 h. p. My 1 3-4 h.p. air cooled, little "Boss of the Farm" engine sells for only $24.75—an unheard of price. The same style of engine at your dealers costs from $45 to $65. Now, that's just a sample of what buying direct from Galloway means in money saved. Get my special pumping engine offer right away. Write today.

Write Today for My Catalog and Special 1913 Business Proposition

Here's a final clincher. My 1913 Special Business Proposition. I've got a new plan which will help you get your engine partly or entirely without cost to you in the end. No canvassing, no soliciting, no agent's proposition, for we don't sell through agents—but just a straight business offer. Will give full details when you write me. Send for special pumping catalog—offer—and my new bed rock engine prices. Don't lay this paper down and forget it. Write me now. Address me as below:

Wm. Galloway, Pres., WILLIAM GALLOWAY CO.

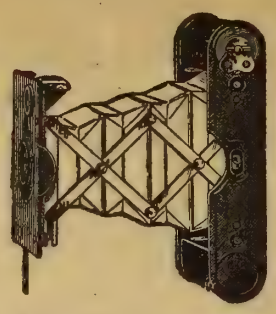
Cushman Mfg. Co., 804 N. Third, St. Joseph, Mo.

Price, $6.00



The Vest Pocket

KODAK

is a miniature in size—actually small enough to go into a vest or hip pocket—but a thoroughly capable, durable, practical and efficient photographic outfit.

A Kodak on the farm, not only means fun for the young folks, but has an every-day, practical usefulness as well. Tells the story of crops, new buildings under way—stock and poultry for sale, etc., better than any description.

And the Vest Pocket answers every outdoor need to perfection.

The size makes it as convenient to carry as a pocket knife or watch—the fine quality of the meniscus achromatic lens gives you pictures (size 1⅝x2½ inches) of splendid definition and as full of detail as the largest.

The Vest Pocket Kodak is made simple and strong—nothing to get out of order—is always ready for use, has a fixed focus—brilliant, reversible finder—Autotime Scale—loads and unloads in daylight with Kodak film cartridge for eight exposures—lustrous black metal finish. Right as a watch in adjustment and the refinement of every detail.

THE HOME

LETTERS intended for publication should be accompanied by the name and address of the writer, not necessarily for publication, but as a matter of good faith. All communications intended for this department should be addressed to Postoffice Box 639, Aurora, Missouri.

WITH THE EDITOR.

Sometimes a stray anecdote makes a profound impression upon the mind—as is proved by the fact that it recurs time and again. The following comes under this head:

One day a young mother, overburdened by work and loss of sleep, spanked her two-year-old baby and scolded the one next to him. The sobbing little ones ran to their grandmother to be comforted. After she had put them to sleep she went to her daughter, who said, shamefacedly, "I don't know what possesses the children that they irritate me so; I'm cross at them before I know it. I know I ought not, and I pray for grace, but I don't seem to get it." The mother's reply was, "You need to pray for wisdom as well as grace. You are wearing yourself out trying to keep your children's clothes clean, overclean, and the floors scrubbed, overscrubbed. You put cleanliness before godliness which would give you grace to put up with a certain amount of untidiness and allow you to keep control of your temper."

So many women are like that young mother. Cleanliness, it is true, is akin to godliness; but godliness—self control and sweet temper in this connection must come first.

There is more work to be done in the average farm house than the housemother with a family of little ones can possibly do as she would like it done, without help. When help is unavailable what shall she do? Must she insist upon keeping to old standards of neatness and cleanliness, and meals that demand much labor? That is one path open to her. Another one is to study the situation carefully, prayerfully even; and, after doing so, reduce labor in every direction where possible without actually interfering with the health and higher life of the family.

Let the housemother once realize that the well-being of the family depends more upon her health and temper than upon such things as clothes or clean floors, and she may be trusted to govern herself accordingly.

HOME AND HOMEMAKING.

A NATURE CREED.

I believe in the brook as it wanders
From hillside into glade;
I believe in the breeze as it whispers
When evening's shadows fade.
I believe in the roar of the river
As it dashes from high cascade;
I believe in the cry of the tempest
'Mid the thunder's cannonade.
I believe in the light of shining stars,
I believe in the sun and the moon;
I believe in the flash of lightning,
I believe in the night-bird's croon.
I believe in the faith of the flowers,
I believe in the rock and sod,
For in all of these appeareth clear
The handiwork of God.

THINGS THAT MAKE FOR HAPPINESS.

It is not rare gifts that make men happy. It is the common and simple and universal gifts; it is health, and the glance of sunshine in the morning; it is fresh air; it is the friend, the lover; it is the kindliness that meets us on the journey; it may be only a word, a smile, a look—it is these and not any rarity of blessing that are God's gentle art of making happy.

SOWING WILD OATS.

We often hear it said, and by fathers of boys, too, "He is sowing his wild oats—we all do it." It seems to me that any father who is a farmer would quickly see the fallacy of this. More and more in the agricultural world it is being understood and taught that the best results are to be gained by pure, clean seed, carefully sowed, and cultivated. Yet many will affirm that even if our boys are allowed to "sow wild oats" and carelessly cultivate their young lives, a harvest of good may be expected in after life. They expect the weeds to disappear from the human life by some magic means; but mothers! if the harvest ever amounts to anything, after such sowing, it will be because the weeds be burned out as by fire. If the fathers of our land could only be fully roused to the dangers which threaten our boys, the boys themselves would learn to look at such things differently.

FOR THE COOK.

Mint Peas.—Cook the peas in the regular way, but add one or two mint sprigs while cooking. This adds a delicate flavor of mint.

Cherry Brown Betty.—In a buttered quart pudding dish arrange alternate layers of stoned cherries and bread crumbs, seasoning each layer with bits of butter, a tablespoonful of sugar and a pinch each of ground cinnamon and nutmeg. When the dish is filled, add a sirup made from a tablespoonful of water and two of sugar, cover the top with crumbs and, after placing the dish in a pan of boiling water, cook for about an hour in a moderate oven. Serve accompanied by a stirred hard sauce.

Strawberry Fritters.—Beat the yolks and whites of two eggs, separately, to a stiff froth and then add to the yolks one saltspoonful of salt, one tablespoonful of sugar and two tablespoonfuls of oil (the oil very gradually); blend thoroughly and, when well mixed, gradually stir in a little at a time, one cupful of sifted flour, one teaspoonful of baking powder, half a cupful of cold water and a cupful of strawberries that have been cut in quarters and allowed to drain for ten minutes. The batter should be very thick and should be allowed to stand in the ice box for an hour before using, folding in the whipped egg whites just previous to cooking. Fry by the spoonful in deep, hot fat and roll in powdered sugar, serving with a hard sauce.

AMONG OURSELVES.

I have two quite interesting letters for your attention this week, and as they are somewhat lengthy I will not take up any of our space in commenting on them. I leave that for you, later on. But I do so wish that our mothers would "act" more unitedly and with some of the Roosevelt "strenuosity" on the schooling of their own children. Discuss with each other, learn, plan, do!

Though for sixteen years a reader and for fifteen years a subscriber to this paper I have not written you a letter for several years. Fifteen months were spent in southern California. While there I wrote a letter to this department and then failed to send it. If all of you could only take that trip you would be well repaid for the expense. We so managed it that we were not "out" anything for the trip nor for expenses while there, the man of the family working enough at various occupations, carpentering, picking oranges, etc., to pay expenses while there; buying a few acres as an investment while there and selling after we returned home for enough of an advance to pay traveling expenses. Of course, we were economical, but we saw so many sights and enjoyed the fruit and flowers so much. But it was of another matter I wished to write. How many of you are taking the interest in your rural schools that you should? So many let their work keep them from visiting the schools and so many pay no attention to the progress of their children. As long as the children speak well of the teacher and make no complaints they think everything is all right; while others, if the children bring home a tale of woe think the teacher "no good." I do think neither the teacher nor the children have a good chance in our schools as they are arranged. There are too many grades, they make so many recitations, the classes do not receive the time and attention they need. Will not some who live in townships where consolidated or centralized schools have been tried, especially for more than one year, tell how they have succeeded? How do you get along with that great drawback, the transportation question? Consolidation or centralization seems to be the only way out and I think more should be published in regard to "educate the public." Can't we have some letters from such communities telling the success and the drawbacks of such system? It seems good to see the names of those who used to write when we first subscribed for this paper and also to know we have the same editor; a friend to us all, she seems.

One lady in talking of consolidated schools objected on the ground that the children needed a chaperon along as they were transported to and from schools, "you wouldn't want your girl with a crowd of rough boys, all the way to and from school, without a chaperon." What have the mothers to say about that in the places where they have had consolidated schools for some time? Anything you can tell us either for or against consolidation would surely be of benefit now that so much is being written and said of the question. It is experience that needs to be made public now. If any club of women is needed in the country these days it seems to me to be a club of mothers to work with the teachers to improve the schools. Would it not be a good idea to meet at the schoolhouse one afternoon each month, with the teacher? The teacher and the mothers would then take more interest in the schools and the schools

Costs little with a Fairbanks-Morse outfit. Gives you the brightest, healthiest, most convenient light known. Our low-voltage outfit is absolutely safe, easy to install and care for. Engine can be used for other farm machinery or water supply. Battery supplies current when engine is not running.

would surely benefit thereby. If the mothers would arrange and get to "pushing" surely the solution of the school problem would "move along." I do wish we might have a good discussion and something come of it.

I have been a reader of this department for a few years. I like it fine. I always turn quickly to the home pages. There I always find some good things that will benefit any housekeeper; then there is a lot of other good things all the way through. A few papers back I read an article on the screened porch and you asked that someone who had one write about it. As we have two of them I thought I might say something that would help someone—and that is what we are here for, to help each other. In the first place, I will say there is nothing about the house so nice and useful as a screened porch (unless it is another screened porch). Our porches are plain ones, but mighty handy. The good man of the house and I put on the screens. We called up the hardware store and got the different widths of screening, then we measured the porch and put our strips of wood just where we wanted to tack the screen and by getting the different widths we didn't have to cut the wire, so there was not waste. Then being pretty handy with my left hand and the hammer I helped the boss tack on the wire. Our largest porch is 7x12. The other is smaller, but the wire only costs about $5. I paint it every year and it keeps in good condition. We have had ours four or five years and it is good yet. Where a porch is screened the heat from the kitchen goes out in the porch so all parts are warm alike—unlike the screen door where all the flies stick on the door till it is one solid mass of flies. Where we have two doors to the kitchen we can use the one where the wind blows and the flies never bother at all. If there is anything I hate worse than anything else it is the nasty fly. I suppose one reason I hate them so is when I was a child I always had to brush the flies off the table. I used to dread meal time because I only had one hand to eat with, brush flies wth the other and keep both eyes peeled to watch that I didn't brush someone in the face, but now it is different. I'm glad I don't have any flies at all. If they do get in I get them out right away—we use our largest porch to eat in; it's fine to eat out in the fresh air where we can see the little birds hopping about and listen to their sweet songs—just like a picnic, only no bugs or flies—our threshers always enjoy the cool north porch. When you make yours have it as wide as you can, for ours is not as wide as it should be—it would be a lot better if it was wider. In the winter it makes the finest place you ever knew to put your meat. We get a quarter of a beef and put it out on a table where it freezes and keeps fresh without salt. Then we keep our refrigerator on the porch, too. I have vines over the east end so it is shady and cool. When the snow is too deep to hang up our washing outside I hang it up in the porch where it freezes, but the clothes don't blow and break to pieces as they do outside. I let them hang there till I get ready to iron. I finish drying the thicker ones on the umbrella clothes rack. We got a lot of those hooks that screw in the wall, then put the clothes line back and forth across the porch. Our line is seven times across the porch and what a washing I can put out there! On the end of the small porch we have a closet where I keep the men's jackets, overalls, the egg cases, etc; there everything is out of sight. I must quite for this time. Does any one who reads this paper know a piece, "Cherokee Rose?" If so, will you please send it to the department? I would be so glad to get it.

THE YOUNG FOLKS

For the best letter received each week we offer twenty-five cents; second best, a silver badge; third best, a pansy badge. Send letters to Aunt Mary, Hawley, Minn.

GEOGRAPHY AT HOME.

(First prize.)

Some folks say geography would be an interesting study if one could travel and see something of what he studies. This is a fact, but some children overlook the opportunity when it is close at hand. Children who live on large farms can see a great many of the things which they study about in geography. Very few farms are without a ditch which quite often contains falls and rapids. On our farm is a creek called Gas creek. There is a large waterfall in it which I call Gas falls. The falling of so much water has worn the bottom of the creek to so large an extent that the water at times reaches the depth of fifteen or twenty feet, although the creek is just a mere ditch. This pool of water is cool and clear. I sometimes call it Gas lake. But a better example can be had by building a dam across a small stream, causing the water to rise to a great depth and width. The part of the stream above the dam makes a good example of the inlet, the lower the outlet. We sometimes hear of "oxbow loops," caused by sediment carried down stream by the water. Small oxbow loops are to be seen close to nearly every small creek. If a person would look his farm over and get the outlay of it, he might draw its outline and put in the rivers, falls, lakes, woods, low places, hilly and high places, name the hills and other things I have mentioned, and he would have a very interesting map. If one wished to go on so far with this method of studying geography, he might place the fields on his maps and name them as he would a country. I wish some boy or girl would try a few of these experiments and write and tell what you have learned from them.—Ralph Baylock, age 13.

The Kildee Incubator.

(Second prize.)

One summer three of my cousins from Galesburg, Ill., came to visit us on the farm. My grandpa was cultivating corn and we were out watching him when we saw three Kildee eggs; they were out in the bare field with a few straws about them. As they were in the way of the cultivator I took them to the house, and put them into a mustard dish and put the top on; the top of the dish was made to look like a rooster. I wanted to save the eggs for my cousins to take back with them to the city. One day some little friends of mine came to visit me, and I went to show them the eggs, but when I took the top off there sat three little birds instead of three eggs! It keeps my cousins and me busy getting bread and bugs to feed them. We named the dish the Kildee incubator. I think that old rooster is a good old rooster; don't you?—Irene Milnes, age 12.

Overcoming a Difficulty.

(Third prize.)

I once knew a very smart old hen. Her name was Biddy. At the time I knew her she had ten little chickens. One hot morning these little chickens became very thirsty. They were very restless and peeped continually. Their mother was unhappy about it. She ran to and fro. She brought them worms and seeds. But the chickens wanted water, so Biddy began looking for water. At last she found some water in a high tub near the wood shed. She could fly up and drink, but the little chickens could not fly so high. They cried harder than ever for water when they saw their mother drinking. Biddy stood on top of the tub, and tried to think what to do. She saw a stone near by with a hollow in it. She gave a glad cackle. She filled her bill with water; then she flew down and poured it in the hollow of the stone. Then she called her chickens to drink. She filled the hollow again and again until every chicken had all the water it wanted. Then they all went to the wheat field together.—Brown Eyes, age 14.

PLEASANT FIELDS OF HOLY WRIT

Save for my daily range among the pleasant fields of Holy Writ I might despair.—Tennyson.

THE INTERNATIONAL S. S. LESSON

2d Quar. Lesson 13, June 29, 1913.

REVIEW: THE VICTORIES OF FAITH.

The fascination of the story of Joseph is that it is true. It is a cross-section of human life. You see the emotions and motives of mankind in action, stirring and impelling. That is what makes it universal and perpetually applicable. It has no provincial or racial limitation. That justifies twenty-five million persons (the Sunday school population of the world) in turning their attention to this tale of long ago. The story of Joseph is a moving picture, instinct with life, color and activity. It moves not only itself, but it moves those who look at it. It has passed before each successive generation and aroused the strongest compunctions. It is the story of sin, its turpitude and penalties; exhibits the progress of awakening, conviction, and conversion; reveals the possibility of forgiveness and reconciliation. Extremes certainly meet in the story of Joseph. Murderous jealousy of his brothers is matched by his own self-possessed and forgiving spirit. "As sheep before shearers is dumb, so he opened not his mouth." Twenty years later the brothers appeared before an Egyptian prince to buy bread of him in famine. That prince, blazing in his jewels, is

A College Adapted to Present Day Needs

Meets All The Standard Requirements

Our splendid business and trade courses are adapted to present day needs. All courses are arranged to care for the needs of students lacking the required entrance credits necessary in other higher educational institutions, also for the student ready for the regular standard college course.

School practically all the year. Enter any time. Vigorous, thorough instruction by expert specialists. Small tuition fees. Minimum living expenses. Every aid for ambitious students with limited time and money. 2,000 students each year. Graduates in paying positions everywhere. Magnificent buildings, fully equipped. Equal to best Eastern schools.

School terms open Sept 2, Oct. 18, Nov. 25, 1913; Jan. 5, Feb. 17, Mar. 30, May 12, June 9, 1914. New classes formed each term. Students advance rapidly.

Colleges and Schools

Liberal Arts Standard, Classical and Scientific Courses. Also preparatory and Elementary Preparatory Courses, in which students of all degrees of advancement are admitted.

Normal Didactic, State Certificate, County Certificate, Primary Training—most complete training for teachers in the West. Graduates receive state certificates.

Engineering Civil, Electrical, Mechanical. Also one-year Telephone, Electrical, Steam, Machinist's and Automobile Machinist's courses. 12-weeks' courses in Gas, Automobile and traction Engineering. Shop work from beginning.

Pharmacy 1. Regular Ph. G., Ph. C., Pure Food and Iowa courses. 2. Practitioner's Course and Extension Courses for Druggists. One of the largest, best equipped Colleges of Pharmacy in the United States.

Oratory A thoroughly equipped College of Oratory directed by most competent teachers.

Music A Complete College of Music. Piano, Violin, Voice, Orchestra, Band, Chorus, Harmony, Mandolin, Guitar, and Supervisor's Course in Public School Music. A fine faculty of teachers, each an artist in his line.

Commerce Business, Shorthand, Telegraphy, Penmanship, and Civil Service. A thoroughly equipped Business College said to have one of the finest business exchange departments in any college. Graduates of Business, Shorthand and Telegraph courses guaranteed positions.

Home Study Over 8,000 Students Have Enrolled in the Correspondence School. Almost any subject you wish by correspondence.

Expenses Board, $2.25 and $2.75 per week. Tuition in preparatory College, Normal and Business Courses, $18.00 a quarter. Send for catalogue. State Course in which you are interested. Address

$250 Motorcycle Given Away

YOU SEE in this picture a boy riding one of the $250 Excelsior Motorcycles we are giving away. In other parts of the picture are the faces of several other boys. They are hard to find, but by turning the picture about you will be able to see them. Mark at least two of the faces with a cross (X) and send the picture to me. Be sure to send me your name and address, for I will tell you all about the contest in which you can win the seven-horsepower motorcycle and many other prizes.

1500 Votes Free I will send you a special coupon good for 1,500 votes toward the motorcycle. All you have to do to get this coupon is to send your name and address at once.

PEOPLE'S CO., • 515 Popular Building • Des Moines, Iowa

$25 for a Name for this Pony

I will give **$25.00 FREE** for the best name for this beautiful prize Shetland pony. Send the best name you can think of right away, for not only do you have a good chance to win the $25 prize but

You Can Win the Pony, Too

for I am going to give him to some boy or girl who will do a little easy work for me. I have just given "Dandy," another beautiful pony, and now I am going to give away this pony. But first I want a name for him.

1500 VOTES FREE

Just as soon as you send me a name for the pony I will tell you all about my great offer and I will also send you a special coupon good for 1500 free pony votes. Remember, I will give $25 for the best name for this pony, and I send you 1500 free pony votes and full particulars about the pony as soon as I hear from you. Write me today.

COPYRIGHT, 1913, BY A. M. PIPER

A. M. PIPER, 650 Popular Bldg., Des Moines, Ia.

the brother from whom they once took coat and liberty. The brothers are knocking like mendicants at a palace door one moment. The next they are seated at a regular banquet table and served by the prince in person. But the narrative is not merely one of startling situations; it is fairly studded with ethical principles of priceless value. Some incidents in Jacob's variegated career make fitting prelude to the history of Joseph. The destiny of the Hebrew race was within the narrow circumference of a bowl of soup when Esau sold his birthright for the mess of pottage. In that barter both brothers are to be condemned: Jacob for his craftiness, Esau for his epicureanism. Jacob sought a spiritual thing in a worldly way. Esau despised a spiritual thing and bartered it for the material. Esau eats, drinks, rises up, and goes away—goes to oblivion, where he belonged. Jacob, on the other hand, rises to eminence; not, however, because of his despicable craft, but in spite of it. But Esau's prowess could easily undo Jacob's plotting. Risk of rage of the skilful hunter had not been counted. The heir by craft to the chieftainship finds himself a shelterless fugitive. One comforting dream is given him on his way to the forty years of exile. He sees in a vision a rock staircase peopled with angels, and feels that the lonely place is really a gate of heaven. A reverse! So it seemed, when the heir to the chieftainship of Israel became a slave. But whether an event is a reverse or not depends upon what God means by it and the use man makes of it. If Joseph had become a man hater and spent his time bewailing his hard lot, going as slave to Egypt would have been a reverse. On the contrary he triumphed over circumstances and made himself indispensable to prince or prison keeper or Pharaoh, as the case might be. Joseph was a rose of Jericho. He bloomed anywhere, palace, pit, or prison, it mattered not. He was brilliant and fragrant under most adverse circumstances, and has justly become the universal ideal of personal purity and disinterested kindness. But the rose tree in Joseph's lovely character developed into the sturdy oak under powerful temptation. He stood erect, crying: "How can I do this great wickedness and sin against God?" From prison cell to throne room is a startling, abrupt transition, but really Joseph paved every step of the way, and it took him thirteen years to do it. He got honey out of the eater by submitting to chastening providences. He worked out his own salvation at the same time God worked through him those beneficent purposes which have always been his pleasure. He intended to bless Joseph and make him a blessing; and Joseph, by patience, industry, and piety, put himself in the way of getting and being a blessing. Joseph had a prime opportunity of disentangling himself from his race and family. He would have been justified in doing so by his brothers' cruelty. He had nothing to gain, all to lose, by dallying with his brothers. But Hebrew race feeling is a proverb. He could not forget his country or countrymen. Like Moses, later, he was willing to give up the pleasure of Egypt, and royalty itself, if need be.

WHAT IS THE MOST PROFITABLE CROP.

The American farmer, as a rule, does not count his own time, the value of the land or the cost of his horses and machinery in estimating his profits on grain, says C. C. Bowsfield in "Making The Farm Pay."

If he has a crop of 100 acres of wheat that will clear $500 for him after reckoning the value of seed, the cost of help and the expense of threshing, he puts it down at $500 profit, though he has put most of his year's time into it, besides maintaining the land and equipment of horses and machinery worth several hundred dollars.

The following table showing the relative value of crops is based on Mr. Bowsfield's own experience:

	Gross	Net
Wheat per acre	$ 15.00	$ 8.00
Field corn	30.00	20.00
Sweet potatoes	150.00	110.00
Potatoes	125.00	75.00
Onions	250.00	150.00
Cucumbers	200.00	150.00
Strawberries	300.00	200.00
Apples	250.00	200.00
Cherries	200.00	150.00
Clover	25.00	20.00
Alfalfa	45.00	30.00
Timothy	20.00	15.00
Millet	25.00	20.00

IOWA SWINE BREEDERS' ASSOCIATION.

(Continued from page 9.)

do their share. Hog buyers and neighbors should be excluded from the herd in times when cholera is threatened. Dr. Stange thinks the simultaneous method of inoculation is the only one of real merit. He thinks that the introduction of cholera at the time of inoculation should be through vaccination and not from pen exposure. Hog yards should be broken up and put into cultivation, disinfected by the use of lime and other methods. When a herd has been vaccinated, corn should be withheld from their ration for one or two weeks. Green corn has a predisposing influence towards cholera. He thought successful vaccination depended as much on the manner of the use of serum as on the serum itself.

The second day had been reserved for a meeting of the National Association of Expert Swine Judges. None of the officers of this organization presented themselves. A committee, comprised of W. Z. Swallow and W. H. Pew, was appointed to take charge of the scoring exercises. A number of gentlemen scored a Poland China, a Berkshire, and a Duroc Jersey furnished by the college and a Chester White supplied by Barr & Rae, of Ames. The committee recommended that a certificate be issued to F. G. Paul, of Marshalltown, Iowa, on Poland Chinas.

On invitation of the college authorities it was unanimously voted that a special meeting of the Iowa Swine Breeders' Association would be held at Ames during the winter short course, and a particularly strong program will be arranged for that day. The object is not so much for the producers of pure-bred swine as to cultivate a more general interest in hog breeding on the part of farmers themselves.

If the corn cultivator shovels are to be sharpened and re-pointed this year let it be done early. Sharp, long pointed shovels are not the thing to use when the corn is large and the roots are long.

OUR FASHION-DEPARTMENT.

ALL PATTERNS, 10 Cents Each.

THIS department is prepared especially for The Iowa Homestead. We can supply our readers with high-grade, perfect-fitting, seam-allowing patterns at 10 cents each, postage prepaid. Full directions for making, as well as the amount of material required, accompany each pattern. When ordering, all you have to do is to write your name and address plainly, tell us the correct number and size of each pattern you want and enclose 10 cents for each number. We agree to fill all orders promptly and guarantee safe delivery. Address all orders to The Iowa Homestead, Des Moines, Iowa.

6156 Misses' and Small Women's Dress.—This pretty dress is made with a draped skirt. The closing is made at the left side of the front and the skirt is cut in two pieces. Cashmere, linen, pongee or ratine can be used to make this dress.

The pattern 6156 is cut in sizes 14 16 and 18 years. Medium size requires 4 yards of 36-inch material. Price of pattern ten cents.

6164 Children's Dress.—This pretty little dress is just the thing for a small child. It closes at the front. The shield is removable. The kilt plaited skirt is joined to the waist with a belt. Serge, cheviot or any of the wash materials can be used to make this dress.

The pattern 6164 is cut in sizes 2, 4 and 6 years. Medium size requires 2⅛ yards of 44-inch material and 2 yards of edging. Price of pattern ten cents.

6131 Ladies' Dress.—An excellent model for a one-piece dress is here given. This dress closes at the left side of the front, may be made with standing or rolling collar and with four-gored skirt, in empire or regulation waistline. The double row of buttons afford pretty trimming and the frock is chic and splendid looking.

The pattern 6131 is cut in sizes 34 to 42 inches bust measure. Medium size requires 5 yards of 36-inch material. Price of pattern ten cents.

6145 Boys' Suit.—Every small boy needs a play suit and here is an excellent pattern for making one. It can be made with either the round, square or standing collar. It can also be made with either the long or short sleeves. Linen or gingham can be used to make this suit.

The pattern 6145 is cut in sizes 2, 4 and 6 years. Medium size requires 2⅛ yards of 27-inch material. Price of pattern ten cents.

6140 Girls' Dress.—This dress closes at the front in Duchess style. The skirt is cut in two pieces and may be gathered and attached to the waist with a belt. Any of the wash materials can be used to make this dress with the collar, cuffs and belt of contrasting material.

The pattern 6140 is cut in sizes 6, 8, 10 and 12 years. Medium size requires 2 yards of 44-inch material and ¾ yard of 27-inch contrasting goods. Price of pattern ten cents.

FIELD MEN.

M. T. White, western Iowa and Nebraska (north of the Platte river). Address 4015 Izard St., Omaha, Neb.

Carlos C. Palmer, eastern half of Iowa and Minnesota and swine division in Illinois. Address 2714 High St., Des Moines, Iowa.

Fred V. Johnson, Wisconsin, Illinois, Indiana, Ohio, Michigan and Kentucky. Address 924 Hearst Bldg., Chicago, Ill.

A. T. Cole, Missouri, Kansas and Oklahoma. Address 3900 Holmes St., Kansas City, Mo.

John C. Halderman, Kansas. Address 4347 Harrison St., Kansas City, Mo.

A. W. Hopkins, Wisconsin. Address 201-202 Washington Blk., Madison, Wis.

J. C. Price, southern and western Nebraska. Address 145 So. 28th St., Lincoln, Neb.

C. C. Carlin, special assignments in central, southern and northern Iowa. Address 715 Clinton Ave., Des Moines, Iowa.

FIELD NOTES.

Some very choice Scotch Collie pups are advertised for sale by Le Roy Brown, Lamoni, Iowa, on page 12.

Some good Duroc Jersey fall boars and sows are advertised for sale by L. L. De Young, Sheldon, Iowa, at $25 and $35. His advertisement appears on page 20.

C. W. Phillips, breeder of Poland Chinas, New Sharon, Iowa, announces his annual fall sale to take place October 8th. Mr. Phillips has at the head of his herd Long King's Superior, which he insists is one of the best Poland Chinas in the state of Iowa.

Twenty-five exceptionally good big-type Poland China brood sows, bred to Mouw's Big Sioux for fall litter, are advertised for sale by George Glynn, Sioux Rapids, Iowa, on page 19. These are splendid sows and splendid bargains. Send Mr. Glynn an order for some of these at once.

A. Latimer Wilson, importer, Creston, Iowa, writes that he has had a very successful year, selling 297 head of imported and home-bred registered horses and mares. Iowa took the most of any state in the Union, Utah, Idaho and Canada coming next. Mr. Wilson says he is well fixed for two and three-year-old colts and has a number of good imported horses for sale. His next importation will land September 1st. Write Mr. Wilson, Creston, Iowa, for particulars. See advertisement on page 21.

On page 12 of this issue of The Homestead appears the advertisement of Earl M. Filson, Birmingham, Iowa, in which he is offering full-blooded Scotch Collie puppies for sale. They are all well marked and from parents that are natural heelers. In color they are sable and white. They will be sold at reasonable prices.

J. P. Peterson, Herman, Neb., reports sixty good spring Duroc Jersey pigs on the farm, together with about twenty head of fall boars and sows. The fall stuff are sired by Big Jim and the spring pigs are by Jumbo U. S. and Col. Chief Jr. Mr. Peterson is expecting to make a fall sale if everything goes right and in that case will be heard from through these columns later in the season.

Kratzer Quality carriages are advertised on page 5. The special style of Kratzer carriage known as Majestic buggy No. 25 is a wonderfully attractive one. It is good all over. It is easy running, lasting, well painted and a fine looker. It is right in line with other styles made by the Kratzer Carriage Company. For the free catalog fillI out the coupon and address it to Kratzer Carriage Co., No. 4, Des Moines, Iowa.

The agricultural division of the Iowa State College, Ames, has among the other animals offered for sale, a splendid Aberdeen Angus bull calf just a year old that has the qualities of individuality and breeding which should satisfy critical breeders as well as farmers. The calf is a son of Vala's Rosegay, the well-known show bull, and the dam is a Pride cow and one of the best of the breed on the college farm. The price quoted on this bull makes him a most desirable bargain.

Conditions throughout a great deal of the territory in which this paper circulates enforce the need of some means of supplying water for stock permanently. There is perhaps no way by which such water can be furnished more cheaply than through the use of Fuller & Johnson's farm pump engine advertised on page 13. The manufacturers insist that for from fifteen to twenty-five cents a week this little engine can supply sufficient power to do all the pumping on the farm and besides that it may be applied to other work. No farmer can afford not to have the catalog which describes this engine. It may be secured by writing to Fuller & Johnson Mfg. Co., 6 Ironton St., Madison, Wis.

Carey Cameron, Herman, Neb., claims October 6th for a Short-horn sale and he expects to put up one of the best offerings that has ever come from his farm. We have seen a bunch of the heifers that he is listing for this sale and they are an exceptionally good lot and are both Scotch and Scotch topped. Carey Cameron is one of the breeders who has in a measure kept his light under a bushel, but when it comes to putting up good short-horn and good Durocs he can give most of the boys pointers. Quite a number of years ago he and John Skinner sold a draft offering of Short-horns at South Omaha and it was the best offering that has ever been sold at that point and the prices received indicated that the cattle were appreciated by the breeders throughout the central West. For the last few years Mr. Cameron has been making sales each fall and winter and the class of stock that he has sent out has made his name and his herds familiar to the breeders of Short-horns and Durocs throughout Iowa and Nebraska. He will have an offering of Short-horns and Durocs for this sale that will attract attention especially if the boys are wanting good things.

Goodenough's Hampshires.

A. L. Goodenough, Morrison, Ill., the well-known judge and breeder of Hampshire swine, has about 100 spring pigs largely sired by the prize-winning boar, Dudie. There are some extra good pigs to be found sired by this young boar and he bids fair to make a good record as a sire. No sale will be made this year and only the boar pigs will be offered the public at private treaty.

Poland China Boars for Sale.

Any of our readers who are going to want to buy a good boar will be interested in Mastodon Prospect, the boar that W. H. Barr & Son, Elliott, Iowa, are advertising for sale on page 19. He is bred right and is right and can be bought worth the money. They also offer some good fall boars for sale and some choice sows bred for fall litter. Write them at once and kindly mention The Homestead.

Simpson Ponies.

The Simpson Shetland ponies advertised on page 21 all made a remarkable list of winnings at the greater state fair shows last year, having captured about 80 per cent of all first prizes. The herd contains about 150 head of ponies and a fine string of them are now in preparation for the fall shows. The Simpson farm exported 100 head of ponies to England last year and is now fitting about sixty-five head more for the export trade.

Chief's Col. Bred Sows.

On page 21 the Economy Stock Farm, Shenandoah, Iowa, are advertising some splendid Duroc Jersey sows bred to the grand champion boar, Chief's Col., for September and October farrow. This is the first time that western breeders have ever had an opportunity to buy sows bred to this great boar and the wide-awake man will not overlook this opportunity to buy one of these sows. They have 200 head of spring pigs sired by Chief's Col., Highland Chief, Capt. Gano, and one litter by the noted boar, Cherry Chief, and they are now booking orders for boar pigs. They have a couple of yearling boars for sale that are very excellent and they will make splendid herd boars. One of these is a son of King The Cols., and is out of a Proud Chief dam and he will make any breeder a boar that he will be pleased to place at the head of his herd. Write the Economy Stock Farm, Shenandoah, Iowa, at once and tell them just what you are looking for and we are sure they can fill your order. When writing them kindly mention The Homestead.

Auto-Fedan Hay Press.

The president of the Auto-Fedan Hay Press Company claims that the Auto-Fedan means one less man. He says the reason for this economy of labor is that with an Auto-Fedan hay press two men can take more hay from the windrow and bale it than three men can do with any other make. The facts on which he bases this claim, together with full descriptions and special prices to advertisers of this paper, may be obtained by writing to the Auto-Fedan Hay Press Co., Kansas City, Mo. See advertisement on page 8.

Why No-Rim-Cut Tires Excel.

Goodyear No-Rim-Cut tires have the reputation of having superior lasting qualities and other advantages which make them general favorites among automobile owners. The advertisement on page 6 gives some of the reasons for the excellences referred to. The Goodyear is made by a secret process, reinforced by materials having great wearing qualities and made on plans that cannot be improved upon. The Goodyear Tire Book tell other features in detail. Write for it. Address Goodyear Tire & Rubber Co., Akron, Ohio.

Moulton's Durocs.

C. A. Moulton, Morrison, Ill., has 110 spring pigs that are very promising. Their is one litter sired by S. E.'s Premier Col., one by Captain Model, one by Golden Model 31st and the balance by Success, a good young boar bred by S. E. Eakle and sired by S. E.'s Premier Col., dam the great breeding sow, Pride of Sunnie Side by Chief's Col., second dam Helen's Duchess by Ohio Chief. These pigs are out of sows by Browning Boy, a grandson of Chief's Col., S. E.'s Premier Col., Manley, a grandson of Junior Jim, Model Chief's Last and others. A littel later we will have more to say of this herd.

Beckendorf's Hampshires.

One of the breeders of Hampshires that expects to be at Des Moines this fall with some good things is J. E. Beckendorf, Walnut, Iowa. He has some nice spring pigs, but not quite as many as usual, but those he has are all right. They are sired by his well-known boar Lad For Me and Compeer of Walnut. He has a splendid lineup of sows and he will have some of the best of these with him at the fairs this fall. Those of our readers who are interested in Hampshires should make it a point to see the Beckendorf Hampshires when they go to the state fair.

Meinhold Sells Big Jumbo.

H. C. Meinhold, Stromsburg, Neb., reports the sale through The Homestead of his herd boar, Big Jumbo, to C. A. Church, Columbus, Neb. Mr. Meinhold is now offering spring boars and gilts sired by Big Jumbo, Pud's Wonder by A Wonder, Nelson Tecumseh, O'Connell's Wonder and a few other big sires. These are big hogs well bred and will be sold at farmers' prices. Mr. Meinhold has recently put into his herd a new boar called King Wonder by Nebraska Wonder by A Wonder. This is the making of a big boar and has a lot of quality. Readers of The Homestead will do well to write Mr. Meinhold for prices on the stock he is now offering. Mention this paper when you write. See advertisement on page 19.

Kreitzberg's Durocs.

The other day we called on Lewis Kreitzberg, Griswold, Iowa, and found him with forty head of spring pigs and while his crop is not large, they make up in quality for what he lacks in numbers. He has twelve fall boars on the place and they were all that could be desired. Both his spring and his fall stuff are good and no one need hesitate on sending him an order and be sure in getting a good boar. He will sell these fall boars at any time and they are sired by Freed's Improver and a son of Latter Lafollette. He wants to dispose of these fall boars and he will be pleased to hear from anybody wanting one, or he will be glad to show them to anyone who will call and see them. He has four good litters by Lewis' Crimson Wonder and one good litter by C. H.'s Special. He is only asking from $35 to $40 for these fall boars, and he hopes to dispose of them as soon as possible. No one will go wrong in ordering one of these boars of Mr. Kreitzberg.

Cedar Hill Farm Short-horns.

Irvin E. Wilson, proprietor of Cedar Hill Farm, Belvidere, Neb., is offering for quick sale a few young bulls of serviceable ages, also a pure Scotch bull that has been used some. The young bulls are sired by Secret Hero, a 2,200-pound Scotch bull that was selected on account of the splendid showing his family has made as milkers and he was introduced into one of the best milking herds of real, big, smooth, Short-horns that was to be found anywhere in the West. Mr. Wilson has made a special effort to maintain size, feeding quality and milking quality at all times and he has succeeded to a great degree. The young bulls he is offering are of this sort, and they are just now ready to go out and do good service. The older bull offered is being sold for no fault, is a nice handler, comes of big stock and is being priced worth the money. He is a bull that can go out and serve from fifty to sixty cows this season. He is just right in his prime, and has never been overused, although before Mr. Wilson got him he has seen some short feed. It has cut him in size probably 100 pounds, but his breeding ability has only been made greater thereby. Bulls that are continually kept on heavy feeds, quite often do no breed well, for the reason that they develop the tendency to lay on fat instead of developing their reproductive organs. Carried to excess, heavy feeding will completely ruin a bull. The bulls Mr. Wilson offers are right in every way, in fact, everything that leaves this farm are right, or they do not leave it as breeders. The writer is well acquainted with Mr Wilson and we recommend him and his stock. Mention The Homestead and write at once.

Messer's Angus Bulls.

Bargains in Aberdeen Angus bulls are offered by A. O. Messer, Grundy Center, Iowa, on page 18. Oakfield Earl 138858 is a tried herd bull that has proven a good breeder. This bull is a Trojan Erica and is a grandson of Earl Eric of Ballindalloch. Here is a herd bull proposition. There is a May yearling Trojan Erica bull by Erica 2d 163549, dam by Blackbird Jack 129823. This calf is smooth, has good head, is well proportioned and has a fine disposition. There is also a December yearling E. T. Duchess bull that should sire a high-class lot of steers for someone. Mr. Messer has another good yearling bull. If any of our readers want a good bull it will pay them to see these before buying. The prices range from $90 to $175. Mention The Homestead when writing.

Dunbar's Chester Whites.

That well-known breeder and showman, W. H. Dunbar, Jefferson, Iowa, has 100 head of Chester White spring pigs this year and they are early and good, and he is going to be strictly in the swim when it comes to filling orders the coming season. These are sired by Iowa Challenger, Combination 2d and Longfellow. Mr. Dunbar is going to be at the Iowa State Fair with a strong lineup, and he will have some good things that will make the boys go some if nothing happens. For the past several years the Dunbar herd has been shown at the Iowa State Fair, the Intertate Fair at Sioux City, at Hamlin and the Dakota State Fair and he always has had his share of the ribbons, and this speaks well for the kind of Chester Whites he is breeding. He has bred a lot of good stock and the hogs that he has sent out from his herd have invariably done well for the men who bought them. Those of our readers who are going to want a Chester White boar or a few good sows will not make any mistake if they will only call and inspect the Dunbar herd. If you cannot do this then make it a point to meet him at the fairs this fall.

Billie McFarland's Hampshires.

Farming a section of land, looking after a big herd of Hampshires, and taking personal charge of a large horse buying and breeding establishment in town keeps Billie McFarland, Syracuse, Neb., pretty busy. The herd of Hampshires is generally regarded as the second largest in the state, and comprises about 150 head. The past winter a number of sows were purchased and placed in the herd, but they failed by quite a little to come up to standard of the former herd. Mr. McFarland knows the hog business and he certainly knows a good Hampshire, and, as he is a good caretaker, he is pretty sure to have a lot of good stuff on the farm. One of the best boars in the country is in use here and he is Zehr's Perfection by Gen. Wasser by Col. Wasser. The dam of Zehr's Perfection is Mary W. by Major Watson. This boar is sure of the big type and, in fact, that is the type that Mr. McFarland is breeding, and those looking for bigger Hampshires will be able to get them from this old reliable stock. Mention The Homestead when you write, and if interested in getting good boars or any breeding stock, apply at once. See advertisement on page 18.

Zellmer's Durocs.

On October 4th, C. A. Zellmer, Atlantic, Iowa, will make his first public sale of Duroc Jerseys and he expects to have an offering that will interest the breeders and farmers of western Iowa. He now has seventy head of spring and fall pigs on the place and from these and a few good sows that he expects to catalog will make up his offering. The fall stuff are all sired by King Carlos a son of Don Carlos, and he was a son of old Ohio Chief. His present boar is Cedar Grove Chief, a grandson of H. A.'s Choice Goods, and out of a dam by Zeek, a son of Proud Advance that Len Roberts formerly owned and used in his herd. This hog was first prize and champion boar at the Cass county fair in 1912 and he has been a good breeding boar in his herd. Many of the very best spring pigs he has are sired by him. Some of his best pigs are out of Queen Ruby, a granddaughter of S. J.'s Buddy K., and his best fall boars are out of Cedar Grove Lass, a daughter of Golden Model Again. Another splendid litter is out of a sow called Daisy by King Commodore. Later in the season we will have more to say of the Zellmer Durocs and remember he will make a sale at Atlantic on October 4th.

Andy Joy's Poland Chinas.

Among the many younger breeders of Poland Chinas in Nebraska that have been pushing rapidly to the front as pastmaster in the art of feeding and producing good things is Andy Joy, Herman, and while he has not an overly large number of pigs this year, what he has are very good. He owns that splendid young boar, Half Ton Wonder, and he is one of the splendid boars today in the state of the large-type kind. In fact, this boar is a better hog today than ever before and he is coming along in fine shape. Mr. Joy has forty spring pigs, and they are good enough to show anybody. One of his best litters is sired by a son of Half Ton Wonder and they are out of a dam by Uwanta Hadley, a boar that he formerly used in the herd. This is a most excellent litter and they will be right for his sale the coming fall. Another good litter is sired by Henry's Expansion, a son of Dorr's Expansion, and there are six

good pigs in this litter. He also has a good litter by Hadley Golddust and a litter by Lingford's Jumbo. They are growthy, well fed and well kent and are looking fine, and if he doesn't have something the breeders will want this fall then we are mistaken. Few of the more noted breeders can show you a better bunch of pigs than you will see on his farm.

Elmer E. Thompson & Son's Durocs.

One of the best lots of spring pigs for the number that we have seen this season we saw recently on the farm of Elmer E. Thompson & Son, Indianola, Neb. These gentlemen have an ideal place to grow hogs, started with the right sort and have given them good care, hence they have good ones to offer. The good stockman will be quick to appreciate the extra value that he can get by buying of a firm of this kind and where such breeding and development may be had. The greater part of the spring crop of pigs are sired by Iowa King by Byrd's Wonder by C. W. Again. Byrd's Wonder was one of the good ones out of one of the best litters ever sired by Crimson Wonder Again and the dam was the world's famous producing sow, H. A.'s Queen. The dam of Iowa King is Ohio Lady by Iowa Chief. The pigs are out of sows by such noted sires as Echo Wilkes, by the way, one of the very best breeding boars in Nebraska today, Crimson of Crimson Wonder, Valley Critic 2d, and a few others. Messrs. Thompson will sell this stock at private sale, and are now shipping boars. Those that live long distances should order at once, as they will be assured of a good selection and save considerable on express. Do not wait, but write today, and when doing so kindly mention The Homestead.

Maple Glen Galloways.

A recent visit to the Maple Glen herd of Galloway cattle owned by James P. Milliken, Media, Ill., showed a lot of unusually good young things coming on. Mr. Milliken is a breeder with very practical ideas, with a definite type in mind and has achieved most satisfactory results in breeding for that type. The Maple Glen herd is very strong in the blood of the best strains known to the Galloway breed. For several years it was headed by Imp. McDougal 4th of Tarbreoch, one of the strongest show and breeding bulls the breed has ever produced. At present the herd bulls are Dauntless of Maple Glen, by McDougal 4th; Worthy of Maple Glen, by Tarbreoch Earl, and Netty's Follower, by Imp. Campfollower of Stepford, one of the highest-priced and most prepotent Galloway bulls ever imported to this country. The breeding matrons in this herd are an outstanding lot, and among the young bulls and heifers will be found some of the most attractive prospostions offered by any Galloway breeder. Mr. Milliken has some exceedingly good young bulls for sale and can fill any kind of an order in the female line. His cattle are handled under conditions that tend to future usefulness, and any of our readers with wants in the Galloway line can find what they need in the Maple Glen herd.

Francisco's Poland Chinas.

The writer visited C. W. Francisco, Inland, Neb., a short time ago and we wish to say that we found a nice lineup of Poland Chinas on the farm. Mr. Francisco has been breeding the big Nebraska-type stuff for several years, but he has the best crop this season that he has had for some time. The pigs are for the greater part the get of Young Combination by L. F. Reilly's well-known boar, Combination by Blue Valley Quality. Great Victor, a son of Big Victor and one of the very best that we ever saw sired by that boar was in use in this herd last year, but Mr. Francisco had the misfortune to lose him. His get are not plentiful on the farm for the reason that but few fall pigs were raised and the spring crop a year ago were nearly all lost with disease last fall. Every herd sow and boar on the farm have now passed through the diseases and are regarded by Mr. Francisco as being immune. Some of the best fall boars that we have seen are on this farm. Earlier in the season the writer hought one of these boars the best he had seen in a long time, but the others of the litter are gaining on him now. He is quite a good pig for all that, and we trust will be taken to the state fair this fall. Mr. Francisco will make a public sale this fall, October 21st being the date, and at that time will put up an offering that all Poland China men of the territory should try and attend.

Herd-Heading Scotch Bulls.

Readers of The Homestead in search of some really high-class Scotch bulls should not overlook those that are being offered by K. F. Dietsch, Orleans, Neb. Mr. Dietsch has two that are of serviceable ages and they are of the very best of blood lines. One is a rich roan, an extra choice individual, and is sired by Scotch Lad. His dam is Victor's Secret by Prince Victor; second dam is Secret of Hill Farm 3d by Imp. Merry Hampton, and then comes Imp. Sunbeam by the great bull, Royal Violet. There is a lot we could say about this pedigree, nothing better anywhere, but the bull's individuality is all that would be necessary to convince most stockmen of his value. The other bull is also a pleasing individual, a real good one and he is a red. He is also sired by Scotch Lad and out of Queen Clemency of Scottish Champion. The next dam is Queen Malaka by Scottish Champion and traces to Imp. Queen Clementina by the greatest bull of his time, Cruickshank's noted Gravesend. Mr. Dietsch is asking but a part of what these bulls are worth, or what they would bring in any advertised auction today. These are the class of bulls that breeders furnish competition on up to the four-figure mark, and they would still be worth the money. Someone is going to buy these bulls and do it mighty quick when they see them once. The writer has seen them, and recommends them to breeders looking for something good and well worth the money. Homestead readers will be perfectly safe in dealing with Mr. Dietsch by mail, but whether dealing by mail or in person, we would suggest that you act quick.

The Champion Silo.

The advertisement on page 24 of this issue ought to appeal to every man who grows a bushel of corn. The Western Silo Company, Des Moines, Iowa, has made a remarkable record with their Champion silo. This is due to many causes. In the first place, the care taken in the selection of wood for the Champion silo means that it will be long lived. The inside hoops and the base anchors used in the construction of the Champion silo add immensely to its strength while the solid steel bars welded at the top and looped into U bolts simply mean defiance of wind and weather. The doors of the Champion silo are of solid California redwood and they are continuously trussed and braced with special angle and channel steel. It costs money to saturate staves with oil, but the Western Silo Company goes to the expense of oil filling their staves under the most approved methods. The Champion silo has a remarkable record behind it and one that will be maintained at all hazards in the future. Homestead readers who are desirous of obtaining special information in regard to this type of silo should fill out the coupon found in the corner of the advertisement and mail it to the Western Silo Company, 100 Eleventh St., Des Moines, Iowa.

A. T. Cross' Duroc Herd.

One of the largest herds of Durocs in Nebraska is the herd owned by A. T. Cross, Guide Rock. The spring pig crop numbers well over 200 head and they are a good thrifty lot. The Cross herd is one that is well and favorable known over a large territory, and the stock sent out from this herd the past few years has had a marked influence for good in many herds. One of the greatest herd boar sires of the state is in service here. He is Prince Wonder 2d by Old Prince Wonder, and as a sire of herd-heading boars he has a record not yet surpassed by any boars of his age in the country. Something like twenty-five good herds in southern Nebraska and northern Kansas are using boars sired by Prince Wonder 2d and they are giving excellent results. Col. C. by G. C.'s Col., is a boar that has done much good in this herd, and many of the best sows on the farm, and in many other herds are sired by this boar. A son of Hammond's famous boar, Tattarax, is in use and is siring a good line of stuff, especially on Prince Wonder sows. Tattarax bred a short type of stuff, but when mated with Prince Wonder who is extra long, a fine lot of stuff is the result. Mr. Cross will hold a sale on October 30th and at that time will offer a choice lot of boars and a few gilts. As he will have such a big number to select from, a number will also be sold privately.

W. H. Diegan's Poland Chinas.

A gentleman that has bred a lot of the good boars of the country and who seems in better shape right now to satisfy those looking for that kind of stock than ever before, is W. H. Diegan, Raymond, Neb. It is from this herd that Thos. A. Shattuck's famous Sampson was drawn, also his brother, Herod and still others that are doing good work in other noted herds. To have produced so good a breeding boar as Sampson is honor enough for most men, but the others only emphasize the value of the breeding stock kept on this place. Jumbo Jr. was a boar that was used in this herd with much success, siring Sampson and several others of the big breeding, heavy-boned kind. He was bought in the Wintermute sale of several years ago, and the influence of the Wintermute stuff on the big hogs of Nebraska has been highly beneficial and far reaching. A few litters from choice sows selected at the Peter Mouw sale last winter are doing well. They get good care on the Diegan farm, and as they come of the very best of the Mouw stock they should make some valuable breeding stock for the western stockmen. Early spring boars are now ready for shipment, and we want to say that in this herd are boars that Homestead readers would buy at first sight, if they would but take the time to go and see them. We would suggest writing Mr. Diegan at once for prices and full description of this stock and we fully believe that early selection will be made at much lower prices than the same quality will cost a little later. If the opportunity to see this stock is not presented earlier, make it a point to see them at the Nebraska State Fair.

Holly Williamson's Polands.

The other day we called upon H. O. Williamson, Herman, Neb., who is regarded as one of the most enthusiastic and one of the very best breeders of Poland Chinas in eastern Nebraska and we found him with the best crop of spring pigs that we have ever seen on his place at this season of the year. We are not saying this to please Mr. Williamson, nor are we saying this to deceive breeders, but he has the goods and if you don't believe it go and see him yourself. He will have a great lineup for the boys this fall. The spring litters are sired by Great Mastiff, Henry's Expansion, Hadley Golddust, Big Tecumseh, Revenue Exception and Black Prince. He has a splendid boar that he is now using in Giant Wonder, a son of Big Wonder (who in turn was a son of that 900-pound sow, Lady Wonder 6th) and his dam is Molly King by old Long King and out of a Giantess sow. He has big-type breeding to a fare-you-well in this hog and when he gets him grown out he will be as large as any of them. He has a full sister to this boar on the place and she is as good as the boar and he is going to put her in his fall sale as a special attraction. Those who are going to want something large should remember this sow as one of the choicest things that will be sold this fall. He has a September boar called Mastiff Look sired by Great Mastiff that he is carrying in good shape for the fair and he will sell him should he get what he thinks he is worth and another good October boar also. He has some good fall sows, three of which are out of old Peaches and Cream, one of the very best sows he has in the herd, and these are sired by Big Wonder. Two other good fall sows are granddaughters of the 900-pound sow, Lady Wonder 6th. He has two good litters by Spot's Best and these are out of daughters of Wade's Juhbo. Spot's Best is a son of Long Chief Jr., one of the best boars ever owned by Tom Miller. Mr. Williamson will make a sale on November 5th, when he will put in some of the best boars and sows that he has ever listed for a public sale and later in the season we will tell you more about them.

H. Smith & Son's Durocs and Shorthorns.

The writer recently called on H. Smith & Son, Tobias, Neb., and is glad to report that these gentlemen have a fine crop of pigs numbering near 100. They are a growthy lot, many being the last of February and the first of March and have done well. They are principally the get of Model Chief 10th by Model Chief 8th. Model Chief 10th was the fourth or fifth pripe boar at the Nebraska State Fair last year and is a litter mate to the first-prize junior yearling sow at the Nebraska State Fair two years ago. The sow was Model Lassie, one of the best shown at Nebraska for a good while, and afterwards topped the Con McCarty bred sow sale. Model Chief 10th is a good breeder and is a good show proposition as well. He is very smooth, has an extra good head and ear, and in fact is very good in most parts. He will probably be shown again this season and is a much better prospect than a year ago. He is better fitted at this time than a year ago, and we believe that he will land up pretty well in the money. Smith & Son have a young boar sired by Model Chief 10th, a June boar, that will be in the junior yearling class. He is not as good a proposition as the old boar, but is a mighty well-bred fellow, being out of a Crimson Wonder Again sow. These gentlemen have a junior yearling sow, however, that is the real thing. She is by Select Chief and out of a C. W. Again sow, and she is just mighty hard to fault. It will take a good sow to stand above her. If all goes well with her, she will be one that will be looked for this fall. The Short-horn herd is coming in fine shape, everything doing well. The calves are all by Roan Cumberland, a son of Cumberland's Last, and he is a sire of the right sort. The cow herd is strong in the blood of the great Gold Dust and the cross is a good one. Some good bulls will be for sale a little later, in fact, would be sold now, but they will not do to use till late in the season. Keep these herds in mind, and remember that a brood sow sale will be held in the winter, and probably a boar sale this fall. Should you write, mention this paper.

Eakle's Durocs.

A representative of The Homestead recently visited the farm of S. E. Eakle & Sons, Prophetstown, Ill., and found the best lot of pigs that we have ever seen on the Eakle farm. They have 120 spring pigs and they are surely a good bunch. There is an extra good litter by Cherry Chief, out of a Proud Col. sow, a dandy litter of six by Volunteer and out of a litter sister to Lucky Wonder 112, a litter by C. E. Veak's High Col., some extra good pigs by Captain Model, a full brother to Golden Model II and the balance of the pigs are by the two famous boars, S. E.'s Premier Col. and S. E.'s Defender, two boars that have been used very successfully in this herd. S. E.'s Premier Col. is a son of Premier Col. and out of an Orion Chief sow. He is a large boar with quality and has lots of action. You can pick his pigs as they have the type, style, action and good feet of their sire. S. E.'s Defender 117385 was sold to H. E. Browning to head his noted herd and has since been recorded in the American Association as Disturber. He is sired by Defender and out of Lucy Wonder 112 by Chief's Col. Lucy Wonder 112 is in the Eakle herd and always raises a great litter. She now has a fine litter by S. E.'s Premier Col. The Disturber pigs are looking fine. We saw the fourteen sows that raised the pigs on the farm and they are a good lot. Many of these sows have been kept for three to five years and if they were not raising good pigs they would not be kept that long. There are some fine litters by S. E.'s Premier Col. out of sows by Golden Model, Defender and S. E.'s Top Col. There is no herd in America that is more choicely bred than this. Several sows by Model Chief, Chief's Col., Defender, Ohio Chief, Chief Select are the ones that raise these good pigs. Messrs. Eakle have sixteen fall boars for sale sired by Disturber, S. E.'s Premier Col. and Captain Model. A good yearling boar by Crimson Wonder I Am, dam by Ohio Chief is priced at $50. The Red Polls are coming along in nice shape. A good fourteen months bull by King George and out of Eva 3d and a few heifers will be sold. This spring Mr. Eakle purchased Krussard, a great three-year-old Percheron stallion, sired by celebrated Champion Carnot. If interested in good Durocs or Red Polled cattle see page 18 and write your wants mentioning The Homestead.

We show herewith a kodak picture of a group of the real big Poland China prospects taken on the Oscar Warp farm at Minden. This picture was taken May 5th. Warp Bros. have one of the very best big-type herds in Nebraska. They will have herd-heading boars for sale a little later. Should you write them, mention The Homestead.

TOO LATE TO CLASSIFY.

OLD-FASHIONED SPOTTED POLAND CHINAS SIRED by three of the largest boars of the breed. Spring pigs, either sex, now ready to ship. $25.00 to $50.00. Best breeding, highest quality. **J. D. Gates & Sons, Ravenwood, Mo.**

SOME excellent young bulls, sired by the 2,200 lb. Secret Hero, also a pure Scotch tried bull. Prices low for quality offered. We maintain milk records on many of our cows. Mention The Homestead.
IRVIN E. WILSON, BELVIDERE, NEB.

McFarland's Hampshires

A BIG lot of choice boars of early spring farrow. Some select enough for the best herds, others for the progressive farmers. Mention The Homestead and address
Billie McFarland - - - Syracuse, Neb.

POLAND CHINA SWINE.

COOPER'S BIG-TYPE POLAND CHINAS. Guaranteed Cholera Immune

100 HEAD of pigs of spring farrow for sale, either sex, can furnish boars and gilts unrelated. These pigs are from sows weighing from 500 lbs. yearlings up to sows of over 800 lbs. in weight, representing the biggest blood lines and the most noted families of the breed. They are sired by Big Expansion, the 800-lb. 2-year-old son of the noted Dorr's Expansion; Big Bone 2d, weighing 900 actual pounds, and a son of the great Big Bone, Chief Leader, an outstanding 14-months-old boar weighing 500 lbs. today, and other boars of same likeness. These pigs will be ready to deliver beginning in June. They are from immune sires and dams and have received the double treatment. We will guarantee them cholera immune at

$35.00 EACH OR THREE FOR $100.00.

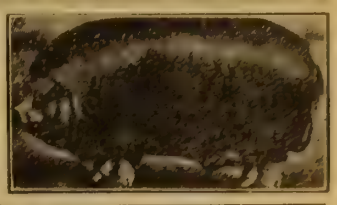
We will refund your money if they die from cholera. We guarantee them to be breeders; we guarantee safe delivery and record everything; have orders booked now from 9 states. If you want the biggest of the breed send us your order. We guarantee satisfaction.

W. H. COOPER - - - - - - - - - - HEDRICK, IOWA.

BIG BONE 2d 16167.

J. O. JAMES' SENSATIONAL PIG BARGAINS

I WILL book orders up to 100 head of spring pigs sired by my half-ton, **Big Orange, Ott's Big Orange,** who weighed 700 pounds on the scales just turned 19 months. **Big Sensation, Big Orange's King, A Wonder Giant** and **Gritters' Best.** All strictly big-type boars and out of extra big, long, heavy-boned matchless sows, many of them weighing from 700 to 800 pounds. These sows averaged 9½ pigs to the sow, many of them 10 to 13 pigs. I want you to write, describing just what you want. It makes it easier to pick the pig that will suit. I am pricing these pigs low for quick sale for June delivery, or at weaning time, for orders booked during May, or while they last, **$25** to **$35.** Must be bought during this month to get this price on them. Many of these pigs will be worth $100 to $150 by October. You can save from $75 to $100 by buying now. The early buyer catches the bargains. The dams of these pigs are sired by Big Orange, Big Sensation, Pawnee Nelson, Long King's Equal, Big Ex and Longfellow Jr. You can't beat sires, dams, pigs or prices. We guarantee our pigs to be as represented. Let me hear from you at once as orders are coming fast. Mention Homestead when writing. **J. O. James, Braddyville, Iowa.**



Walnut Creek Poland China Herd.

A representative of this paper last week called on R. R. Blake, proprietor of the Walnut Creek herd of Poland China hogs near Dallas Center, Iowa. Mr. Blake has expended both time and capital in his endeavors to establish a herd of Poland China hogs which will contain those having the individuality to attract the attention of buyers who are looking for Poland Chinas with size and that carry the strains of the larger sorts. A specimen of the good animals of the herd is a two-year-old sow by Tecumseh Longfellow that is a very close approach to the best Poland China type obtainable. She is very large, of the wide, deep-bodied sort, with an excellent arched back that is wide from end to end, perfect at loin and over the heart. She has good feet and a head and ears which, added to her other good qualities, would make her a money winner in any state fair ring. Her smoothness and finish are as good as ever got into the ring. This sow is and has been an excellent breeder. She has this season a litter of early pigs that are highly creditable and a bunch of last fall pigs that will probably make their appearance at the state fair. The herd has in service the hogs Smooth Wonder Again, L.'s Big Bone and Long King Again. The first named is a son of Hancher's Smooth Wonder 2d. He is a boar of remarkable scale and thickness and is perhaps numbered among the very best grandsons of the noted A Wonder. L.'s Big Bone represents another tribe of big ones. He is also a grandson of A Wonder. His sire was Gallman's Big Bone and his dam a granddaughter of Big Nelson and Good Shine, both of which in good herds represented the biggest sorts. Long King Again is by Long King. He lacks perhaps the scale of the other hogs in the herd, but his active temperament prevents his putting on fat. He has the frame and bone to carry it, but, as a speaker at the Iowa Swine Breeders' Association used to say of the Berkshires, "If he is not going some he is coming back." As a consequence, his appearance lacks the attractiveness of the more quiet fellows. The herd now numbers something like 250 head, a large portion of which are in training for public sale announced for October 19th, concerning which additional facts will be given in later issues of this paper.

Sharp's Hampshires and Red Polls.

Mike Sharp & Sons, Coal Valley, Ill., are known throughout the entire corn belt as breeders of Hampshire swine and Red Polled cattle of the highest type. Mike Sharp, the senior member of the firm, is a natural born stockman and when it comes to his ability as a judge of his particular breeds he has few equals. His success has been largely due to his good judgment. You never see a breeding animal kept in the Sharp herd unless it has a strong constitution. It must have the spring of fore rib and the fore flank well filled out. This firm have for sale a yearling boar that was second in the under six months' class at the Illinois State Fair last year. He is sired by Mike, a good boar formely used in the herd and out of Annie Lee, the sow that produced the cup winners at the Iowa State Fair, 1910. This boar is a strong, good-footed boar that will make a good show. There are six fall yearling boars sired by Clare's Duke and Wonderful Prophet that are extra good ones. All have good feet and backs and strong constitutions. The man who wants a Hampshire herd boar should not miss seeing what Messrs. Sharp have before buying. They also have a fine lot of spring pigs that look the winners. These gentlemen are not going to show this year and will sell any of this show stuff. It is a good place for some showman to fill his herd with winners. Cherokee is a two-year-old boar that if shown would be a hard one for the best of them to step around. He has a strong back, good head and ear, excellent feet and legs and has the thickness and depth that all breeders like. A few Red Polled heifers and a few February and March bull calves will be sold. You can find Red Polls here as good as grow. See page 20 and write these gentlemen your wants mentioning The Homestead.

F. H. Allen's Durocs.

While at Tobias, Neb., a few days ago the writer visited F. H. Allen of that place and made it a point to see the Duroc Jersey young herd that Mr. Allen has. It sort of seems to run in the family of the Allens to have good Durocs, for the Mr. Allen of whom we speak now is a brother of H. S. Allen, Russell, Iowa. The winnings of Allen-bred Durocs is a long list, and will in all probability be added to again this season, as we saw some very good ones on this visit. A young herd, under year stuff, sired by Crimson Wonder Again and out of the sow that produced the first prize under year herd last year, look good. They are sure of a kind, and the right kind at that. The writer is particularly pleased with two of the gilts and the boar, but they are all very uniform. Mr. Allen is in the mercantile business in Tobias, operating the largest store in the city, and only raises a limited number of Durocs, but they are the kind that please the eye and bring the cash when for sale. When at the state fair this fall, look for this exhibit.

Chicago Combination Angus Sale.

Despite the fact that it is a busy time for farmers, there was a good attendance at the combination sale of Aberdeen Angus cattle held at Chicago, June 18th, under the management of M. A. Judy, and while the average of the sale was not high, yet the fact that the majority of the consignees had in cattle that were too young and in too poor condition to sell is responsible for the average. It seems strange that breeders cannot or will not recognize the fact that sending forward of young and undersirable animals to a public sale is more of a direct loss to them than to anybody else, and a detriment to the breed as a whole. The cattle in condition for a sale at the Chicago vendue brought good prices, and the others sold for every dollar they were worth. The outcome of the sale demonstrated the good demand for cattle, the bull enquiry being especially good, and buyers were on hand from Nebraska, Iowa, Illinois, Indiana and Ohio. The consignors to the sale were: E. S. Lantz, Congerville, Ill.; John S. Goodwin, Chicago, Ill.; Stanley R. Pierce, Creston, Ill.; Chas. R. Coleman & Son, Wayne, Ill.; A. C. Binnie & Son, Alta, Iowa; J. O. Gring, Dallas Center, Iowa; Chas. Herendeen, Crystal Lake, Ill. Mr. Judy managed the sale in his usual satisfactory manner and Col. Silas Igo did a good day's work in the auctioneer's block. The following is a list of all cattle selling for $100 and over:

FEMALES.

Blackcap of Alta 5th, calved 1911; John E. Griffith, Washington, Iowa	$170
Blackbird of Inverness, calved 1905, and b. c.; John D. Evans, Sugar Grove, Ill.	115
Blackbird of Alta 5th, calved 1907; A. J. Brock, Waynesville, Ill.	180

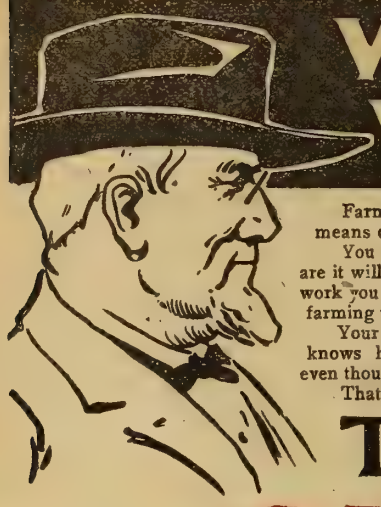
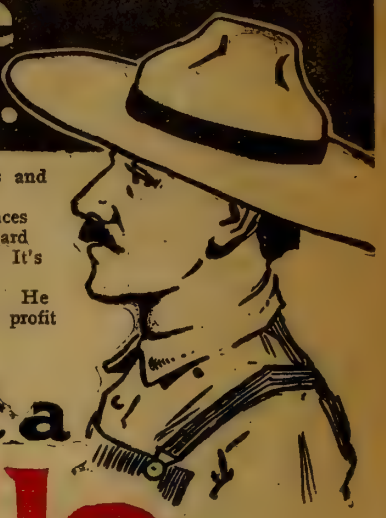
You Make a Mistake-John When You Gamble With Your Corn Crop.





Farming today should not be a hit or miss proposition. To be successful means to think, to plan, to adopt ways and means of making your crops safe even under most unfavorable conditions.

You are not doing this, John. You are gambling. Take conditions right now. Your corn was planted late, chances are it will be late in maturing. That means frost may get it first. If it does, where is your profit? What about the hard work you have done and the soil that has been robbed without fattening your pocketbook? Luck was not against you. It's farming with your eyes shut.

Your neighbor who has worked no harder who had exactly the same condition to meet, sits back and smiles. He knows his corn will be profitable because he intends to turn a part of it into ensilage which will make him a profit even though the balance of his corn fails to mature.

That's the way you should do it, John. It's the safest way and if you are wise you will

Take My Advice and Get a

Champion Silo.

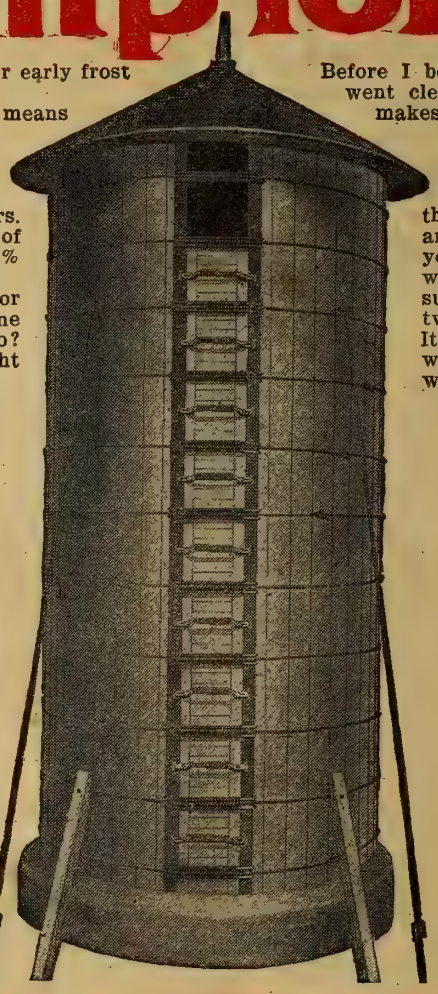
You will then be fixed so a backward season, drought, or early frost won't cause you any worry.

A Champion silo means more than just being safe. It means bigger profits from your corn land.

Why? Because from matured corn you pick only the ears. The stalks go to waste and by selling the corn or feeding it you only get market value.

With ensilage you use the stalks as well as the ears. There is no waste and where one acre produces 40 bu. of corn, the same acre yields 80 bu. in silage and silage has 25% greater feeding value than ear corn.

Those are real facts, John, and if you are farming for profit you won't pass this season without getting at least one Champion silo. Why do I recommend the Champion silo? That's a straight question, John, that demands a straight answer. It's absolutely the best.



Before I bought my three silos I made a careful investigation. I went clear to the core on cement, hollow tile, brick and various makes of stave silos.

I talked with farmers who owned different kinds. I analyzed the claims made by different silo manufacturers. I wrote to the publishers of the best farm papers. I consulted several experiment stations and when I got all through the facts proved that the Champion silo stood head and shoulders above them all. I bought a Champion three years ago. I tried it out in every way. I made comparisons with other makes in my neighborhood and then I knew for sure that the Champion filled the bill. So last year I bought two more and it's been the best move I ever made in my life. It's really the silo that every wide-awake, progressive farmer will buy who wants the best. It's the silo you will buy if you will read on and find out how it's made.

How Champion Silos Are Made

No matter what anyone tells you, take my word for it, the lumber in the silo is the life of it.

Champion silo lumber is not bought sight unseen, because the lumber expert from the Western Silo Co. goes right out to the forests and makes his own selections.

After it arrives at the factory it is again sorted before made into staves. When it comes through it shows that the hand of an expert has guided every operation. Every stave is clean and smooth, perfectly matched and finished ready to build silos that are worthy of the name Champion.

The doors are made of solid California redwood which neither shrinks nor swells.

The door front is continuous, trussed and braced with angle and channel steel. Strong, durable latch holds doors in place and forms safe ladder.

Champion silos are built from the ground up. That's why putting up a Champion is easy. Every part fits like a glove fits the hand.

Modern Improvements on the Famous Champion Silos

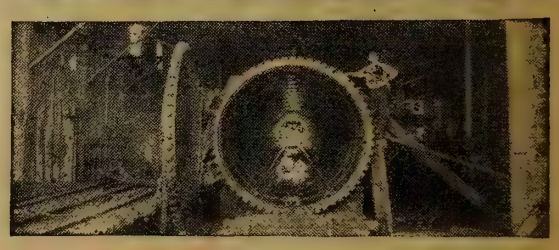
Improvements are also important features on a silo. The Champion today is as near perfect as skill and experience can make it.

The inside hoops add strength and hold the silo rigid. Champion silos are also equipped with base anchors and ground rods and ground plates.

Anchor rods are solid bar steel securely welded at the top and looped into U bolts which are bolted through 2½ in. plate on the inside of silo.

With this system of anchoring your Champion silo cannot be affected by wind or weather. Outside hoops are equipped with malleable lugs which will stand twice the strain required of them.

These and the numerous other features on Champion silos make them worth every penny they cost and from the number of Champion silos that are being put up in our neighborhood clinches my argument, John, that the Champion is the best.



Rot Proof Worm Proof — OIL FILLED STAVES — Also Proof Against Shrinking or Swelling

There is some talk about hollow tile or cement silos being best because they last longer. That's sales talk to overcome the much higher cost of these silos as compared with Champion silos.

Champion silos are permanent. They keep ensilage better. Stave silos have been in use over 75 years. That's long enough to test them. The other kind are still an experiment.

If you have any doubts about Champion silos being permanent investigate the new oil process of treating staves. It's the biggest advancement ever made in silo construction.

What is the new process? Just look at pictures then listen. The one to the left shows a load of Champion staves ready for the oil treating process.

These cars are all pushed into the air pressure drum shown in other picture. When cars are inside the drum head is closed tight, the oil is turned on and the enormous pressure of 250 pounds to the inch forces the preserving oil into the staves.

Just a minute now. Don't compare this process with the creosoting process where the staves are just dipped because on Champion silo staves the preserving oil is forced into the wood. It is made to penetrate the pores clear to the heart, making these staves absolutely rot proof, worm proof, proof against shrinking or swelling.

The next picture also tells an interesting story. It represents two pieces of piling taken from Galveston Harbor. The piece to the left was in use only one year, the other which was treated with special oil process has been in use 38 years and still good. Enough said. Champion silos treated by this oil process are permanent and as near everlasting as any material on earth.

Coupon

Western Silo Co., 100 11th St., Des Moines, Ia.
Gentlemen:—
John's case is like mine, so I want to know more about Champion silos. Send me free of charge and without obligation a piece of oil treated staves and your Portfolio of Experience.

I am going to buy a silo on or about _____

Name _____

Town _____

State _____ P. O. _____

Notice: If you have any neighbors who might be interested send their names and addresses on a separate sheet of paper and we will also send them Free a piece of stave and literature.

Send for Free Sample of Special Oil Treated Staves

Just send your name and address on coupon and say that you are going to buy a silo this year. The next mail will bring you, charges prepaid, a piece of stave treated by this special process. When it arrives take your knife and cut into it. See how thoroughly it is penetrated and you will decide on a Champion silo without further argument.

Cut Out and Mail Coupon Today

In addition to piece of stave, we will send you free, our Portfolio of Experience which tells the experience of Champion silo owners. It shows some big profits that have been made by farmers and feeders. It contains proof of every claim made for Champion silos and will be of great assistance to you in settling the silo problem.

Don't put it off. A stitch in time is worth nine. The time will soon be here when you want to fill your silo, so get facts now. Address,

Don't You Scoop!

Get this machine to unload and crib your corn and small grain. You can buy new machines—but you can't buy a new *back* or a new *body*—remember that!

LET THE LITTLE GIANT Crib Your Corn

Save Your Back, Your Time and Your Money

The "LITTLE GIANT" is the famous 4-wheel Green Machine seen everywhere at husking time. It is the only sensible practical way to get the corn and small grain into cribs. It does away with scooping—lets huskers do 20 per cent more work—gives you a chance to rest—saves lots of time, saves your back and arms—and saves many dollars that you never figured on. You can't imagine what a wonderful machine the "LITTLE GIANT" is or the wonderful work it does until you see it in action or read about it. Shelled corn and silk in the crib means rattage and molding. Our new screen feature in bottom section separates it from ear corn and saves it for feeding. Write us at once for catalog explaining it in detail and we'll tell you where you can see one.

WRITE!

You will be glad to read the many facts and figures in our book—the many letters from owners of "Little Giant"—all proving that *you* can save the hardest work of cribbing corn—that you can dump and crib 60 bushels of ear corn in 3 to 5 minutes, or 100 bushels of wheat, oats or shelled corn. Don't you scoop this year—don't ask your men to either. Let the "Little Giant" save health and strength and a big lot of cash money besides. It's the most practical investment for the *business farmer*—built to last a lifetime—big capacity, triple geared, conveys grain to any part of the crib and has many other advantages that place it far in the lead. Write your name on a postal and mail to us at once for catalog and all facts. Do it now and you will be sure you have taken the first step towards eliminating the back-breaking work of scooping. If you are going to build or remodel your cribs. Ask for our **Free Crib Plan Book.**

DOES YOUR Harness Need Mending?

SEEDING, corn plowing, haying, harvesting and threshing are all destructive to harness. No doubt your harness needs mending. Anyone can mend his harness with my Speedy Stitcher. The broken part will look just like a harness maker had mended it.

The Speedy Stitcher is the latest invention and the most effective of anything in the form of an Automatic Sewing Awl ever offered. Its simplicity makes it a thoroughly practical tool for any and all kinds of repair work, even in the hands of the most unskilled. With this Awl you can not only mend harness, but shoes, tents, awnings, pulley belts, carpets, saddles and suit cases.

The Speedy Stitcher is provided with a set of diamond-pointed, grooved needles, including a special needle for tapping shoes. It also contains a large bobbin, from which the thread feeds. Both needles and bobbin are enclosed inside the handle out of the way. This Awl has a tension which enables you to tighten your stitch. These valuable features you will not find in any $1.00 Awl.

MY BIG FREE OFFER

I will give one of these excellent Speedy Stitchers absolutely free to anyone who will send me $1.00 for one year's subscription to The Homestead.

Kindly use the coupon below and be sure to send your order in today before you forget it.

CUTTING DOWN THE EGG LOSS

Model Egg-breaking and Freezing Plant Established, Under Government Supervision, at Sedalia, Promises to Minimize a Loss Now Approximating Many Millions.

FOLLOWING suggestions made by United States officials, the Murray-Schmidt Poultry and Egg Company, at Sedalia, Mo., have constructed and equipped the only model egg-breaking plant in this country. It was opened for business with considerable formality in June, attended by a number of government and state officials, poultry dealers from several states and by a large number of physicians who have become interested in the advisability of recommending sweet frozen eggs in place of the popular "fresh eggs" for their patients in the hospitals.

The plans for the model egg-breaking plant were drawn up by H. C. Pierce, chief field officer of the Food Research Laboratory of the Bureau of Chemistry, which has its headquarters in Philadelphia, under the direction of Dr. Mary Pennington. Mr. Pierce and four assistants will remain at Sedalia for at least a year, studying the egg-handling business in every movement from the producers to the consumers. Miss Mary K. Jenkins, assistant bacteriologist for the department, has spent several days at the plant and will make frequent visits to it during the coming months to make bacterial tests. However, the plant is not working under government inspection as the live stock packing plants do, but the management has spent about $6,000 in constructing and equipping the plant for this work and is co-operating with the government in working out a process for saving millions of dollars' worth of eggs for consumption which annually have heretofore been a total loss. The preventable loss on eggs in the United States is estimated by the government to be at least $45,000,000 annually.

The room is 24x28x12 feet high. Walls, floor and ceiling are of hard cement coated with white enamel, so constructed that there is not a corner in the room for dust to lodge. The windows are all on the north and are of double construction with an air space between to help keep out the heat. The outer windows are of prism glass to throw the light into the back of the room. The temperature is maintained at 60 degrees, by a system of air circulation radiating from a distributor near the ceiling. The air is washed and then cooled to proper temperature in another room and forced into the breaking room by fans. The girls enter the room through a double vestibuled hall, connecting with their cloak and rest rooms where they remove their outer street clothing and put on white dresses and white caps before entering the breaking room. The caps are required to prevent any dust in the hair falling into the broken eggs. Four washing fountains in the room, provided with foot control, are used by the girls to wash their hands before beginning work and as often as necessary to remove any odor of a musty egg broken by them during the day. The foot control is used to keep their hands from coming in contact with any object which might carry bacteria to their fingers after same had been washed. Each young lady wipes her fingers on a sterilized towel before breaking each egg, so that bacteria from the egg shell of one egg will not be communicated to the contents of another egg.

All of the utensils are sterilized before being used and if an egg is broken which is the slightest off odor, the contents of the cup are thrown into the tanners' grade and the utensils are all sent back to the sterilizing room to be purified. In this room the glass cups are scrubbed out with boiling water by electrically driven brushes, dried and then placed in the sterilizing oven.

The eggs used are the very large or small sizes which are not suitable for packing in the standard grade; "checks" and "breaks" which are discovered in the candling room; and dirty eggs sorted out of the large quantities handled daily by the company. No inferior or second-quality eggs are broken knowingly, and when one is discovered by the careful inspection of each broken egg, the contents are dumped into the tanners' grade. By breaking the "checks" and "breaks" near the source of production, the contents are practically all conserved in first-class condition, whereas if those same eggs had to be placed in crates and shipped to Philadelphia or New York, which are the ultimate destination of the surplus production in the Mississippi valley states, the entire lot would be in very bad condition upon arrival at market, but the commission man and the railroads would have to get their charges out of the lot just the same as if they had been perfectly good eggs, and that expense together with original cost has to be added to the selling price of the salable eggs, greatly increasing the cost of living. The dirty and odd-size eggs will bring more money in the frozen condition than if they are handled in the shells, and under the rigid precautions taken in breaking and freezing them will be worked up into food stuff freer from contamination with bad bacteria than the same eggs handled in the usual way and broken as needed. The capacity of the breaking room is 144,000 eggs per day, the girls working eight hours a day, six days a week.

The egg shells weigh about a ton per day, which so far has no value as a commercial commodity, but the experts have under consideration a plan to place the shells in large presses and squeeze out all moisture which can be used by the tanners, and then the dry shells can be ground and sold back to the poultry raisers as a concentrated shell material for their hens. The company handles more than 600 cars of eggs each season, making a total of 86,400,000 eggs, gathered from the farms in Missouri, Iowa, Kansas and Nebraska. During the laying season a hen averages an egg every other day. On that basis it would take 86,000,000 hens two days to lay the eggs handled by this firm. A normal egg is two and one-half inches in length and all of the eggs listed above, if laid end to end, would reach from New York to San Francisco, a distance of three thousand and two hundred miles.

YOUNG LADIES WORKING IN THE MODEL PLANT AT SEDALIA BREAKING EGGS FOR FREEZING IN THIRTY-POUND CANS AND SHIPPING ALL OVER THE COUNTRY.

THE HOMESTEAD

A PRACTICAL JOURNAL for the FARMER, STOCKMAN, FRUIT GROWER, POULTRYMAN, GARDENER, and HOUSEKEEPER

BY JAMES M. PIERCE

JAMES ATKINSON, Editor-in-Chief

ESTABLISHED IN 1855

Entered at Des Moines Postoffice as second-class matter

PUBLISHED EVERY THURSDAY

SUBSCRIPTION RATES—Single subscription, $1.00 a year. In clubs of ten, 75 cents a year and an extra copy to getter up of club. In clubs of fifty or more, 30 cents a year. Single subscription three years in advance, $1.50; five years in advance, $2.25; ten years in advance, $4.00. Subscription price in Canada, $1.50 a year. Remit by draft, registered letter, postoffice or express money order. In changing address, send both the old and new addresses. In renewing, give the same name and initials as you gave before or state both the old and new names, and explain why you make the change. In case of errors or failure to receive the paper within two weeks, promptly notify the publisher. Address all letters to

THE HOMESTEAD COMPANY,
Des Moines, Iowa.

FOURTH OF JULY, 1913.

Unusual interest and sentiment attach themselves to Fourth of July this year. In a little Pennsylvania town of 4,000 inhabitants more than 40,000 men are assembled this week. They are grizzled and wrinkled; many lean heavily upon a cane; some go about on crutches; on some the hand of Death will shortly be laid. There will be casualties before these men leave the hospitable little town where they are now welcome guests. The Grim Reaper is hovering near, for these men have passed the allotted period of three score and ten; their race is almost run.

Fifty years ago these men were in the full flower of rugged manhood. They were the pick of the North and of the South. They had come from the farm, the factory, the store and the school and confronted each other from Seminary Ridge and Cemetery Ridge, from Peach Orchard and Big Round Top, with the lust of fighting in their brains, these men who had been brothers under the stars and stripes so long. There were men there whose names are illustrious today on history's scroll: Meade, Lee, Hancock, Longstreet, Sickles, Pickett. Men on horseback dash to and fro madly; slowly the columns take up the line of march or quickly they swing into formation and hurl themselves against the enemy, to be mowed down like grain before the reaper. Cannons belch their death-dealing charges and the flower of young manhood withers and sears before the devastating blast. Night falls upon wheat fields soaked with blood, upon orchards bearing only dead and distorted bodies, upon meadows where men have herded like wild beasts seeking each other's throats and life blood.

It is here, after almost a half century of peace, that 40,000 men who wore the blue and who wore the gray are assembled this week in peaceful reunion. The battle field of Gettysburg is sacred ground, never more sacred than this week, when the semi-centennial of the great and decisive battle of the civil war is being celebrated by the men who fought under Meade and under Lee. It is this which gives to Fourth of July this year more than the usual interest and sentiment. The red upon the flag means something this year; it is the blood of heroes soaked up from the field of Gettysburg. The stars mean something this year; they shone out for three July nights fifty years ago and gave the living new hope as they lay among the dead on the battle field. The flag has a more sacred look this year, for it shines over the reunited country which will never again know a Gettysburg of hatred, but always a Gettysburg of peace and union.

There is no field of waving golden grain or of upshooting green blades vast enough or important enough, no matter how many millions of mouths may be dependent upon it for food, to stand as a barrier between the patriotic American farmer and a celebration of this day with all its memories and meanings. As never before, Fourth of July this year is an institution, rather than an occasion. It is meet, therefore, that on the farm, as in the town, men should make of the day one of gala rejoicing and rededication to patriotic ideals. It is only by such days and such spirit that the sacrifices of fifty years ago can reach their full fruition.

CANVAS-CAPPING SMALL GRAIN.

A Missouri subscriber strongly endorses the plan of using canvas covers on grain shocks. In a communication on this subject he says:

The first cost of canvas caps for small grain is the bugaboo which unnerves the farmer when he comes to taking this modern, up-to-date step in saving his oats, wheat, etc., but we must remember that these caps will, with proper care, last for years and years, so that the initial cost will be lost sight of in the wonderful economy they prove.

Canvas caps are much less bother and can be put on the shocks with less labor than the old, cumbersome method of capping with a couple of bundles. After the field is in shock, simply load the canvas caps into a wagon, drive along the rows, and arrange the covers as you go. Small stones, light pieces of wood, or anything else available, should first be tied to each corner of the covers, to hold them down.

By capping the small grain with canvas, we avoid the drying out, bleaching and shattering of the grain. Where the grain is exposed to the action of sun and wind, it will forfeit sufficient moisture to cut down the weight per bushel considerably; while the quality of the product will be impaired by such processes. These caps also add to the brightness and value of the straw. The effect of sun and wind on small grain after a rain has caught the product in shock is especially damaging if it is not protected by these canvas covers, as the thorough soaking, then exposure to these elements, causes excessive and very rapid drying out.

Then, with good canvas caps on the small grain, we avoid the danger of the shocks being blown over, as the smooth surface of the covering gives the wind no place to get a hold on the sheaves. Where shocks are left open, or capped by the old method, many of them are blown over before threshing time; these usually are neglected, rain falls on them, and mold results. Sometimes the sheaves reach the damp earth and in such case, there is a total loss of the grain by rot. All these damages make it impossible for one to thresh a uniform product, as some of the bad grain is sure to be overlooked and put in with the first grade. This results in a lowering of the grade in the whole crop.

Other economical points in favor of the canvas caps are: Protection from birds; straight, well-formed bundles to handle at threshing time; and prevention of destruction by insects. The continued foraging of birds, insects, and many times the farm poultry, on our grain fields, amounts to something that would surprise the farmer if he could know the full extent of such depredations. We thus realize not only a big saving of valuable grain by the use of canvas caps, but the product thus harvested will be of higher grade, and when put on the market, will command a premium over that of the man who handles his grain by the old method of capping. The quality and productiveness of grain can even be improved from season to season where this system of capping is adhered to, as the seed will be of superior germinating powers when thus protected, and will propagate stronger, more vigorous plants than that which is carelessly handled from the time it is bound till threshing time.

Unquestionably considerable loss results from the ordinary method of handling grain in the shock. The plan here suggested has not up to the present time been extensively carried out in the corn belt and the word of this subscriber must be taken at this time for its practicability. There is no question but what covering will improve the quality of small grain and even increase the weight per bushel because, as a matter of fact, the bleaching that ordinarily takes place in the shock lessens the weight of the grain and impairs its quality.

MASONS HONOR A FARMER.

Nothing more conclusively proves that the farmer is emerging from the isolation in which he was all too long segregated than the election of a present actual and operative farmer as grand master of the Masonic lodge in Iowa. The man upon whom this honor was conferred by the oldest and one of the most highly esteemed of all the secret fraternities is Frank B. Whitaker, who has resided in the same county, Van Buren, ever since he was two years old (now almost a full half century) and who has been a farmer, actively and continuously, ever since he became of age. By being eminently successful in tilling the soil and at the same time in engaging in social intercourse with his fellow man, both in town and country, he has set an example which might well be imitated by other farmers.

The fact is, as this Masonic election shows, the farmer is coming to occupy a more commanding position nowadays, in all lines of endeavor, than ever before. And this is only right and proper. The farmer is no longer "only a farmer." The farm is a factory in which the raw material of the seed is converted into the finished product of the crop. Therefore the farmer is a manufacturer. The farm is a great business institution, in which dollars and cents must be balanced with nicety to insure profit and progress. Therefore the farmer is a business man. In his contact with fellow farmers and with city men, the farmer gets first-hand experience in questions running the gamut from law to medicine, from ethics to ethnology. As a result the farmer is becoming more and more an all-around student of public affairs in their relation to the individual. We find this idea well expressed by the editor of a daily newspaper in the state, who points out that the farmer is pushing the lawyer and the city professional man aside as he takes commanding position:

Lawyers have been pre-eminent in holding official station. This has been natural and logical. They are, as a rule, parliamentarians and are versed in the art of public speaking. Naturally they make excellent presiding officers. Doctors, teachers, merchants, bankers and others come along close to the lawyers in the development of some skill as speakers and presiding officers. The farmers, as a class, have not been counted strong along these lines, and for this reason have not been so frequently promoted to such places as presiding officers in such organizations as the Masonic grand lodge. This election, therefore, must be counted as marking something of a new era in these lines. It marks the entrance of the farmers into the ranks of men working in other lines as equal competitors for places requiring skill as parliamentary leaders and presiding officers.

The Masonic fraternity is to be congratulated upon turning to the farm; the farm is to be congratulated upon producing a man of the caliber and solidity of worth to be entitled to the high honor won by Mr. Whitaker. His election marks the dawning of a new day, a day bright with promise of enlarged usefulness and enlarged pleasures for the farmer.

MANURE FOR ALFALFA GROUND.

Those who propose to make a beginning in alfalfa growing this fall should keep well in mind the virtue that is found in farm-yard manure when it is applied to a soil which is to be used for alfalfa. Half a stand of alfalfa is of no value whatever and those who have had the most experience with this crop are the loudest in their claims of what can be accomplished by an application of farm-yard manure. If a small-grain crop is now growing on the ground intended for alfalfa the manure should be applied to the stubble land after harvest. Follow this up by a good, deep plowing and in turn put considerable work on the surface in order to get the soil as firm and fine as possible. Few instances have been recorded where a sweet, well-drained soil failed to produce nodules on alfalfa roots when an application of farm-yard manure has been made to the land.

A few years ago an instance was called to our attention where a coating of manure was plowed under after the removal of a crop of millet and in addition seven tons of manure per acre were applied just previous to sowing the alfalfa, this being worked into the surface soil by the free use of the disk. The field handled in this way cut three tons of alfalfa the first time the year following. Alfalfa was an experimental crop on this farm, but nodules in abundance were produced on the roots, showing undoubtedly that this favorable infection had been carried to the field with the manure.

THE HAY LOADER FOR ALFALFA.

One of our Lyon county, Kan., subscribers asks for some information on the use of a hay loader in alfalfa. This subscriber has built a barn in which to store the most of his alfalfa crop, and if a loader would handle alfalfa hay successfully, he would buy one to use in saving the labor of loading on wagons in the field, the barn not being near the field so the hay could be brought to it with sweeps.

The modern hay loader handles alfalfa successfully and with less shattering and loss of leaves than when pitched by hand, but it is not advisable to use it in the swath, for the simple reason that the hay will dry and burn in the swath before it can be taken up with the loader. One should rake in small-sized windrows, either with a common or a side delivery rake, and load from the windrow. The reason we say small-sized windrows is to give the man on the load time to handle the stream of hay the loader puts up to him, for it comes up the size of the windrow. If this is too large the man on the load cannot handle it, even with a slow-walking team pulling wagon and loader. As far as the loader itself is concerned, it will do the work of taking up alfalfa and will put it up on the wagon in a very satisfactory manner, leaving practically no scatterings in the field unless the windrows are scattered out wider than is the loader. The hay loader is a great labor-saver where hay of any kind has to be loaded on wagons in handling.

THE SUCCESS OF NEW IDEAS.

The corn-fed steer of the northern part of the grain belt confronts a new rival: the peanut-fed steer of the southern part. The experiment of fattening cattle and hogs on "goobers" is being successfully tried out in Oklahoma, where a much larger area than usual is planted to peanuts.

A writer in one of the daily newspapers calls attention to the interesting changes that the past decade has seen in this all-important matter of stock feeding. The old grass days have been succeeded by these piping times of agricultural prosperity when the ingenuity of man is discovering new feeds almost every day. Thus while throughout Montana, Wyoming and Utah cattle are rarely fed on anything except grass, in the San Luis Valley in Colorado, a valley some 200 miles long and fifty to sixty miles wide, stock is fattened for the market (and particularly is this the case with lambs) on cowpeas. In other parts of the west grasses and grains are supplemented or displaced by products of the crushed and ground cotton seed. In the sugar beet districts of Kansas and Colorado cattle are fattened on beet tops and the refuse of the beets after the sugar has been extracted, known as sugar beet pulp. The writer in the daily newspaper continues the story:

A good many feeders in the corn belt use ground alfalfa, sweetened with molasses, enough of the latter to hold the ground feed together. They, too, have a market name and are known at markets as "molasses steers." In the distillery and brewery sections of Illinois, Kentucky, Pennsylvania and other states a large number of cattle are fattened each year from the refuse of the hops, rye and other grain. This feed comes to the cattle, which are quartered in large barns, in mash form. Between 160,000 and 200,000 such cattle were marketd in Chicago and the East in the last two months under the description of "slop steers."

Now, all this long list of feeds is being augmented by peanuts, not only the nut but the whole vine being fed to the cattle, hogs, sheep and horses. Advices from Stephens county, Oklahoma, are that the experiment is meeting with good success, stock fattened on this feed selling as high as that fattened on grain.

The moral of the whole story is that agriculture is reaching such a high development that the farmer is no longer dependent either upon the machinery or the ideas of yesterday in order to still further advance the science of farming. The department of agriculture has scouts all over the world seeking new products that can profitably be transplanted to this country. The ingenuity of man is being exercised to the utmost to devise new methods of cutting down farming expenses and making every minute, every effort and every thought count double what they did yesterday. Stories of crop failures are offset by stories of crop successes. The whole farming story is a tribute to the indomitable energy of the man who goes forth into the fields each day with unlimited possibilities beckoning him and giving to farming not only a profit but a zest.

Hot weather is "bully for the corn" all right, but it is not the kind of weather that makes the hogs happy, even with the best of care. An open shed where the hogs can get the advantage of every little breeze and be protected from the sun is as good as a palace for the hog on a hot day.

To Control Hog Cholera

NATIONAL, state and individual co-operation to control and ultimately to check hog cholera is the program of Dallas county, Iowa. A campaign, starting this week, will serve as an object lesson to the rest of the country, several crusades in other states being dependent upon the success of the work in Dallas county.

The work is to be carried on along three distinctive lines: First, administration of serum by government experts; second, maintenance of quarantine regulations by the state veterinarian; third, educational work among the farmers themselves by the extension department of the state agricultural college. Altogether it is expected to spend fully $40,000 in Dallas county during the next few weeks, this being the first county in the United States in which the work has been carried on in this three-fold manner of co-operation. That the work is necessary and the immense expense justified is shown by the fact that during the past year more than $65,000,000 worth of hogs has been killed by cholera in the United States, this being a loss of close to one billion pounds of pork, or eleven pounds per capita, the Iowa share in this vast loss being 150,000,000 pounds of pork, or sixty-five pounds to a person.

Dr. W. B. Niles, government expert stationed at Ames, will supervise the experiments, with Dr. O. B. Hess, of Washington, D. C., in charge of the field work. It is not proposed to vaccinate all the herds in the county, Dr. Niles outlining the plans by saying: "When cholera appears in a herd we will treat the hogs before the disease spreads. Near-by herds will be immunized. The farmers will be expected to permit us to treat their herds, notify us at once if cholera is present, let us decide whether treatment should be adminstered, and, in fact, put their herds in our care." Dr. Hess will have two assistants in the field throughout the summer, believing this force sufficient to take care of cases the same day they are reported, or by the next day at the latest.

The quarantine will be in charge of Dr. James I. Gibson, state veterinarian, who impressed upon the farmers of Dallas county at a meeting last week the importance of submitting to strict quarantine regulations. "This is the time of year cholera naturally begins to make its appearance in herds," he explained. "It is necessary that a herd be quarantined when the disease appears or cholera will spread over the entire township, eventually over the county." Not only will the infected herds be quarantined as far from the roads as possible, in order not to spread the infection to passing animals, but steps will be taken to prevent the shipment of infected stock and to disinfect stock cars.

The educational work will be in charge of Prof. W. J. Kennedy, of the extension department of Ames, who announces that a special bulletin dealing with hog cholera, its treatment and prevention, will be distributed among the farmers of Dallas county within a few days. Three veterinarians from the college will be in the county throughout the entire summer, talking hog cholera in every schoolhouse in the county and mingling with the farmers at their homes, giving them practical advice. The work began last week when Dr. H. E. Bemis, of the veterinary department at Ames, delivered the initial lecture on hog cholera in one of the public schools. The menace of the pigeon, the crow and fly as conveyers of cholera germs will be pointed out in this educational campaign and everything possible done to instruct the farmers of Dallas county in the work of putting a stop to the transmission of cholera germs.

The initial steps for the campaign were taken at a mass meeting held in Adel last week, attended by government experts, a number of the faculty of the state agricultural college and several score of Dallas county farmers. Dean Curtiss pointed out that if the work planned for Dallas county had been carried on throughout Iowa generally last year a saving in the state of between $5,000,000 and $10,000,000 would have resulted. Co-operation between the federal experts, state authorities and individual breeders is relied upon to put a stop to the ravages of the disease, the losses from which have already reached an immense total.

SOME VALUABLE SUMMER CROPS.

Those who are in a position to convert considerable part of their corn fodder into ensilage are not specially interested in the production of midsummer crops. However, as the man who owns the silo is the exceptional individual in every community what is here said will interest the great majority of our readers. There is still sufficient time to sow crops that will add immensely to the supply of roughage to be available during the winter months. Feed lots that have been eaten down and that will, therefore, produce little or nothing during the remainder of this summer can be used to very great advantage in growing such crops as cane, millet or rape.

Cane seeded at the rate of from sixty to eighty pounds per acre many times during the latter part of June or the first ten days in July will ordinarily mature a crop sufficiently to produce ideal fodder. One point that must be kept in mind at the time of sowing is to be sure that there is sufficient moisture in the surface soil to germinate the seed, otherwise the seed will simply be wasted. In any event it is a good plan to cover the seed somewhat deeply because even in the case of light rains the immediate surface dries out quickly and an inch or two of soil covering will always be favorable to a good stand.

Millet is a good summer crop, though not as heavy a yielder as cane or sorghum. Seeded at the rate of three or four pecks per acre it should produce anywhere from two to four tons of cured hay and if it is cut shortly after it is headed the hay may be used for practically all kinds of stock.

Rape is entirely different in its character from the two crops that we have mentioned and it is adapted for pasture purposes only. It may be seeded any time in June or July with reasonable expectations of getting a good growth providing there is sufficient moisture to germinate the seed. A beginning may be made in pasturing it usually in the course of five or six weeks after seeding and as it is a hardy crop stock may be kept on it right up to the time when the ground freezes. Rape is usually endorsed as a crop to be pastured by hogs, but as a matter of fact, if it is sensibly used cattle may be pastured on rape with most gratifying results providing they have access at the same time to good blue grass or to a mixed clover and timothy meadow.

In some cases it is entirely practicable after the removal of early oats or winter wheat to prepare the soil for either one of the crops that we have mentioned. It goes without saying that there can be no great delay in curing the grain crop if it is the intention to carry out this plan. Sometimes grain is shocked in such a manner as to permit plowing most of the land and the seeding of the same even before the shocks are removed. Where roughage is likely to be scarce or the hay crop short this plan is well worthy of consideration.

FORCING CALVES TO THE FRONT

A former Iowan, C. O. Kaiser, now from the Panhandle, Texas, has demonstrated what can be done with a combination of good beef-cattle blood and sensible feeding methods. Mr. Kaiser has recently sent to the Kansas City market ninety-three short yearlings, these ranging in age from twelve to fifteen months, and realized for the best of them an average of $86.85 per head. These yearlings, though in reality just calves, were weaned last November and from that day until the period of marketing they received kaffir corn ensilage, ground maize, together with a small proportion of cottonseed meal, and a little sorghum for dry roughage.

On this ration twenty-six of these calves attained an average weight of 965 pounds and sold at nine cents per pound on the Kansas City market. Forty-one of the steers weighed eighty-seven pounds and sold at $8.85, or an average of $77.61 per head. The heifers in this lot weighed 689 pounds and sold for $8.85 or $60.97 each. At weaning time these calves weighed practically 400 pounds, so that the best of them gained approximately 100 pounds per month until they were finished. These calves were carried so as to preserve their baby flesh and the record made in this instance is one that should be an example to every corn-belt farmer who has the slightest impulse or inclination to raise and market his own beef cattle. Not only were the gains satisfactory in this case, but as ensilage constituted the bulk of the food consumed after weaning, the gains were made at a minimum cost and this is another matter which should sink deeply into the hearts of the corn-belt farmers.

ANIMAL HEALTH REGULATIONS.

Through the office of the state veterinarian, the Animal Health Commission of Iowa have promulgated a revised set of regulations governing the introduction of live stock into the state. These restrictions are more severe in their requirements than any that have heretofore existed. They apply to horses, cattle, sheep, goats and hogs, and demand that a certificate of health accompany each animal brought into the state.

At this time the ruling concerning the treatment of hogs to be exhibited at fairs is of interest. It provides that all hogs to be exhibited at any fair in the state of Iowa, whether it be state, county, district or a mere neighborhood exhibition, shall have been immunized with the Dorset-McBride-Niles anti hog cholera serum and that a certificate of such vaccination signed by a veterinarian accompany each animal. If the vaccination is made with serum alone the certificate must show that the operation has been performed within thirty days from the date of the fair at which the hog is to be shown. If the simultaneous method is used the certificate must show that vaccination was made not less than thirty days prior to the date of show. Exhibitors at the Iowa State Fair may have the vaccination done at home, or, if they prefer to do so, may be cared for under the supervision of the state veterinarian on the fair grounds. It is quite probable that a small charge will be made to cover actual cost of serum if the vaccination is made on the fair grounds. The regulations, while insisting upon vaccination, permit the owner the option of the single or double treatment. Hogs which have recovered from an attack of cholera must be vaccinated just the same as those which have not been affected.

In the case of dairy and breeding cattle the animals over six months old brought into the state must be accompanied by a health certificate including the record of tuberculin test. It is required that this test and inspection be made not more than thirty days prior to the day of importation. Steers and cattle intended for immediate slaughter are not subject to inspection.

Certificates of health must originate either from the federal, state, or assistant state veterinarian, or from a graduate veterinarian who has the endorsement of the state veterinarian. It is required that three copies of the certificate be obtained by the owner of animals that are inspected.

When shipped one is attached to the way bill, the duplicate sent to the state veterinarian at Des Moines, Ia., and the third one forwarded to the state veterinarian or live stock authority of the state from which the stock is being shipped.

Several new strains of winter and spring wheat on the experiment plots of the college of agriculture of the University of Wisconsin have heads well filled with heavy berries, borne on straw that stands up well, promising large yields. Selected heads of ten of the most promising strains have been reserved for further breeding in accordance with the practice of the college, and selections will later be made of the best heads of new strains of spring wheat.

Stop Grain Waste And Money Loss

Thousands of these portable, rust proof granaries now in use. Everyone giving satisfaction.

2 GRAIN BINS IN 1

THE NORTHFIELD BIN AND COMBINATION CORN CRIB

Can be partitioned to store 2 or more kinds of grain at once. The Northfield combines all good features found in other makes and has several new improvements.

Saves More Than Its Cost Every Season

Costs but a trifle more than wood and is permanent. Insures your valuable grain against fire, dampness, rats, thieves, etc. It will dry out and preserve your grain better than the best wooden bin. Is ventilated through floor and sides, under eaves and by cupola. Holds flax or any small grain and is easily converted into a vermin proof corn crib. Anchor bolts make it wind proof. Only bin with a perfectly smooth rain proof floor. Side and floor sections connected by patent interlocking cleats. Easiest and quickest to set up. Sections all interchangeable. Cannot get mixed. The heaviest bin of its size. Built to stand rough usage. Most reasonable in price compared to its weight.

Sold on 30 Days' Trial. Satisfaction Guaranteed

Write direct to factory for FREE samples of sheet metal, catalog, prices and easy payment terms.

Northfield Iron Company,

118 Water St., Northfield, Minn.

—can't rust, break or wear out. Costs no more than wood—lasts forever. Portable. Big door and convenient spouts. Send name on postal now for interesting booklet and low prices. Address

Bushnell Tank Works, 700 Dean St. Bushnell, Ill.

FARM FURROWS

TURNED BY A PRACTICAL FARMER

There may be many easy ways of killing morning-glories in the corn field, but I have never learned any easy way. My way is to stop my team when I find a bad patch and pull them up with as much of the roots as I can get. This usually checks them for a while.

As the roads dry up and become smooth the automobile fever breaks out among the farmers. There are about twenty autos owned by farmers in the township in which I live. If this indicates anything it indicates that the roads will be looked after pretty closely in the future.

The call for volunteers for the clover brigade was unusually well answered this spring. Cows, clover and corn have carried many a family over the financial seas.

The apple crop is not quite what it promised to be at the blossoming stage, but the trees are still pretty well filled with young fruit. An apple crop that breaks down the trees is not a thing to wish for.

A well-made board gate is a thing of beauty and a joy so long as it lasts, but it cannot compete with the all-steel gate, either in service or beauty. The main beauty about any gate is its ability to turn all kinds of stock.

No farmer would use a stirring plow that does not scour, and the same rule should hold good with the corn-plow shovels, especially the first two times through the corn. Weed killing is the main object at this time, and it takes a sharp, clean shovel to do clean work.

The early bird may possibly get the worm, but it is a mistake to make this an excuse for rushing into the field when the ground is wet and soggy, either for planting or cultivating. It is crops, not worms, that we are after.

The neighborhood celebration is more the rule than when I was a boy, —and everyone went to their near-by town on the day of the glorious Fourth. The firecracker and pin wheel are also going out of style.

There is a theory that corn is not growing its best until it curls in the heat of the day. It does corn no hurt to curl when small, but it gives me somewhat of a pain to see it curl at the earing stage, and when it does not uncurl during the night there is reason for still more concern.

Deep cultivation of corn is not always the thing, although I believe in it when there is plenty of moisture in the soil. After a loose mulch has been made by a deep cultivation, I do not believe in going down below it in dry weather. Of course, a heavy, packing rain disarranges all plans and causes us to change face in a few hours.

I am going to keep a close watch on a concrete silo made by a neighbor. It is certainly a fine piece of work, costing $750, and looks as if it might stand for ages. Even the feed chute is of concrete, nicely rounded to look the best.

The shortage of cattle is going to be overcome slowly. It will be years, if at all, before there will be a surplus, simply because so many farmers who used to keep beef cattle are now devoting all their energy to dairying, and veal the calves. Perhaps we ought not to sell so many veals, but so long as it is highly profitable to do so, we'll do it just the same.

So far this has been a great alfalfa year. Both the first and second cuttings have yielded heavily. Seasonable rains will easily make two more good crops. Alfalfa is certainly great. No other crop turns off from three to five yields in a season.

Asking a farmer to produce more that he may sell it cheaper does not appeal very strongly to the farmer. To him, it looks like a case of working harder for the same money.

The orchard makes a good hog pasture as far as the hogs are concerned, but it is hard on the orchard. If you want to get rid of the trees not quite so quick as by girdling them it can be done by fencing the hogs in the orchard.

A cycle of dry years brings on a heavy crop of insect pests. Such insects as chinch bugs, Hessian fly, grasshoppers and the like have been increasing from year to year, for the past three years. We need one year of floods to rid the country of the increasing insects, although a more moderate rainfall would be better for all else.

Recent rains have put new life into everything green, and everybody, except a few automobile fiends, are happy.

Twine is generally higher in price this year than last. While the grain crop, the country over, will not take as much twine as usual, more and more is being used each year on the corn crop. The silo has increased the use of twine greatly, and now it would not surprise me to learn that more twine is used on the corn harvest than on the small grain harvest.

Each decade seems to add some necessity to our mode of living. This necessity frequently comes first in the form of a luxury, but soon develops into the necessity that people find it to be. Who among us would like to get along without rural mail delivery and telephone? I heard a farmer say, the other day, that he now considered his auto a necessity.

The oat crop is one that has a great come-out to it if the weather is only favorable at heading and filling time. I have seen a miserable looking prospect make a fair yield just because there happened to be a week of good weather at the right time.

Road grading should be done before the first of August. If done later in the fall the grade hasn't time to settle before winter, and rains keep it a mud lobby all winter, except when frozen. Road officials should do grading first and culvert work later in the season.

This is another good hay year. Taking the country over, I doubt if the crop has been beaten by any other in the past ten years. I plan on feeding all hay on the farm, so the market makes little difference to me, but I would like to see those who do sell get more than they likely will get for this crop.

It is not only annoying but expensive to plant seed that does not grow. Now and then seed sent out by seed companies will not grow, as I have found out through experience, but I am glad to say that reliable seed houses are more and more careful each year in making germination tests of all seeds handled by them.

There is a great difference in the work of shockers; some men take pains to set each bundle down solid, while others simply throw the shock together. I have even seen men stand off and throw bundles against the shock, and the first wind blows such shocks down. It pays to do a good job of shocking, for the weather is "catchy" at this season of the year and several rains may fall while the grain is in the shock.

The Heider Tractor Again Leads Them All.

Runs Successfully on Either Gasoline, Motor Spirits or Kerosene

We have solved the fuel problem successfully. A simple device permits the use of either Gasoline, Motor Spirits or Kerosene at all speeds and puts our tractor in a class all by itself. A gallon of kerosene runs the Heider Tractor longer than a gallon of gasoline, and develops the same power, thereby doing the same work at less cost than any other tractor on the market.

HEIDER TRACTOR

The Heider Tractor Pays for Itself.

Its 4-cylinder motor, light weight, great power, simple operation, economical fuel consumption, make it the best, most practical, all-purpose one-man tractor manufactured. Investigate before buying. Write today for free book on Tractor Farming.

HEIDER MFG. CO., 270 Main St., CARROLL, IOWA.

Ertel's Cyclone 3-Stroke Self-Feed Hay Press Bales with least labor

WILL BALE 20 TONS OR MORE A DAY AT COST OF ONLY 40c A TON.

Make big money baling for your neighbors after yours is done.

The Cyclone is powerful, durable, repair-proof—made almost entirely of finest steel. Unbreakable steel baling chamber, adjustable tension, makes smooth, clean, tight bales, 75 to 125 lbs. as desired. Three strokes each circle. Self-feed. Works at stack, barn or windrow.

Here's the biggest money maker you can buy. Low price. Free trial and absolute guarantee on every press. Write today—full information free.

A New Deal in Silage Cutters

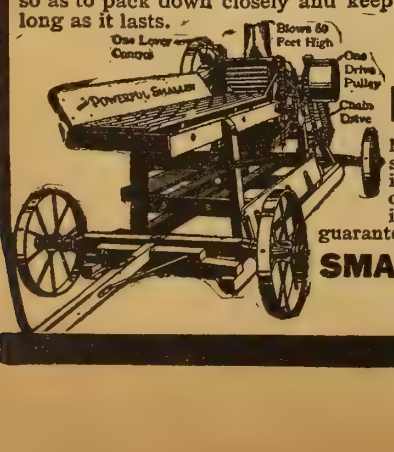
Silo scene on O. D. Jenkins' farm, near Sedalia, Mo.

17 outfits sold at Sedalia last fall.

Yes Sir! **A new deal!** Not the old-fashioned **slat-apron** cutter that keeps a whole crew of men busy feeding it, but a **modern, up-to-date** cutter, a **SELF-FEEDER.** All done by the powerful **Grip Hooks** which cram your fodder into the knives. **Fills** the Silo in a hurry, too, no matter if it's twice as high as your house. No coarse, uneven silage. All cut fine and even, so as to pack down closely and keep fresh as long as it lasts.

Four-fifths of all Silo owners use Smalleys. The other one-fifth would also have bought Smalleys if they had known the **facts.**

Mr. Charles Spayde, of Humboldt, Iowa, says: "We cut over 1,200 tons of ensilage the fall of 1911 and about 350 tons last fall. Cutter worked fine and we are now using it to cut all of our dry feed."



Powerful Smalley Force-Feed Silage Cutter

handles **oats, peas, alfalfa,** as well as green silage. (Alfalfa Grinding Screen for making Alfalfa meal can be attached.) Only one drive pulley on Blower Outfits. No idler to bother with. Ten per cent steel guaranteed in all foundry castings. No oiling by hand—hard oil cups on all important bearings.

Our new illustrated catalog is now ready. Send us a postal and it will be mailed you free, by return mail.

SMALLEY MANUFACTURING CO., Box 165, Manitowoc, Wis.

Manufacturers of Ensilage, Alfalfa and Hand Feed Cutters, Combination Ensilage and Snapping Machines, Drag and Circular Saw Machines, Champion Plows, Cob Grinder and Feed Mills. (72)

CURRENT EVENTS

THE semi-centennial of the battle of Gettysburg is being celebrated this week in the historic Pennsylvania town where 45,000 soldiers of the North and the South were killed or wounded in the decisive battle of July 1, 2 and 3, 1863. The legislatures of practically every state which had troops engaged in the battle made appropriations to pay the traveling expenses of the survivors, these funds being augmented by private subscriptions. The result was that thousands of Union and confederate soldiers are fraternizing today on what was one of the bloodiest battlefields of all history fifty years ago. Ex-President Taft is in attendance at the celebration and is scheduled to deliver the principal address, President Wilson being unable to be present. The battle of Gettysburg marked the turning point of the civil war, prior to that time no decisive victory having been won by either side. It was also the first and practically the only big battle fought on northern soil. The tide of the battle turned often during the three days that the troops under General Lee and General Meade opposed each other, but at last victory settled on the Union forces and the confederates retreated in disorder. Fifty years afterwards finds all sectionalism dead, with a united people celebrating the battle without any trace of the former bitterness which came so near to disrupting the nation. Many heart-touching reunions are in progress at Gettysburg this week and because of the age of the survivors the spectacle presented is picturesque, even dramatic, in the extreme. The principal places in the three-days battle have been appropriately marked. The visitor is able to trace the progress of the struggle by markers which show the engagements and the troops which participated therein.

FREE wool immediately and free sugar in 1916, as demanded by President Wilson, have been agreed to by the senate democrats who, in caucus, by a vote forty to six, determined to stand by the president on these schedules of the Underwood tariff bill. Free sugar in three years is strongly opposed by the two democratic senators from Louisiana, on account of sugar making being the principal industry of that state. It is expected that these two members will vote against the party measure when it comes to the final test. The others who were opposed to the schedule in the caucus come from sugar beet states (Nebraska, Nevada, Colorado and Montana), but the administration hopes to hold them in line when the final vote is taken. In return for the vote of these members against free sugar the two Louisiana senators joined them in voting against free wool, but the half dozen rebels were unable to make any incursions on the rank and file of the members and the party solidarity is being well maintained. The finance committee of the senate has practically completed its consideration of the tariff bill and it now goes to the body as a whole, to be debated for several weeks, after which the final vote will be taken and the two houses will consider it jointly to harmonize whatever conflicting views may arise.

THE popularity of the Canadian landward movement is shown by remarks made recently by Speaker Champ Clark, of Missouri. The speaker was emphasizing the point that while the nation is so seriously considering the problem of new people coming into the country, it should likewise take heed of the large number who are leaving the country, seeking new homes elsewhere and particularly in Canada. He cited figures to show that in one week, not long ago, 1,845 American farmers, with $388,500 in cash and $145,000 in personal property, crossed into western Canada to settle permanently, an average of $288 per capita. The speaker added: "These emigrants are among our best citizens. I am personally acquainted with 200 or 300 of them. There is not a bad or shiftless man in the lot. They are seeking to better their condition. They almost invariably take their families with them. The principal reason they expatriate themselves is the lure of cheaper lands and less stringent land laws as to homesteading, etc. Congress should make our homestead conditions as easy as possible compatible with safety, and should increase the area for home building by judicious encouragement of both irrigation and drainage. A statistician has figured that the average adult citizen is of the money value of $1,000 considered solely as an asset to the country. If that is true the 1,845 American farmers who crossed the Canadian border depleted the assets of the republic that week by $2,378,500, which, multiplied by fifty-two, would make the grand annual total loss to the republic $123,682,000, gone to Canada alone." The Canadian movement has lost none of its popularity, but continues to attract American farmers. Particularly is this so since the Dominion does everything in its power to welcome the newcomer and make his stay pleasant and profitable. There is much that Uncle Sam could learn from the way Canada handles the immigration and the colonization problems.

Save a Team on the Corn Binder

Cut the work of the horses in two by operating binder with the lightweight, high-power

Farm Cushman Engine

Easily attached. A pair of hands and a monkey wrench will attach it to any power machine on the farm. A big day's work costs only 40c to 50c for fuel. Thousands in use. They give more reliable power, smoother, steadier running.

Write Quick & Cut Out Shoveling in Hot Harvest!

EVERY blessed farmer who buys his Sandwich Elevator **before** harvest gets **double** work out of it! This summer, it will store his **small grain**—then crib his **corn** next fall. You, too, can get **double** value—you, too, can cut out the senseless slavery of shoveling load after load till you drop.

"The Sandwich Farm Elevator is the best investment I ever made in hard labor-saving machinery," writes Herman Frey, Melvin, Ia.—one of an army who say the same.

Sandwich (Eternal/Cypress) Farm Elevator

Solves the **hired-man** problem and even lightens the **house-hold** work by cutting out the **keep**—the **expense**—of extra men. And it pays you a profit too!

"Had my crop picked 1c a bu. less on account of my elevator," says C. H. Keller, Marshall, Minn.

50 Bushels in 3 to 4 minutes

The Sandwich fills your bins—your cribs—**chuck to the top** lickety split! "Unloaded 50 bu. corn in 4 minutes," writes I. E. Orendorf, Heyworth, Ill. Others crib 40 bu. in 2½ minutes with the Sandwich.

No Leg-Breaking Platform

The Sandwich wagon-jack is **overhead.** "Works to perfection," says A. J. Anderson, Boone, Ia. You drive right under—with even (9) **the tallest** load. And it dumps it in the hopper in a jiffy. Then hitch on any power—horse or engine—and it's off with a flying start.

Cypress Body Outlasts Steel!

We make less money using "the wood eternal" but we make more **friends** and more **sales.** This is why it is called the **Everlasting** Sandwich and is fast crowding other elevators from the market.

Write Right Now for FREE Book

This season we got **late** orders for 60 **carloads** we could not supply. Those were from farmers who **waited.** They had to shovel. But they couldn't blame us. We warned **them** as we are **warning you now!** Our Elevator Book comes **free** by return mail the minute your request arrives; also the name of a Sandwich dealer close by. Address today 170 B St.

SANDWICH MANUFACTURING CO., SANDWICH, ILL.

Crop Maker Roller Bearing—Fanning Mill

The easiest-running fanning mill a man ever turned—therefore the one f :omplete service and biggest results.

Every farmer knows the value of a good fanning mill. If you don't own one now, you are probably thinking of buying. But before you do buy, let us send you a Free Book telling about our great offer, which enables you to prove to your own satisfaction the wonderful capacity of this Crop Maker for *perfect work.*

30 Day Trial—Direct Factory Price

We mean just what we say—*free* use of the Crop Maker on your own farm for a full month, without obligation to buy, with the machine *yours at factory price* when you find that all we claim for it is true.

The Crop Maker runs "like oil" because it has roller bearings. It cleans, separates and grades grains and seeds of all kinds—turns out perfect seed for planting—insures bigger crops and larger profits. You will make many times its cost in a single season. This machine goes *to you from us*—one small profit added to the actual expense of making. Be sure to write at once for the Free Book, detailed description, price and complete offer. Please write *today.*

DAIRY

MAKING BUTTERMILK FROM SKIM MILK.

To the Editor of The Homestead:

It is the opinion of many dairymen, as well as a great many consumers of milk, that good buttermilk can only be produced from whole milk. But first-class butermilk can be made from skim milk, thus making better use of this valuable by-product of the dairy than is generally done. The quality of buttermilk depends mainly upon the proper ripening of the milk or cream, and does not depend upon the fat content. In either case the good qualities, such as palatability and flavor, are not due to the amount of butter fat present, but are due to the development of the lactic acid fermentation.

In order to produce good buttermilk from skim milk it is necessary, first, that the latter be aerated and cooled, for there is a considerable amount of air incorporated with the milk during the process of separation, which causes it to foam, and as this air is warm it must be removed. When it it is allowed to remain in the milk undesirable fermentation arises, and the milk will "whey" and foam a tough floating curd. If the milk is allowed to stand for a short while after being separated, the foam will all come to the top of the milk and can be skimmed off with a dipper or the milk can be drawn off from the bottom through a faucet or poured from beneath the foam. After this foam has been got rid of the milk should be run over a cooler of some kind, such as the ordinary drum cooler, but in case this is not available the milk should in any event be cooled thoroughly by setting it in the spring water, or in some kind of an ice box, or even in a cool cellar. It is very important that the milk be kept cool for at least twelve hours.

After the skim milk has been kept thoroughly cool for twelve hours, its temperature should be raised to seventy degrees F., which is the best temperature for ripening, and allowed to become sour. When at this temperature it will not take the milk long to sour, and in about twelve hours it will be clabbered, but not yet ready to be churned. It should now be cooled to sixty degrees F., or lower. This should be done in the same way as it was cooled previously, and the milk allowed to set at this temperature at least twenty-four hours longer before being churned, thus making it from thirty-six to forty-eight hours old when put on the market. It is best not to break the clabber up until ready to churn.

Prior to churning it is very important that the maximum development of lactic acid take place. If a small amount of whey rises on the top of the milk no harm will result. The damage is done by a floating curd and whey at the bottom. Hence, in successful buttermilk making it can be seen that the proper cooling and ripening of the milk are both very important features.

The process of churning can be varied to suit local conditions. The wood dasher, the same as is used in a common dash churn, can be used to thoroughly break up the clabber while it is yet in the "shotgun" or cooling cans. This is a fairly good method where only a small amount of buttermilk is made. Or the milk can be put in the churn and churned for twenty or thirty minutes. In any event the clabber must be thoroughly broken up and in all cases the buttermilk must be strained to remove all lumps of curd and to make it smooth.

The consumers should receive the milk as soon as possible after churning, because of the fact that they wish it fresh. Keeping it cool from the time of making until delivered is very important. The receptacles should be wrapped in wet blankets or have ice cylinders in them.

All vessels used in making and handling the milk must be kept perfectly clean. It may be supposed that because the buttermilk is already sour it is not necessary to exercise so much care in keeping the utensils clean, but good buttermilk cannot be made from skim milk without cleanliness in all things pertaining to it. Unclean vessels will cause the milk to sour too rapidly, the milk will "whey" badly and tough, gassy curds will form which will be difficult to break up during the process of churning, and the resulting product will have an undesirabe flavor and not be easy to dispose of.

Good buttermilk is very popular and is in great demand. The supply is not always adequate. It is a splendid food for invalids as well as a healthful one for those who are well.

W. H. Underwood.

CARE AND BENEFITS OF THE MILKING MACHINE.

To the Editor of The Homestead:

The milking machines of this part of the state are working a great revolution in the dairy business. The older machine which was introduced soon went out and for various reasons proved unsatisfactory, but the machine that was introduced about eighteen months ago proved entirely satisfactory and every farmer who has the machine is a booster for it.

This is one of the greatest dairy centers of America. My work calls me to the homes of many farmers and all speak with universal praise of this type of machine. On account of its simplicity a ten-year-old boy can operate three machines at once, these having the capacity of about five men.

The machines cost $40 each and the engine to run them costs $40. The average farmer has two machines at $40 with one engine to operate them, bringing the total cost of his milking outfit to $120. These outfits have a small wooden bar running the full length of the barn and are so arranged that the machine can be changed quickly from cow to cow, not being necessary to change the cows as it was with the older type of machine.

The illustration shown herewith is that of a part of the buildings on the farm of V. A. Briggs, one of the firm of Briggs Bros., Seward, Neb., owners of one of the best herds of Durocs in the country. Their annual sales are of interest to all Duroc men, and among the best each season. They will sell boars at private treaty. Write them.

Buy your Silo Direct from the mill

Don't pay a *fancy* price for a silo. No better silo than the Seattle, and the price is very low. Made of famous "Puget Sound" fir. Manufactured in one of our six mills. Sold direct to you at one profit above producing cost. You get *better quality* as well as a 40% to 60% saving on a

Seattle Silo

Save 40% to 60% on this clear fir Silo

Close and straight grain. No sap or knots. Wonderfully durable. *Doors of new patented swinging type.* Quick detachable. No lifting. The cost of upkeep is very slight, being only for tubing, as the machine is very simply and strongly built. The operating cost of the engine with three machines attached is only about one cent per hour. The machine is easier on the cows than hand milking, and kicking cows that could hardly be milked by hand, stand quiet and look surprised, not knowing what to do.

The use of the milking machine enables the farmer to keep a larger herd and still work longer in the field. It transforms drudgery into pleasure and makes it possible for one person to do the milking, which, heretofore, required the services of the whole family, leaving them free to attend to the other chores. It makes milking more sanitary. The parts that need cleaning are easily and quickly detached so that they may be taken to the house and kept in some convenient place where they cannot get dirty after cleansing. The demand for these machines indicates that they are gaining in popularity. W. H. Ruther.

COWS, OLD AND YOUNG.

To the Editor of The Homestead:

The age limit of greatest usefulness has never been very definitely fixed for a cow. In men, one of the leading physicians of the country thought he had laid down a law which could not be broken safely that a man who reached sixty was done, so far as any work of a successful nature is concerned. But his arguments have all tumbled down in the face of facts presented by men who at seventy or even eighty have been doing the greatest things of the world.

I suppose most men would argue that the cow which has come to the age of eight years is at her prime and should not be kept much longer. But on our farm we have at the present time a Jersey cow which has reached the age of thirteen and is still doing good work. For a number of years we have thought this would be the last season we could keep her, but she raises such fine calves and gives such good milk and in such plentiful supply that we have kept her on and on to her present good old age.

I milked this cow this morning, and could not help wishing we had several more as good.

Now, the age of the other extreme of life when a cow begins to be really useful is quite poorly defined. I have seen heifers at three or four that seemed to be as good as they ever were. The fourth year is called by many the poorest year of all. These men say you cannot tell what a heifer will be till she has passed that year. And yet, I have heifers in my herd now that at two are surely proving that they will be some day very valuable members of the herd. It is true that other heifers do not develop quite as early. Some never get to be worth keeping.

Because of this element of uncertainty in young cows, there are a good many farmers who would rather buy their cows all matured and with established reputations. I have a brother-in-law who never thinks of raising a cow. He says it costs too much, and then you do not know after you have raised your cow what she will turn out to be. So when he wants a cow he steps out and buys her.

There is some grain of satisfaction to me, however, in watching the development of the cows of my herd from the little calf up through. When I get a cow of that sort I know her in all her ways; and, what is quite desirable, she knows me. This mutual understanding is, as I look upon it, a very desirable matter.

But the range of usefulness does in the most of cases lie between three and ten years of age. The cows younger than three or older than ten which are really worth keeping in the dairy are the exception and not the rule. E. L. Vincent.

In the course of a year an ordinary river is the means of moving a great amount of material other than that carried in the boats plying on its surface. From the results of a number of examinations it is estimated that the Mississippi river carries annually into the sea during the average year 136,000,000 tons of dissolved salts and 340,000,000 tons of mud and other suspended matter—a total of 476,400,000 tons of material extracted by the Mississippi and its tributaries from the rocks and soils of its drainage basin.

You need a new DE LAVAL Separator NOW

1st If you are still using some gravity or setting process of creaming—

Because your waste is greatest and quality of product poorest in mid-summer, when the milk supply is greatest.

Because time is of greatest value on the farm at this season and the time and labor saving of the good separator counts for most.

Because the skim-milk is poorest without a separator in hot weather and often more harmful than helpful to calves and young stock.

Because the work of an improved De Laval Cream Separator is as perfect and its product as superior with one kind of weather as with another.

2nd If you have a very old De Laval or an inferior separator of any kind—

Because the losses of the poor separator from incomplete skimming and the tainted product of the difficult to clean and unsanitary separator mean most when the bulk of milk is greatest.

Because of the great economy of time at this season in having a separator of ample capacity to do the work so much more quickly.

Because an improved De Laval Separator is so much simpler and more easily handled and cared for than any other, and you cannot afford to waste time these busy days "fussing" with a machine that ought to have been thrown on the junk-pile long ago.

Because the De Laval Separator of today is just as superior to other separators as the best of other separators to gravity setting, and every feature of De Laval superiority count for most during the hot mid-summer months.

These are all facts capable of prompt and easy demonstration, whether you have a poor separator or none at all. The new De Laval catalog, to be had for the asking, helps to make them plain. Every De Laval local agent stands eager to do so with a machine itself, with no obligation on your part to buy unless he does—and that to your own satisfaction.

WHY DELAY? Why put off so important a step as the use of the best cream separator, which you need more RIGHT NOW than at any other time?

HOLSTEIN CATTLE.

Pure-bred Registered
HOLSTEIN CATTLE

Prof. Eckles, of the Mo. Agricultural College, in comparing the daughters of two sires used in the same herd says:—"Counting the milk at $1.50 per hundredweight, the income from thirty daughters of one sire would exceed that from the same number of daughters of the other $6,467 in 6 years." The difference in the value of the calves was not taken into consideration.

A good pure-bred registered Holstein sire will transform the poorest herd into a profitable one within four or five years, and is a good investment at almost any price.

Send for Free, Illustrated, Descriptive Booklets.

POULTRY DEPARTMENT

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be inclosed with inquiries. Address all letters relating to poultry topics to this office.

CARE OF TURKEY POULTS.

To the Editor of The Homestead:

The turkey is undeniably the aristocrat of the poultry family. There is enough of the wild in their nature to cause them to be fairly fascinating to me. A turkey hen was my first possession when so small that I could hardly carry the pan of sloppy corn meal which was fed in common to all the poultry about the place. At that time young turkeys could be raised by chicken hens or almost any way and if they lived to "shoot the red" you could almost surely count on raising them to maturity. In nine cases out of ten it is a different story today.

If the weather is warm and dry when the poults are hatched the safer plan is to permit the mother to take her brood directly to the pastures. Contrary to the popular belief, she does not "drag the baby turks about in the wet grass"—far from it. Just watch her. She glides along quietly and slowly, now stopping and sitting down and with the peculiar call of a mother turkey brings her downy chicks under her wing, permitting them to rest ere going farther.

And just watch the way she has them feed; a bug here, a worm or seed there, with some time between whiles. It is certainly nature's own way and worthy of imitation by people as well as fowls.

If hatched while the ground is damp and cold it is necessary to confine the hen and poults for two or more weeks, though I have found that two weeks is about all the confinement they can stand. A pen made of boards one foot wide will restrain the poults, giving the hen her freedom to go and come at will.

A wide board across one corner of the lots affords shelter and they prefer this kind to being confined in a coop.

The feed consists mostly of cottage cheese made from sour milk and squeezed dry and also of onion tops chopped fine. After the first week a little commercial chick feed is added or stale bread dipped in sweet milk and squeezed dry. They are very slow about learning to eat and at first require more care than chickens.

Lice are young turkeys' deadly enemies and will kill them off in a small fraction of the time it would take to deplete a flock of chickens. Dust lightly with insect powder and if really necessary rub a very little vaseline on their heads, around the vent and on the second joint of the wings. The wing is the place where the parasites bunch up and on otherwise seemingly "louseless" turkeys will be found to have them standing head down, so thick that not another one has room to stand.

In confinement the feathers on the first joint of the wing grow so rapidly as to sap the bird's vitality. Every turkey raiser knows that the discouraging time begins when these little creatures begin to lift first one and then the other dragging wing. On the first joint of the wing are six quills. They may be pulled out, one at a time, with very little pain, or can be cut with a pair of sharp scissors. By the time they grow out again the youngster seems to have caught up with them.

Minnie G. Stearns.

SWISS CHARD FOR POULTRY.

To the Editor of The Homestead:

Something new? Well not exactly new, but I doubt if many of you have grown it or know its value. I had always thought I was keeping pretty well up with the times, but I have only recently learned to appreciate the Swiss chard.

Belonging to the beet family, it resembles a yellow mangel very much in its early growth, but it soon outgrows the mangels. The center ribs of the leaves begin to widen and thicken, until they become almost as large and fleshy as rhubarb stalks. These center ribs are much prized cooked and cut up in vinegar as you do beets, and the green leaves make "greens" fully equal to spinach, and they keep tender and sweet until fully grown.

While it is fine for cooking, it is not for table use that I have found its greatest value. It is one of the very best summer greens for the chickens I have ever grown, and it can be cut continually by taking the large mature leaves. I am planning to have a small tank made for silage for winter use for my hens, and I think the chard will be a valuable plant for that purpose.

L. H. Cobb.

5A Nottingham Horse Covers
Last Longest—Therefore Cost Less.
This cover affords absolute fly protection to the horse. Being made of 3-ply special hard-twisted yarns—full leather trimmed. The 5A Nottingham will last twice as long as an ordinary horse cover. H--S W-G--R

Can you fill in the blanks above and complete a well known baseball players name? You can if you try. Just write and tell me whose name it is and I will tell you how you can get the fine complete baseball outfit pictured below.

There are seven splendid pieces in this great outfit. The ash bat is a good one. The mask is made of heavy wire, full size. The catcher's mitt is thickly padded, very heavy and has patented fastener. The glove is of tanned leather and has patent clasp. The ball is strongly stitched and will last. A neat, adjustable belt and a dandy cap complete this great outfit. Remember you get the whole outfit of seven pieces for a little easy work. Write me today and I will tell you just how to get it.

A. M. PIPER, 840 Popular Bldg., Des Moines, Ia.

WITH THE EDITOR.

I do not believe we could possibly do better this week than to consider a story which recently appeared in one of our most worthy publications, The Youth's Companion. The moral is so obvious that but little comment on my part is necessary. We who have been brought up on the farm are apt at times to forget or to overlook its possibilities, the unlimited chances for growth, the pleasures which lie ready at our hand. I am sure that we will be more contented after we have read the following and considered well the all too-plain-moral:

"Oh, dear! It's good to get a breath of real fresh air," said Margaret Curzon. "And yet I hate the country—to live in."

"Do you?" a pleasant voice asked, incredulously. "Did you ever really try it?"

The two girls had met in a country railway station. Already, after half an hour, they felt well acquainted.

"I was brought up in the country," replied Margaret. "We moved to the city only a few years ago."

"Why do you hate it?" asked Ruth Evans.

"It was so limited. There was no high school within reach and I had no chance for a real education. They couldn't afford to pay a minister, and we only used the church a few weeks in the summer. There was no place for amusements, and no fun going on anywhere. A girl had no chance to make any money for herself. Father and mother were satisfied, but for a girl——"

"Weren't there any other young people?" asked Ruth.

"A few, but they hadn't any spirit." Then Margaret added, "Do you live in the country?"

"Yes, and I love it," Ruth said. "But we were lucky. It's a dear little place we're in, nestling right under the mountains. To be sure, it's small, but we're happy there. I was like you. I wanted a high school education and didn't get it. I was sickly till we moved into the country. It wasn't too late then, but there was no high school. The country made me strong, though. What's the good of a school with a brain and body that won't let you study? I got the health and then I made the school myself."

"How?" Margaret asked, with interest.

"I got the young people together and we started the Launch Out Club. Every member had to launch out in some little enterprise that would make money to buy books. We applied to the department of agriculture for pamphlets that would help us. I had an outbuilding made into a pigeon house and sent squabs to market. Some raised hens; one girl bred a fine strain of ducks; another concentrated on cauliflowers. We soon had enough money to buy books for a course of reading. Then we read. We've done a lot since. We open the church every Sunday and have simple, helpful services. We have sports and entertainments and a village improvement society. We have made the houses ever so much prettier. The one we bought had plenty of possibilities. Oh, I believe this is your train."

"Yes. I'm sorry to go. But if you'd lighted on Gilead, where I was born, you'd tell a different tale. Your village has some life in it. Good-by."

"Gilead! Gilead!" Ruth ejaculated. Gilead in Vermont? Why that's where I do live. You must tell me your name before you go."

"Margaret Curzon."

"Why! It's the Curzon place we bought—your house. And oh, it had such possibilities!"

The train was moving.

HOME AND HOMEMAKING.

SOME FAVORITE RECIPES.

Coffee Cake.—One and one-half cups of sugar, three-fourths cup of butter, two cups of flour. Mix these ingredients, take out one cup and reserve it for the top of cake, then to the balance add three-fourths cup of sweet milk, two eggs, one teaspoon vanilla, add one-half cup of flour with two teaspoons of baking powder; put in a flat pan, sprinkle the cup of dry ingredients you reserved for top; add one-half teaspoon cinnamon and sprinkle over the top of cake before you place it in the oven to bake. Bake forty minutes.

Veal Loaf.—Three pounds veal, either the part used for stew or neck, one-half pound fresh pork, four crackers pounded fine, three tablespoons sweet milk, one egg and two tablespoons butter. Put meat through food chopper, add other ingredients and also pepper and salt to taste. If green mango peppers are at hand they may be used instead of ground pepper and give a delicious flavor. Make into loaf and bake about one and one-half or two hours. Add some water before putting in the oven. Baste with melted butter and hot water.

Carrot Marmalade.—One dozen raw grated carrots, one cup sugar to each cup carrots, strained juice of three lemons, one teaspoon powdered cinnamon, one teaspoon powdered cloves, one teaspoon allspice. Mix the grated carrots with the sugar and allow to stand over night. In the morning add the lemon juice and the spices. Cook slowly for one hour. If the spices are omitted it is similar to orange marmalade.

Piccalilli.—One peck green tomatoes, one head cabbage, two stalks celery, eight large onions, three red or green peppers. Chop all this fine and mix with one cup of salt. Let stand over night. In the morning dash off all the liquid, then take two quarts of vinegar, one pound brown sugar, one-quarter pound mustard seed, two tablespoons cinnamon, two tablespoons ground black pepper, one tablespoon allspice, one tablespoon cloves, two tablespoons ginger, one-quarter teaspoon cayenne pepper. Put spices into sack and let boil altogether for thirty minutes. Stir often to prevent scorching. Seal into jars or keep in open crock.

Rice Custard.—Cook in a double boiler until soft, two and one-half cups milk, pinch of salt and one-quarter cup rice. When thoroughly cooked add to it the yolks of two eggs beaten with two tablespoons of granulated sugar. Remove from fire at once, flavor with lemon or vanilla and pour into a dish. Spread over the top the beaten whites of two eggs mixed with two tablespoons pulverized sugar and brown in oven. This pudding should be creamy, not thick, and proportions should be accurate.

Nut Bread.—One egg, one cup sugar, one cup milk, four cups flour, four teaspoons baking powder sifted four times, one cup chopped nuts, one cup seeded raisins; stir five minutes; let rise one-half hour; bake in slow oven.

THE YOUNG FOLKS

For the best letter received each week we offer twenty-five cents; second best, a silver badge; third best, a pansy badge. Send letters to Aunt Mary, Hawley, Minn.

THE STORY OF KIO.

(First prize.)

I have a very queer little pet. It is a little coyote. Our neighbor found the den and dug out three. They kept two, and gave me one.

It did not have its eyes open when I got it. I had to feed it with a bottle at first. Then we put it with the old cat and her kittens.

She thought it was a big, nice kitten, I guess, for she would lick him and pay more attention to him than to her kittens. He looked so funny getting his dinner with the kittens. He still sleeps with the kittens, but plays about the yard in the daytime. He is six weeks old, and about half as big as a cat. His name is Kio and when we call him he comes a-running.

He likes to play with the kittens, but sometimes his play is pretty rough. He gets mad at the old cats sometimes and whips them, but most of the time they get along just fine.

When we want him to howl, we imitate a wolf's howl. He will hold his nose straight up in the air, open his mouth as wide as he can, and just yelp. He looks so comical.

If he becomes too troublesome, as he grows older, we will have to send him to some park, I guess, because I couldn't stand it to have him killed, for I think him the sweetest little pet I ever had. —Zenith, age 10.

Along The Trail.

(Second prize.)

Whenever we go to the woods we like best to go along a place known as

Get Your Canadian Home From the Canadian Pacific

WE will make you a long-time loan—you will have 20 years to pay for the land and repay the loan—you can move on the land at once—and your Canadian farm will *make you independent*.

20 Years to Pay

Rich Canadian land for from $11 to $30 per acre. You pay only one-twentieth down—balance in 19 equal annual payments. Long before your final payment comes due your farm will have paid for itself over and over. This advertisement is directed only to farmers or to men who will occupy or improve the land.

We Lend You $2000

for erecting your buildings, fencing, sinking well and breaking. You have twenty years in which to repay this loan. You pay only the banking interest of 6 per cent.

Advance of Live Stock on Loan Basis

The Company, in case of approved land purchaser who is in a position and has the knowledge to take care of his stock, will advance cattle sheep and hogs up to the value of $1,000 on a loan basis, so as to enable the settler to get started from the first on the right basis of mixed farming. If you do not want to wait until you can complete your own buildings and cultivate your farm, select one of our Ready-Made farms—developed by C. P. R. Agricultural Experts—with buildings complete, land cultivated and in crop, and pay for it in 20 years. We give the valuable assistance of great demonstration farms—free.

This Great Offer Based On Good Land

Ask for our handsome illustrated books on Manitoba, Saskatchewan and Alberta—mention the one you wish. Also maps. Write today.

Shinn Lightning Rods

Now protect more valuable property than any other rods made, because they are scientifically perfect. Made and sold under $75,000 bond.

ASK YOUR DEALER

For Shinn rods, the kind that are put up by experts and work inspected by our state inspectors. If he has none don't accept any substitute but write for full particulars about guarantee and for catalog.

W. C SHINN 100 North St. LINCOLN NEBRASKA

the Indian Trail. The trail is a path made long ago by the Indians as they journeyed through the woods, but it is now used by the white people.

The path is only wide enough for one person to walk in at a time, so everyone goes single file. At one place recently two landslides washed away part of the trail, so that part of it is now replaced by a path made by the white people.

The path divides in one place and goes down almost to the edge of the river. This part was used long ago by the red men on hunting expeditions when the river bed was farther north than it is now.

The trail is covered at the side by trees, and at one point it descends into a hollow where a big cave is. This cave is filled with water during the time of spring rains.

The trail, altogether, is over a mile long and goes over many beautiful hills, descends into little valleys, cuts around rocks and boulders, and at last disappears in a ravine caused by a brook.

The brook flows away to join the river, but the hill bears on its summit a log cabin, built by the settler, evergreen trees set out by him, and a well he had dug and plastered with stones.

When anyone comes to our town and wants to go to the woods, we show them the trail, tell them the stories connected with it and have a game of "Indian War" before going home. —Carol.

Country Life.

(Third prize.)

Country life is the most beautiful life there is in the world. If people would give the farm the chance they give the town, the farm would be the most beautiful place on earth.

In town or city you can see beautiful houses and all kinds of costly things, while on a farm most of the houses are log or common box houses.

If the money that is spent in the city home was placed on the farm, there would be more people willing to be farmers. —Blue Eyes, age 16.

PLEASANT FIELDS OF HOLY WRIT

Save for my daily range among the pleasant fields of Holy Writ I might despair.—Tennyson.

THE INTERNATIONAL S. S. LESSON

3d Quar. Lesson 1, Ex. 1, 8-14; 22, 2-19. July 6, 1913.

THE CHILD MOSES SAVED FROM DEATH.

Some one has likened the eleventh chapter of Hebrews to a tall obelisk graven with the name of the Heroes of Faith. That Egyptian column, brought at such expense from the banks of the Nile, and set up in Central Park—not one in a million can read its hieroglyphics, and it is fast crumbling away; but this obelisk is imperishable; it is intelligible to even a child: In all this shining catalog the most brilliant name is that of Moses. The faith of Moses was antedated by the faith of his pious parents. It is written: "By faith Moses, when he was born, was hid three months of his parents because they saw he was a proper child, and they were not afraid of the king's commandment." It was something more than mere natural affection which impelled them to this act. It was borne in upon their minds that this child of uncommon physical beauty and precocity was to break the galling yoke of bondage, and lead God's people from the brick kilns of Egypt to the highlands of Canaan. They believed this. They wished God's purpose fulfilled. Loving and fearing the King of Heaven, they despised and feared not the king of Egypt. Though his cruel soldiers, with drawn and glittering swords, patrolled the streets, and though instant death was the penalty of disobeying the king's commandment, they were not afraid. For three months they successfully hid the babe in the deepest and darkest recess of their lowly hut. But further secrecy was impossible. The child's cries were too lusty. Suspicion was already aroused. The envious gossips were at work. We may see those parents toiling at night—weaving a basket out of long ribbons of the papyrus making a tiny mattress, and tucking the beautiful babe into his strange cradle, which was to be rocked by river's wave instead of mother's hand. The parents used their best judgment at the same time they exercised their faith. The papyrus is said to be offensive to the crocodile. Hence, the child was comparatively secure from that great danger. He was put afloat upon a river which the Egyptians worshiped, and, found there, would be esteemed sacred as the gift of the river god. He was placed where Pharaoh's daughter was accustomed to bathe, with the hope that he might fall into her hands, and the little tactful sister was stationed to watch, and use the strategy of calling a Hebrew nurse if opportunity afforded. Having done all they could, they waited in confident faith for God to bring it all to pass. And they were not disappointed. See the Divine providence—God in history! He just picked the babe out of the river and put him in Pharaoh's palace—to make spoil out of the wisdom and wealth of Egypt, that he might the more easily deliver Israel. But who does not see that one of the turning points in the history of God's ancient people was the faith of Moses' parents? The destiny of the child, the destiny of the nation, turned on the piety of the parents.

Woman's Building for Iowa Fair

By May McPheeters Smith.

THERE is a well-defined movement among the women of Iowa to get together, to assemble at the state fair grounds and there plan and inspire a crusade whose sole purpose shall be to save the babies. The statement that one-fifth of the babies born fail to live through the third day and that one-half of the remainder die before they reach maturity, or twenty-three years of age, that the number of epileptic and mentally deficient children are increasing, has aroused the women to an educational campaign whereby they hope to reach all women in their efforts for the conservation of human life. Much has been said and written of "race suicide," but the real problem is, and always will be, to preserve that which by the very mystery of nature is produced and to rear to the fullest possibilities of moral, mental and physical perfection. Eugenics—the science of being well born—is a far greater factor in the perpetuation of a rugged race than the world has heretofore conceded. Give the little child the benefit of parents physically fit and morally clean and the glory of its existence will be its birthright.

The child health contest held last year at the Iowa State Fair Grounds created a great interest in the welfare of the child. It was a clever thought to compare the babies physically. Spectators crowded the extremely limited space for a glimpse of the darlings. The result was a revelation. "Scientific motherhood" that had been the jest of ancestral parenthood strode forth with the winning ribbons. There was no use ignoring the fact that if a child could be raised in a hotel and yet be the most perfect baby in Iowa there was something in this new idea that human life could be improved upon scientifically. Statistics thus correlated were invaluable, but how to circulate such information was the serious proposition confronting the pioneer workers in the child-welfare movement. No building having been provided for women's activities and the subject being a vital one to all women, it was the consensus of opinion that the state should be asked to provide such a convenience for the fair grounds. The mothers congress and other women organizations interested themselves in the active legislative work and as a result the legislature appropriated $75,000.

The building as designed is a modern adaptation of the Italian villa style, with a court containing flower gardens and fountains surrounded by spacious verandas. It is happily suggestive of home with its proffered comforts of rest rooms, lunch facilities, lavatories and toilets. It is a feeling to cherish that the gentlemen of the legislature conceded no secondary arrangement for the women and children and gave a sum that would provide for comfort and pleasure consistent with other improvements deemed necessary to the success of various departments.

The child health contest will occupy a suite of rooms in which bath, heat and such conveniences as are necessary to the preparation of showing the child. The examination by the lady physicians will be made in a glass-enclosed room, around which visitors may gather and see the work as it is carried on. A large auditorium where lectures on all subjects pertaining to activities in woman's sphere adjoins. It is the plan to have a speaker for every hour in the day and every day's program full. A rural school, modern in every particular lighted shows the equipment necessary for the teaching of manual training, agricultural and domestic science, and such other work as advised by the rural school commission. Parents who have long lamented the meager advantages offered in the country school will find inspiration and information for their improvement. A day nursery, where little folks may be left in the care of trained nurses, with clean cots for the afternoon nap, and a screened-in porch and a net-enclosed playground on which will be sand piles, will afford entertainment. A pleasant dining hall will be located in the basement where it will be cool and sanitary.

This movement originated in our own state has been heralded the world over as the "Iowa idea." "Getting together over the children," what a beautiful message to send forth! Surely every woman in Iowa will want to attend the state fair this year to enjoy this new department.

FARM METHODS.

The above is the title of an admirable book prepared by Dr. W. A. Taylor, director of John Deere's Soil Culture Department. This volume contains the very latest word on all phases of soil culture and crop production. Although the elementary principles underlying agriculture are set forth with much clearness for the benefit of the beginner, yet in every case the relation of these principles to everyday farm practice is ever kept clearly in mind by the author.

This volume goes somewhat into detail in the matter of fertility problems, more especially as these are dependent upon sensible rotation and upon the wise use of commercial and home-made manures. In a discussion of the various crops detailed information is given on every phase of soil preparation, method of seeding, amount of seed to use and indeed such enlightenment is imparted as to enable even the man without previous knowledge to hew very closely to the line of success in crop growing.

An important part of this volume is given over to the discussion of live stock topics, while the farm garden and the farm home are likewise included in the important list of subjects discussed. The concluding chapter of this volume gives a most helpful table of the amount of seed to use in the case of all the principal crops grown on the farm and in the garden.

It is the intention to place this volume in the hands of the farmers of the corn belt at the nominal charge of twenty-five cents per copy and those interested in same should send this sum to Deere & Company, Moline, Ill.

IOWA WEATHER AND CROP BULLETIN.

The following climate and crop bulletin is issued by the Iowa Weather and Crop service from the central station at Des Moines, for the week ending June 29, 1913:

Under the combined effects of high temperatures, bright sunshine, and sufficient moisture corn has made exceptionally rapid growth, and much of it is now up to the average stage for this time of the year. Probably a third of the crop in the southern counties has been laid by in good condition. High temperatures have been continuous; the average daily excess being about 6 degrees, and during the last four days the maximum readings were above 90 degrees. General and in many localities, heavy showers occurred on the night of the 24th and 25th; the greatest amount being over the southern and extreme northern counties, where they ranged from one to more than three inches. Winter wheat and rye are beginning to ripen in southern and central counties, and the harvest will begin during the coming week. Reports vary as to the condition of oats, but over the larger part of the state, both the straw and heads are short. In most cases they are, however, filling fairly well. In many localities small grain was badly lodged by the wind squalls accompanying the thunderstorms on Tuesday night. In the vicinity of Pocahontas and Cherokee counties small grains, and especially oats have been seriously injured by dry weather. Haying is in progress, and the crop is being secured under favorable conditions. Potatoes and pastures are still doing well. Apples continue to drop badly.

The small gasoline engine is a good friend to have around on hot days when the wind refuses to turn the windmill, but care should be used in buying. The stubbornest thing on earth is a "balky" gasoline engine.

Save $50 to $300

I absolutely guarantee to save you $50 to $300 on any Galloway gasoline engine. Made in sizes from 1 3-4 h. p. to 15 h. p. My famous 5 h.p. engine —without an equal on the market—sells for $99.50 for the next 60 days only! Buy now! Same size costs $225 to $300 through your dealer. Think of it! Over 30,000 Galloway engines in use today. All sold on same, liberal, free 90 Day Trial Offer I make you—and all giving satisfaction. Isn't that proof enough?

Get My Catalog and Low Direct Prices

Write me before you buy any other style or make. Get my catalog and low, direct price on the famous Galloway line of frost-proof, water cooled engines. Free Service Department at your disposal. My special 1913 offer will help you get an engine partly or wholly without cost to you. Write today. Do it now.

The Gasoline Engine on the Grain Binder

By C. K. Shedd, Iowa Agricultural College.

ONE of the important uses of the small gasoline engine on the farm during the summer is to aid in harvesting the grain and corn crops. The engine may be attached to the grain or corn binder in such a way that the engine drives the binder mechanism. Two horses then are usually sufficient to haul the machine.

An instance of the profitable use of the gasoline engine in this manner came under the writer's observation a few years ago in Nebraska, when there was a good deal of rain during the harvest season. Forty acres of very heavy winter wheat was saved in this way where the ground was so wet that the horses mired down ankle deep in nearly all parts of the field. In some places water was standing over the ground. The ground was not tile drained and would not have dried sufficiently to use the binder in the usual way until the wheat had been seriously damaged and perhaps lost, entirely due to overripening.

There is a great deal of land in Iowa that is likely to be too wet at harvest time to operate a binder successfully. On such land a small engine attached to the binder will soon pay for itself. The same engine may be used for numerous other small power purposes during the remainder of the year.

The engine attached to the binder is sometimes used even where the ground is hard enough so that power can be taken from the bull wheel without trouble, the idea being to save horses. Two horses and the engine will do the work which requires four horses without the engine. When there is a shortage of horseflesh on the farm at harvest time, the use of the engine in this way may be very profitable, especially if the operator is skilful, taking care of the engine and other machinery so that he is not likely to have trouble with breakdowns or with a balky engine.

There are some difficulties to overcome in using an engine on a binder. The weight of the engine will throw the binder frame out of balance. The engine is usually attached to the rear of the main frame and its weight is counterbalanced by placing the water cooling tank on the tongue of the binder. It is easier to accomplish this if the binder is equipped with tongue trucks.

Another difficulty is that the vibration and weight of the engine are a rather heavy strain on the binder frame which was not designed to carry this load. Bolts in the binder frame are apt to work loose quickly unless carefully watched.

Both of the above-mentioned difficulties have been partly overcome by one manufacturer by mounting the engine on a two-wheel truck which is pulled behind the binder. The binder is driven through a tumbling rod and universal coupling similar to those used on the horse power, only smaller.

In selecting an engine to attach to a binder it is important to select an engine that is light in weight. It will take an engine of three to four horse power to operate the binder mechanism in heavy grain. There are on the market now engines of this size which weigh about 200 pounds. In order to get as much power with as light weight the engine must run at a rather high speed. It must, therefore, be carefully built. The cylinder, piston, and bearings must be ground to a smooth surface and a true fit to reduce wear and prevent leakage of gas.

If a farmer is handy with tools, he can make brackets to fasten the engine to the binder and secure sprocket wheels and chain to connect the engine to the binder mechanism. It is generally much cheaper and better, however, to purchase the binder attachments parts complete from the manufacturer of the engine, when this is possible.

Ask your neighbor to subscribe for The Homestead.

OUR FASHION DEPARTMENT.

ALL PATTERNS, 10 Cents Each.

THIS department is prepared especially for The Iowa Homestead. We can supply our readers with high-grade, perfect fitting, seam-allowing patterns at 10 cents each, postage prepaid. Full directions for making, as well as the amount of material required, accompany each pattern. When ordering, all you have to do is to write your name and address plainly, tell us the correct number and size of each pattern you want and enclose 10 cents for each number. We agree to fill all orders promptly and guarantee safe delivery. Address all orders to The Iowa Homestead, Des Moines, Iowa.

5446 Ladies' Dress.—A pretty dress made in simple fashion, but extremely stylish is given in this model. The frock has a separate guimpe and is made with a five-gored skirt having inverted plait or habit back. Linen or serge can be used to make this dress.

The pattern 5446 is cut in sizes 32 to 42 inches bust measure. Medium size requires 5¼ yards of 36-inch material and 1½ yards of 36-inch material for the guimpe. Price of pattern ten cents.

6112 Misses' and Small Women's Dress.—This dress is just the thing for the schoolgirl. It is made with a three-gored skirt which can be made with either the empire or regulation waistline. It can be made with either the long or short sleeves. Any of the wash materials can be used to make this dress.

The pattern 6112 is cut in sizes 14, 16 and 18 years. Medium size requires 4 yards of 36-inch material with ¼ yard of 24-inch satin for the cuffs. Price of pattern ten cents.

5999 Ladies' Combination.—This model represents a dainty combination suit consisting of corset cover and open drawers. It is a becoming and comfortable garment. The combination may be quite plain or may be as elaborate as the taste of the wearer may desire.

The pattern 5999 is cut in sizes 32 to 42 inches bust measure. Medium size requires 3⅜ yards of 36-inch material, 1⅜ yards of insertion, 4¼ yards of narrow insertion and 3 yards of edging. Price of pattern ten cents.

5838 Boys' Knickerbockers.—The mother with a growing boy to dress will appreciate the simplicity of this knickerbocker design. The trousers can be made with or without a fly and are finished with leg bands or elastics. Wash material may be used or cashmere, mohair or serge.

The pattern 5838 is cut in sizes 4 to 14 years. Medium size requires 1⅝ yards of 36-inch material. Price of pattern ten cents.

5470 Children's French Dress.—This dress is made with the body and sleeves in one piece. It is made with a low square neck and short sleeves. Lawn, challie, cashmere or silk can be used to make this dress.

The pattern 5470 is cut in sizes 2, 4 and 6 years. Size 4 requires 1⁷⁄₈ yards of 18-inch all over, 2⅛ yards of flouncing 8 inches wide and 1⅜ yards of insertion. If made of one material it will require 1½ yards of 36-inch material. Price of pattern ten cents.

LANDS AND HOMES

Irrigation

in the West has been and is highly successful You are wholly independent of rainfall. It has made invaluable the farm lands in Idaho, Oregon, Washington, and other Western States, making possible numerous money-making crops—Alfalfa, Fruits, Grains, etc. We have investigated many irrigated propositions and have information regarding farm lands and ranches in the West. These are opportunities that should not be overlooked. Write for valuable and authentic information which is free of charge.

C. C. Carlin, special assignments in central, southern and northern Iowa. Address 715 Clinton Ave., Des Moines, Iowa.

FIELD NOTES.

The advertisement of A. De Boer, Pella, Iowa, offering Fox Terrier puppies for sale will be found on page 10 of this issue.

W. S. Huber, Tipton, Iowa, is offering for sale pure-bred Fox Terriers of both sexes at the liberal price named in his advertisement on page 10.

W. H. Barr & Son, Elliott, Iowa, advertise some good Poland China boars for sale on page 18 and also some choice sows bred for fall litter. Send them an order for some of these at once and we know you will be satisfied.

Potato raisers are not equipped for the conduct of their business unless they are supplied with sprayers such as those advertised on page 6 of this paper. The advertisers also sell Paris green and other spraying materials and will be pleased to quote prices. Address Ketchum & Gaston Co., Marshalltown, Iowa.

Kalamazoo silos are advertised on page 8. They are sold at reasonable prices with freight charges prepaid. The whole story may be obtained by addressing a request for catalog to Kalamazoo Tank & Silo Co., Dept. 26, Kalamazoo, Mich.

Will Thompson, Jesup, Iowa, advertises Duroc Jersey fall boars on page 17 of this paper. He advises us that they are of popular lines of breeding, that they have size, quality and general excellence. Write him for prices and full information.

A recently published book on the subject of silos tells all about the Lansing and calls it a big, safe, easy-climbing silo and the one that has good doors and other high qualities. See advertisement on page 8 and for copies of the book address Woods Bros. Silo & Mfg. Co., Dept. 18, Lincoln, Neb.

Everybody bales hay nowadays so about the only thing to be considered is which machine is best adapted to the purpose. The Ertel Cyclone advertised on page 6 offers a valuable suggestion. Full facts with reference to the Ertel may be learned by writing to Geo. Ertel Co., 384 Kentucky St., Quincy, Ill.

This office is in receipt of a copy of Volume 25 of Red Polled Herd Book for 1913. This publication shows that the Red Polled Cattle Club of America is progressing and that its members are making extra effort to forward the interest of their chosen breed. The book sells for $1.75, postage paid. Orders may be forwarded to the secretary, H. A. Martin, Gotham, Wis.

M. G. Arnold & Son, breeders of Poland China swine, Strawberry Point, Iowa, writes: "Our big-type Poland Chinas are coming fine. We were fortunate in saving large litters of big, growthy, smooth fellows. We have fifteen November boars and ninety of spring farrow, all doing fine, sired by Orange Boy and A Wonder Special. We have had no cholera in this part of the state in ten years."

It is a bad plan to put off the purchase of any farm implement until the time comes for its immediate use. For that reason we urge our readers to become acquainted with the merits of the Blizzard ensilage cutter advertised on page 8 of this paper. Full descriptions, prices and important facts concerning ensilage may be learned by writing to the Jos. Dick Mfg. Co., 1472 Tuscarawas St., Canton, Ohio.

The general excellence of the hay crop throughout the country will test the facilities of the farmer to get it properly cured and without damage from weather. It is worth while to have on hand stack covers such as those advertised on page 11 of this paper. The importance of the waterproof Slickerine may be fully learned from a free booklet for which write to Slickerine Co., Box 79, Dept. 7, Peoria, Ill.

J. J. Castle, Inwood, Iowa, breeder of Duroc Jerseys, reports 125 head of good spring pigs on his place, and all doing well. He has some good litters by Crimson Indicator, a boar formerly owned and used by O. S. West, Paullina, Iowa, a good litter by Happy Secret and another good litter by the noted boar, Col. Gano. Mr. Castle will have some good boars for the trade the coming fall and will be pleased to have those wanting boars to call and inspect his herd.

George Redhead, Des Moines, Iowa, has a herd of Jersey cattle which stands high in all those things that go to make the Jersey profitable. He has for sale a few females at reasonable prices and for a short time is making especially low figures on bull calves to be shipped in crates. Mr. Redhead operates a practical dairy farm, so that all his cattle are the useful sort. Some of them are of the most popular lines of breeding. Write him for prices. See advertisement on page 9.

Every farmer knows that the storage of grain for any length of time has meant not only a deterioration in value because of dampness or moisture, but because of loss from rats or wasteful means of storage. The Northfield steel bin advertised on page 6 eliminates all those difficulties. It saves more than its cost every year. It is sold on a thirty-day trial and satisfaction guaranteed. For catalog, samples of sheet metal, prices and easy terms address Northfield Iron Co., 118 Water St., Northfield, Minn.

Tme first subject which is apt to come up when two farmers meet is the inability to obtain farm help. This fact calls for the exercise of judgment in obtaining machinery which shall reduce the amount of labor required. The Little Giant elevator advertised on page 2 is one of these means and one of the best of them. By its use the scooping of corn from the wagon to the crib may be entirely done away with and without any hard work or loss of time. It is valuable for other purposes, all of which may be learned by writing to Portable Elevator Mfg. Co., 155 McClun St., Bloomington, Ill.

The near approach of harvest time demands that every means be taken to forward and facilitate the work of the season. Ordinarily operating a binder or corn binder has been horse-killing work and slow at best. The advertisement of the Farm Cushman engine on page 7 presents a means of doing away with a large proportion of the hard work and getting the harvest out of the way quickly. A little four-horse-power engine weighing 167 pounds is attached to the binder and operated at a cost of but forty to fifty cents per day for fuel. It supplies all the power except that of simply pulling the binder. It would be well to learn all about this little engine and what it does. It will surely be a money-maker. For catalog address Cushman Motor Works, 2029 N St., Lincoln, Neb.

Genasco Ready Roofing is advertised on page 2. The principal material employed in this roofing is Trindad Lake asphalt. As a preservative nothing has greater value than natural asphalt. It is known that it was employed in the most ancient structures now known to history. It is not only a preservative, but it is a water-proof agent which may be employed in foundation walls, floors, tunnels or any masonry. Samples of Genasco roofing with a book which gives a lot of still further important information on the subject of asphalt may be obtained by writing to Barber Asphalt Paving Co., Philadelphia, Pa.

A most interesting advertisement appears on page 11 of this paper. It announces that young men who are willing to take up farming in earnest may obtain Canadian lands at the price of from $11 to $30 and that they may, in addition, secure a loan of $2,000 with which to make improvements on the land, the whole to be paid for in twenty years, and at only 6 per cent interest. This is an extraordinary offer It affords an opportunity which thousands of men will be glad to take advantage of. Complete information with reference to this splendid offer may be obtained from J. F. Thornton, Colonization Agent Canadian Pacific railway, 112 W. Adams St., Chicago, Ill.

Buying a Silo from the Factory.

The advertisement of the Seattle silo on page 8 informs our readers why they may save a good proportion of the purchase price and at the same time obtain good silos by buying direct from the Seattle factory. Read the advertisement and for catalog giving full descriptions and price list address Hewitt-Lea-Funck Co., 480 Union Ave., Seattle, Wash.

Hanna's Big Short-horn Sale.

One hundred and fifty head of Short-horns will be sold at public sale at Chicago, July 29th and 30th by D. R. Hanna, Ravenna, Ohio. This is the practical dispersion of one of the big herds of the country, and one that for the past fifteen years has been a potent factor in the rings at all the big shows. Some very sensational show and breeding cattle will be submitted to the public at this sale, and the catalog should have wide distribution. File your application for one today with John Garden, manager, Ravenna, Ohio, mentioning The Homestead and watch the columns of this paper for farther particulars.

A Tire-Saving Device.

The advertisement of a Tire Cut Filler on page 7 provides for automobile owners a means by which they may extend the service and the life of tires quite considerably and reduce tire expense 30 per cent. Tire Cut Filler is a preparation that is self-vulcanizing, semi-mastic, and non-inflammable. It comes in collapsible tubes and is squeezed into the cut or into the tire filling it completely and when left over night hardens and becomes a part of the tire, restoring it to its original usefulness. A trial tube may be obtained by filling out the coupon in the advertisement, enclosing $1 and sending to the National Rubber Co., 4448 Papin St., St. Louis, Mo.

Thyne Bros.' Poland Chinas.

One of the good herds that deserves more than a passing notice is that of Thyne Bros., Doon, Iowa, who own two good herd boars in Long Prospect and Thyne's Longfellow. These breeders have some outstanding good spring pigs by these two boars, and they have some splendid brood sows in the herd that are daughters of the old boar, Long Prospect. They have some good fall boars for sale and will book orders for spring pigs at any time. You can buy a good boar from these breeders at a reasonable figure and their herd is bred along strictly big-type lines. When in their vicinity make it a point to see their herd, or write them for prices on those fall and spring boars. Kindly mention The Homestead when corresponding with them.

Iowana Berkshires.

Champion sires are in service at the Berkshire breeding pens at Iowana Farms, Davenport, Iowa, and Manager Thatcher was never so well situated to care for the wants of the buying public as at present. Over 700 spring pigs, the get of champion sires and from some of the greatest breeding sows in the country, are for sale at Iowana at this time. The Berkshires at this great breeding establishment have all been given the simultaneous treatment for cholera, and under the most severe tests there has never been an Iowana hog that has failed to prove immune. Anyone intending to buy Berkshires should certainly inspect the offering at Iowana Farms before making any selections. The advertisement will be found on page 18. Kindly mention The Homestead when writing.

Lionberger Makes Good Sales.

C. Lionberger, Humboldt, Neb., the well-known breeder of Poland Chinas, writes that he has had splendid trade as a result of his advertising in this paper. He has shipped hogs to Nebraska points, a number to Iowa and Illinois, and a herd foundation to Mr. Griffith, Prescott, Ariz. Mr. Lionberger raises good Polands, sells them at prices well in keeping with their real value and it is little wonder that readers of this paper are so quick to grasp the opportunity offered by him to secure for themselves good breeding stock. Mr. Lionberger still has a fall boar, one of the very best of the entire crop for sale at $50. This is not a high price for this boar, in fact, many, many boars of less value have sold for several times the price. He is worth this price to go into a good farmer's herd simply to sire market hogs, but he is the kind that breeders are in search of to head their herds. Better write about him if interested, as we know that he is a mighty good one. Mention this paper when you write.

McCandless' Hampshires.

On page 17 E. S. McCandless, Thurman, Iowa, begins his Hampshire advertisement and he always has some good boars and sows for sale. He is one of the oldest and best breeders in the West. Write him and tell him what you want and he will tell you if he can fill your order.

Chester White Fall Boars.

On page 17 John F. Holst, Jr., Denison, Iowa, advertises twenty-five splendid fall boars for sale and many of these will make choice herd boars. He also has a splendid lot of spring boars for sale. If you want the pick of his bunch you will have to write him at once. When corresponding with him kindly mention The Homestead.

J. O. James' Boar Offering.

If you want one of those good Poland China boar pigs sired by Ott's Big Orange and his other noted big-type boar you will have to write J. O. James, Braddyville, Iowa, at once. He has been having a splendid call for them and he still has some good ones left. Get in touch with him at once and kindly mention The Homestead. His advertisement appears on page 18.

Messer's Angus Bulls.

Any of our readers in need of an Angus bull should write or visit A. G. Messer, Grundy Center, Iowa. He has a good three-year-old Oakfield Earl, a grandson of Earl Eric of Ballindalloch, that is a proven sire of good calves. This bull cannot be used longer to advantage and will be sold worth the money. Then there is a good Eric bull sired by Blackbird Jack, a son of the noted Black Woodlawn, that will make some man a good bull. A yearling E. T. Duchess bull by Blackbird Jack is a big, strong, smooth bull. There are a few younger calves that are extra good sired by Blackbird Jack. See the advertisement on page 19 and write for any information, mentioning The Homestead.

Syverud's Poland Chinas.

One of the good bunches of spring pigs that we have seen in the Northwest is owned by E. J. Syverud, Inwood, Iowa. He has 125 head of good spring pigs, many of which are sired by his splendid yearling boar, Longfellow 195455. Mr. Syverud is not making any great noise about his pigs, but he has some that are just as good as you will find in any herd, and this boar Longfellow that heads his herd is one of the very best that you will find in that section of the state. Breeders visiting northwestern Iowa herds should make it a point to see this herd and get your eye on this good herd boar. Later in the season Mr. Syverud will have some good boar pigs to offer the breeders, sired by this good boar.

Faulkner's Spotted Polands.

H. L. Faulkner, Jamesport, Mo., has never had such a call for spotted Poland Chinas as during the past two months and the shipment have been to buyers in Indiana, Illinois, Iowa, Nebraska, Kansas, Oklahoma, Texas and Kentucky. All fall boars are sold and the greatest string of fall gilts ever bred at Highview Farm are being reserved for the February 11th sale. Just now Mr. Faulkner is making a special drive on spring pigs by Brandywine, Big Jim, Lucky Judge, and Good Enough. These are March and April pigs from the greatest sows in the herd. Mr. Faulkner has had a big inquiry on these and early orders will get the benefit of the pick. Note page 18 for Mr. Faulkner's advertisement and order now if you want some of these early spring pigs.

Ficke's Durocs.

Hugh M. Ficke, Long Grove, Iowa, has one of the good herds of Durocs in eastern Iowa. A representative of this paper recently looked over the herd and was impressed with the size and smoothness of the breeding herd. Mr. Ficke has 140 spring pigs that look mighty good. They are sired by several different boars. Among them is a fine litter by Cherry Chief and others by Royal Col., Professor 2d, S. E.'s Premier, Eclipse, B. & C.'s Perfection and about seventy-five by Mr. Ficke's great breeding boar, Premier Gold Bond, by Gold Bond by Golden Rule, the noted sire of prize winners. The male pigs are for sale at reasonable prices. Mr. Ficke has ten extra large, smooth, growthy, heavy-boned fall boars for sale sired by Premier Gold Bond. Mr. Ficke has the right blood lines in his herd, he is a good caretaker and our readers will find him a gentleman in every respect. See his advertisement on page 17 and write him your wants, mentioning The Homestead.

Lightning Rod Protection.

Practical experience and the investigation of scientists have established the fact that in order to avoid loss by lightning all buildings should be protected in some manner. The more common practice is by lightning rods. There are all kinds of lightning rods and some of them better than others. The Shinn rods advertised on page 11 are claimed to belong to the latter class. There is every reason why they should do so because they are manufactured on scientific principles of materials best adapted for conducting the electric fluid and disposing of it in a harmless manner, and put up by expert workers. That leaves little more to be asked. A testimonial to the popularity of the Shinn rod is given in the fact that during the month of June, 1913, the factory shipped out more lightning rods than it did during the entire first year's business. The Shinn factory is now running night and day and it is making every possible effort to fill orders promptly. The present season calls for lightning protection more than any other during the year and it is important in particular

that hay barns and new buildings be rodded immediately. Particulars concerning the extraordinary guarantee and the low prices at which the Shinn rods are sold may be obtained by writing to W. C. Shinn, 100 16th St., Lincoln, Neb.

Dunbar's Chester Whites.

On page 19 W. H. Dunbar, Jefferson, Iowa, begins his Chester White advertisement and he is offering about forty choice boars for sale. He also has a lot of sows that he will sell at any time and if any of our readers want Chester Whites they will do well to write him at once. He has a cracking good lot of spring boars for the trade and now is a splendid time to send him your order.

Some Good Short-horn Bulls.

Anybody wanting a good, young Short-horn bull will do well to call on that veteran breeder C. S. Buckley, Holstein, Iowa. He has a number for sale sired by his splendid bull, Rookwood Glory, one of the greatest sons of Imp. Bristol Glory, formerly owned by Professor Curtiss and later by Robert Miller, Lucas, Iowa. He is offering a good red Cruickshank Victoria and several others of the leading families. Write Mr. Buckley at once about these bulls and kindly mention The Homestead. His prices on these bulls are very reasonable and it will pay intending purchasers to go at once and see them.

Barnard's Polands.

In a recent letter from John S. Barnard, Nelson, Neb., he reports everything doing well in his herd of Poland Chinas. He states that he did not save as many spring pigs as is his custom, but that those that he has are good. Mr. Barnard will hold a fall sale on November 18th and will sell both gilts and boars at that time. Mr. Barnard has been buying good stuff, has the reputation of being a good caretaker and certainly should have a good lot of stuff to sell this fall. Mr. Barnard topped the T. W. Cavett sale last fall, getting some of the best gilts sold at that time. We will have more to say regarding this herd in later issues of The Homestead and would like to have our readers kindly notice the mention we make.

Theo. Martin's Short-horns and Polands.

Theo. Martin, Bellvue, Iowa, the well-known live stock auctioneer and breeder of Short-horn cattle and big-type Poland Chinas, was recently visited by a representative of this paper. The Short-horns are coming along in fine shape and a fine lot of calves are coming. The herd never was in better condition than at the present time. There is nothing for sale at present, but some fine young bulls will be ready for the winter trade. The Poland Chinas are coming along nicely. Not as many pigs were saved as usual, but there will be some good young boars for the fall trade. Mr. Martin has a good September boar sired by Long King's Equal that should find a buyer on short order at the low price asked for him which is $50. The Barred Rocks are coming along nicely. About 300 chicks were hatched this spring.

Tyrrell Announces Short-horn Sale.

The veteran Short-horn breeder, G. P. Tyrrell, Oxford Junction, Iowa, announces a sale of Short-horns to take place at his farm on September 19th. At that time he will sell fifty to sixty high-class cattle that will be a credit to his long experience as a breeder. A number of the females will be sired by his great herd bull, Wampum of Wayside, a son of the noted show bull, Money Musk. Wampum of Wayside has been used in the herd for several years and has sired a lot of good, deep-bodied, thick-fleshed cattle. Prince of Wayside is a son of Wampum of Wayside that has been used some in the herd and will be sold in the sale. Several of the females will be bred to Sultan of Wayside, a Burger bred bull sired by Sultan's Heir by Whitehall Sultan. His dam was a Beauty, sired by Hopeful Knight and the grandam was by the noted show bull, Money Musk. Short-horn breeders should keep this sale in mind. Further particulars will appear in later issues of this paper.

J. V. Slepicka's Chester Whites.

The largest bunch of Chester White spring pigs that we have seen this year are on the farm of J. V. Slepicka & Sons, Wilber, Neb. They are an extremely good lot as well, and a good representative lot will be at the fair this fall. Slepicka & Sons showed the first prize under-six-months boar at Nebraska last year, and they had other first-prize winners and many that could have won and done honor to the breed. The Nebraska State Fair management the past few years has not given the matter of Chester White judges the attention that it has deserved, in the opinion of the writer, and usually selects someone that is not wholly familiar with the breed. Chester White men should have a Chester White judge, and believe they will get it if the men will make application for such a man. It will take a lot of good hogs to defeat the Slepicka herd this season, as they will show nearly a full herd and their entries in all classes are good and in some are outstanding. The spring pigs are extra good and it will be no difficult matter to get a good litter or two out of them, however, the Chester White show is getting stronger all the time, and it will take better stuff to win this season than heretofore. Combination and Plainview Choice breeding is to be found in the herd in considerable numbers and they are always good. First-class boars are now for sale from here, boars that are real herd headers and we would suggest that readers of The Homestead write for prices on them at once. This is one of the best places to buy that we know of, and by purchasing early, one gets the benefit of greater selections, lower prices and less express charges. Write these gentlemen at once and mention The Homestead when doing so. They are first-class business men, and we believe our readers will appreciate the treatment they will receive.

American Chester White Herd.

Alden Anderson, Ellsworth, Iowa, owns the American herd of Chester White hogs and may well be proud of the high standard shown in his lot. He has at the present time, besides his crop of spring pigs, about forty head each of fall boars and sows. Among these are quite a number that are right up to the top in show herd prominence. They have wide, nicely arched backs, absolutely good feet and legs and style and finish that are just a little hard to equal. Most of these pigs are the get of Chief Select, an Emmert-bred hog that is himself unusually strong. A proportion of the spring crop are by Hiawatha and two litters by Pathfinder. All the Anderson pigs are from matured dams. They are good ones. They show an excellent type, are plenty big enough, and while they are just the kind that breeders and showmen are looking for they are also the kind that make quick response to feed and pay good profits to the farmer. In later issues of this paper additional facts will be presented concerning these hogs.

Choice Duroc Jersey Boars.

On page 20 the Economy Stock Farm, Shenandoah, Iowa, are advertising twenty choice fall boars for sale and they are offering some very good ones. These are all sired by that grand, good breeding boar Highland Chief, and it will not be very difficult to pick out a good herd boar from this bunch. Then they are offering ten or twelve good sows bred for September and October farrow to that celebrated grand champion boar, Chief's Col., and here is a proposition that every breeder should take a hold of. Few boars have made a better reputation than has old Chief's Col., both in the show ring and as a breeding boar. He was the sensational grand champion boar at the Illinois State Fair a few years ago and he has been regarded as one of the greatest breeding boars of the Duroc breed. They are offering a splendid yearling boar sired by King The Cols. that will make an outstanding herd boar. He has the size, the bone and the stretch, and is just such a boar as will make a good herd header. Write the Economy Stock Farm at once about these and kindly mention The Homestead.

Common Sense in Implement Buying.

Perhaps every reader of this paper has seen the announcements of the Plow Man and his connection with the Monmouth Plow factory. The Plow Man is a new element in agriculture. It became his duty to plan methods of introducing farm machinery to the farmer in such manner as to supply his demands for good machinery at the lowest possible cost. The low Man has in his catalog quoted prices prepaid to points of destination so that the customer exactly to a cent what any machinery he bought would cost. This year he quotes prices prepaid and prices on boar cars at the factory so that the buyer may take his choice as to the methods. The new catalog is a fine one. It describes everything in a simple and sure way which answers every possible question. The Monmouth goods were good and are good. The book has a lot of other information that farmers ought to possess. It may be had without cost by addressing a postal card request to the Plow Man, Monmouth Plow Factory, 17 South Main St., Monmouth, Ill.

H. L. Bode's Chester Whites.

The writer recently called on H. L. Bode, Friend, Neb., and we wish to say that we saw a lot of stuff, the sort one would expect to see on this farm, knowing the herd. More good Chester Whites have been bred, shown and sold from this farm than any other establishment in the state. The efforts of Mr. Bode have done much to further the interest now shown in Chester Whites throughout the state, and the show-yard record of this herd has put Nebraska on the map as far as good Chester Whites are concerned, especially in the opinion of those that have shown against him. About eighty spring pigs have been saved, and, of course, are good ones. They could not well be otherwise when they are out of daughters of O. K. Winner, the great show and breeding boar, and are sired by O. K. Keep On by Keep On. This boar is some sire, we believe as good as O. K. Winner, and that is enough said. A young boar is in the herd, will probably be shown this fall, and we believe all will take notice of him. He is O. K. Climax and by Evans' noted boar, Combination 2d. Mr. Bode will sell all boars at private treaty, and they are for sale from this time on. The gilts will mostly be held for the February 18th sale. This should be the greatest event ever pulled off in Nebraska as far as Chester Whites are concerned. Keep the date in mind and remember if it is good ones that you are looking for that Mr. Bode has them. Should you write mention The Homestead.

C. F. Adams' Polands.

C. F. Adams, Owasa, Iowa, owns one of the good herds of big-type Poland Chinas to be found in this state. His great herd boar, Big Halver is considered one of the best sires of big, smooth, heavy-boned hogs to be found anywhere. He sires the kind that all breeders admire. Mr. Adams can show fifteen or twenty yearling and two-year-old sows sired by Big Halver that are indeed mighty attractive. Few men can show as good. Mr. Adams offers for sale at the present time choice spring boars and gilts sired by Big Halver, Maid's Halver 1st, one of the very best sons of Big Halver and out of the mammoth sow, Long Maid, and he has others sired by Mammoth Jumbo by Big Jumbo and Grand Chief, a John Miller bred boar. The sows in the herd that have raised these pigs are certainly a great lot and it is worth the time of anyone interested to visit this herd and spend a few hours looking over the boars and sows that are producing a lot of good stuff. Mr. Adams is a gentleman in every way and will be glad to hear from any of our readers in need of a good boar or sow pig of the very best breeding and individuality. See page 18 and write him your wants mentioning The Homestead.

The Economy of Good Materials.

Millions of dollars of losses sustained by farmers might readily be avoided through the purchase of materials of lasting character. An instance to the point is the case of iron goods. This loss became so serious that in the late 90's the United States Department of Agriculture took up the matter and found that nails, barbed wire, etc., rusted out far more rapidly than did the iron goods of half a century ago. Some landowners could point at barbed wire fences which had been erected soon after the invention of this useful form, and which were still in good condition, while on the same farm, later purchases of wire had been replaced two or three times because of the rapid corrosion of the material. Almost everyone is familiar with the great difference between the old wrought nails of the nineteenth century and the handsome product of present-day machines. Buildings seventy-five years old have the greater portion of their nails in good condition, while those erected within fifteen or twenty years have very few not rusted. The result of numerous experiments and analysis goes to show that the old iron was generally of a high degree of purity, while modern steel contained a relatively larger admixture of substance like manganese, carbon, copper, etc., having a widely different electrical quality from that of iron and which as a result tended to set up those electro-chemical actions which are involved in the formation of rust. The final decision was embodied in a report, the net result of which was the statement that iron for all exposed situations ought to be the purest obtainable. The proof of this theory has been demonstrated in practice. For quite a number of years it has been possible to obtain, at a slightly higher price than that of the ordinary product, iron of a degree of purity never attained before; and this material, in the form of road culverts, irrigation pipe and flumes, roofing, etc., is showing itself to be of very great practical value, as it is but little harmed by rust. Taking into consideration the expense and annoyance of replacing metal work, after only a few years of service, it is probably true that this new iron product more than justifies its cost; and it seems that the conditions of the future will compel the adoption of some form which will do away with the alarming waste resulting from metallic corrosion.

WORKS FOR BUYER AND SELLER

PERRY O. BROWN, of the Maple Grove farm at Lamoni, Iowa, breeds Short-horn cattle, and recently advertised his herd in The Homestead. As a result he writes, saying: "In one week since the appearance of my advertisement in The Homestead I sold seven heifers to Grigsby & Barber, of Skidmore, Missouri; six heifers to G. A. Bonewell, Grinnell, Iowa; six heifers to E. C. Linberg, Essex, Iowa; a good bull calf to B. M. Murray, Tuskeega, Iowa, and one to R. H. Gorsuch, Lamoni, Iowa. The Homestead does good work for both buyer and seller." This letter should be a pertinent suggestion to cattle breeders who have certain stock for sale. Advertising rates or other information may be learned by writing to THE HOMESTEAD COMPANY, DES MOINES, IA.

Lawson Offers Boar Bargains.

On page 17 John B. Lawson, Clarinda, Iowa, begins his advertisement and he is offering some rare bargains in spring boars sired by his noted boars, Long King's Equal and A Wonder's Jumbo. Old Long King's Equal has been before the public so long it hardly seems necessary to tell our readers about him. However, we will say he is the greatest son of old Long King ever sired, and he is one of the best big-type breeding boars now living. In breeding condition in the presence of forty of the leading breeders, Mr. Lawson drove him on the scales and he balanced them at 965 pounds, so you may know he is a big one. His other boar, A Wonder's Jumbo, has come out wonderfully well the past year and now he stands among the foremost sons of old A Wonder. Mr. Lawson will not hold a fall sale and he is therefore offering his spring crop of pigs at private treaty. He is also offering sows bred for fall litter to these noted boars and he has some good ones. No man will go wrong who orders a boar or a sow of John B. Lawson, as he has been before the public so long that he has the reputation of breeding them good and big. Write him for description and price at once and kindly mention this paper.

J. R. Higgins & Son's Polands.

For the past three years the writer has called at the Poland China farm owned and operated by J. R. Higgins & Son, De Witt, Neb., and each season we have seen one of the very best herds of Poland Chinas within the state. They breed the largest quality hogs that we come in contact with. They are surely big and with plenty of feeding quality, and the pigs always show a great amount of thrift. The farm has splendid equipment, not expensive, but convenient and good and the sort that saves labor. It is a pleasure to visit such herds and converse with such practical men. Exacting business methods are employed, and complete records are maintained of everything and these features explain in part the success that has been attained by this firm both in the matter of choice herds, and also in a financial way. A little over a quarter of a century ago the elder of the firm came to Nebraska and about all he possessed was a strong faith in the country and good business ability. Today they own one of the finest half-section farms in eastern Nebraska and city property and other holdings. The Poland Chinas have been profitable both for themselves and for others. The top sows in many sales the past season were bred on this farm. The dam of Futurity Jack, the first-under-six-months boar at the Nebraska State Fair last season, was bred by Higgins & Son. They have also bred any number of the boars heading some of the best herds of the country right now, as well as many that have won honors in the show ring. These gentlemen never show, but it is a safe bet that a litter of pigs on this farm each year could be put in the money at the state fair. Pretty big statement we know, but we also showed hogs a dozen years and we believe that we know the kind that it takes to win. The largest Poland China for his age ever shown at Nebraska was shown two years ago by B. E. Ridgely, Pickrell, and he was bred by Higgins & Son. These gentlemen will sell both boars and gilts at private sale this fall, sired by the great and only Centennial, the greatest son of Big Victor, also a Taxpayer, one of the very best ever sired by Sampson. Taxpayer is an excellent breeder. If opportunity offers, go and see this herd, your time and money will be well spent. Should you write mention The Homestead.

Van Patten & Son's Durocs.

It is customary for Gilbert Van Patten & Son to raise a good lot of Durocs, but this season they have a better lot than they have raised for the past three years. They have about ninety spring pigs on the farm, and they are surely a good lot. Mostly the get of Uneeda Crimson Wonder, Model Wonder and Queen's Col. Uneeda Crimson Wonder is just one of the very best Crimson Wonder boars of which we have knowlege. He is a big hog, a fact that should interest the more progressive breeders, and he has quality and breeds it. He sires as good sows as will be found anywhere, and he also sires some extra good boars, however, his gilts are usually the best. Model Wonder is a good young boar. The wrter thought the best sort of pig on the fair grounds last fall, but he did not win a place. He is still a good boar, although a little different boar from what we thought he would make. He will be shown this year as junior yearling and it will take a good boar to beat him. Queen's Col. is a boar that as a breeder is hard to beat. He does not sire a big type, but he gets stuff that has as much quality, as good underlines and side lines as any boar that we ever saw. Some junior yearling sows by him will be shown this year, and they are sure good. A little different type from much of the show stock, but they are nevertheless the sort that commend themselves to the judges. Van Patten & Son will hold a sale on October 14th, and at that time will offer a choice lot of boars, and some very fine gilts. These gentlemen have been doing a great work for the breed and the stock they will offer this

season are the sort that we recommend to our readers. Keep the date in mind, and watch The Homestead for further announcements.

Amos Turner's Chester Whites.

Amos Turner, Wilber, Neb., is better fixed this season to take care of his trade in Chester Whites than he has been for some time. He has 100 spring pigs on the farm, and they are exceptionally good. Many of them are really outstanding, but quite a few of them are a little too late to show this season. They are the sort that everyone is looking for as breeding stock, however, and those that have bought of Mr. Turner the past several years have always received full value for their money. Choice spring boars and gilts will be for sale a little later on, and in fact are for sale right now. By ordering early one will have the advantage of greater selection, and at the same time a saving on the price and the express. The pigs are mostly the get of O. K. Wilber, a son of H. L. Bode's noted O. K. Winner. The remainder are nearly all the get of Combination's Last by Kent's well-known boar, Combination. A few litters are by A White Hope, by O. K. Wilber and he is out of a daughter of the grand champion boar, Plainview Choice. This boar will be offered for sale and to any of our readers looking for a good herd-boar proposition we wish to say that he will be sold worth the money. Watch this paper for Mr. Turner's advertisement a little later, and in the meantime if in need of anything, write him immediately, and when doing so, mention this paper.

J. H. Harper's Short-horns and Durocs.

A short time ago the writer called on J. H. Harper, Bennet, Neb., and spent some time in looking over the herds of Short-horns and Durocs. These herds are well established, having been maintained on this farm for many years, and the breeding material selected from outside sources has always been of the best. A new herd bull was placed in service last spring, and is without question one of the very best individual bulls in the country and he also comes of a beautiful line of stock. He is called King of Diamonds and is sired by Imp. Diamond Rex and is of the same style and makeup of Cock Robin. His underlines and general thickness are as good as one sees in a long time, in fact, a bull smoother of shoulder, better let down in the flank and with greater beef character we have but rarely if ever seen. This bull was formerly in use in the Johnston herd, Holdrege, Neb., and sired for his former owners a most excellent lot of stock. A former bull that was used with much success in the herd was Rex Dictator 3d, also by Diamond Rex and his dam was Imp. Dalmeny Mina by Dictator. Bulls by this latter sire are now for sale. They are both pure Scotch and Scotch topped and are from an excellent line of cows. The Duroc herd is one that has been built up of the right kind of stuff. The sow herd is strong in the blood of Buddy K. 4th, Kruger, Prince Wonder and many of the boars that have been famous the past two or three years. The present herd boar was bred by Briggs Bros., and is sired by Golden Model 5th and has for dam a daughter of Watt's Model. About seventy spring pigs are on the farm, and the boars and gilts will be for sale at private treaty. Mr. Harper will probably be at the state fair with a number of good strong boars, and those of our readers interested will do well to look for his exhibit at that time. When writing kindly mention The Homestead.

John T. Higgins' Duroc Jerseys.

A recent visit to the farm of John T. Higgins, Abilene, Kan., found this ambitious young breeder of Duroc Jerseys, an extremely busy man, as in addition to the hogs and a young herd of Jersey cattle maintained by him, Mr. Higgins has over 100 acres of corn that demands his attention and 100 acres of wheat about ready for the harvest. Ninety head of spring pigs all coming along in fine shape however shows that the Durocs are not being neglected by this breeder and his competent helpers. Many of our readers are familiar with Mr. Higgins's splendid herd and remember the great bred sow sale made by him last winter, this sale being one of the very best of the season. Good Enuff Model 2d 127255, the wonderful breeding son of the Nebraska champion, Good Enuff Model, is the wonderful breeding son of the Nebraska champion, Good Enuff Model, is the senior boar in service, and bids fair to take the place of his great sire both as a breeder and individual. Mr. Higgins had the misfortune to lose the Tippy Col. boar, Cherry Col., but a quantity of his get is in the herd. The class of this breeder's sow herd is well known and includes many noted matrons, among the number being Chief's Maid, the grand champion sow at Iowa and Nebraska last year, purchased in the Davis diversion sale. She is by the noted Valley Chief. In her spring litter by the grand champion, Ohio Col. is a young boar that is a great prospect. Among other good spring litters are one of seven pigs out of a Defender sow by Crimson Wonder Again, one of nine pigs by King the Col., out of a Proud Chief dam, and one of eight raised out of nineteen farrowed by Beauty's Model Top out of an Ohio Chief bred sow. This sow was the next to the top-priced sow in Sheley & Clatterbuck's winter sale. Mr. Higgins has claimed November 10th as the date of his fall sale at which time a number of toppy boars and gilts will be offered. In addition to his great herd of Durocs Mr. Higgins has one of the best herds of young Jersey cattle in the West. At the head of the herd is an imported bull by Noble of Oaklands. He has been a prize winner at five state fairs and two dairy shows. We will have more to say later. Keep this herd and fall sale in mind, and in writing for further information kindly mention The Homestead.

Walker's Galvanized Roofing.

The advertisement of the Walker Sheet Metal Company on page 7 illustrates the most modern method of application of sheet iron to building. It is used both as siding and as roofing and in those forms which afford perfect protection from both wind and rain. The advertisers insist that this form of roofing lasts twice as long as shingles. A catalog illustrating the various forms and also showing Walker's barn ventilators may be had on application to Walker Sheet Metal Co., 21 S. 21st St., Council Bluffs, Iowa.

H. H. Koenig's Durocs.

The writer visited H. H. Koenig, De Witt, Neb., a few days ago and we wish to say that he has one of the best lots of pigs on the farm that he has ever raised since he started in the Duroc Jersey business. Near 100 head are on the farm and they are thrifty and nice. Mr. Koenig is a stockman that has produced a lot of the good ones, and is still at it. His health has not been at all good this season, but he has managed to take good care of his pigs. His farm is one of the best appointed, and most conveniently arranged of any that we visit, and we are glad that he is getting some return for his labor and the expense of fitting this farm for the pure-bred hog business. The pig crop is by four sires. They are: Red Model by Golden Model; King's Wonder by I Am A Crimson Wonder 2d; Echo's Chief and a son of A Crimson Wonder. The Red Model and King's Wonder pigs are especially attractive and have promse of great development. Echo's Chief pigs are no experiment and we feel assured that his get will be as good as formerly, which will mean that they will make very fine hogs. The A Crimson Wonder boar has only a couple of litters to his credit, but they are right in every way. There is also a litter on the farm by Golden Model 2d and while they do not now compare with the others on the farm, the writer has faith in them and believe they will make good. On account of being long on herd boars, Mr. Koenig will sell one or two of these boars now on the farm, and he truly has some good boars. Red Medol by Golden Model will be sold, or the son of A Crimson Wonder or even King's Wonder. This last boar is one of the best yearlings in the state and will make a good showing at the state fair this season. The prices on these boars are not high, in fact, if Mr. Koenig had but one boar and any one of them, he could not be bought at any price, but he positively does not need so many for a herd of the size he keeps. Mr. Koenig will be at the state fair this fall. Be sure and see him. If writing for one of this choice boars kindly mention The Homestead.

Col. L. F. Teter, Auctioneer.

One of the more progressive auctioneers and an enterprising breeder of pure-bred stock is Col. L. F. Teter, Shickley, Neb. Colonel Teter has enjoyed a splendid business the past few

years and has also been successful in getting a good line of pure-bred stock sales. The writer has been at a few pure-bred sales where Colonel Teter was employed and we wish to say that he has done good work. We do not know of a breeder employing him that has not been entirely pleased with the work rendered. Readers of The Homestead need not hesitate to employ him, for they will certainly get their money's worth in his services. His prices are reasonable and his conduct is that which recommends him to the better class. If you have not dated your fall sale as yet, give Colonel Teter a trial. You will be more than satisfied. When writing mention The Homestead. See advertisement on page 17.

Thos. A. Shattuck's Poland Chinas.

One of the most constructive stockmen of a great live stock state is Thos. A. Shattuck, Hastings, Neb. His farm and the city of Hastings has become famous as the home of good Poland Chinas. Queen City Stock Farm, Mr. Shattuck's home, has sent out a greater number of herd-heading boars than any other herd within the state, and they have made good for the other fellow. It is some satisfaction, and it has always been a source of profit to this able stockman and what he has accomplished in this line of work is entirely within the power of any wide-awake man to acomplish, provided that he is not visited with unavoidable misfortunes. About twenty-five years ago Mr. Shattuck started in the Poland China business. He was then without means, and making the best of a situation in which he put up his business ability against the situation and he has certainly won out. Today he possesses all that mortal man can possibly use, and more besides, and he and his family enjoy a degree of comfort that many are not trained to enjoy, even with the means to do as well. It is such men as Mr. Shattuck that lend dignity to the profession of pure-bred stock breeders and we are glad he is here. His influence cannot be but for good, and his stock produced certainly add much to the value of the live stock industry of a great state. Something over 100 pigs were raised this year, and from thirteen sows. The great breeding boar, Sampson is in use in the herd. He has sired a great many and they are uniformily of much excellence. He is a sire with few equals. His gilts mature into wonderful brood sows and his boars head good herds and make good. A part of the pig crop is by him, part by Momentum and the remainder by Jumbo Chief by Jumbo Pan. The two old boars are doing as well. In early October a public sale will be made from this herd, and Poland China men of all sections will find it a good place to be. If you have not been getting the catalogs of the sales on this farm, drop Mr. Shattuck a postal with your address and ask that it be sent you when sale time comes. Mention The Homestead when you write.

The Durability of Silos.

An important feature of silo construction is that the silo shall be durable, because upon the durability depends all its other usefulness and profit. The Champion silo, an advertisement of which appeared on the last page of our issue of June 26th, is made of staves which have received oil treatment, giving them lasting qualities of the highest order. These staves are oil filled through a process by which oil is forced into the wood under an enormous pressure. This means that it

is rot proof and worm proof and that it will neither shrink nor swell under ordinary climatic conditions. The effects of this method of treatment are illustrated in the engraving which appears herewith. It represents two piles taken from Galveston Harbor. That on the left in the picture was an untreated pile which had been in use only one year. The larger one on the right which had been treated with a special oil process had been in the water thirty-eight years and appearances indicate that it is still good. Champion silos are given practically the same oil treatment, but under more effective conditions. It would seem that this method of silo building would answer every question of doubt concerning the practicability of building a silo. As to the use of a silo, that is another question. It really seems that no farmer can afford not to have a silo because a silo preserves every particle of the corn crop and puts it into a form which enables it to be utilized to the last degree and with no loss whatever. It also provides a most valuable feed at a time when a shortage of pasture through unseasonable weather may bring extraordinary losses. The manufacturers of the Champion will be glad to furnish other information with reference to this silo, its cost and other factors that the buyer should consider. Address Western Silo Co., 100 Eleventh St., Des Moines, Iowa.

W. N. Shanks' Durocs.

Among the many good Duroc Jersey herds in the state of Minnesota, one that stands out among the rest is that of that rising young breeder, W. N. Shanks, Worthington. Many of the older breeders and some with reputations as showmen, could learn a lesson by an inspection of the 170 head of spring pigs he now has on the place, and the many first-class sows he has in his herd. We are strictly within bounds when we say that he has sows in the herd that are superior to most of the sows seen at the leading state fairs and sows that should they be shown would indeed be hard to beat. It is very few herds that you will go into where you will find as many good things as you will see in the Shank herd. The two boars he is now using are Chief Model by Golden Model 2d and out of an Ohio Chief dam. This boar was first at Sioux City and first and junior champion at the Iowa State Fair in 1912, and was purchased from the Waltemeyer Bros., Melbourne, Iowa. The other boar is Model Chief's Last by old Model Chief and out of an Advancer dam. The most of his spring pigs are sired by these two boars, except those that are out of sows he purchased last winter. He has a number of good fall boars, several of which are fit to head good herds. He has an unusually choice fall boar that is sired by Model Chief 2d that will make a most excellent herd boar. We have looked this pig over carefully and if nothing goes wrong with him he ought to have a good outcome. We have seen very few that are in his class this season. While there we saw that noted old sow, Lady Top Notcher, a daughter of the old World's Fair boar, Top Notcher Again, and she still looks good to us. This is one of the best sows that has ever been owned in the Northwest and is the dam and grandam of many of the best sows he has in the herd. He has four daughters of that famous old grand champion boar, Crimson Wonder Again in the herd, five daughters of Golden Model 2d and fifteen daughters of Model Chief 2d. Besides these he has daughters of old Model Chief, Chief's Protection and other noted boars. He has one of the best daughters of old Crimson Wonder Again that we ever saw and she is a sow that would today be a hard sow to beat in the aged class at any of the state fairs this fall were she fitted and shown. Just at the present time he is offering fall boars and would also book orders for spring boars. If you want to get in on the ground floor it might be well to order one of these pigs before they have been picked over, and we therefore urge Homestead readers to write Mr. Shanks or call and inspect his herd.

Thirty Years a Poland China Breeder.

To have bred Poland Chinas for a period of thirty years is no small honor for any stockman, but in that time to have bred and owned many of the famous ones of the breed is indeed a matter to cause one much satisfaction. Such is the record of John O'Connell, Malcolm, Neb., as a Poland China breeder. His herd is one that is known over the hog country as but few are known. Good ones in plenty have gone out from there, and still better things are due from this herd. Among the early boars that made history for the herd we mention one that gained a lot of notoriety during his day. He was King of Lancaster and was shown at the Nebraska State Fair in 1888 and was first and champion. He was sired by the noted boar, Banker, who in turn was sired by Success. These boars were bred by Mr. Shallenberger, Ohio, at that time the foremost breeder of show stock in the country and one of the very best judges of good ones in his day. King of Lancaster sired many good ones and was used some little time, and was succeeded by Seldom Seen 3d. Seldom Seen 3d was bred by Lampe Bros., Van Wert, Ohio, and came of a line of stock that made the Lampe Bros. herd famous. Seldom Seen 3d gained distinction in the O'Connell herd by siring the second-prize sow at the World's Fair at Chicago, and many others of show-yard quality. Electric Light, a Blain-bred boar sired by Searchlight, was used at one time, and was followed by the great breeding boar, O.'s Black Chief. This boar came from Ohio, and from the very center of the big-type Poland China district and was one of the most potent factors in building up the big strain in the early days. W. T. Garret, Maryville, Mo., was gaining a reputation for his Poland Chinas about this time and Mr. O'Connell paid the herd a visit, selected the best on the farm and named him Big Perfection. He was sired by Nodaway Perfection and was one of the biggest hogs of his time. Whitewater, Wis., had a noted Poland China man about this time (the late nineties) and Mr. O'Connell drew on this herd for Cash Price. He was bred by B. F. Fowler of that place and came of a strain of hogs bred by the well-known Price & Sons, Pekin, Ill. This boar came of the extreme big ones, having been bred that way for many generations, a feature that characterized the early Price strains of Poland Chinas. The boars that then followed are familiar to nearly everyone in the Poland China breeding today. They were Winsome Chief, O.'s Perfection, Nebraska Giant, Allerton Chief, Big Tecumseh and O.'s Jumbo. Since 1888 to the present time, Mr. O'Connell has usually been at the state fair, has helped the breed in many ways, and has always contributed liberally of the very best breeding stock. Such men are certainly benefactors, lend dignity to the profession of improved live stock breeders and make this country a better place to live. He has certainly been a great stockman, a wise farmer and a good neighbor. We wish him many more successful and pleasant years.

Schluter 3-Horse Evener

SOMETHING new, the Schluter 3-horse wagon evener. There is no tongue side draft. Horses equalized.

THE MARKETS.

Union Stock Yards, Chicago, Ill., June 28.—Something has been radically wrong with demand for beef cattle this week. Just what it has been is not clearly outlined, the explanations advanced savoring of lack of ingenuity, but the fact remains that the rank and file of the fat steers are closing 15 to 25c lower than a week ago despite a decrease in local receipts of 12,000 and a shrinkage of 32,000 in the aggregate supply at six markets as compared with the week previous.

A trinity of depressing factors are given. Chief of these is "hot weather." Extremely high temperatures are never conducive to a broad consumptive demand for beef and this has doubtless had much to do with the mean market this week. Then the holidays coming at next week's end are advanced as a movement of Pennsylvania cattle and Kentucky sloppers is given as another. Cattle that have been filling eastern markets are now pretty well run, however, and shipping demand to the big Atlantic seaboard distributive centers is expected to revive soon.

Supply is running lighter than a year ago, yet prices are considerably lower. A year ago choice bullocks sold up to $9.60 and the distillery crop was being absorbed at $9.00 to $9.30. The range in prices was much wider then than now, however, the class of light steers now selling at $7.25 to $8.00, then going around $6.25 to $7.50. The gradually decreasing proportion of good beeves and deterioration in quality generally appeared to warrant prediction of rapid spread widening at this juncture, but the decline this week has been pretty evenly distributed.

The best steers here this week sold at $9.00 and that quotation is disputable at the close, a right choice class of 1,487-pound beeves selling Friday at $8.60. Probably 70 per cent of the run has sold between $7.85 and $8.50, against a $7.50 to $9.25 bulk a year ago this week. Elimination of Pennsylanvia cattle and Kentucky sloppers from the supply ought to clearify the situation, but something unforseen has the faculty of cropping up and exerting repressive influence.

Butcher she stock trade is closing on the bottom of last week's decline, though much business was done during the week at a 10 to 15c advance over the close last week. Buyers have complained of low dressing figures and discrimination against big-bellied, grassy stuff has been more marked than at any previous time this season. Such improvement as was shown during the week was chiefly on the strictly choice to prime dry-fed cows and best yearling heifers and low-grade cows of and closely approaching canner and cutter class. The price range between decent butcher cows and heifers and the best dry-fed classes has widened out 50 to 75c within the last few weeks. Some prime dry-fed yearling heifers have made $8.25 to $8.50, but a medium to good short-fed class lacking finish has sold at $7.25 to $7.60 and frequently have sold very disappointingly to shippers who had figured they would land within 25 to 50c of extreme top quotations. Bulk of the fair to very good killing heifers has sold this week at $6.75 to $7.50 and $5.35 to $6.50 has taken most of the decent to very good butcher cows, although occasional prime corn-fed beef cows, which are becoming very scarce, have reached $7.35 to $7.65. Cutter cows sold largely between $4.50 and $5.00 and canners chiefly from $4.00 to $4.40. Bulls above canner class advanced 10 to 15c during the week. Demand has hardly been up to normal volume, but supply has been much lighter than last week. Balognas sold largely at $6.00 to $6.25, but took a range of from $5.85 to $6.60 for poor light to best big weights, while $6.65 to $7.00 has taken plain to good beef bulls with prime ranging upward to $7.50. Calves closed mostly 25c higher for the week, receipts having decreased about 2,500 head and eastern dressed veal markets improving slightly. Best vealers closed at $9.25 to $9.50; bulk going at $8.75 to $9.00 and fair to good heavies largely at $6.00 to $6.75.

Timely rains in the drouth-stricken regions, curtailed marketings of stock and feeding cattle and brought about an enlarged demand and good recovery from last week's sharp decline, some low-grade, thin stockers still showing 35 to 50c declines from the best levels reached early in the month, but choice heavy feeders and best steer yearlings selling within 10 to 20c of the season's best rates and a good sort only about 25c below high time. Selected yearling feeders have sold upward to $8.00 and a few loads of heavy feeders at $8.00 to $8.10, while a spread of from $6.85 to $7.65 has taken the bulk of the stock and feeding steers, common, light off-colored stock steers alone selling under $6.50, nothing desirable in the stock heifer line below $6.65 and stock cows largely at $5.35 to $5.65. The market is on a high plane for this time of the year, and unless weather conditions affecting pastures hold unusually good, reactions may be expected at any time supplies get liberal. A year ago the best feeders were selling around $6.50 and bulk of the fair to choice young cattle on country account at $5.25 to $6.40, and as rated above the best fat cattle were considerably higher then than now.

The close of the current week virtually ends one of the most satisfactory June hog markets the trade has ever experienced. The June slump, much predicted, but the materialization of which has been questioned right along in this column, is yet to make its appearance, and with but one more market session this month to complete the history of the June trade left to come, the market is found to be on even a stronger basis than at its opening, the top and average price today being 5c higher than a month ago. Fluctuations in values this week have been narrow and closing prices are on practically the same basis as a week ago, top butchers selling up to $8.80 and the bulk within the narrow range of from $8.65 to $8.75. This week's eleven market supply will show an increase of about 15,000 over the week previous and 40,000 over a year ago, but for the year to date a decrease of 1,240,000 head in the eleven market total is shown. A wider spread in prices may be expected to develop within the near future, as eastern hog run dwindles and shipping demand for light and butcher weights revive. The logical result of corn abundance and a good hog market will be delay in sending the summer run of sows to market, but they will be lard yielders when they do reach packers and the crop will be closely garnered. Prime light hogs above the $9.00 mark and choice heavy packers below $8.50 before July is greatly aged, is a trade prediction that appears logical.

If three consecutive weeks have ever shown as erratic conditions in the live mutton trade as have been those of the past three weeks the fact has escaped the memory of pioneer traders on this market. Following last week's ruinous declines shippers put the lid down tight on their marketings. Chicago received less than 35,000 the first few days of the week, inclusive of 14,000 direct to packers from Louisville, and other market reported correspondingly light runs. On these short runs the market did a great availing stunt, spring lambs advancing $1.50 to $1.75 within four days, yearlings $1.00 to $1.25 and fat ewes 75c to $1.00. The bulge brought a run of Friday and buyers proceeded to shoot the inflated values of Thursday full of holes, the Friday session being productive of a 50 to 75c lower spring lamb trade and a 25 to 50c lower yearling and sheep market. Further downward revision of the price list is scheduled for next week. Southern lambs are again being cut loose freely and the Northwestern range will be conspicuously represented next week for the first time this year, some Idaho lambs now being en route and a train or two of sheep and yearlings coming from Oregon and Washington. At the close good to best spring lambs are making $7.75 to $8.00, fair to best yearlings $5.75 to $7.25 and light ewes $2.75 to $5.00, while heavy and medium ewes are down to $4.15 to $4.50.

SUMMER SHADE FOR HOGS.

The accompanying engraving shows a cheap and simple method of providing summer shade for hogs. Shade of some sort is an absolute necessity in a hog pasture. Quite often, however, there are no trees in such pastures and in such a case the shelter or shade referred to is of great value.

SUMMER SHADE FOR HOGS.

THE COST OF BEEF FAT.

It costs a farmer twenty-five cents a pound to produce fat on cattle. This fat sells for about one-third that amount. All the fat a butcher cannot dispose of to the housewife, who buys it over the telephone without seeing it, he sells as raw tallow for about five cents a pound.

These interesting facts were disclosed by Pres. J. Henry Waters in an address on "How An Animal Grows" in the meeting of cattle farmers at the Kansas Agricultural College. More than five hundred cattle feeders and a large delegation of members of the live stock exchanges of Kansas City, St. Joseph and Chicago heard the address.

"The fat on a steak or roast which the family will not eat," President Waters said, "finds a place in the garbage can or in the tummy of the family cat.

"Thus fat making, on the farm, which takes the best product on the farm—corn and alfalfa—is an expensive and losing business. This loss involves the farmer, the butcher and the consumer, especially, if more fat is put on a steer than is necessary, or if the steer puts it on in wrong places. The scrub steer and the dairy breeds have a strong tendency to store their fat in the wrong place, in the body cavity.

"It is the lean meat we are striving for. Only as much fat should be with the meat as is necessary to give juiciness, flavor and tenderness. Any fat in excess of this in cattle is a waste of the feed required to produce it."

Coming down to the remedy for the condition of which he spoke, President Waters said: "The way out is found chiefly in grading up the beef stock to higher standards, so they will put the fat in the steak. Proper breeding and proper feeding will bring about the desired results."

"No matter how skillful a man may be as a breeder," President Waters said, "if he fails to feed properly his animals will revert to the original or unimproved type. They will be narrow, tall, long legged and sloping at the rump instead of straight, flat ribbed, heavy in the foreparts and light in the hind quarters.

"The best cross possible to make is between a well-bred animal and a well-filled grain bin. At the foundation of the best progress in animal improvement is a clearer knowledge than we now have of the limitations of heredity and nutrition in their influence upon the mature animal, and a definite knowledge as to whether the deficiencies of one may, to any practicable degree, be supplied to the other. It does not matter that the breeder and the feeder are in many instances one. Feeding and breeding are independent operations.

"We should, then, have much less waste of effort through attempts to accomplish with feed those things which may alone be accomplished through breeding, and by trusting to pedigree those things for which the feed bin alone is responsible. It is an old theory, but one which is well sustained by experience, that both contribute in an important and indispensable way to the final results and that a really good race of animals cannot be developed or the excellencies of a highly improved race maintained, except through a rational system of mating and a correct system of feeding."

The lion and the rhinocerous live sixty years; the goose, common pike, and pelican, fifty; the hart and vulture, forty; the ass, bull and camel, thirty; the horse, twenty-five; the peacock, from twenty-three to twenty-five; the pig, bear, cow, pigeon, cat, dog, deer, wolf and the fresh water lobster, twenty years. Fifteen years is the average of the duck, nightingale, lark, fox and pheasant; the canary and the cricket, ten; the rabbit, eight, and the hare and squirrel, seven.

TOO LATE TO CLASSIFY.

LAWSON'S SENSATIONAL BIG POLAND CHINA BARGAINS

THE home of the noted breeding boar, **Long King's Equal** (weight 965 lbs. in breeding condition, weighed in the presence of forty breeders). Sows bred to him and **A Wonder's Jumbo** for fall litters. **150 Choice Spring Pigs** that I am now offering at private treaty. Will not hold fall sale and will sell these out privately at less than half the money they would bring in a sale. Now is the time to get your bargain while the good ones are here. Write me at once for description and prices and mention Farmer and Stockman.
JOHN B. LAWSON - - - - CLARINDA, IOWA

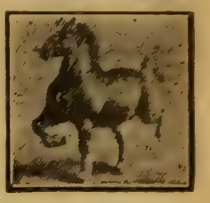
50 HEAD HEREFORD BULLS FOR SALE 50

WE are offering 50 head of good serviceable bulls. Good shape, strong ages, big-boned fellows and strongly bred in Anxiety blood. Come and see us right away.
A. SPOONER & SON, - - MONDAMIN, IOWA

25 GOOD CHESTER WHITE FALL BOARS 25

I HAVE some excellent fall boars, some choice herd headers. Also 50 good spring boars. Write me if you want one and mention Iowa Homestead. Address
JOHN F. HOLST, JR. - - - - - - DENISON, IOWA

BELGIAN EMPORIUM OF AMERICA.



A CHOICE collection of Belgian stallions and mares constantly on hand. Several importations annually. Catalog on application. Address
HENRY LEFEBURE - FAIRFAX, IOWA.
Eight miles west of Cedar Rapids.

Duroc Jersey Boars

I HAVE 10 big, lengthy fall boars by Premier Gold Bond and an extra good lot of large heavy-boned spring boars sired by Cherry Chief, Royal Col., Professor 2d, S. E.'s Premier, Eclipse, B. & C.'s Perfection and Premier Gold Bond. If you want the big, smooth kind, write me, mentioning Homestead.
HUGH M. FICKE, LONG GROVE, IOWA.

YEARLING DUROC BOARS

I HAVE 2 yearling boars by the International Champion Volunteer, dam Mc's Dream II by Chief's Col. out of the champion sow Mc's Dream; also one yearling by Model Wonder and one by Proud Ohio Chief, dam by B. & C.'s Col. I have 2 good fall boars by Pratt's Leader. All for sale at right prices. R. R. Station, Tripoli.
M. S. PRATT, - FREDERIKA, IOWA

5 SHORT-HORN BULLS

TWO Scotch yearlings, one a Marr Flora, the other a Barmpton Leaf; two nine-months-old bulls. All sired by King Banff 3d. Also a good yearling by Scottish Victor. All good. Priced right.
W. M. MYERS - - BEAMAN, IOWA.

SHORT-HORN BULLS

I HAVE a few good bulls, 8 to 12 months old; also heifers. All blocky, blood reds, for sale. Address
J. E. Barr, R. F. D. 4, Davenport, Iowa.

WAYSIDE FARM SHORT-HORNS

9 BULLS ready for service, the equal of any bulls I ever bred. Herd headers. Address
G. H. BURGE - MT. VERNON, IOWA.

Stooker's Stock Farm

OFFERING just now some very choice Percherons, A pair young stallions and a few mares. Write for full information. Address
F. A. STOOKER, DUNBAR, NEBRASKA

Thompson Farm Duroc Jerseys

TEN big-boned fall boars of the best breeding. Will guarantee all to be breeders and to suit purchaser. For full information call or write

POLAND CHINA SWINE.

COOPER'S SPECIAL 30-DAY BOAR SALE

WE have over **100 head of boar pigs of spring farrow.** We have 25 sows to begin to farrow in 2 weeks. We must have room for them. Hence, for 30 days we are going to sell these boars at prices they will bring on the market next fall, and they will be worth $40 to $100 each as breeders at that time. They are all immunized. We guarantee safe delivery and record them at

25 DOLLARS EACH

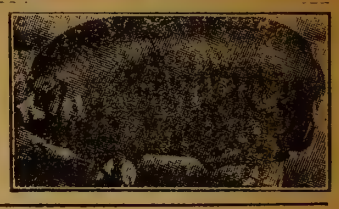
They are sired by Big Expansion (the 800-lb. son of the noted Dorr's Expansion), Big Bone 2nd (weighing 900 actual pounds, a son of Big Bone), Chief Leader (weighing over 500 lbs. at 14 months old), and Ideal Chief, and other noted boars. **The dams are sows weighing from 500-lb. yearlings up to sows of over 800 lbs.** If you are in the market for the biggest blood lines, from big sires and dams, send your check, tell us the kind of pig you want and we will send him or return your money. You will not buy such boars, such breeding, at the price again this year. Buy your boar now and save 20 to 50 dollars on him.

W. H. COOPER - - - - - - - - - - **HEDRICK, IOWA.**

BIG BONE 2d 161497.

J. O. JAMES' SENSATIONAL PIG BARGAINS

I WILL book orders up to 100 head of spring pigs sired by my half-ton, **Big Orange, Ott's Big Orange,** who weighed 700 pounds on the scales just turned 19 months. **Big Sensation, Big Orange's King, A Wonder Giant** and **Gritters' Best.** All strictly big-type boars and out of extra big, long, heavy-boned matchless sows, many of them weighing from 700 to 800 pounds. These sows averaged 9½ pigs to the sow, many of them 10 to 13 pigs. I want you to write, describing just what you want. It makes it easier to pick the pig that will suit. I am pricing these pigs low for quick sale for June delivery, or at weaning time, for orders booked during May, or while they last, **$25 to $35.** Must be bought during this month to get this price on them. Many of these pigs will be worth $100 to $150 by October. You can save from $75 to $100 by buying now. The early buyer catches the bargains. The dams of these pigs are sired by Big Orange, Big Sensation, Pawnee Nelson, Long King's Equal, Big Ex and Longfellow Jr. You can't beat sires, dams, pigs or prices. We guarantee our pigs to be as represented. Let me hear from you at once as orders are coming fast. Mention Homestead when writing. **J. O. James, Braddyville, Iowa.**



Fall Poland China Boars

I HAVE now for sale the best lot of fall boars I ever raised. They will weigh from 250 to 275 pounds. I have spring pigs weighing 75 pounds or better. These boars are sired by Pawnee Expansion and R. C. Pawnee Lad. The fall boars will be sold at $35 and $40 each, crated and ready for shipment.

JOHN I. DRIPPS - - SPRINGVILLE, IA.

C. F. Adams' Big-Type Poland Chinas

I WILL sell spring pigs sired by my great herd boars, **Big Halvor** (generally conceded to be one of the very best big-type boars in Iowa), **Maid's Halvor 1st,** a son of **Big Halvor** and out of the mammoth sow, **Long Maid,** and one of the grand young boars of the breed, **Mammoth Jumbo,** a son of the noted **Big Jumbo** and **Grand Chief,** bred by John Miller. These pigs are out of a herd of

Sows That Cannot Be Surpassed for Size and Quality

These sows are bred in the purple, many of them being sired by the great sire, **Big Halvor,** others by **Coming Wonder, Big Nelson,** etc. I know I can please you in a pig and that you will be more than pleased with the manner in which they develop. These pigs will be worth three and four times what I am asking for them within the next year. Write me for prices, mentioning Homestead

C. F. ADAMS - - - - - - - - - - - - - - - - - - **OWASA, IOWA.**

Mouw's Polands Average $104.

The sale of big-type Polands made by Peter Mouw, Orange City, Iowa, on June 25th, brought out a large crowd of breeders and he disposed of fifty-three head at an average of $104. This is the first midsummer sale Mr. Mouw has ever made and considering the busy season of the year, it must be regarded as a most excellent sale. The top of the sale was Square Jumbo, a two-year-old son of Big Jumbo and he was secured by W. J. Graham, Howard Lake, Minn., at $415 and he was a bargain at that figure. The second highest price boar was Iowa King, a two-year-old son of Big Wonder, and he was purchased by J. O. James, Braddyville, Iowa, at an even $400. When it comes to size and bone we regard this hog as one ofthe best in the entire offering and we look for a splendid outcome in this hog. Williams Bros., Villisca, Iowa, got another great bargain in the April yearling boar, Wonder, at $190, and we look for these breeders to make a good hog out of him. Thos. F. Miller, York, Neb., was a discriminating buyer of sows and secured several of the better ones, as also did W. J. Graham, Howard Lake, Minn. In the younger boars W. W. Birge, North Platte, Neb., got the pick in Mouw's Tecumseh at $95. Colonel Benson cried the sale, assisted by Ira Cottingham in the ring. Below we list those selling for $40 and above:

1.	Long Orange, H. J. Weeldrier, Bridgewater, S. D.	$180
2.	Oakland Jumbo, H. F. Anderson, Castleton, Ill.	330
3.	Square Jumbo, W. J. Graham, Howard Lake, Minn	415
4.	Tecumseh Jumbo, C. A. McCormick, Mechanicsville, Iowa.	105
5.	Young Jumbo, Harry Blockter, Henry, Ill.	105
6	Big Jumbo 2d, W. Z. Swallow, Waukee, Iowa	65
7.	Iowa King, J. O. James, Braddyville, Iowa.	400
8.	Chief Price, M. Shivers, Knoxville, Iowa.	102
9.	Smooth Wonder, W. J. Graham.	180
10.	Wonder, Williams Bros, Villisca, Iowa	190
11.	Fair Fellow 2d, E. Gritters, Perkins, Iowa	95
12.	Long Jumbo, C. J. Anderson, Wausa, Neb.	100
13.	Long Jumbo, Harry Uittenbogard, Archer, Iowa.	130
14.	Adam's Big Hal, E. W. Kreischer, Mt. Vernon, Iowa.	75
15.	Mollie's Jumbo, H. T. Hayman. Formoso, Kan.	95
16.	Long Jumbo 2d, P. S. Armstrong, Owensville, Ind.	95
17.	Tecumseh Bib Bone, J. B. Roberts, Pierce, Neb.	75
18.	W. N. Dean, Pierce, Neb.	50
19.	A. G. Miller, Kellogg, Iowa	80
20.	Thos. Sturdy, Greenfield, Iowa	70
21.	W. E. Henshaw, Oskaloosa, Iowa	67
22.	J. L. Gutschall, Sheffield, Ill.	50
23.	W. J. Graham	165
25.	S. R. Kiefer, Mt. Carroll, Ill.	120
26.	F. J. Hicks, Onarga, Ill.	125
27.	J. K. Jones, Ottawa, Kan.	65
28.	C. A. Smith, Britt, Iowa	80
24.	W. W. Wright, Allen, Neb.	80
30.	Thos. Sturdy	80
31.	James Ten Cate, Edgerton, Minn.	55
29.	Link Lukens, Disco, Ind.	60
32.	Reubel Bros., Marathon, Iowa	150
33.	W. J. Graham	35
34.	L. W. Lugar, Derby, Iowa.	45
41.	E. F. Dettoff, Le Mars, Iowa.	40
43.	E. A. Holt, Garner, Iowa.	42

63.	W. J. Graham	60
69.	E. J. Miller	205
70.	E. J. Miller	95
71.	W. E. Henshaw	55
72.	C. B. Harttever, Kenneth, Minn.	55
75.	T. F. Miller	130
76.	E. E. Curtiss, Union, Iowa.	60
77.	M. Shivers, Knoxville, Iowa.	100
78.	Chas. Stevens, Little Indian, Ill.	45

POLLED DURHAM CATTLE.

WAYSIDE POLLED DURHAMS, Poland Chinas, Wayside Victor, roan, Scotch bred 3 yr. olds, and calves 6 to 12 mos., choice big-type fall pigs, either sex. E. J. Augspurger, Pulaski, Ia.

YORKSHIRE SWINE.

LARGE YORKSHIRES Gilts bred for Aug. and Sept. farrow. Pigs not akin of Dec. and Jan. farrow. Booking orders for spring pigs. Pedigree with each sale. Prices right Address W. C. Cook, R. 42, Box 22, Ada, Michigan.

Kool's Poland China Herd.

A representative of this paper last week made a visit to the farm of A. Kool, Cordova, Iowa, and found that gentleman's herd of Poland China hogs to be fully up to its usual high standing of merit. Mr. Kool has made it an object to obtain a great deal of size in his herd, while at the same time maintaining a degree of finish and early maturing qualities such as have generally been overlooked by breeders of greater prominence. Mr. Kool has in service in his herd a hog which the writer looks upon as one of the most valuable Poland Chinas in existence. This is Big Victor's Improver, a son of Lonergan's Big Victor and an animal which is remarkable for size, bone, symmetrical proportions and prepotency as a breeder. There is good reason for the existence of all these points of excellence, because it is probable that few other hogs of the breed combine in their pedigrees so much of the excellence of those animals which have been responsible for the high standard of the Poland China today. Perhaps some of the names in this pedigree have not received consideration by breeders of today, but just the same they have exercised an overshadowing influence without which the Poland China would never have arrived at his present prominence. In the pedigree we find the name of Free Trade, a hog which as a yearling at the Iowa State Fair topped the beam at 800 pounds, won championship and gained the reputation of being at least as good a Poland China as had ever been driven into a show ring. Another line of the pedigree traces to George Wilkes, the most prominent and most talked about representative of the Tecumseh strain, than which there is none better. Still another line goes to Look Me Over, and Look Me Over was a hog of usual size with a remarkable mellowness and finish such as is seldom found. Still back of this is the old Give or Take blood that furnished the foundation on which many breeders built their success. Big Victor's Improver is a worthy representative of his famous ancestors. His get are just as big as any of the more boasted big-type kind and they are just as good as any kind that can be produced. In the hands of expert showmen they would certainly have arrived at front rank as show pigs. Mr. Kool has also in service Jumbo by The Big Orphan. His dam was a daughter of Fesenmeyer's A Wonder and back of that other strong infusions of most popular strains of blood. The brood sows in the herd are good ones. They are well bred and have been chosen with particular reference to breeding qualities as well as size and finish. Mr. Kool announces a fall sale to take place October 10th. In this he will have a magnificent lot of fall boars as well as a few of the best of the spring crop. Additional information will be given in due time.

The welfare of cattle and horses and the profits to be derived from them depend upon the degree of comfort which is afforded them. During the summer season flies do more to deteriorate the value of live stock than any other one cause. The fact should interest owners in Cow-Ease, which is advertised on page 8 and which is recommended as a means of keeping flies off of cattle and horses and preventing ticks. It is sold at the low rate named in the advertisement. Address orders to Carpenter-Morton Co., Boston, Mass.

25--Big-Type Poland China Sows For Sale--25

These are all strong in the blood of the strictly big kind and are bred to the 900-lb. Mouw's Big Sioux for fall litters. I am also offering to sell my splendid 2-year-old boar, Smooth Jumbo. Write me at once and mention The Iowa Homestead. Address - - - **GEORGE GLYNN, Sioux Rapids, Iowa.**

AUGUST GORDER'S POLAND CHINAS

A FEW choice fall boars sired by Teddy by the champion, Big Mischief. A nice crop of pigs sired by Futurity Jack and Matchless Expansion. The sow herd is by such sires as the 1,000-lb. Centennial, Colossus, Big Victor and other noted big boars. Address today and mention The Homestead.

Regal Underslung Best for Country Roads

Hundreds of representative farmers who are the best and most critical automobile buyers, have selected Regal Underslung Cars and found they rendered constant, lasting and efficient service on country roads. Today Regals are found in every rural district.

The Underslung Construction—the frame below the axles—insures you against skidding and turning turtle. Ample road clearance is provided. The distinctive spring construction make the Regal the easiest riding car in the world, saves your tires and greatly reduces stress and strain on all working parts. Regal cars are born hill climbers. No car assures more power to come and go as you desire.

These values combined with remarkably low prices —*all around $1,000*—have made Regal Underslung Cars favorites with the farmers. You can have your choice of a touring car or a roadster.

Write today for instructive Regal booklet. We will mail it to you together with the name of the Regal dealer in your locality. Call on him and he will give you a demonstration.

HOMESEEKERS LOW FARES TO CANADA

Come to Canada now and let us help you pick a choice farm before the best are taken. The Canadian Government is now distributing 135,000 FREE fertile farms along or near the **Canadian Northern Railway**—Wheat Farms, Poultry Farms, Dairy Farms, and farms adapted to cattle, hog, sheep and horse raising.

Even if you have already located your farm you should travel to it over the **Canadian Northern Railway** and have the added advantage of traveling from 1,550 to 2,500 miles through Canada's richest farming country.

Just glance over these low rates—tickets are first-class, round-trip, good for twenty-five days, with stop-over privilege. Excursions every first and third Tuesday, via Duluth and Ft. Frances, or via St. Paul and Winnipeg.

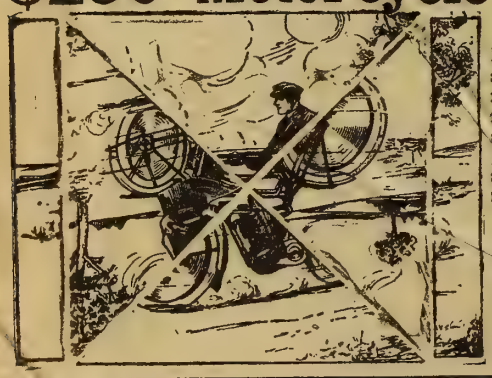
$250 Motorcycle Given Away



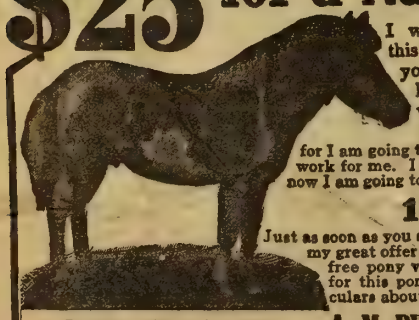
Here is your chance to get a $250 Pope Motorcycle. Cut this picture into six pieces and paste or pin the pieces together so as to make a complete picture of a boy riding a motorcycle. Mail it to me with your name and address and I will tell you all about the great contest in which you can win the seven-horse power motorcycle and a lot of money besides.

1500 Votes Free

I will also send you a special coupon good for 1500 votes toward the motorcycle. All you have to do to get this coupon is to send your name and address at once.

Popular Company
507 Popular Bldg. Des Moines, Iowa

$25 for a Name for this Pony



I will give **$25.00 FREE** for the best name for this beautiful prize Shetland pony. Send the best name you can think of right away, for not only do you have a good chance to win the $25 prize but

You Can Win the Pony, Too

for I am going to give him to some boy or girl who will do a little easy work for me. I have just given "Dandy," another beautiful pony, and now I am going to give away this pony. But first I want a name for him.

1500 VOTES FREE

Just as soon as you send me a name for the pony I will tell you all about my great offer and I will also send you a special coupon good for 1500 free pony votes. Remember, I will give $25 for the best name for this pony, and I send you 1500 free pony vote and full particulars about the pony as soon as I hear from you. Write me today.

DOES YOUR

Harness Need Mending?

SEEDING, corn plowing, haying, harvesting and threshing are destructive to harness. No doubt your harness needs mending. Any one can mend his harness with my Speedy Stitcher. The job will look just like a harness maker had mended it.

The Speedy Stitcher is the latest invention and the most effective of anything in the form of an Automatic Sewing Awl ever offered. Its simplicity makes it a thoroughly practical tool for any and all kinds of repair work, even in the hands of the most unskilled. With this Awl you can not only mend harness, but shoes, tents, awnings, pulley belts, carpets, saddles and suit cases.

The Speedy Stitcher with a set of grooved needles, including a draft stallion needle for tapping sewing machine needle for tapping shuttles, contains a large bobbin for less the thread feeds. Any firm bobbin are enclosed. Come to out of the way. tion market tension which end draft breeds. your stitch. The MER WILL you will not Creston, Iowa.

MY BIG FREE OFF

I will give one of these excellent Speedy Stitche anyone who will send me $1.00 for one year's subs stead.

Kindly use the coupon below and be sure to before you forget it.

A PURE-BRED HOG FARM

Tidy Buildings—Economical Arrangement—Energetic Management—Fairness in Business Dealings—The Things That Go to Make a Successful Business.

PICTURES on this page are made from photographs taken on a progressive Iowa farm which is devoted almost exclusively to the business of producing pure-bred swine. These sightly, well-planned, well-cared-for buildings are merely a reflection of the close attention to detail that is exercised in every feature of the conduct of this breeding farm. The perfection of equipment, the energetic management, and the well-balanced judgment displayed, have brought a well-earned reward to the owner—a young man who possessed little else than the qualities referred to as capital with which to begin his operations.

The purpose of the farm is to produce registered hogs to sell to farmers. The plans of the improvements are all laid with the object of facilitating the operations of the business. Realizing that growth, thrift and progress of animals depend upon their bodily comfort and peaceful surroundings, every arrangement of lots and buildings is made with the aim of promoting those ends.

The principal building is that shown in the large engraving. The view shows the south exposure. That section showing the windows is perhaps 24x60 feet in size. A wide alleyway extends the entire length. The south section is cut up into farrowing pens with removable partitions so that it may at other times be utilized as a feeding floor or for sleeping room. The north section is used for grain bins, storage, etc. A short addition facing west is divided on the same plan. The larger section at the east end is used as a feeding floor, and for such other purposes as circumstances may demand. It is arranged for temporary seating to accommodate the auction sales that are held in it in fall and spring. The building has a concrete floor throughout. The floor is also built about eight feet wide around the outside. The system of light and ventilation leaves nothing to be desired. During the early spring farrowing season the sunlight reaches just where it is needed, while the plan of ventilation prevents drafts.

A smaller separate building accommodates growing pigs. Small individual houses are also provided so that the hogs may be cared for under any conditions that may be presented. In addition to the buildings, there are concrete feeding floors, automatic water supply, sun shades, automatic salt and ashes feeders, and steel wallowing tanks. Everything on East Side Farm is built in an attractive and substantial manner. Nothing is unpainted. No accumulation of trash or manure is permitted. No untidiness is evident. Convenience with a view of economizing labor is studied.

Not many breeders have been as attentive to all the details and little niceties of the business as has the owner of East Side. And it follows that few have been accorded the same degree of success as he. He cares for his stock as he cares for his buildings. He knows every pig and every pig knows him. They are on good terms with each other. So they both get along.

As soon as a little pig thinks he is big enough to eat, he somehow finds a nice corner with a supply of corn or ground feed that nobody else knows about. As soon as he feels like snuggling down in the long grass or nibbling a few green shoots a little private gap in the fence leads to a blue grass pasture, a clover field, or a juicy rape patch. When he feels the need of a bath he knows just where to find the steel bath tub half filled with scented dip that soothes his itching spots and kills lice. And when he wants to take a cool and quiet snooze he knows of a spot under a kindly roof that gives a shady, airy sleeping place all his own. Practical and economical methods of feeding are employed. A variety and enough cause thrifty growth and vigorous muscular development. The place has a reputation for producing pigs with size and pork-making qualities. East Side has also a reputation for fairness in business deals. Acting on the principle that right is right, the owner always gives patrons value received and in case of doubt he invariably gives the other fellow the big end of the bargain. The obligations of East Side Farm are always fulfilled.

SUMMER WORK ON PERENNIAL WEEDS.

A subscriber from Audubon county, Iowa, is having a serious encounter with the Canada thistles. He finds that in spite of heroic methods of destruction that have been adopted they are gaining on him, hence the appeal to this paper for advice.

In fighting this pest one must understand in the first place that it is perennial in its root character, or in other words, it propagates itself from year to year by its root system and therefore is not dependent on seed for its continuation or even for its ability to spread because the roots are constantly creeping along below the surface of the ground.

Where these pests have infested a considerable area there is only one way to proceed to kill them out, namely, to plow the land and afterwards keep it in continuous cultivation during the balance of the season. There is no better time to get in deadly work in the beginning than to plow some time in the month of July when the soil is dry. There is no special advantage in plowing deeper than five or six inches because the cutting of the rootlets simply means the more rapid spread of the thistles unless growth is headed off by constant cultivation. Where the soil is exceedingly dry when it is plowed little work may be required on the surface during the next month, though it is an excellent plan to disk the ground two or three times immediately in order to prevent the further drying out and insure the complete destruction of such thistles as may not have been covered by the plow. During the late summer and fall months the disk should be used whenever the thistles begin to show themselves above the surface. Under no circumstances should the leaves be allowed to form because this only affords the root system an opportunity for development. The root must die or rot if it cannot be sustained by the carbon of the atmosphere obtained through the medium of the leaves and stems. It is true that this heroic method we have outlined means that the use of the land must be given up during the summer, but where one is so unfortunate as to have part of his land infested with this pest he can well afford to take a season to make a sure thing of their destruction.

PLOWING A DRY SOIL.

The average man has a natural aversion for the kind of labor involved in plowing a hard, dry soil. Because of this stubble lands after the removal of small grain crops are frequently allowed to remain unturned for several weeks after harvesting, much to the detriment of the soil itself as well as to the unfavorable effect on the following crop.

Where perennial weeds exist in the soil, such as morning-glories or thistles, a real hardship can be imposed upon these pests by plowing the soil to a good depth when it is dry. We have known instances where a crop of these perennials has been absolutely killed out by this plan, if followed up in the fall with an occasional surface cultivation.

In some instances men who have planned to start an alfalfa field have felt themselves obliged to pass the matter up, simply because their soil was dry after the removal of a grain crop. As a matter of fact in most cases if the land is plowed as soon as the crop is removed there is usually under average corn belt conditions sufficient rain during the following weeks to mellow the soil and thereby afford opportunity for making the seed bed friable and firm.

It takes more horse power, it is true to handle land when it is in this condition, but as the work usually comes at a time of year when other forms of labor are more or less slack one can afford to take a little more time and reasonably expect that the outcome of such labor in actual dollars and cents will fully justify the practice here recommended.

A WORD ON PAINTING WOOD.

We are not prepared to furnish facts and figures showing to what extent the life of wood structures is prolonged by sensible use of paint. Indeed whether there is any profit in painting or not might be a debatable point, but as to the wisdom of using paint on all frame farm buildings there can be no question whatever. If for no other reason than for appearance's sake money invested in good paint properly applied actually pays dividends.

The United States Department of Agriculture strongly endorses the plan of keeping both buildings and farm machinery painted and in a bulletin on the subject gives some of the principles that must be kept in mind by the amateur painter. According to this bulletin all wood is more or less porous, and the natural result of applying a substance like paint to such a material is that the liquid portion sinks into the wood and leaves a large portion of the solid material on the surface. Also different parts of the wood will differ in porosity, and there will tend to be different amounts of paint left on different portions of the surface.

In order to do a good job of painting it is practically always necessary to apply several coats to new wood. The first or priming coat is made thinner than the others, the amount of thinning depending upon the porosity of the wood. For ordinary pine, a paint of proper spreading consistency when mixed with an equal volume of raw linseed oil, generally furnishes a good material for priming. With very porous wood, such as redwood, more oil may be added. The priming coat should be applied with as much care as any other and should be thoroughly brushed into the wood, the brushing being carefully done so that the paint is evenly distributed, with no tendency to run. It is the custom of many painters to add a great deal of drier and of turpentine to the priming coat, and to apply the other coats almost immediately after finishing the priming. This is not good practice. The paint for priming should consist of the pigment, linseed oil and a minimum amount of drier, with no turpentine or benzine; and after applying it at least a week and preferably longer should elapse before putting on the second coat.

Three coats at least are generally necessary to make a good piece of work. The effect of the priming coat, if properly applied, is to fill the pores of the wood and furnish a foundation on which to apply the subsequent coats. Owing to the different porosity of different parts of the surface, it is almost impossible to completely fill with one priming coat, and an attempt to get a good effect by applying the finishing coat immediately on top of the priming generally results in failure. A second coat will not penetrate to any very great extent into the wood. It should not, however, dry with a gloss, because a glossy surface does not furnish a good foundation for the next coat. In order to prevent the gloss, most painters add turpentine to the paint for the second coat; the amount used, however, should be small—to each gallon of paint about a half pint of turpentine in hot weather, or a pint in cold weather, is sufficient. The second coat, which of course should have been evenly spread and well rubbed in with the brush, should be allowed to dry somewhat longer than the priming coat. The third, or finishing coat should be one which will dry with a gloss, and for this purpose there should be no turpentine or thinner added to the paint at all. This method is one which is advocated by a large majority of authorities on the painting of wood, but is seldom carried out by painters, the tendency being to add excessive amounts of turpentine or benzine, unduly thinning the paint and making it possible to spread it in thin, even coats with less labor than would be required for the same thinness and evenness when paint of a proper consistency is used.

1913 IOWA STATE FAIR.

With $76,000 offered as premiums in the various departments and with larger and finer exhibits promised than ever before the fifty-ninth annual Iowa State Fair, which opens at Des Moines, Wednesday, August 20th, promises to eclipse all previous records. The Iowa fair has the usual distinction of opening the circuit, which means that it will have no competition for that week and that the entries and exhibits will be in the pink of condition. Sec. A. R. Corey announces a number of important innovations, chief among them being the competition for the National Draft Horse Breeders' Futurity Stakes, competition for the Poland China Futurity Stakes, an enlarged fish and game exhibit, a third babies' health contest and a boys' state fair camp similar to the one which proved so successful last year. This latter offers a free trip for one boy from each county in the state and last year proved to be an educational feature second to none. The State Board of Agriculture has turned over to the fish and game department twenty acres of land for a state game preserve. Inside this enclosure will be located feed house, breeding pens and the largest and finest exhibit of game birds ever shown at the Iowa fair.

While the contests for agricultural supremacy will be more strenuous than ever, the amusement features of the fair have not been overlooked. Three bands, including the famous Liberati's Concert Band of forty-two pieces and six grand opera singers, have been secured. The spectacular production for the night show will be the fireworks display known as "Old Mexico," showing scenes in the southern republic in the late forties, at the time of the invasion of the American troops under General Winfield Scott. Many new and valuable features will be added to the live stock and hippodrome night show, so that all who attend will find ample and divers means of amusement as well as of education.

Cash prizes offered in each department for the 1913 fair are as follows:

Horses	$14,686.00
National Draft Horse Breeders' Futurity (estimated)	4,000.00
Speed events	15,700.00
Cattle	15,868.00
Swine	4,200.00
Poland China futurities	980.00
Sheep	2,868.00
Poultry	2,101.00
Agriculture	4,284.00
Pantry and kitchen	828.50
Honey and bees	411.00
Dairy	657.00
Horticulture	1,827.75
Floriculture	1,470.00
Fine arts	1,862.00
Work of children	170.50
School exhibits	968.00
Dog show	1,000.00
Babies' health contest	500.00
Boys' judging contest (scholarships)	650.00
College exhibits	800.00
Total	$75,831.75

The fair opens Wednesday, the 20th, and continues until Thursday, the 28th, thus opening two days earlier than has been the custom heretofore. Saturday, the 23d, will be known as Des Moines day and will be one of the big days of the fair, whereas this has heretofore been held on Monday. It will therefore behoove every visitor to come to Des Moines earlier this year than heretofore, so as to lose none of the big features promised.

THE ABUSE OF AUTOMOBILES.

The automobile tourists who found brush piled upon the road by indignant farmers had only themselves to blame for these obstructions, for in their eagerness to break records scorching across the country they were all too heedless of property rights and even of human life. Even in this day of farm-owned automobiles, when such states as Iowa and Kansas report as many motor cars owned by farmers as by city men, there remains farm opposition to the automobile, founded almost entirely on the driver's reckless disregard of the farmer's rights. The story comes from Kansas of an official of one of the transcontinental highway routes setting forth to discover the reason of farm opposition. He found it to lie entirely in the carelessness displayed by the automobilists to the rights of others. Here is his report in detail in regard to one section of the route:

I have been getting down to the grass roots to find out why some farmers are opposed to improvement of cross-state automobile roads, such as the Santa Fe trail. I had imagined it was a matter of taxes, and that the farmers were opposed to money being spent for road improvement. But that is not the cause. Dead chickens cause more opposition than taxes. In Franklin county, where there has been more difficulty than anywhere else in the state, in getting county road improvement, I found that nearly every kicker had been losing chickens. "Those joy riders come along the pike lickety-split and kill the chickens; run down the dogs and never think of even apologizing," one Franklin county farmer told me. "That's why I don't want to see any improved road near my farm. I'd rather drive in the ruts and save my chickens."

Where the good road promoters and the automobile enthusiasts encounter farm opposition it is almost always the result of some such heedless disregard of others' rights as reported here. The motor car driver has only himself to blame. He is his own worst enemy, in this matter of good highways over which to scorch at top speed. Nothing of recent adoption has greater reason for being or more justification than the automobile, but its abuses are as numerous and as flagrant as its uses. There are altogether too many men who think that the possession of a motor car exempts them from the ordinary statutes, not to say civilities. When this abuse has been corrected farm opposition to automobile highways will have disappeared.

AMOUNT OF GRAIN TO FEED PIGS ON CLOVER OR ALFALFA.

The Missouri State Board of Agriculture has carried on a campaign to obtain information in regard to the practice of farmers in the feeding of grain to hogs when legume pastures are used. Out of 153 replies to the question as to whether hogs will make a satisfactory gain on pasture alone, 121 replied in the negative. This means that practically 80 per cent of those to whom the inquiry was addressed believe in the plan of feeding grain. Among the thirty-two who were able to obtain satisfactory gains without grain sixteen of the replies came from men who adopted the practice only when the legume was in bloom. From this it is inferred that there is a time when either red clover or alfalfa will under favorable circumstances produce reasonable gains on hogs in thin flesh.

In an experiment conducted at the Nebraska station lasting sixty-three days, with ten pigs, it was demonstrated that pigs weighing seventy-five pounds each did little more during the period of the experiment than hold their own. Each pig in this lot gained only one and one-half pounds in the sixty-three days, whereas in the case of shoats fed grain lightly the gain was 21.7 pounds per head during the period covered by the experiment. When a medium grain ration was fed the gain per head amounted to 39.8 pounds, while a heavy feeding of grain produced a gain of 53.7 pounds in the sixty-three days. From the standpoint of grain used the results in this case are in favor of light feed of grain because it required 386 pounds of grain to produce 100 pounds of gain, whereas the hogs on a medium ration required 398 pounds of grain, while those on heavy feed consumed 423 pounds of grain for each 100 pounds of gain made.

In another experiment at the same station shoats weighing fifty-two pounds made a gain of twenty-seven pounds each in ninety-eight days when they were fed one-half pound of corn for each 100 pounds of weight. In another lot where one and one-half pounds of corn were fed for each 100 pounds of live weight the gain was thirty-six pounds in ninety-eight days, whereas a third lot fed two and one-half pounds of corn per 100 pounds weight made a gain of forty-eight pounds during the period of the experiment. In this case it required 124 pounds of grain to make 100 pounds of gain on the light ration, 222 pounds on the medium ration and 332 pounds on the heavier grain ration.

From these results, then, it must be

concluded that after all it is a question of whether rapid gains are desired or on the other hand cheap gains. A light grain ration will produce gains at a very low cost considered from the standpoint of the cost of the grain, though there is another factor that must be kept in mind that it prolongs the feeding period. Where there is plenty of legume pasture and where grain is relatively high the somewhat slower route may in the end be the most profitable. On the other hand where pastures are relatively scarce and grain comparatively cheap the feeding of as much as two and one-half pounds of corn per day for every 100 pounds live weight might be justifiable.

MONEY SPENT ON AUTOMOBILES.

We are in receipt of a letter, this week, from a subscriber who stands in great fear of what he terms the present craze for automobiles. According to his belief, it is going to bring financial ruin to the country, particularly to the middle West. We quote in part from his letter as follows:

The money spent for automobiles and the after upkeep expense is almost too great to comprehend. In looking about my neighborhood it seems to me that to own an automobile and to keep it in running order is what three-fifths of my neighbors are working for. In many instances the buying of cars is along the old order of house and barn building—the last one to buy getting something that outdoes all the others. The cost of these machines and the expense of keeping them ready for the road is not the only bad feature; if it were I might be inclined to keep still, but when I see all this money spent on automobiling going East instead of staying here where it is produced, then I realize what a bad thing the automobile craze is going to be for the central West. It is draining the great corn belt of all the money our corn crops earn for us, and the East is getting it, for there is where the majority of the machines are made. One of these days we will awaken to the fact that we have been acting like fools, and the East, as usual, will have our money.

While this is a great country, in size, in wealth and diversification of crops, it still remains a fact that what is of benefit to one part of the nation is of benefit to all; likewise, what proves a detriment to one portion, proves, in part at least, a detriment to all. Our financial affairs, particularly, are closely interwoven, and it is almost impossible to build up one portion of the nation without all the nation feeling a benefit from it.

This paper does not deplore the fact that the majority of automobiles are made east of what we commonly call the corn belt. It is true we send our money there to buy these machines, but the folks who make them send their money out here to buy what we produce. It is simply a case of exchanging what we produce for what they produce, and it is not in our heart to say that we are not benefited by the exchange.

Of course, there are things more important than automobiles, but after a man has earned for himself and family the needed portion of those things, who can blame him for buying an auto if he and his family have a desire to own one? Is not the farmer, who works harder for what he produces than anyone else, as entitled to the pleasures of an automobile as anyone? We think so, therefore, have not a word of censure for the farmer who is able to own an automobile and who buys one. Furthermore in the case of the farmer the auto is not only a vehicle of pleasure; it has an economic value that has if anything been underestimated heretofore. Its use by the farmer really enhances the value of land by the annihilation of distance between the farm and market centers. It makes a difference whether it requires an hour or two to go to market or on the other hand ten or fifteen minutes. The use of the automobile as carrying agent for small commodities to and from the farm means in the end a saving of the farmer's time, and time never was worth so much in the world's history as it is at present. While it is not claimed that the automobile is as indispensable as the binder, the mower and the silo, yet it already occupies an important place in the economy of farm affairs.

As to the great amount of money now spent for automobiles and on their upkeep, we cannot see financial ruin to the country because of it. The money thus spent is kept in circulation, the same as if it were spent for any manufactured article. The fact that it goes through the automobile maker's hands makes no more difference than if it should go through the lumberman's hands in the purchase of lumber for the fine house or to the furniture maker for the fine furniture to furnish the house when completed. Men who make automobiles must eat, the same as men who build houses, who operate railroad trains and who work in factories of various kinds. The idea is to keep our population supplied with work, at profitable wages. This the automobile industry is doing, so how can it bring financial ruin to the country?

CAUSES OF DECREASE IN RURAL POPULATION.

In an address before a recent country life conference Dr. B. H. Hibbard, of the Wisconsin University, called attention to some of the causes that have resulted in decreasing rural population, and among other things, said:

The tendency toward a sparser rural population has not been confined to the decade just passed. It has been going on for a much longer period, and represents a struggle in the mastery of power. By the evolution of the plow to the huge traction engine plowing outfit of today, of the cultivator from the simple hoe to the modern three-row machine, of the reaper from the scythe and cradle to the self binder, the feeble physical powers of the man with the hoe have been multiplied. Besides plows, cultivators and reapers, there are harrows, planters, seeders, windmills. There is the aid of the ox, the horse, the steam or oil engine, and the electric motor. And they all mean more land farmed by one man, or, in other words, fewer people per square mile of rural territory.

The increased use of farm implements is reflected in the number of horses used. Because of the high price of feed, the horse on the farm is not there for pleasure, but he must justify his existence even more than formerly. He is on the farm to do the work of the farm. While other classes of live stock have decreased in numbers, horses have become more numerous. In Iowa in the past ten years the number of horses at the disposal of the farmer has been raised from five to six. This additional horse, together with the added equipment in the form of machinery, means that a given man on a farm can do a fifth more farming now than ten years ago. He can, therefore, work more acres than he could ten years ago, and he is doing it. The farms are larger. This increase in the size of farms points to the slow movement toward a more efficient unit, and a more efficient unit means economy of the labor factor, or fewer people on a given area.

One of the great economic wonders of recent years is the increase in the price of farm lands. It has more than doubled in ten years for the entire country. But the sections of the West where the price has risen the most rapidly and reached the highest point are just those in which the rural population has reached the highest decline. Throughout the country west of the Hudson river the decrease in population has accompanied an increase in size of farms, and this fact added to that of increasing land values, augments the rise in value of the farm as a unit.

The rise in the value of land seems to be coincident with a decrease in the number of people living on it. It may seem somewhat paradoxical, but it is true within the middle West that the population varies inversely with the land values. The greater the value of the land, the fewer people are living on it. On the high-priced land of the middle West the percentage of tenancy is greater than anywhere else outside the cotton belt. In Iowa in the ten counties of highest tenancy and highest land value, there are 27.5 persons per 1,000 acres of farm land, while in the counties of lowest tenancy there are 34.5 persons per 1,000 acres of land. The tenant is on the average a much younger man than is the owner. A larger percentage of tenants are just beginning married life and the numbers of their families are small.

While the lessening of the farm population is in a measure a serious situation, Doctor Hibbard expresses doubt about the wisdom of society bestirring itself in efforts to replace the population by forcing recruits from the city into the rural ranks. What is needed, he contends, is the promotion of the prosperity of the farm and farmer. It is the belief of this expert that the farmer should get a larger proportion of what the consumer has to pay for food products of all kinds and when some plan is devised whereby this equitable share is obtained by the producer the soil will then be used to a fuller capacity and the whole people will be gainers. Undoubtedly there is an adjustment between country and city employment regulated largely by the degree of justice that exists as shown in the proportion or price which the producer receives for what he has to sell.

(For Hot Weather Lubrication

Polarine

FRICTION REDUCING MOTOR OIL

Friction eliminated from a motor means long life and added power. With friction down to minimum, old cars are kept like new—their value stays intact. They bring the maximum prices on re-sale.

Polarine is worth ten times its cost because it adds to motoring *pleasure*, and stops *depreciation in car value.*

It maintains the correct lubricating body at any motor speed or heat and flows just as well at zero.

Every type of motor car, motor truck, and motor boat, is made better by Polarine.

The product of the World's Oil Specialists after 50 years' experience with every kind of lubricating problem.

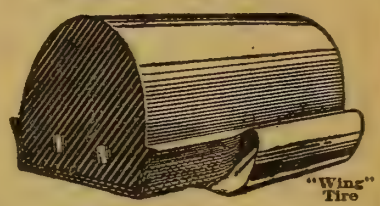
For Satisfactory Service

Equip Your Carriages With

GOODYEAR Rubber Tires

AKRON, OHIO

If you can get for the same money better carriage service and bigger *tire values* than you now get, you simply can't AFFORD to overlook the opportunity. Thousands of farm residents have considered this fact and have accordingly ttered themselves by using one of these famously satisfactory Goodyear Tires.



"Wing" Tire

"Wing" Carriage Tires

Tires that have exceptional lasting and wearing qualities due to the patented wing. This keeps dirt and grit out of the channel and prevents cutting, grinding, loosening at the base.

Because of the Wing features and fine quality, these tires give about twice the service of ordinary tires. They stay on—wear longer—at same time are very resilient—easy riding and comfortable. Get the world's best. Insist on Goodyear "Wing" Tires.

Send today for our latest book on carriage tires.

"Eccentric" Cushion Tires

The more wearing depth, the longer your tire wears. In Eccentric Cushion Tires you get 50 per cent more wearing depth because the retaining wire is below the center, allowing that much more depth. Means not only easier riding qualities but greater durability.

Buried deeper, the wire does not crack out. Tire stays firm in channel. Tough, high grade *resilient* rubber assuring you the very limit of satisfactory service.

"Eccentric" Cushion Tire

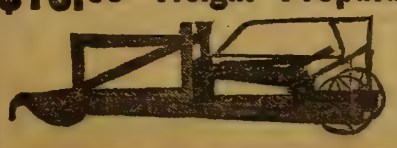
The PERFECT CORN HARVESTER

SOLD DIRECT TO THE FARMERS

$18.00---Freight Prepaid



Send for Booklet and circulars telling all about this labor saving machine.

The Cheapest and Easiest way Possible to Cut your Corn for Shock or Silo.

Oregon, Ill., Oct. 26, 1912.

Gentlemen—After giving the Perfect Corn Harvester a thorough working test in all conditions of corn in the cornfield, we write you that it has adjustment for a great variety of conditions in cutting high, medium or low. We are very much pleased at its light draft and steadiness in following the center of the row. We consider it the very best one-horse corn cutter that the experimental station has ever had an opportunity to demonstrate, and we commend it to the corn cutting farmer.

Very truly, Samuel Ray

LOVE MANUFACTURING COMPANY - - DEPT. 4, LINCOLN, ILL.

$750
F. o. b. Lansing.

YOU CAN DO IT WITH A REO

Cheaper than two horses.

Better than four horses.

Are You Awake to a Big Opportunity?

You know how the binder, the threshing machine, the drill, have revolutionized farming. If you don't—ask your father. Just as big an improvement over the old ways of hauling is offered you in this Reo—the farmer's truck. When are you going to start to make the most of it?

REO **Model H 1500 lbs. Capacity MOTOR TRUCK**

Do you stick to the blistering flail and the backaching cradle? Of course you don't; they are relics of the past. Then why do you still depend on horses for all your farm work? Horses must be used for some duties—but for work on the road they are a wasteful extravagance. This Reo truck, long of life, hard as nails, sound as a nut, spavinless, unsweenied, never footsore, can outwork four horses at less than the upkeep of two.

All we ask is that you give us a chance to show you. Just send us your name and address and receive some eye-opening facts.

REO MOTOR TRUCK COMPANY,
LANSING, MICHIGAN.

50 Bushels of Corn on One Gal. of Gasoline

50 bushels of corn per gallon of gasoline! Not an uncommon record with the Lauson Frost King Engine—just an every day performance, that's all. Think of it! Only one-quarter of a cent a bushel for shelling corn. And the Frost King is just as *saving of fuel* on all other farm work—feed grinding, pumping, ensilage cutting, etc.

The Lauson Frost King
Gasoline and Oil Engines

Perfect Balance—Every part accurately ground and fitted. Engine stands quiet even under full load. ***Starts Easily*** on the magneto, without cranking. Sumter gear-driven, built-in magneto eliminates batteries, coils and their expense. ***Takes Less Fuel*** and oil and delivers more power because of special features in design and construction. Highest grade of workmanship and best of materials insure steady running and long life.

2 to 50 H.P. Portable, Semi-Portable, Stationary

Guaranteed—We absolutely guarantee Lauson Frost King Engines to make good on every claim we make for them; also as to workmanship and material.

Write for Free Engine Book and name of nearest dealer who will be glad to give you a demonstration of the Frost King without obligation on your part.

In writing us, state size engine needed.

FARM FURROWS
TURNED BY A PRACTICAL FARMER

This country now has a grater acreage of alfalfa than ever before, and the first two crops already harvested throughout most of the central West have been heavy. Great is alfalfa.

Don't complain if the "town fellow" does satisfy his desire for ice cream this hot weather; it only makes the dairy business all the more profitable.

We need non-producers as well as producers. Non-producers must have what producers produce, consequently that creates good market, at profitable prices. I have no faith in the theory that everyone should get their living from the soil. If a man is able to live without working, the fact that he does not work makes the way all the easier for the man who has to. But I do not believe in keeping men in idleness who cannot afford a live-without-work policy.

A good garden is bought at the cost of considerable work with the hoe, yet, where one has the room, much hoe work may be dispensed with by planting in long rows and far enough apart so a horse cultivator may be used. I notice gardens worked in that way usually stand dry weather better, because horse cultivation as a rule is deeper.

Whenever I buy another mower it will be a six-foot cut. My horses are large enough to handle a larger machine nicely, and when the machine is old, if the cutter bar drags back too much on account of its length, I can cut off a foot.

Usually the purchase of an auto makes a good roads man out of a fellow, but I know of one man who has owned a machine for a year and he has not yet shown any symptoms of road dragging alongside his farm. He wears out tires enough traveling in the ruts to more than make up to him for the work spent in dragging a mile of road.

Pigs may be carried through the summer on pasture alone, but some grain fed in connection returns much more than market price. Grass shoats are usually stunted to some extent when the new corn crop matures enough for feed, and it takes enough more of it to get them in thrifty condition so that feeding grain regularly through the summer would be a cheaper plan.

Every farmer who turns off $500 worth of live stock of any kind during a year, and who owns the farm he tills, should also be the owner of scales to weigh the stock. Taking "short weight" is a great temptation to many a buyer, and a few pounds of beef or pork counts up in money these days.

Getting under the lone tree to save wetting when a sudden shower comes up is risky business. The smaller the shower, it seems, the more deadly the lightning that accompanies it, and a lone tree standing in a field is an inviting attraction for lightning. I would rather take a ducking than to act as terminal for an electric current.

A cone trap to catch flies need not be an elaborate affair, nor large in size. One can take screen wire and make a cone no larger than a tea cup, then mount it on a base that stands up the proper distance to make an entrance all along the bottom, and turn a glass fruit jar over the point of the cone. A pasteboard for the bottom, with the screen cone sewed to it, and tacked to a small block at each corner, is a good plan.

Hard rains followed by warm, clear days make it necessary to order "full speed ahead" in the cornfield.

A neighbor of mine had a wire fence fastened to the corner of his stable and during one of our recent showers a bolt of lightning followed this wire and killed a valuable team in their stall. It is waste of time to tell him now that it is wrong to fasten a wire of any kind to any building unless it is safely grounded. He knows. There are many others that might profit by his experience.

With plenty of moisture in the soil and the thermometer showing ninety in the shade every day the corn is fairly jumping out of the ground. The only drawback about it is that when the corn is growing so fast it is very brittle and great care must be used in cultivating.

It does not take a very bright mind to see that fresh, clean drinking water is needed by little chicks as well as all other animals during this hot weather, but it takes an unusually bright mind to drive a lazy body to supply it.

Fly nets are a necessity, but in addition it is a good plan to apply a liquid "fly chaser" to the horses' legs and bellies in order to protect them from the unswatted pests.

Plant McCULLOUGH'S
Turkey Hard Seed Wheat For Next Year

Plant for a bigger, better, more profitable crop than ever before—

Plant the wheat that is making more and more money for its growers every year—all over the winter wheat belt—

Plant the wheat that out-sells all other hard winter varieties in all the great grain markets.

Plant the wheat that the big millers everywhere are paying the fancy prices for—

Plant my selected Turkey Hard Seed Wheat.

Why It Beats All Others

1. Because of its hardiness and Dry-Weather-Resisting qualities.
2. Withstands Winter-Killing Better.
3. Has Highest Percentage Gluten of any winter wheat—ask any miller.
4. Makes a beautiful WHITE Flour—and MORE BREAD.
5. Not an experiment—but thoroly tried for years past and proven as to yielding and milling qualities.

Right here within 20 miles of me is the farm where "Turkey Hard" wheat was first grown in the the U. S. So I'm "right on the ground," right *in* the original American homeland of this wonderful wheat, right where I watch "Turkey Hard" Hard" grow and select the perfected, pure, and true-to-name crops of it.

Consequently, I offer you the absolutely genuine "Turkey Hard" Wheat—seed that I've expertly selected, thoroughly cleaned, and then rigidly tested for germination—seed whose every firm and flint-like kernel is full of the gluten that will earn 3 to 5 cents per bushel more $ Cash Money $ for you!

So sit down and write me today—now—it won't take but a minute—tell me to send you "Turkey Hard" samples, prices, full particulars—get my proposition at once—before you buy your next year's seed and before my supply of Turkey Hard is all sold.

McCULLOUGH
"The Seed Wheat Man"

CURRENT EVENTS

AN AMAZING story of legislative lobbying and political maneuvering was disclosed last week, when the Chicago Tribune (to which belongs credit for the Lorimer exposal in Illinois) printed the story of Col. M. M. Mulhall, who for ten years was lobbyist, field worker and strike breaker for the National Association of Manufacturers, an organization embracing 4,000 individual members, employing more than 5,000,000 persons and representing an approximate capital of $10,000,000. Colonel Mulhall has been subpoenaed to appear before the congressional committee which is investigating the lobbying charges and will go into the matter in detail. At present, while many of his charges are specifically denied by interested parties, he has disclosed enough to show that undue pressure has been brought, in the past, to prevent legislation and to elect or defeat congressmen and other public officials because of their stand for or against issues in which the National Association of Manufacturers was interested in a financial way. Colonel Mulhall names a half hundred prominent men, from the late Vice-President Sherman down to numerous grain-belt congressmen, whom he alleges had dealings, either directly or indirectly, with the association. The Mulhall charges will be sifted to the bottom, as they must be if the American people are to have any faith left in the old-school lawmakers. His charges are simply in line with the accusations made by the anti-reactionaries of both old-line parties in the last campaign that there is an "invisible government" more powerful than the lawmakers elected by the people. This "invisible government" must be overthrown if the regular, visible and legal government is to continue. Nothing more important confronts the nation today.

IN THE presence of President Wilson, ex-President Taft, the governors of a score of states and dozens of other notables, 50,000 survivors of the battle of Gettysburg lived over the scenes of that historic, three-day struggle last week. The reunion was a success in every way and notwithstanding exceedingly hot weather, was attended with comparatively little suffering and few fatalities. While the northern veterans surpassed the southern in numbers four or five to one, wearers of the gray were shown every courtesy and honor. When the confederates had been driven out of Gettysburg and the northern troops had regained possession, the Gettysburg girls of 1863 welcomed the victorious northerners with flowers and song. An effort was made to secure the presence last week of the survivors of these civil war girls. Only a half dozen could be found, but they sang the old war songs, while the veterans listened with tears streaming down their cheeks. It was an historic occasion, one which causes the younger generation to pay greater respect than ever to the veterans and to keep alive the memory of a struggle without parallel in the world's history. Ex-President Taft and President Wilson delivered notable addresses, rendering homage to the soldiers of both sides, both being actuated by a conviction that the principle for which they fought was right and truth. If anything more had been needed to prove that there is no North nor South now, but only a united country, the Gettysburg celebration provided it. It revived patriotism, awakened renewed interest in American history and was picturesquely dramatic throughout.

PRESIDENT WILSON'S currency legislation bids fair to be enacted at the present session of congress, notwithstanding the desire on the part of many congressmen to confine the session exclusively to tariff revision. The president is insisting that business conditions will demand currency reform to keep pace with the change in tariff affairs and that the party will be derelict in its duty if it neglects action. The president's plan provides for a central or federal board of control similar in form to the Interstate Commerce Commission and which will have jurisdiction over financial affairs and banking institutions just as the commerce commisson has over railroad affairs and companies. The banking board would consist of six members, appointed by the president and confirmed by the senate, three of them to consist of the secretary of the treasury, the secretary of agriculture and the comptroller of the currency. The bill further provides for the issuance, when necessary, of $500,000,000 emergency currency, this sum being selected because it was found that during the 1907 panic the amount of clearing house certificates issued was less than half this sum and hence this amount would be sufficient to meet any similar panic that might arise in the future. The president believes that with a central board in Washington, having at its disposal half a billion dollars emergency currency and power to fix discount figures on which it will be issued, the days of a money trust will have passed and financial panics will be out of the question. The bill embodying these ideas, known as the Wilson-Glass bill, has already been introduced in congress, and every effort will be made to get it through at the present extra session, coincident with the passage of the tariff bill.

WITH the duties cut even lower than provided by the house the Underwood tariff bill is now on the floor of the senate, after several weeks' discussion before the finance committee. If passed in its revised form it will be necessary for the two houses of congress to get together in conference for acceptance or compromise on the rate changes made since the bill passed the house. In addition to reducing the rates and equalizing them on raw materials and their manufactured products, the senate finance committee has made several important changes. For example, the first sweeping reduction of the tariff on sugar (with free sugar to come in three years) will take effect on March 1, 1914, instead of immediately; the income tax will be operative on March 1, 1913, instead of January 1, 1913; and the minimum exemption income has been placed at $4,000 (with $1,000 additional for a married man and $500 additional for a dependent child) instead of $4,000. It is expected that a good part of a month will be devoted to discussion of the tariff bill on the floor of the senate, after which it will come to a vote, with every prospect of passage, notwithstanding the fact that the two Louisiana senators will vote against it because of the free sugar declaration. Should the vote be a tie the ballot of Vice-President Marshall would pass the bill and bring victory to the democratic revisionists.

It is said that for every five in the increase of population in the past ten years, four live in towns and cities and but one on the farms. This means the increase of population off the farms is as four is to one. If this ratio is maintained the high cost of living is here to stay.

Ask your neighbor to subscribe for The Homestead.

No-Rim-Cut Tires
10% Over-Capacity

The Chief Tire Problem

How to end rim-cutting, for years and years, has been the chief problem of Tiredom.

Many devices have been tried and abandoned. They developed faults. The tires fell down. Thousands came back for replacement.

Every great tire maker, again and again, has tried to make tires that can't rim-cut.

We solved this problem in a faultless tire, and by means that we control. That is the reason why Goodyears now outsell every other tire.

The Ruin of Rim-Cutting

Motor car owners have lost millions of dollars through having tires cut by rims.

The trouble occurs when tires are run wholly or partly deflated. And the ruin can't be satisfactorily repaired.

Myriads of punctured tires have been wrecked in a moment—before the driver knew of the puncture.

No-Rim-Cut tires make this ruin impossible. They have been used for years, on hundreds of thousands of cars. And not one has ever rim-cut.

Over-Capacity

Another fact is that No-Rim-Cut tires exceed clincher tires ten per cent in capacity.

That is, in air capacity. It is air that carries the load. This extra capacity, on the average, adds 25 per cent to the mileage.

So these tires embody two enormous economies. They save rim-cutting and save over-loading.

The Secret Bands of Wire

These tires are made possible by six flat bands of 126 braided wires. They are vulcanized into the tire base.

Thus we get an unstretchable tire base, and we don't hook the tire to the rim.

One glance at these tires in any Goodyear shop will show why these tires can't rim-cut.

We control these bands by secrecy. They are made under lock and key.

And, so far as we know, there is no other way to make a satisfactory tire of this type. Nearly every maker has tried it.

No Extra Price

No-Rim-Cut tires used to cost one-fifth more than clinchers. With our multiplied output the price has come down. Now no standard tire of any type costs less than No-Rim-Cut tires.

There is no reason whatever to try an experiment. No reason for tires that rim-cut, or for tires of less capacity.

You can get at the same price the tire which is now the most popular tire in the world.

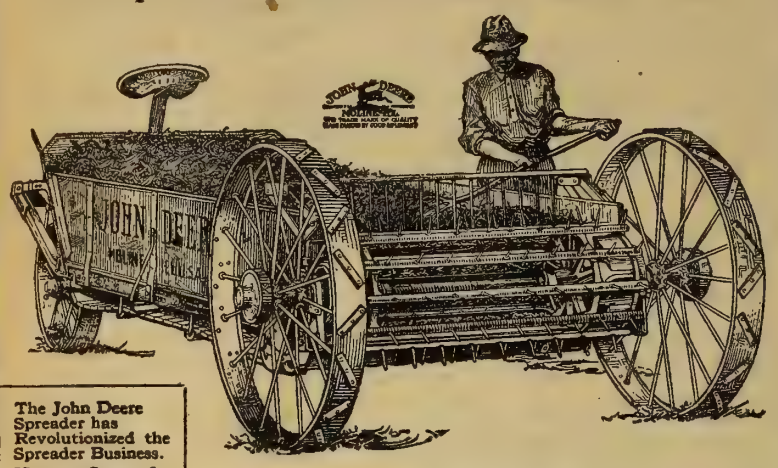
John Deere Spreader

The Spreader with the Beater on the Axle



The John Deere Spreader has Revolutionized the Spreader Business.
Here are Some of the Reasons:

BEATER and all its driving parts are mounted on the rear axle. Power to drive it is taken from the rear axle through simple gears like those that have been used on horse-powers for many years. This construction is patented. You cannot get it on any other spreader.

ONLY HIP-HIGH, easy to load. The top of the box is only as high as your hips. Each forkful of manure is placed just where it is needed. You can always see into the spreader.

FEW PARTS. Clutches, chains and adjustments—in fact, some two hundred parts in all—are entirely done away with. To throw the machine into operation, move the lever at the driver's right back until the finger engages a large stop at the rear of the machine.

ROLLER BEARINGS together with the simplicity of the machine itself, make the John Deere Spreader light draft. There are many more reasons that have helped to make the demand for John Deere Spreaders greater than all those interested in the spreader business thought possible. These features are fully discussed in our spreader book. You can get it free.

The Low Down Spreader with the Big Drive Wheels

What You Want

Here's your chance to get exactly what you want in a manure spreader.

One that is easy to load, light for your horses free from constant repairing, and one that will last as long as you think it ought to.

What You Get

With a John Deere you get a low-down spreader in which the advantage of big drive wheels is not sacrificed for the low down feature.

You get a spreader that is easy for your horses because it has these big drive wheels, together with roller bearings, few parts, the center of the load comparatively near the horses and evenly distributed over all four wheels.

No clutches to get out of order, no chains to give trouble, no adjustments necessary.

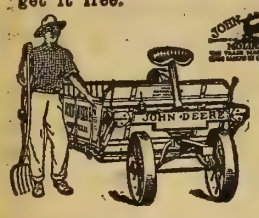
Built with steel frame, securely braced, like modern railway bridges—strong and durable.

Why You Get These Things

Mounting the beater on the axle makes all these things possible in the John Deere Spreader.

It does away with some two hundred trouble-giving parts. It makes the spreader low down. It permits the use of big drive wheels. It does away with clutches, chains and adjustments. It puts all the strain and stress of spreading on the rear axle, where it belongs, not on the sides and frame of the spreader.

It does a lot of other good things, too. They are fully illustrated and described in our new spreader book.

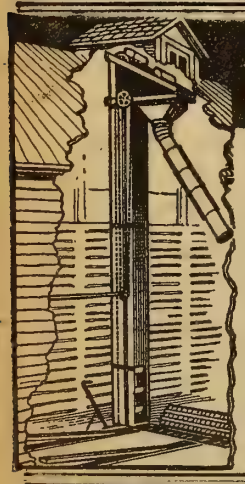


Get this Spreader Book

It tells how the John Deere Spreader is made and why it is made that way. It contains illustrations of the working parts and colored pictures of the John Deere Spreader in the field. It also has valuable information in regard to storing, handling and applying manure to the land.

Get one of these books free, by asking us for our spreader book, Y 27

John Deere Plow Co., Moline, Illinois



A MACHINE LIKE YOUR GRAIN DEALER USES

THE "Hart" Bucket Elevator is the most massive and securely made elevating device you can buy. Will work under all conditions and handles all kinds of grain, even coal, most economically. Withstands continuous usage without causing trouble This machine, when installed, requires less room, will not block your driveway and is always ready for use.

FINEST quality material is used. Buckets are made of pressed steel 16 inches wide attached to No. 77 sprocket chains. The "Hart" machine absolutely cannot clog. Grain cannot splatter over or carry back at the top. The special front panel, encasing the buckets, makes it impossible for grain to drop elsewhere than into the bin. Machine can be operated with overhead lift or log dumping device.

THE elevator can be installed in any of your cribs—or if you intend putting up a new barn or crib, ask for our **architects plans, furnished free,** to fit your exact needs. Just tell us capacity desired and type of elevator and we'll send information that you should have. Remember—buying the "Hart" machine means having a real elevating plant. Write today for catalog.

OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit $1.00, addressed as above.

TITLE BY ADVERSE POSSESSION.

In the beginning of things, when human society was in a primitive condition, the private ownership of property, both real and personal, was founded upon the actual possession of it. Title to land originated in conquest, and conquest was wrought by force or fraud, and frequently by the exercise of both. Even in this country of high ideals, the title to most of the land, if not all of it, rests upon conquest and possession; the ability of our strong race to take and hold. Possession has always been, and still is, a powerful factor in determining the right to property. So potent is it that the old saying, "Possession is nine points in the law," has become a popular proverb. A good title to real estate may be acquired by what is called "adverse possession." A person being in possession of land claiming to own it, although he actually has no right or title to it, may, nevertheless continue to occupy and use it in such manner and under such circumstances as will give him a good title after a certain period of time. By the common law, adverse possession of twenty years was necessary to confer title. In this country adverse possession is provided for and regulated in every state by what is known as the statute of limitations. These statutes differ from each other considerably as to the length of time adverse possession must continue in order to ripen into a title, but in other respects they are very similar, especially as to what constitutes adverse possession. The general rule is, that in order to give title, possession of land must be actual, visible, notorious, exclusive, hostile to the real owner, and held under some kind of a claim of ownership, continuously for the period of time fixed by the laws of the state in which the land is located. All statutes of limitations are based upon the ideas that persons having claims to property should assert the same within a reasonable time and that it is for the peace of the community that the actual possession of real estate continued for a long period of time should not be disturbed. In some states the possession must be based upon some kind of a paper title, although such document may be defective, or even void. This is called "color of title." In other states a mere verbal claim of ownership, coupled with continuous possession for the required time, will give the occupant good title. Adverse possession when complete gives a good title to the possession against all the world except persons who are under disability of some kind when the possession is complete: for instance, persons under age, insane, or imprisoned, because of such reasons are unable to bring suit for the recovery of the land.

In Iowa adverse possession under color of title or claim of right is complete in ten years.

In Illinois adverse possession under claim of ownership for twenty years gives title, and color of title to unoccupied land, with payment of taxes for seven successive years, is equivalent to adverse possession.

In Wisconsin where a claim to land is founded on a written conveyance or judgment, adverse possession for ten years is sufficient, but if there be no written conveyance or judgment, twenty years of possession is necessary to give title. In Minnesota fifteen years; in North Dakota and South Dakota twenty years. In Nebraska ten years; in Kansas fifteen years: in Oklahoma fifteen years; in Missouri ten years.

"INGECO" Engines

A BIG MONEY SAVER

An engine that you can bet your last dollar on to work right in all kinds of weather—a fuel saver — an easy starter — a steady worker.

The "INGECO" is just that kind of an engine and besides its reliability it has a record for keeping out of the repair shop—it is a marvel of simplicity—there is nothing to get out of order. Once set it runs constantly without trouble.

KEROSENE ENGINES

Find out about "INGECO" Kerosene, Oil and Distillate Engines before you make another move on the engine question—you'll be ahead in money and satisfaction.

International Gas Engine Co.

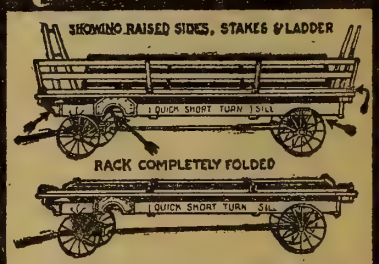
"QUICK" ADJUSTABLE HAY RACK



This ALL PURPOSE RACK will meet your exact needs and greatly simplify your work.

Home-built racks cost too much for what you get. Lumber comes mighty high bought in small quantities; there is a lot of bolts and clamps to buy; you must pay a carpenter a big price, or use your own valuable time in building; and then add to this the cost of paint and painting. The result — an ordinary hay-rack.

Better buy a "Quick Adjustable," The ADJUSTABLE SIDES have no ropes, no stay rods—nothing to interfere with loading. You can have any of five adjustments, from a wide basket rack, as shown in cut No. 1, to a flat bottom rack as in cut No. 2. There are so many good features in this rack it will pay you to investigate further. Write today.

QUICK ADJUSTABLE RACK CO.
Dept. 5, Flatt, Ills.

Saves Its Cost
on any farm
in one day's operation

THE AMERICAN BUNCHER is an attachment for any mowing machine and will save you enough seed in bunching your red top clover or alfalfa on 10 acres to easily pay its cost. Also bunches timothy, short oats, wheat, flax, and prairie grass. Catalogue **free** to your address.

MODERN SPECIALTIES MFG. CO., 104 High Street, South Bend, Ind.

VETERINARY

PROFESSIONAL Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. Thoroughly good and reliable veterinary remedies are advertised from time to time on these pages. If they were not good and reliable they could not appear in our paper. Our readers are requested to look them over. You may find here some remedy which will exactly fit your case. All veterinary inquiries should be addressed to this office.

SYMPTOMS AND TREATMENT.

FITS.

Our four-months-old calves have fainting spells which last for five or ten minutes at first, after which they stand up and look around. They begin to get lighter and finally can't get up again and die in about a week. Have lost two and another one is sick. We feed them as many oats as they will eat and plenty of hay, with water to drink.

Indigestion is the cause of such fits or convulsions and calves die of apoplexy during such attacks, blood vessels rupturing in the brain. Instead of feeding whole oats, feed bran, cornmeal and flaxseed meal, or ground screened oats. The main feed should be sweet skim milk fed three times a day.

INFECTED SOW.

About two weeks ago one of my sows had pigs, all of which had to be taken. She was sick all day and night and since then she refuses to eat; just drinks slop and lies down most of the time. She was fed corn and ground feed with tankage before she came in.

There is septic inflammation of the womb from infection following the use of forceps, or afterbirth may have been retained. Chance of recovery is poor. Once a day flush out the vagina with a gallon of lukewarm 1-5000 solution of permanganate of potash. Dissolve a dram of granular hyposulphite of soda in her slop twice daily.

ABORTION.

(1) Last fall a sow that was raising a fall litter took sick for a few days and then she peeled off from her ears back to her tail, half way down her sides, taking as much as one-half inch of the fat along in many places. She always eats good and is mostly healed up, but I would like to know what I could put on to heal her up faster? Have used nothing but hog dip. What was the cause? (2) Last January I bought a gilt that lost her litter a week after I got her. She was in a pen adjoining the rest of my herd. After that five of the others lost their litters. They were all in good thrift, fed on corn, oats and a warm swill in the morning of bran, shorts, tankage and about seven pounds of oil meal for twenty head. They had plenty of exercise. Will it be all right to breed them for fall pigs and use the same boar on others?

(1) Sunscald from pasturing rank growths of wet rape sometimes causes skin trouble, or it may come from an acute attack of poisoning or indigestion. The case described is unusual and we are unable to give a confident opinion as to the cause. (2) Overfeeding and irritants in the feed most likely caused the abortions and the new sow was not probably to blame. It is a mistake, however, to let a new bought animal at once mix with the home stock. Pregnant sows do not need such rich feeding as you have been giving. Let them have plenty of alfalfa hay and roots, along with a light slop not containing corn or tankage. Make the sows take plenty of exercise. Breed the sows again to same boar.

CHOLERA.

Twelve Duroc Jersey sows were to farrow this month. The first one that I noticed was sick, died April 16th, and though she acted as though she was going to farrow she didn't have any pigs. A veterinarian whom I called said it was cholera. After that another one died. She turned black under the stomach and a big lump formed on the left side. The third one that died was in great pain and quivered all over. The nine that are left are having their pigs, but the pigs don't seem to be nearly grown, although it is time for them. The sows are all so stiff they can hardly move. These hogs have been fed lye since October, also corn and oats. I moved on this place this spring and I understand there was cholera here last fall. However, I cleaned up and disinfected the hog house before I turned my pigs in. After the first one died I shut up the house and lot and before I could get a new one built a cold rain came which probably has something to do with the stiffness. Will these sows do to breed again?

As the veterinarian diagnosed the trouble as cholera, after making a post-mortem examination, we could not presume to give a contrary opinion; but we have no hesitation in stating that it is unnecesary, and wrong to give lye, or any other drug, right along to pregnant sows, nor do any swine require to be drugged right along for months. It is also quite possible that the exposure caused sickness or stiffness. The sows may be bred again when fully recovered.

CHOLERA.

I have about 100 pigs ranging in age from two months down to a day or two. Yesterday the cholera broke out about a mile away and I would like to know if the pigs would take the cholera if I would have the sows vaccinated with serum or serum and virus both. Would it be advisable to vaccinate sows which will farrow in a week or so? Would you advise using just the serum or both in my case? I understand it is not practical to vaccinate young pigs.

The pigs will be liable to die if vaccinated and it would not be wise to use the double vaccination on the sows. Both sows and pigs may be given the single vaccination and both may have the double vaccination when the pigs have grown to fifty pounds weight, or thereabout.

SPAVIN.

Have a black driving mare, weight about 1,100 pounds, and eight years old, that I think has been kicked in the stifle. She has been lame for about a month. When standing she rests the left hind foot on the toe and it pains her to step to one side in the barn. She is worse when starting and when trotting. Have used some liniment and trimmed her toe. Last year she had a spavin on each leg, but I think they are cured.

The spavin is the cause of the symptoms described and you should have it and the entire hock joint fired and blistered by a veterinarian and then tie the mare up short in a stall for a six weeks' rest.

COL. T. C. CALLAHAN DEAD.

It is with sincere regret that we announce the death of Col. T. C. Callahan, at Omaha, Neb., on Saturday, June 28th. Mr. Callahan was one of the best known and best liked live stock auctioneers, and for the past twenty years was one of the most successful salesmen in the middle West. He had not been feeling very well for a couple of weeks, but he had a real estate sale at Creighton, Neb., on Friday, the day before his death, and was returning from there when he was overcome with heat prostration on the train. His son went to the depot to meet him and was surprised to find the trainmen taking him off the train in an unconscious condition. He was removed to the Nicholas Sen Hospital at once and died at 11:20 that night without recovering consciousness. Colonel Callahan was fifty-nine years of age and was born at Kenosha, Wis. For a great many years he lived at Friend, Neb., and was engaged in the hardware and lumber business. He represented Saline county in the legislature one term and held other important places of trust. About twenty or twenty-five years ago he began selling pedigreed live stock and became one of the most successful salesmen in the West. He was well liked by the entire breeding fraternity, absolutely reliable and trustworthy in all his dealings and had a host of friends throughout the central West who will mourn his departure. He was buried at his old home in Friend, Neb., on July 1st. He leaves a widow and two children, who reside at Omaha, Neb.

Using steel fence posts may not be the cheapest way of grounding wire fences, but it is cheaper than trusting to luck and memory in keeping insurance policies in force. With cattle and horses at their present price the loss of a single animal is more than the cost of a load of posts.

Don't Have a Blind One

"VISIO"

A Remedy for MOON BLINDNESS

(Ophthalmia) Cataract and Conjunctivitis
Rhyme horses all suffer from diseased eyes.

Galloway's Famous Pumping Engines

Wm. Galloway, Pres.

Get My Special Engine and Pump-Jack Combination Offer—NOW! Yes, sir. Do it today. Don't wait a minute. Just sit right down and drop me a postal and say, "Galloway, send me your special pumping engine offer." I am out after the pumping engine business and I am going to get it because I am making the best pumping engine outfit ever made and selling it at a price never before equalled. You can't imagine the number of uses you can put one of these little engines to until you see my Special Pumping Engine catalog. It's something new and different and I have a copy waiting for you, free. Just write me for it without fail today. Don't wait until your windmill blows down or the calm hot days get here when the windmill won't run and you have to toil and sweat pumping water by hand for a lot of live stock. No, sir; don't do it. Be prepared. Get my catalog and special offer. That's the first step. Then—

$24.75 And Up

I'll Save You $25 to $300

on the first cost alone. I'll save you $25 to $50 on the best pumping outfit made. On my larger engines I can save you as high as $300 and more. Remember, we make engines in sizes from 1 8-4 h. p. up to 15 h. p. My 1 8-4 h.p., air cooled, little "Boss of the Farm" engine sells for only $24.75—an unheard of price. The same style of engine at your dealers costs from $45 to $65. Now, that's just a sample of what buying direct from Galloway means in money saved. Get my special pumping engine offer right away. Write today.

FREE Service Department. When it comes to help or information for proper installing to get the most profit out of your engine, just call on my Service Department composed of engine experts. Think of it. I not only save you money right at the start but put at your disposal a corps of experts who will tell you how to install your engine, size pulleys to use with different machines, anything, in fact, you may want to know, and this service don't cost you one cent. It's just another advantage you get when you buy of Galloway.

Write Today for My Catalog and Special 1913 Business Proposition

Here's a final clincher. My 1913 Special Business Proposition. I've got a new plan which will help you get your engine partly or entirely without cost to you in the end. No canvassing, no soliciting, no agent's proposition, for we don't sell through agents—but just a straight business offer. Will give full details when you write me. Send for special pumping catalog—offer—and my new bed rock engine prices. Don't lay this paper down and forget it. Write me now. Address me as below:

(Continued from page 8.)

this child inherit from its grandparents the share which would have come to its parent if living, getting an equal share with the other four heirs?

Answer.—The child will inherit from its grandparents an equal share with the other four heirs, getting the same share its parent would have received if living.

CHANGING FENCE AND ROAD.

A Subscriber, Volga City, Iowa.—(1) A lives on the east side of the road and B lives on the west side. B has furnished all the road through the middle of his field for several years. In 1855 B filed a petition and had the road changed over to the east fence which is the line between the farms of A and B and has been the line for ten years or more. Two years ago A moved his fence out to the road. What steps must B take to compel A to move his fence back? (2) In another township A and B each furnished half the road and A set his fence out on the road, claiming the line goes west on B's land. The road has been traveled for over sixty years. What steps should A take to change the road?

Answer.—(1) B will have to bring a suit against A in the circuit court of the county. (2) A should file a petition for a change of the road, in the office of the county auditor, addressed to the board of supervisors. A commissioner will then be appointed to investigate the matter and make a report and a day will be set for hearing before the board of supervisors, when they will decide whether or not such change will be made. A must give a bond to pay expenses of the proceeding in case his petition is denied.

FENCE UNDER BRIDGE—OBSTRUCTING STREAM.

Mr. Thos. O'Boyle, Fort Dodge, Iowa.—A railroad right of way divides two farms. A large creek runs across the right of way, and across both farms. The railroad crosses the creek on a long trestle-work bridge. The railroad foreman says the railroad company is not required to maintain a fence across the creek at the bridge. Stock from adjoining farms cannot get on the railroad track, but can pass under the bridge from one farm to the other. Owners of the two farms have kept up the fence under the bridge. (1) Whose duty is it to keep up this fence? (2) The bridge piling or supports are so close together that ice lodges and causes near-by land to be flooded in the spring, taking out some of the fences. What remedy have the farmers?

Answer.—(1) The owners of the land will have to make and keep up the fence under the bridge, as the railroad company is not required by law to do it. (2) The owner of the land that is flooded on account of the close piling of the bridge can recover damages from the railroad company for the injury so caused, and may obtain an injunction restraining the company from so obstructing the flow of water.

TAXES IN TWO STATES.

A Subscriber, Garden City, Minn.—The first of last March I moved from Iowa to Minnesota, taking with me my personal property. This property was assessed to me for taxation in Iowa in February, 1913. In May following, the same property was assessed to me for taxation in Minnesota. Must I pay taxes in both states?

Answer.—We know of no way by which you can avoid paying taxes on your personal property in both states. Taxes in Iowa are assessed to the person who owns property there on January 1st, and in Minnesota to the person who owns it on the first day of May, and there is no provision of law in either state for abatement or refunding the taxes in such a case as you state.

If everyone who owns or cares for dogs would see to it that the animals had plenty of water to drink during the summer months there would be fewer cases of rabies. There are doubtless hundreds of people to whom this simple precaution never occurs, and who just take it for granted that their canine friends can, of course, find water somewhere whenever they are thirsty. This applies to other animals as well, but dogs are the principal sufferers.

The "Armstrong mower" should be overhauled and sharpened because the battle with the weeds cannot be completely won without its use. Nooks, corners and under fences and some places along the road it is impossible to use a team. This is where the "Armstrong" shines.

Ask your neighbor to subscribe for The Homestead.

THE FLOWER CITY

Built in Three Sizes---20, 30 and 40 H. P.

A good operator and a poor tractor is an unsatisfactory combination. A good tractor and a poor operator does not improve the situation, but a **"FLOUR CITY"** tractor and a good operator is a paying investment.

The **"FLOWER CITY"** has many distinctive features. The bevel gear transmission is worthy of special mention. The gears are made of forty-point carbon steel and are practically indestructible. The complete transmission, together with the drive pinion and belt pulley are mounted on one shaft and are controlled by one lever.

The over-head valve is also a feature of the **"FLOUR CITY."** It is conducive to perfect ignition, combustion and economy, opening direct into a cylinder free from valve pockets; the full energy of the charge is utilized, and the constant necessityof re-grinding the valve is eliminated. These features will appeal to any mechanical mind. Our catalog, giving all details, will be sent on request.

KINNARD-HAINES COMPANY, 857 44th Ave. No., Minneapolis, Minn.

CONCRETE MACHINERY

Did you ever stop to consider that the secret of good, durable concrete is largely due to the mixing; that no matter how careful you may be in getting the proportions correct, if it is not properly mixed it is worthless?

OUR DAIRY DEPARTMENT

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

THE RIGHT START IN DAIRYING.

To the Editor of The Homestead:

There is always a wide margin between the possibilities and the probabilities. It may be figured what it is possible to make in the dairy business, and with the expectation of great profits from the start a large sum of money may be invested in high-priced cows without duly considering the lack of experience, the marketing facilities, the nature of the farm and other matters upon which success must depend. While dairying is profitable under proper management, yet like any other business it requires forethought and business methods. Success cannot come out of haphazard effort.

Jumping into the dairy business is something like "falling in love." Those that jump in a short time are "off again, gone again," and say they are thoroughly convinced that dairying does not pay. A much better way is to grow into the business and to take each step as the way opens.

One may read of the great dairy interests of some localities and marvel at the amount of milk that may be produced in a given time, but when the trouble is taken to investigate the history of the industry, one finds that it was not established in a day. That, in fact, it came about through evolution, through a great interest in the business, a thorough knowledge of the best ways and methods, and a high appreciation of its possibilities.

The great problem in any undertaking is to know, and no matter how great the effort, if it is not wisely directed it is sure to end in failure. In seeking a better understanding of the business, perhaps the first thing to consider is the standing of the individual cow. This can be ascertained by the use of a tester, and no time should be lost in getting rid of the boarders. With the best cows a foundation for the future herd should be laid, and by the judicious selection of a sire, in a few years a herd may be had that any dairyman would be proud of. With this method it is not necessary to make a great investment to start with, besides, other things considered, it is the wisest course to pursue. By growing up with the business and learning its details as the business expands, keeping a grasp on the situation, laying plans for the future and having the perseverance to carry them out, success is sure to crown one's efforts.

W. H. Underwood.

KAFFIR WON AS ENSILAGE.

Kaffir ensilage, fed in connection with cottonseed meal, returned the largest profit in the calf-feeding experiment just finished by the Kansas Agricultural College. Next in point of profit was the sweet sorghum silage and cottonseed meal. The results of the feeding experiment were described in the college live stock pavilion to several hundred cattle feeders and members of live stock exchanges in Kansas City, St. Joseph, Omaha and Chicago. It is the largest experiment previously conducted in this country in the winter maintenance of steers.

Five lots of high-grade Hereford calves, ten to the lot, were fed one hundred days, ending May 2d on the following rations:

Lot 1.—Corn ensilage according to appetite. One pound of cottonseed meal to the calf daily.

Lot 2.—Kaffir ensilage according to appetite. One pound of cottonseed meal.

Lot 3.—Sorghum ensilage according to appetite. One pound of cottonseed meal.

Lot 4.—Corn ensilage according to appetite. Alfalfa hay according to appetite.

Lot 5.—Alfalfa hay according to appetite. Corn stover acording to appetite and ration of 1.89 pounds of shelled corn daily.

The cost of feeding, including labor, was: Lot 1, $55.05; lot 2, $54.96; lot 3, $54.94; lot 4, $57.45; lot 5, $9.56.

The profit by the lot was as follows: Lot 1, $47.05; lot 2, $60.46; lot 3, $51.03; lot 4, $48.04; lot 5, $49.34. The calves are a year old.

An important showing in the demonstration is that kaffir corn and sweet sorghum silage can be fed to beef cattle as a winter maintenance

DE LAVAL CREAM SEPARATORS

Save Much Time and Labor in Summer

BESIDES greatly increasing the quantity and improving the quality of cream and butter DE LAVAL cream separators save much valuable time and labor.

This great saving of time and labor counts for more in summer than at any other season and often alone saves the cost of a separator, aside from all its other advantages.

As compared with any kind of gravity setting the saving of man's time and labor and usually woman's drudgery with a DE LAVAL is a big item in its favor.

As compared with other separators the DE LAVAL saves much time and labor by its greater capacity, easier running, easier handling, easier cleaning and freedom from need of adjustment or repair.

These are merely some of the advantages which make a DE LAVAL cream separator the best of all summer farm investments, as every DE LAVAL agent will be glad to explain and demonstrate to anyone at all interested.

See the nearest DE LAVAL agent **at once** or if you do not know him write us direct for any desired information.

HOLSTEIN CATTLE.

Pure-bred Registered

HOLSTEIN CATTLE

At the St. Louis Fair in 1904 great satisfaction was felt by the advocates of a popular dairy breed in the 120 day records made by their cows, the best one being 280 lbs. fat.

From their point of view this is still a phenomenal record, though rather small when compared with a recent official Holstein record, namely—393.487 lbs. fat from 11,326.7 lbs. of milk in 120 days. Other things being equal, great producers are economical producers and in no other breed will you find so large a proportion of big-yield cows as among Holsteins.

ration with practically the same results as that obtained with Indian corn. That means, according to authorities at the agricultural college, that in the short-grass country and other localities where Indian corn does not produce well, the sorghums can be utilized as ensilage.

The results given do not finish the experiment. The fifty calves are tagged so a complete report will be possible next fall showing how the animals passed through the summer.

SILAGE RATION FOR BEEF PRODUCTION.

To the Editor of The Homestead:

Few facts in agriculture have been more clearly and conclusively established than that the silo is a necessity to the stock farmer. When we consider the varied conditions under which these experiments have been made it is surprising to find the results so similar and all pointing to the one conclusion. The following notes are taken from bulletins and are arranged in a condensed form to save time and space:

Nebraska station in Bulletin No. 163, comparing corn silage with corn stover as a fattening ration for steers found the steers fed silage made 20 per cent larger gains than those fed stover.

The silage-fed stock required one-third less grain than the fodder-fed steers and produced beef more economically.

Missouri station found in a steer-feeding experiment, where corn silage was compared with hay; they could make a saving of $1.07 on 100 pounds of beef by using ensilage.

Pennsylanvia station found good results in feeding steers silage and realized a value of $6.20 a ton when used in this way. They also found silage superior to hay and much more economic in the raising of young stock.

Ontario Experiment Station found they could save $63 on every $200 invested in feed if they used corn silage in preference to hay in feeding.

Kansas Experiment Station not only produced beef cheaper with silage in the ration, but also the silage-fed steers sold at a higher price on the market than did the dry fodder steers. They found corn silage when put in the silo would keep for five and six years and retain its feeding value.

Kansas station also found in a recent experiment that kaffir corn silage gave $11.12 more profit per steer than a good ration of alfalfa hay, corn fodder and grain.

In another bulletin they have demonstrated that corn silage, cane silage and kaffir silage are quite similar in both feeding value and profit when fed to dairy cows or steers.

South Carolina Experiment Station found corn silage produced beef from 15 to 20 per cent cheaper than other foods tested and gave an earning of $6.86 per ton for silage fed to fattening steers; also that silage-fed cattle shrunk less in shipping to market than those fed on other rations.

Illinois station found silage worth 31 per cent more than corn fodder when all costs of producing the feeds were considered.

In one of the Indiana station bulletins they have found corn silage to be worth from $5.50 to $6.50 per ton when fed to fattening steers and sheep.

Massachusetts station found in a test, where corn silage was compared with hay for feeding steers, the silage more economic as a ration.

The experiment station of Indiana has for many years been conducting experiments along the line of economic meat and milk production. Practically all of their tests have demonstrated beyond the question of a doubt the economy of corn silage as a ration for domestic animals. In Bulletin No. 116, which gives the results of a steer-feeding experiment, we find the following conclusions:

The addition of corn silage once daily to a ration of shelled corn, cottonseed meal and clover hay, reduced the cost $1.83 for each 100 pounds of gain and increased the total profit $8.85 per steer.

The addition of corn silage twice daily to a ration of shelled corn, cottonseed meal and clover hay, reduced the cost $3.17 for each 100 pounds of gain and increased total profits $11.19 per steer.

The substitution of corn silage for clover hay in a ration of shelled corn, cottonseed meal and clover hay reduced the cost $4.35 for each 100 pounds of gain and increased the profits $17.97 per steer.

The more nearly corn silage replaced the clover hay in the ration, the cheaper was the gain and the greater the profit.

Corn silage produced a very rapid finish on the cattle.

The silage used in this trial contained an unusually high per cent of dry matter, and was, judging from previous experience, more efficient for fattening cattle than silage containing a higher per cent of moisture.

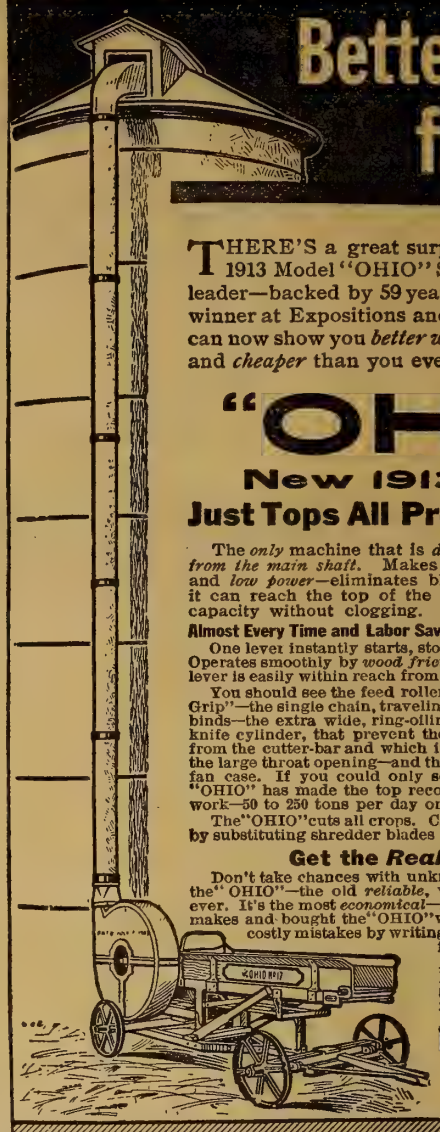
A ration of shelled corn, cottonseed meal, oat straw and corn silage (twice daily) proved to be as efficient for fattening cattle as a ration of shelled corn, cottonseed meal, clover hay and corn silage (twice daily).

The Iowa Experiment Station in Circular No. 6 gives a large number of results in feeding experiment, where corn silage was compared with hay; they could make a saving of $1.07 on 100 pounds of beef by using ensilage.

(Continued on page 13.)

First-prize and champion Hampshire winners at Missouri and Iowa State Fairs in 1912. Bred by Isom J. Martin, Lancaster, Mo., and sired by Gen. Tipton 1677.

Better Than Ever for 1913



THERE'S a great surprise for you in the new 1913 Model "OHIO" Silo Filler. The famous leader—backed by 59 years of progress—the prize winner at Expositions and Experiment Stations—can now show you *better work*—more of it—*quicker* and *cheaper* than you ever thought possible.

"OHIO"
New 1913 Model
Just Tops All Previous Records

The *only* machine that is *driven, cuts and elevates direct from the main shaft.* Makes *bigger capacity* on *low speed* and *low power*—eliminates blow-ups and explosions, yet it can reach the top of the *highest* silos with enormous capacity without clogging.

Almost Every Time and Labor Saving Feature Has Been Improved

One lever instantly starts, stops or reverses the feed rollers. Operates smoothly by *wood friction* under *finger pressure*—the lever is easily within reach from almost any side of the machine.

You should see the feed rollers with their famous "Bull-Dog Grip"—the single chain, traveling feed table that never twists or binds—the extra wide, ring-oiling bearings at each end of the knife cylinder, that prevent the knives from springing away from the cutter-bar and which insure fine ¾ or ½-inch silage—the large throat opening—and the 10-inch pipe and huge blower fan case. If you could only see them you'd realize why the "OHIO" has made the top records for *quality* and *quantity* of work—50 to 250 tons per day on 6 to 15 horse-power.

The "OHIO" cuts all crops. Can be converted into a shredder by substituting shredder blades for knives. Five popular sizes.

Get the *Real* Facts *First*

Don't take chances with unknown makes when you can get the "OHIO"—the old *reliable*, with *better* improvements than ever. It's the most *economical*—many men have discarded other makes and bought the "OHIO" when they saw its work. Avoid costly mistakes by writing today for the big money-saving facts on the new 1913 "OHIO."

Ask for catalog and "Silo Filler Logic"—mailed free. "Modern Silage Methods"—264 pages—mailed for 10c coin or stamps.

DIPHTHERITIC ROUP.

To the Editor of The Homestead:

One of our Missouri subscribers sends the following communication:

I raise Buff Orpington chickens and they are sick. Their eyes become watery and foam forms in the corner of the eyes. The nose becomes stopped up and a cake of cheesy-looking sores forms in the throat, going into the windpipe, then sores form around the outside of the latter. When I pull off the scab it leaves a raw sore. The chickens in the meantime gasp for breath. I bought a new rooster and in about two weeks he took the disease and died. This was the first of the trouble. Our chickens have fine range and running water together with good feed and care. Do you think the young chickens will take the disease? Will this trouble keep the eggs from hatching?

This description gives a very good pen picture of diphtheritic roup. The membrane is apparently a part with the mucous membrane of the throat. To remove this a bit of absorbent cotton may be twisted about the end of a small stick, moistened with creolin and held for a short time against the membrane, being careful that none drops into the windpipe. For internal treatment give one one-hundredth of a grain tablet biniodide of mercury four times daily until the membrane begins to disappear, then gradually reduce the dose to one tablet daily and continue for a week.

Give fowls soft, nourishing food. A good tonic through convalescence is five-drop doses of compound sirup of hypophosphites made into a pill with bread crumbs to be given three times a day.

Diphtheritic roup is a contagious germ disease and was, no doubt, brought to this flock by the new cockerel. He may have come from a roupy flock or he may have contracted the disease in transit. Fowls from away should be isolated for two or three weeks after their arrival. Our correspondent has asked for treatment and we have given as good as there is. However, unless it is a very valuable bird it is far better to destroy badly affected birds and take vigorous measures to save the others.

Hens do not lay after they get really sick, but if they are constitutionally weak the eggs might hatch but the offspring would be weak. The little chicks will hardly contract the disease now—later they will be predisposed to the trouble. Also a chicken once afflicted is a good subject for future attacks.

SILAGE RATION FOR BEEF PRODUCTION.

(Continued from page 12.)

sults in feeding domestic animals corn silage. In practically all of these tests, the economy of silage as a ration was well demonstrated and established. Some of the conclusions in these feeding tests may be here repeated:

Corn silage should be put into the feeding program of every Iowa beef producer if he wants to fatten cattle economically and efficiently. That corn silage is our most profitable cattle roughage has been clearly demonstrated at the experiment station as well as upon hundreds of Iowa farms.

The addition of corn silage to the ration not only decreases very materially the cost of gains, but usually makes them more rapidly. The steers are finished more quickly and ordinarily sell for a higher price than where clover is used as the roughage.

Fattening cattle of all ages utilize silage as their roughage ration. It is as good for the calf and yearling as for the two and three year old. All profit from its use.

Silage is practically one-third to two-fifths as valuable as clover hay for beef production. Silage at $3.20 a ton and clover hay at $7.66 a ton were equally efficient in fattening two-year-old steers in 1911-12 in our station tests. Ordinarily when clover is selling from $10 to $15 per ton silage is worth from $3.50 to $6.

That the corn grain which is put into the silo is not wasted our feeding records clearly show. Cattle receiving silage do not eat as much grain as hay-fed cattle, the decrease being approximately equal to the amount of corn found in the silage.

For a short feed, silage is preeminently our most abundant and efficient roughage. The gains are not only more rapid than where clover or alfalfa is fed, but are made more cheaply. Furthermore, the selling price is markedly enhanced. Actual experiment has shown that as compared to clover in a ninety-day feed, silage cattle, rightly fed, will sell from ten to seventy-five cents higher per hundredweight.

For a long feed silage is quite efficient, producing as compared to clover, both cheaper gains and higher quality of finish.

North Carolina in Bulletin No. 222 gives the following summary after a carefully conducted feeding test:

Beef cattle fed on corn silage as the roughage portion of the feed in conjunction with cottonseed meal will not only use the meal more economically during a continuous feeding period, but they will finish in better condition and command a higher price than cattle fed on dry roughages.

In all of the lots where corn silage was fed as a whole or part of the roughage, the daily gains were more uniform throughout the feeding period than the gains made by the lot-fed cottonseed hulls. The least average daily gain made during the last month by any of the cattle fed silage was .64 of a pound against .01 of a pound for the lot-fed cottonseed hulls.

South Dakata Experiment Station in Bulletin No. 137 gives the following results in a steer feeding test where silage was used:

In comparing silage with similar corn cut and shocked the silage gave better returns both in economic production and quality of production. It was found that no bad results were obtained by feeding large quantities of corn silage to steers. At the end of the experiment some of the animals were consuming seventy pounds per day.

For fattening steers hay with silage proved to be better than hay or silage alone as a roughage. In each case where silage or roots were fed with shelled corn and wild hay there was a larger gain than with the lot that did not receive these succulent foods.

There are many other station reports which show the advantage of corn silage is an economic feed for beef making, but space and time prevent their recording here.

The large movement throughout the whole country speaks perhaps in stronger terms than anything else of the value of the silo as an economic farm equipment.

The conservation of the corn plant is perhaps the most important item of farm economics that has come before the people of recent years. By the proper use of the silo we will not only be able to save hundreds of dollars worth of stock food, but we will also produce all stock products more cheaply. It will place the American farmer in a position where he can compete with the cheap labor of foreign lands, and we will be able to market our beef and butter in all the great meat-eating nations of the world.

A. L. Haecker.

The Mississippi Valley Compress Association has adopted resolutions fixing the uniform size of compressed cotton bales at twenty-seven inches in width and fifty-four inches in length and the weight approximately five hundred pounds. Requirements that the actual condition of both the cotton and wrapping be described in receipts and bills of lading were also approved.

WITH THE EDITOR.

With the coming of the busy season on the farm there is a tendency to overwork the family, frequently the children are taken out of school before the term closes and from early in the morning until late at night their hands are kept busy over tasks that are uninteresting if not actually arduous. This is the sort of thing which breeds dislike for the farm in the mind of the growing boy and girl.

Where it is necessary to take the children out of school—a thing to be avoided where it is at all possible—or to utilize their services in field or orchard during the holidays an effort should always be made to give the young helpers a feeling that they are partners in the work of the farm. If children are paid even a trifle for hoeing or weeding or picking fruit or any of the dozen tasks which fall to their lot they will usually do the work more or less cheerfully and there will be none of the sulkiness and bitterness which are frequently encountered where a different course is pursued.

Another plan is to agree with the children that certain privileges will be theirs, certain "treats" be enjoyed if the work assigned is faithfully performed. The promise of little picnics, a birthday party, a trip to some nearby place of interest, all stimulate young workers and if circumstances permit of telling them that the money saved by their labor will be invested in some coveted thing, either for themselves or for the home, a new zest is given to the daily tasks.

Hard work alone will not disgust young people with farm life. When boys slip away to the city content to try their luck at untrained labor, when girls chafe and wait their time to leave the farm home, it is because parents have not dealt intelligently and fairly by them. Let parents take their children into fellowship and they will be willing co-workers, even when the conditions are uninviting.

HOME AND HOMEMAKING.

LITTLE HELPS BY THE WAY.

What constitutes a state?
Not high-raised battlement, or labored mound,
Thick wall or moated gate;
Not cities fair, with spires and turrets crowned;
But men, high-minded men,
Men who their duties know,
But know their rights and knowing, dare maintain;
Prevent the long-aimed blow
And crush the tyrant, while they rend the chain. —Alcaeus.

OUR PRESIDENTS.

First on the list, the peerless one,
The great and good George Washington.
Then Adams from the old Bay state,
Steady and stanch, a man of weight.
Next Jefferson, with ready pen,
Statesman and southern gentleman.
Then the two James's, as we all know,
James Madison and James Monroe.
Now comes John Adams with the Q,
Then Jackson, soldier and fighter, too;
Martin Van Buren; then Harrison,
Who at Tippecanoe the victory won.
John Tyler came next, then James K. Polk
And Zachary Taylor, both southern folk.
Millard Fillmore, Franklin Pierce
And James Buchanan follows next,
Then Abraham Lincoln, martyred saint,
A country mourned o'er his sad fate.
Johnson succeeded to his place,
And filled it with but meager grace.
And then the nation's hero came,
Ulysses Grant, of warlike fame.
Next on the list is Rutherford Hayes.
Foul murder shortened Garfield's days,
And Chester Arthur filled his chair
With honor, and with "savoir faire,"
Then Grover Cleveland followed him;
And after, Benjamin Harrison;
Cleveland then served his second term.
McKinley, killed by an assassin's hand,
A wave of grief swept o'er the land.
Then in that time of doubt and dread
Came Theodore Roosevelt to the head;
Bravely and well he played his part,
And conquered our great country's heart. —Emily C. Cobb.
(Written previous to election of Ex-President Taft. Editor's Note).

SUMMER DRINKS.

Koumiss.—Put into a bowl one-half cup of milk, heated lukewarm, two teaspoonfuls of granulated sugar and one-third of a yeast cake. Stir until the yeast cake is dissolved. Pour this mixture into a bottle with a patent air-tight stopper, first scalding the bottle well. Pour in fresh milk until the bottle is two-thirds full, fasten down the stopper and shake hard until the contents are well mixed. Set in a warm room for six hours, or until the contents are a mass of foam, then set on the ice until wanted. Koumiss should taste like effervescent buttermilk.

Homemade Cream Cheese.—Take two quarts of thick clabber milk and pour into it a quart of boiling water. Let it stand ten minutes or longer, then put into a cheese cloth bag and drain over night. The next morning rub this cheese to a smooth pulp, salt to taste, add gradually one-half tablespoonful butter and one tablespoonful of thick cream, pack into small jars or cups and stand away in a cool place for two weeks. At the end of that time scrape off the top and turn from the cups for use.

AMONG OURSELVES.

School is out these days, and you have most likely got more than enough of daily child troubles already, and wish there were summer schools in the country as there are in the city. You must needs be teacher as well as parent through the summer months. How are you working out your problem? Does it not make you feel kindlier towards the troubles of the teacher?

The life of a teacher is by no means easy, or full of pleasure. When the majority of girls go out into the world to earn money for themselves their troubles begin. They have never had the opportunity to meet with or been rubbed against life's hard propositions and when they are brought face to face with real life they look for a hiding place. On Monday morning when the teacher faces her pupils, mischief and fun sparkle in their eyes. The first thing they try is to weigh the teacher. If she weighs heavy all will be well, but if she is wanting, prepare for trouble. A great deal depends upon the personality of the teacher. She may be well educated, but lack the governing ability; or, as the case may be, the governing power may be there, but much hard work must be done upon the coming work in order to have the lessons well prepared. In most schools too much is expected of a teacher. She is expected to answer any question that may be asked, be a perfect character in society and keep a model school. In the latter she is apt to fail. "As a child does at home she or he will do in school," and sometimes she finds herself trying to do someone's work. Can she be expected to make all pupils submit to her will? Not much, and when the pupils are stubborn and will not obey, then the patrons say, "She's no good, can't make the youngsters mind." Is she doing her work or the work the parents should have done? When a child is master of the home he will try to rule the school, and when the teacher steps in to do her duty, then the house is not large enough for two masters; the stronger will oppress the weaker and one proving to be the stronger is victor. I do not mean to say that all people can make a success of teaching under the best circumstances, for without the ability or genius they are not apt to succeed. Quite often troubles will arise from the tales children tell out of school. The parents will believe their child's story instead of going to the teacher for the straight of it, for a child will always tell the story in his own favor. I think one grave mistake we teachers make is punishing for slight offenses. Punish when necessary and do it right. Very often a joke will settle matters better and quicker than an hour of scolding and preaching. If you have to scold or rebuke a boy or girl, ask them to remain after school hours, then talk to them pleasantly about the subject and they will go home without planning a scheme to even up things.

Very well put. It is essential to realize that the boy at home and the boy in the school are one and the same boy, and the parent who with flashing eye and set teeth states with precision, "I have never caught Johnny in a lie" should wake up to the fact that very likely "Johnny" is "pulling the wool" over the dear parental eyes.

From the library corner comes a voice saying:

I have lately read three good books by Harold Bell Wright—"The Shepherd of the Hills," "The Calling of Dan Matthews," and "That Printer of Udell's." These all deal with the subject of religion in its relation to everyday life, and there is much in each one to interest a thoughtful reader, beside the interest of the excellent stories. Another book, "The Shuttle," by Frances Hodgson Burnett, is especially good. The story deals with international marriages, and the leading character, Bettina, is a girl of marvelous perfection. Her unusually good judgment and self control are only a part of her well-rounded characteristics. This is by far the best book Mrs. Burnett has ever written, even though we appreciate the merit of all her writings.

Are you cultivating a sweet home spirit similar to what this mother writes to us about? There may be long years of seed sowing and harrowing and fallow times, but such a crop

of family kindness bounteously fills the garner:

The best way to be happy is to be kind and good to each other, more especially members of the same household. I was left a widow a little over a year ago with a 160-acre farm on my hands and only two boys, seventeen and nineteen, to help me with the work. My two girls, twelve and fourteen, help me with the house work, but, of course, when they have to walk two miles to and from school they have very little time to work except in vacation, but by being good and kind to each other we are getting along fine. I have one older girl who is married and living in the state of Washington, and four older boys scattered over the world. They are all thoughtful about writing home to mother and I answer their letters promptly. Mothers can't expect to hear from their absent children unless they answer their letters as soon as received. My oldest boy here on the farm has a pony which he rides and drives whenever he wishes and if I wish to go to town or anywhere he is always ready to harness Bonner to the buggy for my use and as I enjoy driving, have taken both comfort and health from this lovely weather.

Mrs. Ellen Steven is a fortunate mother. Won't you let us hear from you again? Tell us how you live with your lads and lassies.

Quality and service are much used words these days. And here are suggestions to help you give your mealtime problems a quality service:

The art of cooking is a bugbear to a great many housekeepers, especially to those of little experience. It should,

Picking a Present for Mother

In the millions of orders we fill every year none give us greater joy than the supplying of gifts for some loved one at home. Grocery orders, furniture orders, clothing orders, implement orders—all, of course, have our greatest care and attention.

But, when a letter is received saying: "This purchase is a gift for Mother—a remembrance on her birthday or wedding anniversary" it goes through our great fifty acre establishment with a sense of loving responsibility that permeates every man or woman who handles it.

And we receive thousands of such orders.

This announcement will be read by hundreds of thousands of our customers who use the Montgomery Ward & Co.'s Catalogue constantly for the supplying of their many needs.

To them we say, when you are ordering a gift for father, mother, son, daughter or friend, don't fail to mention the fact when writing.

To those who are not *now* our customers, we ask the privilege of sending our wonderful new Catalogue, which shows in truthful text and picture thousands of items at small cost that can be used for gifts.

And then, in addition, it shows over a hundred thousand other items—groceries, clothing, shoes, hardware, furniture, farm implements, everything from a paper of pins to an automobile which can be purchased through this great modern method of merchandising at a lower cost with higher quality than you can secure elsewhere.

The book weighs several pounds. It contains 1000 pages—every one of them a wonderful store window of surprising bargains. It is sent absolutely free on request—without any obligation to you. *Your* copy is waiting. All you need do is to ask for it. Write today. Now.

300 Main St. Cedar Falls, Iowa

of course, take much thought, but by good management not such a great deal of time. Meat and vegetables simply cooked, with crisp green things or fresh fruit are far more wholesome for John and the children than the fussy things that do so try the patience of the busy housewife. Have you ever tried saving all small pieces of meat, bread, potatoes, grinding and chopping them, binding them together with an egg or two, seasoning them to taste and frying in little cakes? You will have a pleasing supper dish. Again, for variety, try this: Thicken a cupful of tomatoes with flour and pour over the cakes, or add a bit of chopped onion or make a mound of mashed potatoes and arrange the cakes around it. One's appetite will sometimes fail us, especially as summer advances. Try this some night: Toast slices of bread a nice golden brown and butter slightly. Take some bits of finely chopped dried beef and put in the pan with enough water to cover; let come to a boil and drain; add one-half pint of milk in which you have stirred smooth one level tablespoonful of flour and let come to a boil; season, and pour over the slices of toast. Serve this very hot and you'll all be delighted. And again: Pick apart any cold cooked fish to make a pint; rub together a rounding tablespoonful of butter and same amount of flour. Add half a pint of milk, stirring constantly until it thickens. Take from the fire and add the fish, a level teaspoon of salt and a little pepper. Stir gently and stand over hot water until it is thoroughly heated. Serve on toast.

THE YOUNG FOLKS

For the best letter received each week we offer twenty-five cents; second best, a silver badge; third best, a pansy badge. Send letters to Aunt Mary, Hawley, Minn.

THE STORY OF A MAGPIE.

(First prize.)

One of my uncles, when a small boy, was riding along a country road with my grandfather. On this road lived a man whom grandfather knew and he stopped for a chat. This man owned a magpie, and it was sitting on a gate near by, and it would say, "Howdy-do." Uncle wanted to go near it, and he would go up quite close to it, then it would say, "Come a little closer, Tommy," and "shake hands." As uncle would reach out his hand, it would pick it and say, "Ha, Ha!" as if it were laughing. Uncle was a little afraid, but tried to be quite brave, and every time it would do the same. This magpie, when a neighbor had a sale, called out bids, and would call out to the teams to "back up," "whoa," "gee," "haw," etc., until it was raising quite a disturbance, and the men went to hunt it, but could not locate it at first. It was up in a large tree. This magpie came to my grandfather's house when my grandmother was sick, and would fly in her bedroom and perch upon her bed. She would feed it bread crumbs and it came back several times. It got so it would not stay at home, and one day it went away and never returned.

—Cecil, age 8.

A Bird Club.

(Second prize.)

I am a lover of birds. The only birds my father kills are hawks, crows and sometimes blackbirds. At our school we have formed a "bird club." It is called "The Liberty Bell Bird Club." Twenty of the scholars signed the pledge. Each of us received a pin also. The birds we are allowed to kill are English sparrows and chicken hawks. This spring I found a little robin sitting on a rose bush almost dead. I took it in the house and gave it some water and tried to feed it, but it would not eat. I looked for a nest, but could not find any. I then put it in a box and set it outdoors so it could fly away if it wanted to. In the afternoon I went away and when I came back the bird was gone and I have not seen it since.

—Sadie Mitchell.

Changed His Name.

(Third prize.)

One afternoon not long ago my grandmother had callers. My little brother was playing with his cat near by.

Later on in the afternoon one of the ladies asked my little brother what his cat's name was. His quick reply was: "It used to be Tom, but I changed it to Nellie so she would have some kittens."

—Alfa Morgan.

In A Hurry.

One day last spring my father was up town. He met one of his old friends on the street, running pretty fast and quite out of breath. In his hand he carried a sack.

Stopping him he asked, "Why are you in such a hurry?" "Oh," he says, "I bought my wife a hat today and am hurrying home before it gets out of style."

—Edith.

A Picnic Club.

This summer the girls in this neighborhood formed a club called "The Picnic Club." We have it every Wednesday afternoon at the girl's home who wants it. Each of us is to take something to eat. Just before we start home we have a lunch. Each of the girls is going to put in some money to get a treat for the last day.
